Mercantile Summary

THE Ottawa Citizen has just finished the erection of a fine six-story fireproof building, and has installed a new three-deck Hoe press with a capacity of 24,000 papers per hour.

MESSRS. H. L. Wilson, of Winnipeg, and G. Silvester, of Elkhorn, Man., are about to build in the former city a large modern office block, five stories high, at a cost of $60,000.

THE Intercolonial Railway has begun construction work on a new car repair shop at Sydney, C.B. It is to be 175 feet long by 45 feet wide, and is expected to be completed next August.

THE Canadian Pacific Railway has awarded contracts to United States companies for five steam shovels at a total cost of about $100,000. Tenders are being received for a $130,000 freight shed and a $150,000 subway at Winnipeg.

A COMPANY has been formed in Montreal, with a capital of $125,000, under the name of Fisk, Limited, to continue the business of leather manufacturers and merchants and dealers in boot and shoe findings, at present conducted by H. J. Fisk & Co.

THE Canadian Bullock Electric Manufacturing Company, Limited, of Ottawa, has been authorized by the Dominion Government to change its name to "Allis-Chalmers-Bullock," Limited, and to increase its capital stock to $1,200,000.

THE Ottawa River Railway Company, which proposes to build an electric railway from Montreal ultimately to Georgian Bay, is said to have had some $8,000,000 worth of its bonds underwritten, and to have let already contracts for the Montreal-Ottawa section. Power will be obtained from the Ottawa river, but the motive power will also be steam.

THE Dominion Government is reported now to have completed arrangements for the taking over of the Canada Eastern Railway, formerly known as the Northern and Western Railroad of New Brunswick, the price paid being $800,000. The line runs from near Fredericton in a north-easterly direction for 136 miles, when it connects with the Intercolonial. The total gross earnings last year were $116,536, while the operating expenses were $113,861. It is to be run as a feeder to the Intercolonial.

J. DUPAUL, dealing in carriages, agricultural implements, etc., at Valcourt, Shefford county, Que., whose failure occurred several weeks ago, has arranged to pay 60 per cent. on liabilities of $16,500,—D. Belair, tinsmith, at Grenville, Que., has effected a settlement at 25 cents on liabilities of about $1,200.—U. Phœnix, general dealer, Windsor Mills, Que., reported as insolvent in a recent issue, is offering his creditors 33 1-3 cents, cash.—The estate of J. Samson, general store, Ville Marie, Que., is to be closed out. He owes $7,500, with apparent assets of about $6,000.

FROM Morrisburg we learn of the embarrassment of J. T. Barry, dealing in clothing, men's furnishings, etc. He has made a proposition to pay 50 cents on liabilities of about $2,500. Under the style of Barry & Sons the business in former years was one of the most prominent in the town.

NOT only in Ontario, but in British Columbia, has the past winter been severe on railroads. Snow and mud-slides and washouts have been frequent, and on the 5th inst. there was a terrific snow-slide on the Kaslo and Slocan line near McGuigan Station, which took away bridge and trestle and deposited, it is estimated, a million tons of rock and mud on the track.

THE Temiskaming and Northern Ontario Railway Commission has decided to call for tenders, receivable up to 27th inst., for the construction of the line from New Liskeard to the proposed route of the Grand Trunk Pacific, a distance, roughly speaking, of 100 miles. The road is now graded for nearly a hundred miles north of North Bay, and steel has been laid for about sixty miles.

Mercantile Summary.

PETERBOROUGH ratepayers have rejected a by-law in favor of aiding the Peterborough Sugar Company by guaranteeing its bonds to the extent of $100,000 for ten years, but have passed one authorizing the town to borrow $50,000 to build a new collegiate institute.

A COMPANY has been formed under the name of the Montreal Star Publishing Company, Limited, with a capital stock of $750,000, to acquire and continue the business carried on in Montreal by Hugh Graham as publisher, together with subscription lists, real estate, etc., and to manufacture and sell pulp and paper.

AT a recent meeting of shareholders of the Alexandria Wood Export Company, Limited, of Alexandria, Ont., it was resolved to put the concern into liquidation, the business not having shown satisfactory results. The company was organized four years ago, under an Ontario charter, with an authorized capital of $20,000, the principal shareholders being parties prominently interested in the manufacture of cheese box material, and other similar supplies.

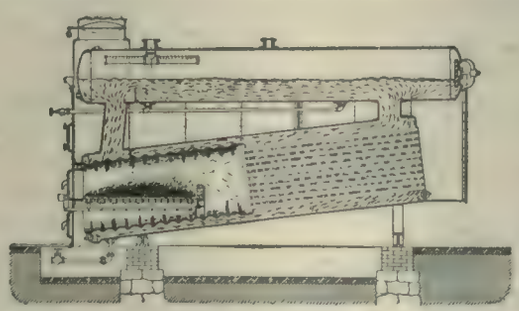
A DESPATCH from Glace Bay, Cape Breton, says that the vein of coal at Dominion No. 5, the new mine, has at length been definitely located. It was found nine feet from the surface. The works will now be located and hurried to completion. The water is now all out of Dominion No. 1 colliery. It is just a little over a year since No. 1 was flooded. The mine has not been injured, and is expected to be producing as much coal as formerly inside of a few weeks. Arrangements are being made with the Government and the Dominion Coal Company to have the S. and L. Railway extended from Morief Junction into the village.

NO HEAT WASTED.



The Robb-Mumford Boiler is internally fired and no heat is wasted by radiation as in an externally fired boiler.

The furnace is long and of large diameter with greatest height at the back, giving good combustion.

The boiler is built with sheet steel case, ready for use when it leaves our works, or for bricksetting if preferred.

CHURCH & Company's beading mill, hoop mill and dry kiln, at Sand Point, near Arnprior, Ont., have been burned down at a loss of about $25,000, partially covered by insurance.

THE Montreal & South Shore Autocar Company has begun the running of a regular automobile service between Montreal, Point St. Charles, and St. Lambert.

MR. J. P. MCGOLDRICK, of Minnesota, has bought a site on the lake port at Nelson, B.C., and will erect a two-side band saw-mill, capable of cutting 100,000 feet of lumber in twelve hours. About $250,000 is to be spent. A company is being formed, with a capital of $300,000, to carry on the work.

FOR a good many years Joseph Bussiere has been in the grocery trade at Quebec. He has made a voluntary assignment, and is said to owe $8,700. In 1899, we are told, he compromised at 25 cents, and again in 1902 he became involved, assigning, and eventually settling at 25 cents; so no sympathy need be wasted on him.—W. G. Berrigan, cigar dealer, of the same city, who has been trying to compromise at 25 cents in the dollar, has been asked to assign.

THE Imperial Coal and Coke Company, Limited, of Montreal, has elected the following directors: W. Herbert Evans, of Messrs. Evans Bros., coal merchants; J. W. Pyke, iron and steel merchant; Randolph Macdonald, vice-president Sovereign Bank, Toronto; C. W. Spencer, general superintendent transportation, C.P.R.; Frank Thompson, financial agent; Andrew Laidlaw, Spokane; O. G. Laberee, Spokane. The company's property is within a very short distance of the Crow's Nest Pass line of the C.P.R..

WE hear with regret of the death of a prominent Winnipeg man, Alderman John Russell, who had lived in that city and Brandon for twenty-two years. He went West from Toronto, where he had studied law, in 1882, and practised with D. H. Cooper. In 1887 or thereabout, he and Mr. Cooper were appointed general agents for the Freehold Loan & Savings Company and removed to Winnipeg. After that company was amalgamated with the Canada Permanent and Western Canada Mortgage Corporation, Mr. Russell took up the Winnipeg General Trust Corporation, which was later bought out by the Toronto General Trust. He then organized the Standard Trust Company, a purely local company, of which he has since been manager.

Mercantile Summary.

BRANTFORD council has refused to give the Bell Telephone Company even a two-year renewal of its franchise.

O. CHALIFOUR'S last factory and planing mill at St. Roch's, Que., have been destroyed by fire at a loss of $25,000, with an insurance of $10,000.

THE Canadian Northern Railway Company has awarded the contract for track laying and bridge work on 519 miles of its road, to S. R. H. Robinson, of Winnipeg, and work is to be started at once.

MONTREAL Harbor Commissioners have awarded contracts for steel freight sheds along the water front, to Peter Lyall & Sons, the price being $2,305,000. The $1,000,000 worth of steel needed will be supplied by the Dominion Bridge Company.

THE Kingston and Dominion Central Railway Company is applying to the Dominion Government for power to build a railroad from Kingston, thence northerly to Newboro' and Westport, and westerly to Georgian Bay, between Parry Sound and Midland, with branch lines, tramways, ferries, docks, etc., and with authority to generate electricity for light, heat and motive power.

THE winter business from St. John, N.B., to Great Britain, Antwerp and South Africa, which has just closed, was very successful this year. There were ninety-six sailings, and the various steamers transported Canadian exports to the value of $10,155,813, and foreign exports to the value of $5,722,376, making the total value of shipments $15,875,189. This is an increase of $2,793,711 over the value of goods shipped last season. In addition, four steamers sailed for South Africa with $752,727 worth of goods.

A COMPANY is being organized, we hear, to revive the Atlantic and Lake Superior Railway charters, which were given with the intention of building a line from Gaspe Basin to a port on Georgian Bay, in order to obtain direct connection between the Gulf and the Great Lakes. The promoters of the scheme, of course, ask the Dominion Government to guarantee the bonds of the new company to the extent of $20,000,000, with an additional $7,000,000 for a bridge over the St. Lawrence at Montreal, and the Premier has promised to look into the scheme. The idea is to build from Gaspe Basin to Paspebiac, to buy the Atlantic and Lake Superior from Paspebiac to Metapedia, to build a new line to Riviere du Loup, shortening the distance by the Intercolonial by seventy miles, to use the I.C.R. to Quebec, and the Great Eastern and Sorel to Montreal, where a new bridge is to be built, and from Montreal taking a line to Midland, or to buy out the Canada Atlantic Railway. These are great days for railway promoters. As the Americans say, they are "getting busy," if indeed they are ever anything else.

Mercantile Summary.

THE council of St. Boniface, Man., has awarded contracts for the building of a power-house and for laying mains for a new water works.

THE Hemming Manufacturing Company, Limited, Montreal, capital $45,000, has been incorporated under the Dominion Act for the purpose of buying, selling and manufacturing gold, silver, metal and enamelled jewellery, fancy goods, etc.

T. McAVITY & SONS, of St. John, N.B., have completed large extensions to their machine shops. Their buildings are now practically remodelled, and are fitted with the latest machinery in all patterns. Motive power is supplied by a new fifty horse power tandem Robb-Armstrong engine, obtaining steam from a 60 horse-power Robb-Mumford standard boiler.

DELORIMIER council has made a new arrangement with the Montreal Street Railway. The company obtains a franchise for twenty-five years, and exclusive rights for ten years, without prejudice in the franchise at present held by the Terminal railway. The company is to defray one-half the cost of snow removal, but is exempt from all taxes except the water tax for twenty-five years.

DAME Lena G. Marsh, wife of E. C. Joyal, of Fulford, Que., and doing business under the style of E. C. Joyal & Co., and also as the Dominion Raw Hide Co., is reported to have assigned to the court at Sweetsburg, the judicial centre of the district. Mr. Joyal, who has been engaged in sawmilling and the manufacture of lace leather, etc., in a small way, has not had a successful business record. He suffered from fire in 1901, when he made an offer of 30 cents, which does not appear to have been generally accepted, and his wife's name has since been used.

IT is two or three years, at least, since first we heard of the location on Howe Sound, north of Vancouver, of an enormous mass of copper ore, since named the Britannia Copper Mine. Control of this has lately been secured by the Howe Sound Company, which is arranging to push development work so that shipment of ores to the Crofton smelter may commence soon. A contract has been awarded to Charles Cates, of Vancouver, to build a wharf out from the beach two hundred and fifty feet. At the end of this, there will be an "L" shaped addition, ninety feet long and fifty feet wide, and on this will be erected an immense ore bin capable of containing from 900 to 1,000 tons of rock. A system of electric trams is to be installed for carrying the ore from the mines to the bin. C. W. McMeekin, the engineer of the Howe Sound Company, went to San Francisco in April to arrange to get it installed. So it looks as if the Britannia Copper Mine would be putting out copper ore soon upon a large scale.

HERALD BLOCK, CALGARY, N. W. T. | CORRESPONDENCE SOLICITED.

JOHN FINLAY & SON'S hub factory in Lariviere, Man., was a few days ago totally destroyed by fire at a loss of $5,000, with no insurance.

THE Alberta Coal and Coke Company has sold its coal lands at Cowley, Alta., comprising 6,400 acres, to Emmanuel Restor, of London, Eng., and J. H. Thorburn, of Edinburgh, Scot., the price being reported to be $100,000.

AMIDST the shrieking of whistles, the steamer Huronic entered the harbor on Wednesday, being the first passenger boat of the season to arrive at the head of the lakes. She has a cargo of 1,500 tons.

SKINNER Company's harness and carriage hardware factory at Gananoque, Ont., has been burned down at a loss of $75,000, partly covered by insurance. About a hundred hands are thrown out of employment. The factory is to be rebuilt.

A WOMAN in Levis, Que., Mrs. H. Verrault, who has carried on the harnessmaking of her late husband ever since 1884 has become embarrassed, and has had to assign, the liabilities being placed at $9,000. The business has been a prominent one of its kind, from 30 to 35 hands being employed as a rule.

NAVIGATION from Kingston to Ottawa via the Rideau Canal is impossible at present, owing to the prevalence of ice in several of the chain of lakes that make up the so-called canal. Last year the season opened on May 1st, this year it is not thought likely that it will really get under way before June 1st.

TORONTO STOCK TRANSACTIONS

A slowly improving tendency is certainly visible in the condition of the local market, to a proportionately larger extent than is the case in New York. Not only is the volume of trade less confined, but the tone of the market is better, and prices have an upward movement, which has made itself manifest in some stocks at any rate, by enhanced values. The following summary will show the range of prices: Ontario Bank, 128½-129¼; Merchants, 159¾; Commerce, 154½; Imperial, 218-220; Dominion, 226¾; Hamilton, 209⅞-212; C.P.R., 116⅞-117½; Tor. Elec. Light, 134⅝-137; Can. Gen. Electric, 146¼-148; Bell Tel., 143½-146½; Rich. & Ont. Nav., 86½; Tor. Rail., 102-102¾; Twin City, 94-95⅜; Can. Landed & National, 105-105½; Can. Permanent Loan, 121⅞-122; Sao Paulo, 98-99; N.W. Middlesex Four per Cent. DEBENTURES.

Sealed tenders endorsed "Tenders for Debentures," will be received at the office of the undersigned up to two o'clock p.m. on Monday, June 6th, 1904, for the purchase of $12 000.00 County of Middlesex Consolidated Debt Debentures, bearing interest at Four per cent., payable semi-annually, on the 15th of December and the 15th of June. Principal payable in gold on the 15th of June, 1924.

Each tender must state a lump sum, payable at the Bank of Toronto, in London, Ontario, on the 15th day of June, 1904,—where and when the Debentures will be delivered.

A. M. McEVOY,
Treasurer

CANADIAN EXPORT TRADE.

It is satisfactory to note that under the stimulus of the preferential tariff Canadian manufacturers are coming to the front in Australia, as is evidenced by the number of agents and travellers now showing samples in Melbourne and Adelaide. Mr. D. H. Ross, the Canadian commercial agent, states that he has recently inspected sample collections comprising a wide range of Canadian goods, and that he observes with pleasure that some fair orders are being forwarded to Canada. Importers are disposed to give Canadian goods the preference over foreign goods, everything being equal, which proves the existence of a certain amount of trade sentiment. A Canadian traveller recently arrived from New Zealand states that he had a record trip owing to the preferential tariff enabling his goods to be delivered in that colony, duty paid, at 11 per cent. less than foreign goods of a similar class. Canadian carriages, for the most part built in accordance with distinct Australian specifications, are being extensively introduced into that country. Recently a shipment was landed at Fremantle, W.A., being the first sent direct to that State. Western Australia offers a good field for Canadian vehicle manufacturers to exploit if they can secure good representation. In Adelaide a shipment recently arrived, and as the goods there are in first class

hands, large business in South Australia can be anticipated with confidence. Hitherto the local production, augmented with some special designs built by the United States—and a few Canadian—makers, held the market. The trade is in its infancy, and only requires the careful attention of Canadian manufacturers to secure the bulk of the orders for Australian requirements, says Mr. Ross. The samples of Canadian chenille goods and cotton curtains now being shown in Melbourne are said to be exceptionally attractive. Such goods advertise to the Australian importers, as no other means could, the great advances made by Canadian manufacturers. Knitted goods also are very favorably received. Mr. Ross says there is every probability of a strong demand setting in for hot water and steam radiators and warm air furnaces. Canadian manufacturers of sawmill machinery should distribute their circulars and export price lists amongst the mill proprietors of the Commonwealth.

McGILL UNIVERSITY.

A Montreal letter tells us that it is proposed to frame a new coat of arms for McGill College under the following circumstances. It appears that when McGill College was founded in Montreal, through the generosity of James McGill, the college authorities adopted the coat of arms of the founder for the college, and this has ever since been used officially. But now that the college has developed into a university, it is thought by the alumni that the coat of arms fails to express the nature and status of the university, and should be remodelled. The committee appointed to deal with the matter suggests that the arms of the founder should be incorporated; also the maple leaf as an indication of nationality, together with a book, either open or closed. The committee drew up the following design: Blazon: gules, three martlets argent; on a chief, or an open book, worded, "In Domino Confido," proper, between two maple leaves of the first; motto, Grandescunt aucta labore.

There appears to be some doubt entertained whether the authorities have power to make the change without applying to the Heralds' College. We have, therefore, asked the opinion of Mr. E. M. Chadwick, of Toronto, who is an authority on heraldry, upon this and other points. Mr. Chadwick replies:

"The question of exclusive rights of the Heralds' College or any other body with regard to creating coats of arms is one which has been very much discussed, and I personally have taken a hand in the discussion in print both here and in England, and my views have been endorsed by people in the front rank of archeologists and armorists. As to the case in point, I have no hesitation in saying that the authorities of McGill are quite at liberty to adopt the proposed armorials of their own motion, and do not require to make any application to Heralds' College. The proposed coat of arms seems to me to have been composed by someone with some knowledge of the subject (which is by no means always so in such cases). I observe that there are no crests or other "accessories," such as people who get up fancy coats of arms are very apt to stick on, no matter how much they may be out of place. This one is quite correct. I think it would have been better if they had omitted the words to be placed on the book; otherwise the composition is faultless.

To describe the coat of arms so as to be generally intelligible can hardly be done without the use of some technical terms, though it may be made more easily understood by using the new style of blazon rather than the old-fashioned style, as follows: Gules, three martlets of silver, on a golden chief an open book inscribed, "In Domino Confido," proper, between two maple leaves gold. To translate the technical terms: Gules means red; the martlet is an imaginary bird resembling a swallow, but with no feet; 'proper' is the natural or real color of the object represented."

THE UNCERTAIN WOOL OUTLOOK.

Perhaps the backward state of the season, which interferes with clipping operations, is in large measure responsible for the dull condition prevailing in the woolen market just now. Whatever may be the cause, it is a fact that very little new wool is being received by dealers and that little is practically all unwashed, no washed being looked for in the near future. For that which is coming in the demand may be described as fair, at the average price of 9 or 10c. per pound. Washed is quoted nominally at 15c. or a little over, while pulled wools, which are in slow request, are 18 to 20c. for supers and about 21c. for extras. The prospects for any appreciable rise in values are not promising. True, latest reports from London show that in several lines there is a hardening tendency, and this will help the Canadian wools indirectly, but, on the other hand the news from the United States is of an opposite nature. Stocks in hand in that country early this month were very light, but, against that, the demand was small and appeared to be diminishing. Lately, manufacturers in several sections have received so few orders that they had to close their mills. A peculiar feature over there is that the scoured cost of coarse and medium wools is to-day actually higher than that of merino. But this condition, exactly the opposite to that which exists in Europe, is one which is not likely to last for very long. Even with regard to the coarser grades, the higher values looked for as a consequence of short supplies have not materialized, and, now that the new clip is arriving, are not likely to do so. This, together with the very unsettled state of the woolen manufacturing industry in this country, gives no promise for better prices for the Canadian wool grower.

Apropos the Canadian woolen mills, Mr. E. W. Thomson, of Ottawa, had recently a very interesting article in the Boston Transcript, which reads as though he had endeavored to arrive at an unbiassed judgment on the matter. After testifying from personal experience to the excellent quality of many of the goods turned out by the Canadian mills and referring to the old-time prosperity of the trade, he gives it as his opinion that the trouble would seem to lie in the fact that while, through the general adoption of the protective system in Canada, the cost of living and of mill supplies has increased, the duties on woolen manufactures have not increased in sufficient proportion to offset this or allow the wool manufacturers and operatives to bear the burden. Mr. Thomson touches on a sore spot when he denounces the prejudice held by many Canadians against some of the fabrics made in their own country, which causes them often to choose imported goods upon nothing but their name. But he blames the domestic manufacturers, too, for not being more up-to-date in their business and advertising methods, a lack which is partially responsible for this preference.

One apparently good suggestion Mr. Thomson makes as an alternative to the demand for increased duties to counteract the consumption of imported shoddy goods. He would have the Government establish a system of inspection for all woolen goods, domestic and imported, requiring the manufacturer's certificate of composition, to be fixed and remain on the goods until the last yard has been sold. By this means frauds on the purchasers of woolen goods would be discouraged; there would be no more interference with trade than in the case of governmental inspection of cheese, or butter, or apples, and Canadian manufacturers would be much better protected than they are now. This suggestion does not necessarily put out of court the claim for a revision of the tariff duties as well.

INTERIOR BRITISH COLUMBIA.

Since the proposition to build another great transcontinental railway under the name of the Grand Trunk Pacific was mooted in earnest, there has been an extraordinary demand for information concerning the Skeena river district and various sections of British Columbia which may be classed as undeveloped areas of the great interior. To such an extent has this gone on that the Bureau of Information of the Provincial Government has thought fit to re-issue in an enlarged form a bulletin which was originally published two or three years ago, giving information, so far as could be obtained up to date, of those great tracts of virgin land. Among the sections to which particular attention has been drawn for some time past are Bulkley Valley and Ootsa Lake, in that Province. The first-named of these two places came recently into notice as the proposed site for an important colony, but to show that the Government at the present stage does not greatly favor

immediate settlement we may quote the following words of warning from the bulletin:

"It is not desirable . . . that the development of the enterprise should be hampered by men and women who are unused by experience to the trials of pioneer life, unfitted by training to take up the work of actual farm labor, and unable by physical endurance to withstand the hard labor involved. It must be understood that settlers who go in there will, for some time, be wholly isolated, and that for three years, at least, their property will be unproductive. The prospects for success in five years' time, or as soon as railway communication is afforded, are very good, and all accounts are favorable to the belief that Bulkley Valley is one of the most fertile in British Columbia, and particularly well adapted for stock-raising; but the way to success is long and hard, and without pluck, untiring industry, intelligent effort, self-reliance, physical endurance, and some capital to back up these qualities, disappointment and failure are sure to result. . . . Similar remarks apply to the whole of the northern interior, as without communication and without market, except that afforded by local mining development—still in its infancy—it requires some capital and a good deal more pluck to await patiently the day when railways will accord both."

This points out the great lack of the entire region—adequate transportation facilities. Given these, an enormous extent of fine land will be ripe for development and for addition to Canada's enormous wealth-producing territory.

Bulkley Valley appears to be especially adapted to cattle-raising and dairying, with considerable good bottom land for general agricultural purposes, especially after the Indian village of Morricetown is passed on the south. Light summer frosts are sometimes experienced, but these will probably become rarer with the advance of cultivation. The soil is principally a rich black loam, the country rolling, and the timber chiefly small spruce and poplar. Good grazing is found, the pea-vine and red-top grasses growing as high as a man's head. The winter climate, according to the experience of an exploring party two or three years ago, is good, and not very severe, the lowest temperature having been 26° below zero on one day, and reaching to zero on only twelve other days. On the north shore of Ootsa Lake there is some splendid open country. Deer and caribou are plentiful. The soil is described as admirable, while up to August 28th in the only year of which there is continuous record there had been no summer frost. On the southern and western slopes of the hills in this region the snow in winter never covers the grass. There should be fine openings for stock ranches.

WESTERN CROP REPORT.

If the news about much winter-killing of fall wheat in South-western Ontario be somewhat dampening to the spirits, nothing of the kind characterizes the news from Manitoba and the North-West. Our telegram of yesterday noon from Winnipeg states that reports obtained from 125 different points throughout the western prairie country indicate that the increased area under crop will be 12 per cent. None report any falling off, increases being from same as last year to 200 per cent. greater. Seeding is practically completed, and the weather considered most favorable. In several districts it is already well sprouted and beginning to show above ground. "A conservative estimate places total acreage in whole North-West under crop at something over four million acres, probably 4,300,000 acres."

THE TRUST COMPANY IDEA AND ITS DEVELOPMENT.

THE TRUST COMPANY IDEA.

It was formerly laid down that corporations could not be trustees. The reason assigned for this rule was that they could not be compelled to execute a trust, for Courts of Equity in decreeing the execution of a trust lay hold upon the conscience, and it is impossible that a body so artificially created could have a conscience. Again, it was said they could not be imprisoned if they refused to obey the rules of the court.(1) But these technical rules have long ceased to operate, and to-day in more than one country the trust company is as firmly established as the bank.

THE AMERICAN TRUST COMPANY.

It has been said that the trust company is essentially an American institution. It is true that extraordinary conditions and the remarkable growth of individual and corporate wealth in the United States during the last quarter of a century have produced there an evolution of the trust company idea which is peculiar to that country, and the development has no parallel in financial history.

The first companies to carry on the business of administrator and trustee in the United States were life insurance companies. There are only four trust companies now in existence which began business prior to 1836: The Farmers Fire Insurance and Loan Company of New York, incorporated in 1822; the New York Life and Trust Company, the Pennsylvania Company for insurance of lives and granting annuities (2), and the Girard Life Insurance Annuity and Trust Company of Philadelphia. Prior to the Civil War there were not more than half a dozen companies that actually undertook a trust business. Of the companies now in existence, forty-two began business between the years 1864 and 1875; ninety-nine between the years 1875 and 1885; five hundred and eighteen between 1885 and 1900, and nine hundred and twelve between 1900 and 1903. There are, therefore, to-day over fifteen hundred trust companies doing business in the United States (3). They have an aggregate capital of $317,000,000, surplus of undivided profits of $363,000,000, individual deposits of $2,122,000,000, and nearly $3,000,000,000 of resources (4).

The American Trust Company of to-day combines every function of financial business, and has been called the department store of finance. In its later development it is primarily not a trust company, but a bank, with this distinction from the National and State banks, that it does not discount paper or issue bank notes. It also undertakes the following functions: Business as executor, administrator, assignee, trustee and agent

(1) Perry on trusts, 5th Ed. 42.

(2) This company, though incorporated in 1812, did not acquire powers to execute trusts until 1836. The early history of the company, the growth of its trust business and decline of the insurance business is fully set out in an elaborate volume published by the company.

(3) Article by Clay Herrick, in February number, 1904, Bankers' Magazine, published in New York. This is one of a series of articles by the same author on the American Trust Company, which are a valuable contribution to the subject. For a list of American trust companies, see March number, 1904, "Trust Companies," published in New York.

(4) Paper by Breckinridge Jones, chairman, Trust Co. Section, American Bankers Association, in March number Trust Companies, 1904.

for individuals, business as trustee, agent, transfer agent, registrar and liquidator for corporations, the reorganization and promotion of corporations, the underwriting of the stock of corporations, fidelity insurance, the insurance of land titles, and a safe deposit business (5). In the last few years there has been a tendency to the amalgamation of companies in large cities (6). It is only in the larger centres that the complete trust company is found; in the smaller towns companies with a small capital devote their attention to any of the above functions under the name of a trust company.

Originally the law makers of the different States appear to have intended that apart from insurance the primary business of a trust company should be the execution of trusts, and the other powers which were granted were only intended to be incidental and helpful to the successful carrying out of the duties of a trustee. The originators did not contemplate the addition of the duties of banking, safe deposit, fidelity and title insurance. But in the struggle for dividends trust companies disregarded the intention of the Legislatures, and developed as they found most advantageous any of the powers with which they were invested, and gradually, starting from the receipt of deposits, they invaded the banking business. With the multiplication of trust companies the necessity for this action became more acute. It is remarkable that in every State there has been a surrender to the demands of trust company promoters. In no State does there appear to have been any legislation rendering it possible to preserve the trust company on the original lines by limiting the number of companies to the demand for the services of a trustee. On the contrary, in nearly every State the general tendency of legislation has been to enlarge the scope of the trust company's functions (7).

There have been failures of companies doing business under the name of a trust company, (8) but it is very difficult to ascertain what amount of trust funds, if any, has been lost by such failures. Officials of New York trust companies state that not a dollar of trust funds has ever been lost by the failure of a trust company in that city.

Trust companies were not developed in the United States without adverse criticism from the leading financial papers and the banking interests. The remarks of the New York superintendent of banking are typical of these views. In his report, dated 10th January, 1885, he said: "The number of trust companies has increased beyond the wants of the State, and a general law will be a benefit by helping to check their multiplication. Trust companies are needful, but only for certain well-defined purposes. They are misnamed, and in some cases misleading, when in the garb of a trust organization they exercise the powers of a bank." And again in his report, dated 23rd February, 1904, he says: "The right of trust companies to hold stocks in private corporations might wisely be defined, their right to engage in underwriting schemes unqualifiedly denied, and the obligation imposed upon them to carry a legal reserve."

At the present time there is much discussion in connection with a bill before the New York Legislature to amend the banking law in relation to the law for money reserves of trust companies.

The laws regulating the amount of capital required and the safeguards imposed vary in the different States. The trust companies of the District of Columbia alone are under the direct supervision of the Federal Government. These companies are rated as among the strongest institutions in the South, and the laws regulating them are worthy of especial notice. They cannot be incorporated with less than $1,000,000 capital. One-fourth of their capital must be deposited with the United States Treasury as a trust fund for the faithful discharge of their fiduciary obligations, and the books are subject to constant inspection.(8)

(5) Bankers' Magazine, April, 1904.

(6) Notably in St. Louis and Greater New York.

(7) New York Statutes, 1900, 704, 30 Ap. provide that only corporations formed under banking or insurance law may have the word trust as part of their name. A similar provision appears in Statutes of Indiana, 1899, 96, 24th February. The Statutes of New Jersey, 1895, 398, 4 June, prohibit trust companies from acting as fire insurance agents.

MANUFACTURER VERSUS UNDERWRITER.

There is a controversy between the Canadian Manufacturers' Association and the Canadian Fire Underwriters. Or, rather, a healthy beginning of a controversy has been made by the former body by a letter which the latter has not yet found it convenient to answer. It is a letter of ten pages and a half, foolscap, typewritten, and after reciting various things which the underwriters have done and left undone, it requests a conference between the two bodies to consider the subject of Toronto's insurance. This conference, we are given to understand, the underwriters have postponed till a more convenient season, seeing that they are rather busy just now.

One or two things stated in this lengthy letter may be remarked upon. Blame is thrown upon the underwriting board for that they have not, during these five years last past, made any recommendations to the city council for the improvement of fire appliances in Toronto. It would seem to us sufficient to reply to this that about five years ago a very full statement of requirements of this kind was made to the city authorities; it is still on record, and the city's equipment is not seriously altered since it was made. Ought the fire underwriters to have repeated it? Would it have been of any use?

Again, a large part of the letter is occupied in deducing, from a basis of merely estimated figures, the inequitable share of insurance which Toronto's citizens have been forced to pay in a certain number of years, making this city, which lost little by fire for half a dozen years, pay for the deficiencies of other places. This is the same short-sighted argument as has been used any time these twenty years by many small towns and villages. It ignores the very principle of average upon which fire underwriting has been established and successfully built up.

Among the concluding sentences of this letter is this one: "The Canadian Manufacturers' Association has not the least desire to too severely criticize the insurance companies or to call the Board of Underwriters to task." This sounds oddly, when the whole letter is filled with reproach and criticism of the under-

(8) Bradstreets' Journal, Feb. 6th, 1904, reports 41 failures of loan and trust companies in the eleven years from 1893 to 1903, inclusive. This, however, compares very favorably with the record of the National and State Banks in this period.

—The charming little city of St. Catharines is about to make its attractions, from a manufacturing point of view, more widely known. It has facilities in water and electrical power which place it in the front rank, and several fine water privileges, suitable for various industries, are owned by the city. The Board of Trade is taking up the matter.

writers' procedure or non-procedure, as the case may be. Hot reproaches and criticisms, too. What is said of the secretary of the Board, for instance, is strong enough, if true, to cause doubts of the fitness of that official for his office. Happily, as he is of an equable temperament, the aforesaid secretary is not likely to issue a writ. Perhaps, when he reads the deprecatory sentence we have quoted above, Mr. McCuaig may say:

So gently they kicked me downstairs
That I thought they were handing me up.

THE APRIL FIRE WASTE.

The fire loss in Canada and the United States last month was not very much less than double that of what it was during the same period either in 1902 or 1903. The following are the figures for the present year, so far as it has gone, as compiled by the New York Journal of Commerce and Commercial Bulletin:

	1902.	1903.	1904.
January	$15,032,800	$13,166,350	$21,790,200
February	21,010,500	16,090,800	90,051,000
March	12,056,600	9,907,650	11,202,150
April	13,894,600	13,549,000	23,623,000
Totals	$61,994,500	$52,703,800	$146,666,350

It will be seen that, even deducting the especially large losses at Baltimore, Rochester and Toronto, the fire-waste thus far this year by the ordinary fires would reach $60,966,350, or some eight million dollars more than the sum charged against the first four months of 1903. Besides Toronto we have had April burnings in Canada at Montreal, Fernie and Midland to an aggregate of $962,000, while five United States burnings swallowed up $1,395,000 worth. April was an especially destructive month for fires. Fire underwriters have suffered very severely during 1904, and, notwithstanding the enormous drains upon their assets, no general increase of insurance rates have been made. It is coming, in the States, and it has already come, in Canada. There is no use in postponing the inevitable.

THE MONTH OF MAY.

When at length we are rid of the frosts and snows of winter—and what an unconscionable time they took to go in 1904—and the usual signs of spring appear, the effect is sure to be one of expectant rejoicing. Speaking for many dwellers in town and city, may it not be said that we watch like eager school-boys for the greening of the grass; we watch for the budding of the trees; we watch to see the coming, through the brown soil, of the yellow and blue crocus, the white snowdrop, and the radiant tulip. And is there not the dandelion, "first pledge of blithesome May," that inspired Lowell's impassioned outburst about that flower's gold being the Spring's largesse, scattered to poor and rich alike:

The sight of thee calls back the robin's song,
Who, from the dark old tree
Beside the door, sang clearly all day long.

But the city householder and the city gardener do not like the dandelion; indeed, they contemn it and attack it, much as Charles Dudley Warner despised "pusley," and for the same reason. And they proceed in this merry month to ply the rake, the spade, the roller, for all the purposes that garden or lawn require "to make them beautiful or leave them neat."

All good housekeepers clean house in the spring of the year; some insist on doing it again in the fall—and it is then, probably, that paterfamilias resents the operation most. Nor is it only the inside of the house that the wise matron will purify and decorate. They set out flower-beds, shrubs, potted plants. Why? Why do they take so much pains with their flowers, their window-boxes, their grass plots? Not always reflectingly, but often unthinkingly they seem to recognize the result of these efforts in added beauty and cleanliness. Health, too, is a consideration, and so the front yard, the back yard; the "hides" under the steps; the rubbish which a year has accumulated and the snows of a winter have concealed; these are raked and carried away. The dust and weather stains of window-sash, the trellises and other woodwork, and the outhouses, too, should all get a taste of the scrub brush or the garden hose if fresh paint cannot be afforded. This much we have said at the risk of being reminded that we are neither a Family Herald nor a horticultural journal. Our aim is to get the ear of those who are responsible for municipal house-cleaning, by which we mean the tidying up and purifying of towns and villages.

May is the spring month when the improvement wrought by nature after the long concealments of winter should be recorded by the cleansing and embellishment on a broad scale which human taste can bring. Town authorities should look to the removal of stagnant water, the opening of drains, the cleansing of cesspools. Alleys and back streets should be rid of the collection of rotting garbage which a summer sun may make pestilence of. Foul or damp cellars, undrained outhouses, baneful barnyards—all breeding-places of disease should be cleansed. Waste water on the surface may drain into wells; refuse matter from kitchens, instead of being thrown into street or lane or yard to be made poison of by the sun, should be burned; dead animals should be removed to a distance and buried. Besides, and even beyond the consideration of health, there is the same argument for beauty in the town or village as a whole that applies to the individual resident of either. It was a Down Easter, and a wise one, who said: "If eyes were made for seeing, then Beauty is its own excuse for being." Natural or acquired beauty is an asset to a town. Scores of places on our rivers or Great Lakes have found that it pays to have clean streets and walks and pretty parks, because they attract the summer resident. Many a town and village in the Maritime Provinces has found itself repaid for providing sweet and grateful surroundings by an influx of summer tourists. Let us hope, then, that municipal cleansing and adornment will supplement personal effort in the duty and pleasure of spring cleaning.

PACIFIC COAST NEWS.

From a gentleman now on the way through the far West of British Columbia, we derive the following information under date 6th May. It will be seen that he touches various points in the far West:

Vancouver has four business blocks in course of construction, over a hundred new residences are going up in the East End. At Mt. Pleasant, Fairview, in every part of the city, one can see abundant evidence of residential expansion. The Government appropriations having gone through Parliament for the new post office site, and everything relating thereto being satisfactorily settled, work may be expected to begin in sufficient time to influence the electorate favorably toward the Government candidate.

One bone of contention, long striven over, has been removed this year by the decision of the salmon canneries to pay 20c. per fish for salmon. With a good run of these valuable fish, times should be real good at the coast this season. In fact, it ought to put the labor agitator out of business.

The School Board of Victoria, B.C., have a problem on their hands at the present moment. There are over 200 Chinese children of school age for whom they have to make provision. And they will get no sympathy from those in the community who are down upon the Chinee. The Fraser river had risen about 12 feet and caused some alarm, but the cooler weather of the last few days has prevented any inundation and the river is falling again.

Evidences of a business awakening are not wanting in Kamloops, B.C. In the first place, the Iron Mask mine, which has for the past three years been under development by an English syndicate, is just south of the town. This is a mine of great value, being an immense body of high grade copper ore. The company are now engaged installing a complete new plant and reduction works to the value of $150,000 The concentrator and reduction works will be in operation, it is expected, by the end of June, when employment will be given to over 200 men.

The Kamloops sawmills have recently been sold to a company of Eastern capitalists, composed of the Hon. Geo. E. Foster, George McCormick, M.P.; T. W. Fowler, M.P., and W. Irving, of Peterboro. The new company have taken possession, and are engaged in enlarging the mill to the capacity of 80,000 feet per day. The purchase price of the mill, which includes the limits on the Shuswap lakes, was $200,000. The same company have also purchased the shingle mill, at Sicamous. This makes five lumber mills that they operate in British Columbia. The original owners of the Kamloops mill were Messrs. Peter Ryan, of Toronto, and John and Alex. Shields, of Kamloops. Mr. Pat Burns, the well known British Columbia rancher and packer, is taking over the business of Hull & Co. He will erect a large abattoir at Mission, about a mile west of the city.

A great many settlers are coming in hereabout, and land is rapidly being taken up in the neighborhood. A new hotel is going up that will likely cost $35,000. It will have forty bedrooms, and is intended to be first-class. The name of the new hostelry will be the Hotel Cecil.

A LETTER FROM NORTH ENGLAND.

Press and public on this side both take a curious, kindly interest in Canadian industrial efforts. The news that Dominion-made macaroni is to be placed upon our grocery-counters, in competition with Italian make has aroused general comment. Undoubtedly the fact of their origin will give the goods a send-off into public favor. For years the prejudice against foreign materials has been growing. The staunchest of Free-traders, the most confirmed among anti-Preferentialists are susceptible to domestic and Imperial sympathy. Granted that he is not to lose money by doing so, the typical consumer of the Old Country may be depended upon to extend his patronage preferentially to articles produced in the Britains.

At present, Canadian manufactures are eyed with some of the interest of a child's early efforts to walk and talk. As a place to grow things, Canada has its definite recess in the home-Briton's mind. He has scarcely realized yet that it has long-established industrial centres. The wary exporter will do well to advantage himself of the feeling of pride and wonder in Canada's capacity. The circumstance is a useful basis for the erection of a favorable impression. It is a "talking-point," and as such is to be used with diplomacy and effect.

Reuter has flashed the message telling of Messrs. Elder-Dempster's offer to make a floating exhibition of Canadian wares at the South African ports. The step is thoroughly characteristic of Sir A. L. Jones—Banana-King, merchant, shipowner and galvanic enthusiast. For so much as he can do to foster inter-Imperial relations, one may count upon him to his last breath. None the less one may have doubts of the commanding success of the endeavor. Often tried by English and German enterprisers, the floating exhibition has as often failed to do more than a very little to stimulate trade, and the experiment is rarely repeated by promoters or exhibitors. There is an ocean-going exposition at present making a world tour with British manufactures, under the direction of a flighty London newspaper, *The Daily Express.*

Thanks to its autonomy Canada escapes representation by the Crown Agents' Office. At present the good name of the Crown Colonial Agency is lost in clouds of abuse and some misrepresentation. Undeniably some of the methods of the agents are open to fault-finding. The agents do not advertise for tenders for goods wanted, as do virtually all other purchasing departments of the Government. They deal exclusively with firms upon their secret list of contractors, and they ask these firms for prices as the official discretion dictates. Resentment has been shown at the intimate connection of Sir E. E. Blake, K.C.M.G., senior Crown Agent, salaried at £2,500 per year, with the London Assurance Corporation. This company receives almost all of the Crown Agents' insurance premiums, and Sir E. E. Blake is upon its board.

Moreover, there is a scandal over coals bought for West African railroads. While best Welsh steam coal was costing 15s. per ton, and freight less than 15s. more, the Lagos Railway was paying the monstrous figure of 50s. per ton through the Agency. The line itself, though for this perhaps the engineers and not the agents are responsible, cost such a price per mile, that transits are nearly prohibitive. These extreme examples of bungling mismanagement take no account of the large quantity of work that the Agents' Office performs with some degree of efficiency. But there is no reason to suppose that their duty is nearly so well done as is that which is performed by the private enterprise of the ordinary commission-house.

A significant piece of financial news seem to indicate a revival. Very large purchases of Consols have been made for investment recently. From barely 85 at January 1st, Consols have grown to 89⅝ at May 1st. The yield is therefore £2 16s. 0d. per cent. When in 1897, Goschens reached high-water, 113⅞, they produced only £1 18s. 9d. Money was easier at that date, but taken in conjunction the indications reflect the belief that British securities are to grow in value. Their depreciation has been somewhat of a handicap to trade, for banking and all other corporations found themselves at the year end with diminished assets due to the leakage in standard securities. Provision had to be made at the expense of dividends, and thus spending-power has been injured.

But the matter that raises most complaint in commercial circles is the continued depression in South Africa. To an extraordinary degree that market has become indispensable to the full employment of the boot and clothing trades; to name no others. Advices from the spot are most melancholy as to the present and as to the future. In Lancashire, which not excepting the metropolitan area, is our densest and most largely populated district, the loss consequent upon the cotton trouble is only to be measured in millions. With few exceptions there is a slackness of employment in all localities. Home trade therefore is appreciably damped and the defection of South African orders has caused quite a consternation. The busy, in any trades, are those with some private preserves of specialities to work. And the thought is gratifying that many people are so placed in these trying times.

One standing advertisement that the United States market receives gratis in every English paper is the monthly statement of trade returns which issues promptly from each United States Consulate. This constant reminder has an influence over the mind, and the fluctuations in exports are followed with a sporting interest by all manner of people. To keep Canadian possibilities in the public eye, a more simple or effective device could hardly be imagined. An immediate and detailed record of British goods sent into Canada prepared by authority and issued with regularity at

brief intervals would find acceptance at the hands of every English editor, and would do more for Canada than merely help it to buy cheaply.

Manchester, 3rd May, 1904. NORTH COUNTRY.

ARRANGEMENTS OF THE FIRE SUFFERERS.

The past two weeks have been a busy time in the devastated wholesale district of Toronto. Even yet a few spots remain where the ashes, or rather the old bricks, are not yet cold. But the work of pulling down old, tottering walls has gone on apace, and the general appearance of things is now very different from what it was say two weeks ago. The making of definite arrangements for rebuilding has been greatly hampered by the ruthless advancing of prices of land by owners, who have taken advantage of the necessities of burnt-out merchants or manufacturers to ask unheard-of rates. Whether this will prove in the end a good policy, either for the city or the land owners, is doubtful. It is not only in the high prices suddenly asked for land (which, perhaps, are a good illustration of the unearned increment of the economist), that would-be builders of premises are face to face with hard conditions. The cost of practically all the materals which enter into construction work are very high. One case we have heard of recently, where a man proposing to rebuild was asked $11 for bricks which a year ago could easily be obtained for $7. And so on.

Among the arrangements which have already been made by the fire sufferers, we note that Gordon, Mackay & Co. are to erect a thoroughly modern fireproof building at the corner of Bay and Front streets. It is to be equipped throughout with sprinklers and water curtains, and each floor is to consist of three thicknesses, with fireproof material between the floors. The elevators and stair passages will be outside the wall of the floor proper, between it and the main wall of the building. The E. W. Gillett Company, yeast manufacturers, have bought out the palatial premises of the Pure Gold Manufacturing Company on King street West, and this latter concern, we understand will rebuild. The D. D. Hawthorne Co., wholesalers of boots and shoes, are occupying offices alongside the Canadian Rubber Company. They intend to put up a building, but are unable to come to any definite arrangement yet. The Canada Paper Company has offices in the Board of Trade building, and such ample storage facilities that its business has gone on uninterruptedly. It will build, however, so soon as negotiations can be carried through. A. A. Allan & Co., at present located at 18 Wellington street West, are preparing to put up a five-story building in the old spot. The W. R. Brock Company will shortly enter the warehouse being prepared for them on Front street, opposite the Queen's Hotel. Meantime, the work is going on at their old premises of sorting salvage, stock, etc. Rebuilding will be begun as soon as possible. Brown Bros. are still clearing up debris, with a view to getting an early start on reconstruction. They have a large stock of stationery, meanwhile, at Queen City Rink. Buntin, Reid & Co., have a full and varied stock of stationery at 7 King street East, and are likely to remain there indefinitely. Robert Darling & Co. are among those who have been kept back by the exorbitant prices asked for real estate. Howland, Sons & Co., hardware merchants, have offices in Scott street, and a commodious warehouse at Parkdale Rink, from which they have already shipped a surprising quantity of stuff. As to rebuilding, no definite plans have yet been made by them. Kilgour Bros. now have the roof of their factory repaired, and expect to have everything in good shape within two or three months. The Merchants' Dyeing and Finishing Co. are erecting a five-story building in York street.

OUR SAINT JOHN LETTER.

The pulp mill at Mispec, fifteen miles from this city, has been closed down and the hands discharged. The mill was built a few years ago by Scotch capitalists, mostly paper manufacturers, and represented an outlay of probably more than half a million dollars. It has been run continuously, but the venture has not been profitable. It is said the property is now in the hands of the preferred creditors, and that a reorganization of the company will be effected. The mill is situated on the Bay of Fundy, at the mouth of the Mispec river, which drains the Loch Lomond chain of lakes. It has not been possible to get sufficient pulpwood down this stream, and towing it from St. John has been expensive. Then the manufactured pulp has all to be brought up to the city and transhipped, as there is no rail or steamboat connection with the place. The company has an abundant water supply, but the other drawbacks and the unsatisfactory condition of the pulp market have contributed to bring about the closing of the plant.

The building at Hampton, formerly the property of the Ossekeag Stamping Company, which manufactured granite iron ware, has been secured by Messrs. T. Wm. Barnes and Wm. Brown, residents of Hampton, who are now arranging for machinery which they will instal therein for the manufacture of tubs, pails, etc. There is no factory of this kind in the Maritime Provinces and western dealers now control this market, supplying the candy manufacturers as well as the domestic trade. Messrs. Barnes and Brown think they can capture the business down here, and it is said they have secured promises of the trade of some of the heaviest buyers of these goods.

On different occasions, I have made reference to the large amounts St. John and New Brunswick capitalists have invested in western mines. Just at present those who hold stock in the Gold King Consolidated are feeling elated over an offer of purchase made by an English syndicate. It is said these parties have offered to put up $40,000 for a month's option on the property, and will buy for $9,000,000, if satisfactory arrangements can be made. Most of the stock of this Colorado mine is held by New Brunswick and Maine people. Some of the owners are also heavily interested in the Kimberly-Montana, formerly the Bear Gulch mine, and they would like definite information about it. They are associated with Chicago people and all kinds of rumors about the property are in circulation. One day it is declared to have millions of gold in sight, and the next day to be a failure.

Journeymen tailors in several St. John establishments went on strike to-day. The men are all in a union and the strike is confined to houses that declined to recognize the union hours, the union demand for extra time, etc. The strike was only ordered to-day, so it is impossible as yet to say what proportions it will assume, but it is not likely that shops that have recognized the men will be affected.

Recently a valuable property in the City of Fredericton was offered for sale, because the owners, who were followers of Elijah Dowie, preferred to leave the province rather than submit to regulations requiring that their children be vaccinated before being permitted to attend the Public Schools.

Messrs. Walter C. Bauer and Arthur H. Woodworth, carrying on business at St. John as the Maritime Art Glass Works, have dissolved partnership. Mr. Bauer will continue the business.

Fire at Shediac, early this morning, completely destroyed the Shediac Boot and Shoe Factory, together with all the stock on hand. The property destroyed, worth over $40,000, has been long in existence, and was insured for only about $18,000. At this moment there seems to be doubt at to whether or not the factory will be rebuilt. If not, the employees, most of whom own their own houses, will be compelled to seek a living elsewhere. The Weldon House, the chief hotel in Shediac, was somewhat damaged by the fire.

On Monday there was a serious fire at the village of Richmond Corner, near Woodstock, in Carleton County, which wiped out fourteen buildings, mostly dwellings; the general store of Hugh Montgomery, with all its contents, the local blacksmith shop, and other buildings. More than one-half the people in the place were rendered homeless.

People living along the line of the Canada Eastern Railway will welcome the acquisition of that line by the Government. Branch lines in New Brunswick are not generally operated with much regard to the interest or convenience of

people living along them, while under Government control the line is sure to be kept in good order and a fairly satisfactory train service maintained. The taking of this road is almost sure to lead to a demand for the acquisition of other branch lines in New Brunswick and Nova Scotia.

The local fire underwriters, besides making a demand on the city of St. John for an improved water supply, and the purchase of chemical engines, have also been calling on the provincial towns to do something to mitigate the danger of serious conflagrations. The city councils of St. John, Fredericton, and Moncton are now seriously considering the demands made on them, and makers of fire-fighting appliances are sure to soon get some orders from this section. In St. John a serious difficulty has arisen. The water service is admittedly inadequate, but there is great diversity of opinion as to how it should be improved, and in the common council there is not an alderman willing to become chairman of the water and sewerage board. The last chairman was defeated at the elections two weeks ago by eight hundred votes.

Saint John, N.B., 10th May, 1904. * * *

THE ST. LOUIS EXPOSITION.

The same sort of unreadiness for the opening which was peculiar to the Chicago and Buffalo Exhibitions of 1893 and 1901, appears to characterize the St. Louis Fair. We have seen a letter of Saturday last from a Canadian visitor to St. Louis, which says that the buildings are not ready, and that great quantities of merchandise still boxed up are lying outside them, on the grounds, the owners declining to allow them to be opened until the buildings are in a fit state to receive them.

The attendance on the opening day was very large, but has dwindled until the number present on Friday was only ten thousand, and on Saturday a still smaller number. It would seem that the opening would have been much more appropriate on the 1st June than on the 2nd May, having in mind the preparedness of the premises. These are spacious and beautiful, and the extent of the whole affair is very great but just now a visit to the Fair is simply uncomfortable.

There are some things to be borne in mind by the visitor to St. Louis who values his comfort and respects his purse. One is that the weather there just now is extremely hot, and the atmosphere to a Canadian depressing; his dress should be prepared accordingly. Another is, according to this letter at least, which was written to a member of the Canadian press in advance of the visit of his association, that everything in the city is expensive, hotels especially so, and that everybody seems resolved to make money out of the visitors. This week is the week of the press members' visit. The advice of a man who knows the climate of St. Louis is to go to see the Fair in August or September. Everything will be in good running order then, and the visitor from a distance will be far more comfortable than now. To persons who are rich and do not need to care for the sort of extortion which disgraced Chicago in the early months of their World's Fair, or to the traveller who does not mind heat, the present condition of things will not seem so repellent. But it will be better for the reputation of the city and its Exposition to have visitors wait until exhibits are in place and until prices and other things become better regulated.

Nevertheless, we must not forget that arrangements have been made in advance for numerous "conventions" of all sorts and conditions of folk to be held at the great Fair. The convention, consisting of from a hundred to a thousand persons of the same handicraft, the same society, the same profession, the same religion is dear to the American heart. There is lots of speaking, numbers of resolutions, and almost always there is "a good time." So we append a list of the principal gatherings arranged for thus far: The funeral directors of Missouri were to meet on May 11th and 12th; on the 13th and 14th are the Gymnastic Championships; from the 16th to the 20th, the International Press Congress will meet (and we hereby acknowledge a free admission ticket to the Fair for that event); from the 16th to the 21st assemble the Good Roads Convention; on the 19th the Federation of Women's Clubs begins their innings, which extends over four days; May 21st is Machinists' Day; May 20th, Rebekah Day; there is a Millers' Day on the 25th and another on the 28th. On the 26th, the Mothers' Congress assembles, and on the same day the Missouri Bankers' Association meets.

NEW BUILDINGS.

Contracts have been awarded for an extensive tannery on the east bank of the Rideau river, opposite the Isolation Hospital, at Ottawa, which will probably employ at once 100 and later 150 men. It is intended that the plant and buildings, which are to cost approximately $75,000, will be ready for occupation by October next. They will occupy a large part of the fifteen acres of land which the company have purchased. The name of the concern, which is erecting these important premises, is the John A. Lang Leather Company. The name of John A. Lang, of Berlin, is well known to the leather trade of Ontario; the other provisional directors are: John McGrail, Acton; D. Murphy, M.P.P.; George S. May and W. C. May, Ottawa. The capital is $200,000. The product of this tannery will be harness, upper, russet and several other kinds of leathers. There is no oak bark efficient for tanning purposes found in Canada and in this tannery hemlock bark will be used, which is plentiful in the Gatineau district. The main buildlng will be 304 by 85 feet, and three stories high, with stone foundation and sheeted with metallic sheeting. The boiler house, of brick, is to be 100 by 50 ft. Then there is a brick house, and also a bark mill. An engine of 250-h.p. and three boilers have been ordered in Galt. In the main building there will be 250 vats on the first floor. The business of this tannery is likely to be a large one, for besides a Canadian business it will tan for export.

The Office Specialty Manufacturing Company, whose warehouse premises on Bay street, Toronto, were completely destroyed in the recent fire, have, with their characteristic enterprise, already secured another lot, and plans are being prepared for a larger building better adapted to the growing business of the company. They have purchased a lot on the south side of Wellington street W., between the Toronto Club and Northway & Co.'s establishment. This lot measures 66 ft. front by 111 ft. deep; upon it will be erected a solid brick structure, four stories in height, which is intended to be, when completed, among the largest and best appointed office and show rooms in the world devoted exclusively to office furniture. The new building is expected to be occupied by September 1st. In the meantime, they will occupy their present temporary quarters at 55-57 Yonge street. Warehouse accommodation has been secured in the J. D. King building, on Wellington street. At the time the fire occurred, a new additional factory 125 by 560 feet, and five stories high, was in course of construction at Newmarket, so that their facilities for turning out goods are better than ever before.

The large factories of the International Portland Cement Company, near Hull, Que., are rapidly nearing completion. The heavy rotaries, grinders and crushers were placed in position sometime ago, and some other contracts have been awarded for smaller and lighter parts of the machinery and other necessities, such as leather belting, rubber belt conveyors, trippers, electric fans and electric motors, for the cable ways. Tenders being received were based upon the detailed plans and specifications prepared by the company's own engineers and the contracts were given to the manufacturers that were able to give the best guarantee of satisfaction. We are glad to hear that most of these contracts were awarded to Canadian firms. With the completion of these contracts, the factories will be fully equipped, and Hull will be turning out cement in quantity.

—Through the misplacement of the decimal point we did the I.O.F. an injustice in one of the paragraphs of our description last week of their "blow-out." We said, on page 1489, that they had in the shape of surplus, three dollars and seven cents on hand for each $1,000 in force, whereas they have ten times that sum, viz., $7,326,582 to pay $238,124,000. It is not very much—$32.50 per $1,000—still we want to be fair to them, and we regret the erroneous statement.

MONTREAL CITY AND DISTRICT SAVINGS BANK.

Ever since the year 1846, the City and District Savings Bank, of Montreal, has been taking care of savings for the people of that city until now their amount in its charge exceeds fifteen millions of dollars and the number of accounts is 69,487, which means an average of $220.29 for each open account. The aggregate of the bank's liabilities is $17,031,993; of this, $15,654,285 belongs to the public, and $1,377,708 belongs to shareholders who have subscribed $2,000,000 capital stock and paid up $600,000 of it; the accumulations amount to $777,708, of which $700,000 is in the shape of a rest and the balance at profit and loss.

The bank's assets are shown by the last report to be in good shape. There is $1,208,697 on hand in cash; $6,920,503 in call and short loans secured by collateral; $8,263,606 in Government stock and other bonds and securities; and a "charity donation fund" of $180,000, the interest yielded by which is divided every now and then among deserving charities. The net profits of the bank for the year were $152,445, to which was to be added $50,263 brought forward from last year. Out of the aggregate $100,000 has been taken to pay dividend and bonus, $25,000 was written off property account, and $77,708 left at credit. In addition to the branch at McGill College Ave. and St. Catherine, the bank will open one shortly at Ontario and Maisonneuve streets. At the annual meeting on 2nd inst., the former board of directors was re-elected: Sir William Hingston, president; Mr. R. Bellemare, vice-president; Mr. Justice Ouimet, Mr. Michael Burke, Hon. Robert Mackay, Messrs. H. Markland Molson, C. P. Hebert, Richard Bolton, G. N. Moncel, and Robert Archer. The last-named gentleman replaces the late Hon. James O'Brien.

INSURANCE INSTITUTE OF TORONTO.

The fifth annual report of the Insurance Institute of Toronto was issued last week. It shows that the membership of the body has increased fifty per cent. within the year. The number of fellows is now 35; of active members, 100; of associate members, 259. The total is thus 394. We have noted from time to time features of the session which opened on 16th October last, the papers read, the debates, etc. There were besides, three surveys of fire hazards held in November and January, the supervising committee being Messrs. H. A. Sherrard, of the Western, and W. E. Fudger, of the British America. As to the decided educational value of the course established, we have already expressed a favorable opinion. The educational committee has done good work. Further negotiations are now under way with the Montreal Insurance Institute, to the end that both institutes may adopt a common syllabus. This will be submitted to the Federated Insurance Institutes of Great Britain, and if approved, the certificates of the latter body will continue to be granted to successful students. No fewer than forty-six candidates went up for the written examinations conducted last month, while five others were obliged to postpone the test for a year. These examinations lasted a week and covered twenty subjects. There were thirty-four candidates for the first examination or parts thereof; eleven for the second examination (Fire Branch), four for the second examination (Life Branch).

Two prize essay contests have again been conducted, the fire insurance subject being: "Average and Co-insurance Clauses in Fire Insurance Policies," and the life insurance subject being "Main Principles to be Followed in the Selection of Lives by a Life Insurance Company." These prizes have been won by Mr. E. L. McLean, secretary of the Fire Underwriters' Inspection Bureau, and Mr. John B. Hall, A.I.A., of the Imperial Life Assurance Company's office, respectively.

FIRE AND MARINE INSURANCE.

Permission has been given to the Montreal-Canada Fire Insurance Company to transact business in Ontario for the year ending 20th April, 1905.

Messrs. Ussher, Playfair & Co., stock and insurance brokers, have just moved into new offices, No. 9 Toronto street. They were formerly at 28 Wellington street West.

According to a cable from London, the British Fire Prevention Committee is offering a gold medal and a purse of twenty pounds, sterling, for the best fable teaching the peril of playing with matches or fire. The committee suggests this because warnings embodied in fables are apt to be remembered through life. And surely if such lessons to children are needed in England, they are vastly more needed on this side the Atlantic, where we are so admittedly careless of everything connected with fire.

Since the great fire, in which their premises were destroyed, Messrs. Warwick Bros. & Rutter have been far from idle. Among other things they have turned their business into a joint stock concern. Letters patent have been issued incorporating George Robinson Warwick, Arthur Frederick Rutter, Charles Ernest Warwick, Ernest Jackson Hathaway, and Norman Alexander Sinclair, under the style of Warwick Bros. & Rutter, Limited, with a capital of $250,000.

It is not surprising that some of the underwriters who compose the general committee for settling losses by the great Toronto fire, should feel the strain of their prolonged and incessant efforts. We learn with regret that Mr. Peter A. McCallum, chief agent and inspector of the Hartford Fire Insurance Company, who was appointed chairman of the general adjustment committee, is suffering from an attack of nervous prostration. Some days before the fire, Mr. McCallum had already gone south for his health, but returned to the city on receiving news of the conflagration. While he is not seriously ill, he is decidedly in need of a rest, and this it is proposed to arrange for him.

It is of interest to learn that the North British and Mercantile Insurance Company is about to discontinue its various branch offices on the Island of Manhattan, and maintain only the one head office, which is at 76 William street, New York. In making this announcement, which he does by circular letter, the New York manager of the company says: "Investigation into their methods of conduct extending to a majority of the leading branch offices in Manhattan Borough, convinced us that as a whole the branch office system, as it exists, constitutes an unnatural and forced condition little less than a menace to the best interests of good underwriting in this city." Mr. Richards, it seems had appointed a man as branch manager to whom the New York Fire Insurance Exchange objected. But he would not yield to the objection: hence the company's action.

MONTREAL INSURANCE INSTITUTE.

The annual meeting of the Insurance Institute of Montreal was held on the 6th inst., Mr. T. L. Morrisey, the president, in the chair. The secretary's report showed that the membership of the institute is 77 executive, 198 associate, 6 honorary, and 3 corresponding members—a total of 284. The election of officers for the current year resulted as follows:—President, Mr. T. L. Morrisey; vice-presidents, Messrs. T. B. Macaulay and H. M. Lambert; hon. secretary, Mr. George Lyman; hon. treasurer, Mr. Chas. C. Hole. Governing council, executive members, Messrs. J. G. Thompson, D. McGoun, A. H. Lavers, A. R. Howell, R. J. Dale, L. Lewis, T. F. Dobbin, A. B. Wood, J. B. Paterson, W. B. Colley; associate members, Messrs. W. S. Jopling, C. J. Alloway, Pemberton Smith, A. J. G. McDuff and Henry Timmis.

LIFE AND ACCIDENT ASSURANCE MATTERS.

At the last meeting of the Institute of Actuaries, held on the 25th of April, Mr. James Chatham, F.F.A., F.I.A., secretary and actuary of the Scottish Life Assurance Company, read a paper on "Life Premium Book-keeping." The many changes which have taken place in recent years in the practice of life assurance offices, necessitates corresponding alterations in the book-keeping, and Mr. Chatham's paper

dealt with some short methods which he had found of great service in practice in his own office, and which he recommended other offices to follow.

The insurance business of the late A. G. Lindsay, in Detroit, the Indicator says, will hereafter be conducted by his widow and Ross Brown, who has been manager of the agency for many years.

A movement has been on foot for some time past to have American life insurance companies doing business in the province of Quebec pay the same rate, namely, 2 per cent. of their premiums, as Canadian companies pay in the United States. At present the former pay 1 per cent. The amount of taxable gross premiums for United States companies doing business in the province at present is $2,179,609, of Canadian companies, $1,415,341, and of British companies, $377,966.

Assistant Manager Junkin, of the Manufacturers' Life, says that the first quarter of 1904 has been the most successful three months the company has ever known. During the first quarter of 1903, the new applications amounted to $2,158,365 and the figures this year exceeded that amount by $180,000.

J. A. Fullenwider, the Chicago lawyer recently murdered, carried $7,000 accident insurance in the Aetna Life. The courts are asked to determine whether the deceased died at the hands of robbers and in the defence of his property, or whether he was killed for revenge by persons not intending robbery. In the latter case the company holds itself released from liability.

Mr. Spencer C. Thompson, manager of the Standard Life Assurance Company, of Edinburgh, which has a world-wide reputation, retires from active management on the 15th inst., after forty years' service with the company, more than twenty-nine of them being as manager. Mr. Thompson's father, Mr. William Thomas Thompson, was the first manager of the Standard, and between them, the father and son have been in the managerial chair of that life office for no less than 67 years. At the recent meeting of the Standard, the chairman said: "The names of 'Standard' and 'Thompson' have been happily linked together in the traditions of the life assurance world for a longer period than any of us can personally recollect."

The Superintendent of Insurance for the State of New York, the Hon. F. Hendricks, says, in his report just issued: "In my report of May 26th, 1902, to the Legislature treating of assessment, co-operative and fraternal insurance, the business of the assessment associations was discussed and attention was called to the fact that this system of insurance is fundamentally unsound, being without the aid of the sentiment which animates the fraternal orders, and that, in the opinion of the department, the days of assessment insurance are numbered. I then recommended that Article 6 of the insurance law be repealed, so far as it relates to the organization or admission into the state of assessment corporations. I take occasion to renew such recommendation." An authoritative opinion from the Superintendent or the Actuary of the Insurance Department at Ottawa, and the Inspector of Insurance for Ontario on this subject would be welcomed by the general insuring public of Canada.

Word has just been received in this country of the death of Mr. Arthur Francis Burridge, F.I.A., vice-president of the Institute of Actuaries of Great Britain, a member of the Actuarial Society of America, and actuary and secretary of the Equity and Law Life Assurance Society. Mr. Burridge became associated with the Equity Life in 1869. Seventeen years later he was appointed assistant actuary; in 1888 he resigned, and was appointed actuary of the Equitable Assurance Society of London, and in 1893 he was invited to return as the chief officer of his old company, the Equity and Law. He became a Fellow of the Institute of Actuaries, by examination, in 1881, served on the council for many years, filled the post of honorary secretary, and has frequently examined for the Institute. He also acted as honorary secretary of the London branch of the new Mortality Insurance Committee, and had likewise been a president of the Actuaries' Club. Mr. Burridge died at the early age of 51, deeply regretted by a large circle of his friends. He was one of the brightest and most sociable of all the actuaries who visited Canada from the Old Land last September, and there are many actuaries in Toronto and Montreal who will regret exceedingly to learn of Mr. Burridge's death.

ARTICLES ON TRUST COMPANIES.

We beg to draw the attention of our readers to an important series of papers on the Trust Company idea and its development, by Mr. Ernest Heaton, barrister, of Toronto, under the following headings:—

The American Trust Company.
The Canadian Trust Company.
The Trust Company Idea in England.
The New Zealand Public Trust Office.
The Australian Trust Company.
The Trust Company Idea in other Countries.
The Functions of a Trust Company.
The Advantages of a Trust Company.
The Necessary Safeguards.

These papers will be published in succeeding issues of the Monetary Times, the first appearing in this number. They treat in a concise and exhaustive manner of the origin of Trust Companies, their functions and the legislation affecting them in different countries, and contain valuable information and material which has never before been collated.

FINANCIAL ITEMS.

Mr. Philip MacKenzie has resigned from the position of director of the Huron & Erie Loan & Savings Society, London, Ont., on account of ill-health. He had been on the board of that well-known institution for over forty years. His successor will be Judge Macbeth.

The Montreal Chambre de Commerce is bringing to the attention of the Minister of Finance the obstacles which at present exist in the shape of imposts, etc, to the introduction on the French market of the best Canadian securities, and is urging him to get the French Government to adopt measures by means of which securities guaranteed by the various Canadian Governments may be assimilated to the state funds or to secure French fiscal legislation, whereby the tax on such securities does not exceed that imposed on state funds. One thing advanced in favor of the idea of gaining admission into France of good Canadian securities is that it is apt to be an important help to the increase of commerce between the two countries, which some of us have been long looking in vain for.

The plan of reorganization of the Consolidated Lake Superior Company has now been declared in operation, the committee having this work in charge having entered into an agreement with the Canadian Improvement Company and with the Ontario Government rendering such feasible. The new company is to have, we are told, a clear working capital of $1,000,000 in cash, over and above value of raw or partially worked-up material on hand, and should it become necessary for the Canadian Improvement Company to raise money in addition to the maximum amount of its underwriting obligation, it has the power to receive for such additional sum first mortgage bonds of the new company, at 70 per cent. of their par value.

DRY GOODS ITEMS.

Messrs. Thomas Ogilvie & Sons, of Aberdeen, Scotland, have purchased the woolen business of the Wyld-Darling Company, recently burned out in Toronto, and will establish a branch here. The above-named firm, which is a very large concern in Great Britain, will retain, it is understood, the services of the larger proportion of the old staff of the Wyld-Darling woolen business, and hope to secure suitable premises shortly.

A CANADIAN GUARANTEED BOND,
Absolutely First Mortgage, to Yield
FIVE Per Cent.
TO THE INVESTOR. Particulars from
OSBORNE & FRANCIS. STOCK AND BOND BROKERS, Mail Building, TORONTO.

The W. R. Brock Company, Toronto, inform us that thay have a specially fine and up-to-date stock of new and seasonable lines at their temporary premises at 8 and 10 Wellington St. West.

T. Ogilvie & Sons, of Edinburgh, Scotland, who it was recently announced had purchased the woolen department of the Wyld-Darling Company, Toronto, have also bought the wholesale woolen and tailors' trimming department of Chas. Cockshutt & Co.

John Macdonald & Co., Toronto, are very busy just now in their house-furnishing and carpet department, their stock being fully assorted for the present house-cleaning period. They have a large store of linoleum in both 8/4 and 16/4, the variety of patterns being even larger than usual. Some very pretty designs are shown in inlaid linoleum, of two or three different qualities. Their stock of Crumm's prints is larger than usual, and is being sold at old prices. In their woolen department some special offerings are being shown both in worsted and tweed suitings for men.

FOR GROCERS AND PROVISION DEALERS.

The price of tapioca is rapidly rising, probably owing to the large consumption by the Japanese armies.

The Ontario Superintendent of Fairs is preparing to hold in Toronto about next November a fruit, flower and honey show on lines somewhat similar to the Guelph Fat Stock Show.

A tract of land of 1,000 acres is to be broken up this season, near Plum Coulee, Alta., for the cultivation of fall wheat, and the experiment is to be tried this year, we understand, on a large scale in the Territories.

The Thomson Line steamer, "Fremona," with a cargo of lemons and oranges from Messina and Sorrento, arrived in Montreal last Saturday afternoon, and moored at King Edward pier. The steamer has on board 69,135 packages of fruit. Of these she took on 31,150 at Messina and 37,985 at Sorrento.

Laporte, Martin & Cie., Limited, Montreal, have been incorporated with a total capital stock of $400,000, to carry on a general wholesale and importation trade in the grocery business. They will take over the business heretofore carried on in Montreal under the name of Laporte, Martin & Cie.

—Mr. Murray, chief of the provincial detective force, has been in Mount Forest investigating some recent fires, at the request of residents. While some included suspicious circumstances, there was nothing, Mr. Murray says, definite to regard as a clue.

—The fire chief, city architect and city engineer of Toronto have been appointed to report on the application of the King Edward Hotel for exemption of rentals upon areas in which to locate two pumping engines, with 2,000,000 gallons capacity a day and 100 lbs. pressure, and to have pressure up at all hours of the day and night.

—In St. John, N.B., a branch association of the Canadian Industrial League has been organized, with the following officers for the ensuing year: James Pender, president; W. S. Fisher, vice-president; H. B. Schofield, secretary; W. L. Hamm, treasurer; executive committee, Dr. Melvin, Frank White, C. W. Brown, Eben Perkins, Ald. Macrae, J. B. Cudlip, W. H. Thorne. Its purpose will be to benefit Canadian manufacturers, especially those of the Maritime Provinces, and to push the sales of their goods in the West.

—The Decimal Association, established to promote the adoption of a decimal system of weights, measures and coinage in the United Kingdom, offers prizes of £20 and £10, respectively, for the best two essays on the advantages to be gained by the adoption of the metric weights and measures throughout the British Empire, and on the best means for effecting the transition quickly and with the least inconvenience and disturbance to traders and the public generally. Essays must be sent in on or before January 1st, 1905.

—A few hot days in May have made a wonderful difference in the condition of ports on the more northerly of the Great Lakes. A letter of Monday last from Sault Ste. Marie, Ontario, says that the navigation of the Georgian Bay, which was hardly considered possible until the middle of May, was then open at the Soo: "Navigation is open with us, and we expect our first passenger boat through here to-morrow from Sarnia on its first trip to Port Arthur. Boats have been running up to Michipicoten since last week, and with the numerous boats plying our lakes, we look forward to a steady revival of business. Since the passing of the loan to the Lake Superior Company by the Ontario Government, confidence has been considerably restored in this neighborhood, and some changes in Queen St. property in the town have taken place. The eastern part of this province will know the beneficial results by the increased amount of trade going from this northern district before the season is over, and I feel satisfied will have no reason for regret that the Ontario Government took the stand they did."

CLEARING HOUSE FIGURES

The following are the figures for the Canadian Clearing House for the week ended with Thursday, May 12th, 1904, compared with those of the previous week:

	May 12th.	May 5th.
Montreal	$20,909,015	$20,837,689
Toronto	16,618,624	15,164,362
Winnipeg	5,420,466	6,394,972
Halifax	1,681,997	1,889,750
Hamilton	1,069,306	1,326,432
St. John	915,693	1,117,599
Vancouver	1,509,828	.....
Victoria	.....	500,552
Quebec	1,157,416	1,718,178
Ottawa	1,990,625	2,489,317
London	846,906	972,523

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

A FLYING TRAIN.

The general passenger agent of the Michigan Central Railroad, Mr. Ruggles, last week made known the official figures regarding what is called the world's record-breaking run of President Ledyard's special train, April 27th. The trip was from Niagara Falls to Chicago, and in one stretch of the trip a speed of 111.9 miles an hour was maintained for 3.73 miles. The previous best record in America was that of 95.1 miles an hour, on the Pennsylvania. The Michigan Central president and Mr. Newman, president of the Lake Shore road, had a dispute about the condition of their respective road-beds. This led to the flight recorded here.

The through time of this train from Niagara Falls, including stops, was 9 hours and 13 minutes, and, excluding stops, 8 hours and 22½ minutes. The average speed, excluding stops, for the entire distance from Niagara Falls to Chicago, 471.61 miles, was 60.87 miles, and, including stops, 55.31 miles. This was over what is known as the Canada Southern Railway line, which has one or two stretches forty miles long of absolutely straight track. The distance between Niagara Falls, Ont., and Windsor, 225.66 miles, was made in 191½ minutes, or at the rate of 70.70 miles an hour, excluding stops. The distance from Brownsville to Springfield, Ont., 5.20 miles, was made in 3 minutes, or at the rate of 104 miles an hour, establishing a world's record. From Detroit to Jackson the run was slow, and from Jackson to Niles, Michigan, 115.91 miles, an average speed of 62.09 miles an hour was maintained, 6.58 miles from Pokagon to Niles being run at the rate of 98.70 miles an hour.

THE Union Brewery, Limited, Montreal, capital stock $150,000, will take over the brewing business heretofore carried on in that city by the Union Brewing Company. Among the charter members are W. Wainwright and E. F. Lariviere, both of Montreal.

FINANCIAL CONDITIONS.

Aemilius Jarvis & Co., Toronto, in their letter of May 6th say:

A further tribute to the feeling of greater confidence in the financial world is the fact that, although the market continues to ease off somewhat and the downward swing appears not to have run its full course, still no great confidence is entertained by the bear party, and the depression is more apt to convey the idea of a normal and healthy reaction than financial unsoundness, this too in face of the fact that the movement has been assisted by continued litigation in the Northern Securities case, by extensive shipments of gold and by heavy Russian reverses. The speculating public are watching very closely the Steel situation, and it appears to be acknowledged that the market will be much influenced by the course of the United States Steel securities. Anything reliable as to their business for the current quarter it is impossible to obtain, yet the preponderance of opinion seems to favor the idea that the quarter's earnings will not be good. The last quarter's earnings were not sufficient to pay fixed charges and the whole of the preferred dividend, and, although this was duly paid, such a condition cannot last indefinitely. It would undoubtedly be good financing to pay the preferred dividend, which is cumulative, out of the large reserve for a reasonable period, but as the reserve became impaired, confidence in the future of the stock would be shaken. Any reduction of the dividend would cause temporary trouble to the general market, yet might in some respects be beneficial, as the chances are the rest of the market would break away from the influence the Steel stocks have been exercising over it. Our own market has shown lately much more proportionate activity than the New York market, more especially in investment buying, and it was noticeable that on two or three of the dullest days the American market has seen recently the transactions on our Board evidenced much more public interest.

TO GET SATISFACTION

From your steam plant is the crucial basis of economy to all manufacturers. A satisfactory steam plant is one that produces the greatest needed power at the lowest cost.

MONTREAL MARKETS.

Montreal, 11th May, 1904.

Ashes.—Some little aggregate of small lots ranging from 10 to 15 bbls., has come to hand by first Upper Canada boats, and the market is a shade easier, but $6.25 could still be realized for first pots; seconds, from $5.75 to $5.80. In pearls there is still an entire absence of business.

Dairy Products.—The tendency in the local cheese market is still downwards, and the Liverpool cables have shown further decline to 40s. for white, and 42s. for colored. Steamboat arrivals of Quebec makes have sold at the wharf at 6¼c., while finest Western fodders would not realize beyond 6¾c. per lb. Butter is again easier; boat arrivals of Quebecs sold this week at 15c. ex-wharf, and 15½c. seems to be about the extreme figure for finest fresh creamery.

Hides.—The amount of trading in beef hides is comparatively small, and prices are unaltered, dealers buying on the basis of 9c. per lb. for No. 1. In calfskins there is more activity, and prices are steady at 13c. for No. 1, and 11c. for

No. 2. Owing to the late, backward spring, receipts of new lambskins have been small, and the price has not yet been advanced beyond 10c.

Cements, Firebricks, etc.—The first vessel with new stocks is just in, and brings 385,446 firebricks, 3,200 barrels of Belgian cement and 590 barrels of English. New quotations are: Belgian, $1.70 to $1.95; English, $1.95 to $2.10. Owing to the surtax on German goods no receipts of cement from that quarter are likely for some time, and they could hardly be sold under $2.35 a barrel. Scotch bricks are quoted at $18 to $23, and English $16 to $20 per M. Fireclay, $6.50 to $7.

Dry Goods.—With the bright seasonable weather that has prevailed of late, business has continued to improve. Travellers are doing better, and mail orders are coming in quite freely. With the larger retail stores business has also been good, horse show finery being in demand. Money is coming in a little better, but farmers will not be as flush as usual this spring owing to the very unsatisfactory prices prevailing for butter and cheese. Not a change of note is reported in values.

Groceries.—The one notable feature in this line is the strength of the sugar market. After writing last week the local refiners established a third advance of five cents a cental on all grades, and a further advance is momentarily expected, as the foreign markets for both raw cane and beet sugars are still moving upwards. The demand is also reported pretty active. Little interest appears to be taken in molasses, and thus far only one direct cargo of about 900 puncheons has been bought for this market, reported at about 8½c., first cost. Teas continue to rule very firm in prices, and buyers seem disposed to hold off. Some moderate sales of Ping Sueys are reported to replace cheap Japans. The importation of an increased duty on teas in England has had a hardening effect on cheap and low grade and China and Indian teas of all kinds. Stocks of Valencia almonds at primary points are now said to be almost exhausted, and an advance of 3s. is reported. Late cables report some strengthening in shelled walnuts, with present quotation 10 francs per 100 kilos.

Leather.—A good many of the larger shoe factories are now busy on cutting material for fall orders, and leather dealers report improved enquiry. The export demand is also good, and first outgoing vessels are taking some very fair lots of sole and splits to Britain. Grained upper is firmer at 14½ to 15c., and for best Western splits 22c. would be asked. Quotations for sole are reported very steady on the basis of 23½ to 24c. for manufacturers' No. 2.

Metals and Hardware.—The prolongation of the strike among the plumbers, painters, marble cutters and other tradesmen employed in building operations is affecting city trade in these lines, and business as a whole is dsappointing. New stocks of sheets, plates, etc., are now coming to hand, but there is no very notable change in quotations. Boiler plate is quoted at $2, and tank steel at $1.90. Canada plates are still quoted at $2.25 in a jobbing way, and galvanized Canadas at $4 for 52 sheets; black sheets, $2.20 to $2.25; galvanized sheets, $4 to $4.25 as to brand. Bars are unchanged, and iron pipe is steady at $4.42 for inch. Lead is again a little easier at $3.35, and ingot tin at 3½ to 32c. Copper is steady at 13¾ to 14c.; spelter, 6c.; antimony, 7¾c. per pound.

Oils, Paints and Glass.—Some improvement is noted in the demand, most of the wholesale warehouses being busier than several weeks ago. Turpentine has developed some increased strength, with light supplies on spot, and single barrels are quoted at 85¾c. Fish oils continue dull and in little request. Castor steady at 8 to 8½c. Linseed easy at 45 to 46c. for raw, and 48 to 49c. for boiled. Paris green, 15c. in pound packages for domestic. Berger's ditto, 16 to 16½c. Leads are nominally quoted on the basis of $4.50 for Government standard, but continued cutting is reported. Reports from Belgium speak of a firmer market for glass owing to strike troubles, but local quotations are as yet unaffected. New stocks in this line are now beginning to arrive quite freely.

TORONTO MARKETS.

Toronto, May 11, 1904.

Chemicals, Drugs, etc.—Trade at present in operation here is steady and fair, but there is no special feature which can be pointed out at this time. Carbolic acid continues high priced, and so, comparatively speaking, does quinine, owing to the conditions, no doubt, in the Far East. Opium continues easy. In the British market the month has been a dull one in the chemical trade, with an unsatisfactory demand in all the home branches, while the export trade has scarcely been up to expectations. In the textile trades, however, it is hoped that some improvement, however small, cannot long be delayed. Heavy alkalies are dull. Bleaching powder sells slowly.

Dry Goods.—Not much change has taken place in the general dry goods trade since last report. A fairly active business is being done in spite of the necessary inconvenience left in the wake of the big fire, and in spite of the fact that a certain amount of trade has naturally gravitated to other centres. Prices for all lines of staples are as firm as ever. Prospects are good for a large season's trade.

Flour and Grain.—The market for ninety per cent. patents is firm at $3.60

THE COMMERCIAL

The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST

Reaches direct 90 per cent. of the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

Do you want to sell or increase the sale of your goods in these. THE BEST BUYING PROVINCES IN CANADA?

Estimated that 200,000 new settlers will arrive this year. Will the retail merchant offer them your goods?

Our advertisers our best references. We beg the favor of an enquiry.

THE HUGH C. MACLEAN CO., LIMITED, Publishers, Winnipeg.

Eastern firms should subscribe for THE COMMERCIAL and keep posted on Western trade

in buyers' bags, western or eastern freights. Manitoba flour is a little lower. Oatmeal is steady at the old price. Bran and shorts are firm. Ontario wheat is 1 to 2c. higher, and quite firm at the advance. It is scarce and wanted. Oats are from a cent to two cents higher, and in good demand. All the other grains are unchanged. Little business is being done, and receipts are very light, the farmers being busy seeding.

Fruits and Vegetables.—A normally active trade is going on. Strawberries and pineapples are both now plentiful, and prices are easier. Celery is becoming scarce. Oranges are a little firmer. Prices may be quoted as follows: Apples, 75c. to $2.25 per barrel, according to grade and quality; cocoanuts, $4 per sack; oranges, California navels, $2.75 to $3.25; Valencias, ordinary, $4 to $5.50; large, $6 to $6.50; lemons, Messina, 360's, $2.25 to $2.50; 300's, $2.75 to $3; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; dates, Sair, 3½c. per lb.; Hallowee, 4c.; figs, 8 to 12c.; tap figs, 3½c.; pineapples, $3 to $3.50 per case; strawberries, 15 to 17c. per quart box; Egyptian onions, $3.50 per sack; tomatoes, $2.25 to $2.50 per case.

Groceries.—Sugar remains steady at old prices. Canned goods are very strong, and so is tea, which is now in continued good demand. General business is normally good.

Hardware.—Prices remain practically unaltered, and an active trade is going on in seasonable shelf goods. In metals the movement is good, and prices keep about level. In Great Britain the prices of pig iron have been ruling fairly steady during the month, present values of Scotch being some 6d. per ton lower, and of Cleveland some 6d. per ton higher, than those current a month ago. A fair business has been passing; at present, however, there is not much doing, but stocks are low and producers are not anxious about making further sales, being well provided with orders for some time ahead, and the general position is thus considered fairly satisfactory. The higher-priced metals have only fluctuated moderately during the last month. Copper is about 10s. per ton higher, and is firm. Tin has fallen about 12s. 6d. per ton, and is at present easy. Spelter is practically unchanged, and is steady. Lead is 5s. per ton lower with buyers at present prices.

Merchants Fire Insurance Co.

Workman's Rights

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to explain our plan.

EMPLOYERS' LIABILITY ASSURANCE CORPORATION
MONTREAL —— TORONTO
GRIFFIN & WOODLAND,
MANAGERS.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policyholders and addition to Reserve.
$53,841.18 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1,800,000.00.

Hides and Leather.—Fair offerings of hides are coming forward, and the market keeps steady. Sheepskins are in very light supply, and the nominal price is $1.15. Calfskins have gone up a little. Leather is a little quiet throughout the country.

Provisions.—Large shipments into the city of butter are still the order of the day, and stocks are accumulating, with prices becoming easier. The cheese market has made no change, but is still quicter. The egg market is steady, though supplies are plentiful. Hog products are experiencing a good demand, which is likely to expand as summer weather comes on.

Wool.—Little business is being done at present, though a little unwashed new crop is coming in. Pulled wools are in slow demand.

THIRTY DAYS' GRACE

for the payment of Renewal Premium is invariably allowed by The Canada Life. During this period the policy remains in full force, and should the Assured die within it, the claim would be promptly paid whether the premium had been paid or not.

This has been the practice of the Company for over 50 years, and is but one of many valuable privileges

Allowed by The CANADA LIFE.

30 Days of Grace

for the payment of Renewal Premiums is one of the many privileges the SUN LIFE OF CANADA grants its policy-holders. Should the Assured die at any time within the days of grace the claim would be promptly paid, even though the premium had not been paid.

Protection from Loss.

The business of boiler insurance is an engineering business; the insurance is only a guarantee of the trustworthiness of the engineering services.

Measure the value of those services and then consider the guarantee. In doing this remember that EXPERIENCE, SKILL, and ABILITY are the determining qualifications of the value of those services.

Insure your boilers in

THE BOILER INSPECTION & INSURANCE CO. OF CANADA,
Canada Life Bldg., Toronto,

which has been in this business for nearly THIRTY YEARS.

Then Insurance.

—The three symbols of the imperial house of Japan are the mirror, the crystal, and the sword, and they are carried in front of the Emperor on all state occasions. Each has its significance. "Look at the mirror and reflect thyself," or in other words, "Know thyself," is the message of the mirror. "Be pure and shine," is the crystal's injunction, while the sword is a reminder to "Be sharp."—Leslie's Weekly.

R. G. DUN & CO.
Toronto, Montreal, Hamilton, London and Cities in Dominion, U.S. and Europe

Mercantile Summary

MR. W. POWELL, of Ottawa, in conjunction with New York capitalists, contemplates the erection of a million-dollar hotel in Ottawa.

A DISASTROUS fire took place at Fort William, Ont., on the 12th inst., when the C.P.R. elevator, No. B, was destroyed, together with more than a quarter of a million bushels of grain. The total loss was close to $500,000, mostly covered by insurance.

THE Telfer Manufacturing Company's paper bag and box factory, in Toronto, has been badly damaged by fire. The loss on building is estimated at $8,000, while that on the stock was about $10,000; both insured. The plant was not materially injured.

THE movement in favor of developing the copper industry of the Eastern Townships is gaining momentum. Mr. J. R. Woodward, of Sherbrooke, Que., with a view to the reopening and development of the copper-bearing properties scattered throughout that section of Canada, is urging the Quebec Government to aid in the establishment of a smelter in this vicinity. At present the ores have to be shipped for treatment to the smelter at Staten Island, N.Y., which costs $4.65 per ton, while if such a convenience existed at Sherbrooke, the cost of treatment per ton would not be much more than ninety cents. It is claimed that this reduction in the cost of treatment would give such an impetus to copper mining in view of the higher prices of that metal to-day as would lead to the early reopening and development of all the copper bearing properties, most of which are conveniently located in or near the different lines of railway running through the Eastern Townships to-day and centering at Sherbrooke. It is understood that the Government has promised to give the subject serious consideration.

IT is announced that everything is now in readiness for the transfer of the Soo properties, and that the plants will be in full operation within a short time. The following names, among the directors, have been published: J. T. Lee, president of the First National Bank; Francis B. Reeves, president of the Girard National Bank; Charles B. Hinkleman, capitalist, all of Philadelphia; John T. Torry, vice-president of the Mercantile Trust Company; Charles E. Orvis, President of the Canadian Improvement Company; Dumont Clarke, president of the American Exchange Bank, all of New York; Geo. B. Turrell, president of the Mutual Trust Company of Orange, N.J.; C. D. Warren, president of the Traders Bank Toronto, and Thomas J. Drummond, Montreal. Senator J. K. Kerr and Messrs. Cornelius Shields, of Canada, and Henry Ingall, president of the Franklin Bank, Philadelphia, are suggested for the remaining directorships. Mr. C. D. Warren will be president, Mr. Drummond, vice-president, and Mr. Cornelius Shields, general manager of the Soo plants. The charter for the Lake Superior Company is being applied for under New Jersey laws.

R. P. BUCHART, and other eastern capitalists, are about to erect cement works at Saanich, on the Tod Creek, near Victoria, B.C.

HON. Jules Tessier gives some interesting data regarding the Lake St. John district. He is president of the Lake St. John Colonization and Repatriement Association, which last year placed nearly 3,000 settlers around Quebec's great inland sea, 1,119 of whom came from the United States, and 1,482 from different parts of the province of Quebec. Not quite 200 came from old France, 73 from Sweden, 46 from England, 57 from Norway, and 64 from Belgium.

A DESCRIPTIVE pamphlet has been issued by Fisk & Robinson, New York, showing the advantages of the gulf ports by reason of their favorable location with reference to the Panama Canal. According to the "Manufacturers' Record," the exports through Southern ports amounted in 1880 to $261,000,000; in 1890 to $306,000,000, and in 1903 to $508,000,000. There is, says an American exchange,, no doubt that, with the completion of the Panama Canal, the growth of business of the Southern ports will be greatly accelerated.

Mercantile Summary.

A DESPATCH from St. John's, Newfoundland, under date 10th May, says that the seal fishery for 1904 has ended. The total catch was 284,470 seals, the weight of which was 5,786 tons, and the value $394,485. Twenty-two steamers were engaged this year in the fishery, one of which, the 'Elliot," was sunk. Last year the catch was 317,562, the weight 6,275 tons, and the value, $449,692. The light weight of the catch this year is due to the fact that the seals were small.

THE Mexican representatives, Senores Mendez and Armendaris, had a conference with the Minister of Trade and Commerce, at Ottawa, on Monday, about the proposed establishment of direct steamship communication between Canada and Mexico. The proposition of the Mexican Government is that Canada and Mexico shall grant a subsidy of $50,000 a year each for a line of steamers from Halifax to Mexico, and a similar subsidy of $100,000, equally apportioned, for a steamship line between Vancouver and Mexican ports on the Pacific.

MONTREAL shippers and harbor commissioners have been conferring with the Department of Marine and Fisheries with a view to urging speed on the Government's part in providing ice-breakers in the St. Lawrence, in order to prolong the season of navigation. The Dominion Government, it will be remembered, placed $300,000 on the estimates for this purpose. It is believed that a vessel measuring 200 feet long, 43 feet beam, and drawing 18 feet of water would meet the requirements, though some think that a large boat would be required for below Quebec. Messrs. Armstrong, Whitworth & Company, of Newcastle-on-Tyne, the builders of the "Ermak," report that experience with these ice-breakers so far has been very satisfactory, indeed.

Mercantile Summary.

AN order of sale has been asked for the South Shore and Quebec Southern or United Counties Railway.

A DESPATCH from Dawson of a few days ago stated that the Yukon river was practically free of ice, and that navigation had already begun, which is a little earlier than usual.

THERE was a devastating fire last week in St. Henri (near Montreal), which destroyed twelve or fifteen houses (where resided some twenty or more families, chiefly workingmen), besides several sheds, some cows, and a large amount of hay. The loss, which was only partially insured, principally on buildings, is estimated at about $100,000.

A GROCER in Brockville, named J. E. Hettenhausen, who came in 1901 from Smith's Falls, and bought out T. J. Medland, has assigned to the sheriff.——Henderson & Post, in the dry goods line at Prescott, since 1898, and latterly also carrying on a branch at Smith's Falls, are having a statement of their affairs prepared, it is said, by a Montreal accountant, in the interests of creditors.

THREE small late failures are reported in Quebec city. J. W. Pouliot, who has been engaged in making soap, in a limited way, for a few months, has assigned, and owes about $2,000.——Joseph Laliberte, furniture dealer, a sufferer by fire in March last, is heard of as compromising liabilities of $2,400 at 40 cents, cash, with the assistance of friends.——Elzear Lapointe, a grocer in a small way, offers 25 cents in the dollar, on liabilities of about $1,000.

J. TREMBLAY, of Tremblay, in the Saguenay district, was formerly a farmer, and five or six years ago went into business as a logging jobber, eventually also starting a store, wherein he handled principally groceries and provisions for the men working for him. Last winter he had a large contract for the getting out of logs for the Belgo-Canadian Pulp Co., which is said to have turned out badly for him, and he has assigned, owing, luckily, no more than $3,700. It is reported that a farm he owned was recently transferred to his son, and this is a matter which will likely be looked into.——Paltiel & Frere, a firm of Roumanians, who formerly peddled through the Saguenay district, and who opened a general store last spring at Murray Bay, with a branch at Chicoutimi, are reported in trouble as the result of a fire which destroyed their Murray Bay store in February last. They had $3,000 insurance, but it was in doubtful, presumably "underground," American companies, and there appears to be a serious question whether the same is collectable. They are reported as now compromising liabilities of about $8,000 at 30 cents, insurance policies, also, being transferred to creditors.——Upon demand, Petit Freres, grocers, at St. Hyacinthe, have consented to assign. Their troubles have been caused, it is said, by endorsations.

Mercantile Summary.

BRANDON, Man., is about to issue $90,000 worth of debentures for moving the pumping station and extending the waterworks system, also $42,000 for school purposes.

LONDON, Ont., Street Railway Company have decided to issue $50,000 of additional stock, and to increase the bond issue to the same amount, thus making the total stock and bond issue $500,000 each.

AN offer of 75 cents is being made to creditors on behalf of the estate of the late S. G. Morton, flour and feed dealer, Halifax, N.S., but the offer does not seem to meet with general acceptance. The liabilities are about $4,500.

CITY OF GUELPH
Tenders for Debentures.

The Corporation of the City of Guelph invite Tenders for Debentures as follows: -

City of Guelph Debentures payable in Guelph at the City Treasurer's Office under By-Laws as follows:—

By-Law No. 438—$23,972.59, 13 Debentures issued October 15th, 1902, payable in thirteen yearly instalments, re Iron Pipe Mills, Interest 3¾ per cent.

By-Law No. 441 - $14,600.00, issued December 31st, 1902, payable December 31st, 1932. Half-yearly, authorized by Ontario Legislature. Interest 3¾ per cent.

By-Law No. 455—$155,000.00 payable in 30 yearly instalments, issued April 15th, 1903. By-Law confirmed by Ontario Legislature. Interest 3¾ per cent.

By-Law No. 462—$5,003.04, issued July 15th, 1903, payable in 30 yearly instalments, School Debentures to build Public Schools. Interest 4 per cent.

By-Law No. 472 $30,000.00, issued November 2nd, 1903, payable half-yearly, June 30th, December 31st, to pay for Street Railway. Interest 4 per cent.

By-Law No. 476 $14,900.00, issued December 31st, 1903, payable half-yearly, June 30th, December 31st, payable December 31st, 1933. Authorized by Ontario Legislature. Interest 3¾ per cent.

Total amount $243,535.

The Tenders are invited to be sent in:—

1. For the several Debentures to yield the City par value, that is the tender to state what rate of interest will be required in order to yield the City par value for the Debentures

2. For the Debentures bearing their present rate of interest.

By the Municipal Amendment Act, 1904, passed by the Legislature of Ontario at its late Session, the Corporation can by By-Law increase the rate of interest on these Debentures. They reserve the right to do so in order to enable them to sell the Debentures at par should that course be deemed expedient.

Tenders may be for the whole or any portion of the Debentures.

Tenders addressed to Alderman George Hastings, Chairman of the Finance Committee, Guelph, to be received here not later than 31st May, 1904, at 12 o'clock noon.

Further information will be supplied on application to the undersigned.

No Tender necessarily accepted.

(Sgd.) GEORGE HASTINGS,
Chairman Finance Committee, Guelph.

Dated Guelph, 17th May, 1904.

A POEM ON CHEESE.

Our Montreal correspondent sends us the verses copied below. He says: "They are the outpouring of an English cheese man, and are said by exporters, just back from England, to describe the situation aptly. They may, perhaps, better explain the present state of the market to some of your country readers:"

OH CHEESES!

I wish they wouldn't ship 'em;
They are coming every day;
I'd pay half a cent a pound,
If they'd only stay away.

There are cheeses on the sidewalk,
And cheeses in the door,
Cheeses on the stairway,
And cheeses on the floor.

I really cannot sell 'em,
They are coming in too thick;
And every time I think of cheese,
It makes me simply sick.

There are cheeses in the office,
And cheeses on the scales;
Cheeses in the basement,
In boxes, sacks and bales.
I wish that I could bribe them not to send in any more,
For I can't help thinking of 'em, and it makes me very sore.

I wish that I could use 'em
For grindstones and for wheels,
I know that this will make you laugh,
But you don't know how it feels—

To have cheeses all around you,
Think cheeses in your sleep,
Taste cheeses when you eat your meals—
It's enough to make you weep.
But I've got to grin and bear it, and I've got to stand the smell,
Oh, I wish that I could roll them down the steepest hill in h—l.

An illustrated circular from the Merchants Dyeing and Finishing Co., who were burned out on Front street in the big fire, shows the new premises they are now erecting on York street just north of W. R. Johnston & Co.'s warehouse. The building is to be a very substantial one of modern construction, four stories and basement, the company having 45 feet front in it, and Garside & White 35 feet; the building is 110 feet deep. This company is fairly well acquainted with fire, their factory premises having suffered in February, 1902, again in February, 1903, and their warehouse in April, 1904. But they are always well insured.

Latest country failures in the province of Quebec are noted, as follows: U. Jeannotte, formerly a farmer, and for the past six or seven years doing a general provision business at St. Hyacinthe, has become involved, and is said to have assigned, showing liabilities approximating $10,000, with assets of only about $2,800. He has apparently been a poor manager,

Middlesex Four per Cent. DEBENTURES.

Sealed tenders endorsed "Tenders for Debentures," will be received at the office of the undersigned up to two o'clock p.m. on Monday, June 6th, 1904, for the purchase of $12,000.00 County of Middlesex Consolidated Debt Debentures, bearing interest at Four per cent., payable semi-annually, on the 15th of December and the 15th of June. Principal payable in gold on the 15th of June, 1924.

Each tender must state a lump sum, payable at the Bank of Toronto, in London, Ontario, on the 15th day of June, 1904,—where and when the Debentures will be delivered.

A. M. McEVOY,
Treasurer

County Buildings,
London, Ont., May 5th, 1904.

and not methodical or prompt in meeting his engagements for some time past. ——Joseph Gagnon, a small general trader of Thetford Mines, is reported insolvent with liabilities of $1,875.——For fourteen years, E. Madden has done a moderate-sized boot and shoe business at Valleyfield, and has had the advantage of a well-to-do father; but his assignment is now reported.——P. Bernard, general merchant, Notre Dame des Anges de Portneuf, was burned out last month, having insurance only to the amount of $4,000, while his loss has been variously

Tenders for Coal, 1904

Sealed Tenders addressed to the Provincial Secretary, Parliament Buildings, Toronto, marked "Tenders for Coal," will be received up to noon on Monday, May 23rd, for the delivery of such quantities and qualities of coal in the sheds of the following Provincial Institutions, on or before the 15th of July next, viz. :—Toronto, London, Kingston, Hamilton, Mimico, Brockville, Cobourg, Orillia and Penetang asylums; also the Central Prison, Mercer Reformatory, Deaf and Dumb Institute, Belleville, Blind Institute, Brantford.

Specifications of the qualities and quantities of coal required and forms of application may be obtained on application to the Department, or from the Bursars of the respective institutions.

Tenderers are to specify the mine of origin and the quality of respective kinds of coal, and furnish evidence on delivery that the coal is of origin specified, fresh mined and up to standard of trade grades.

Delivery subject to satisfaction of officers of Department of the Provincial Secretary, who may require additional deliveries, not exceeding 20 per cent., up to 15th of July, 1905.

Tenders will be received for the whole quantity specified or for the quantitjes required in each institution. An accepted check for $500, payable to the order of the Honorable the Provincial Secretary, must be furnished by each tenderer, and two sufficient sureties will be required for the due fulfilment of each contract. The lowest or any tender not necessarily accepted.

J. R. STRATTON,
Provincial Secretary.

Parliament Buildings, Toronto.

May 13th, 1904

is known as Western Canada. Of this immense area [500 miles wide by 1,000 miles long], about 20,000,000 acres have been located upon since 1870, and are now occupied by what is perhaps the most prosperous body of farmers to be found in any portion of America or in any other part of the world.

"To give some idea of the extent of territory and the paucity of population, perhaps no better comparison could be made than to show that instead of having about 6,000,000 of inhabitants, Canada would have between 50,000,000 and 60,000,000 of people if settled as thickly as Norway, which is the most sparsely settled of all European countries; if she were settled as closely as Belgium or Holland, she would be sufficiently large in area to contain the population of the whole world."

BOOKS AND PAMPHLETS RECEIVED.

Toronto Board of Trade Report:—This attractive pamphlet should have had earlier notice.* In addition to the usual civic statistics and a consecutive record of the proceedings of the Board and of its ten sections; lists of the personnel of the council and the various committees, it contains a report of the delegates to the Congress of Chambers of Commerce of the Empire and the president's address in full A feature which has not characterized previous annual issues is the description of Toronto as a provincial capital, a distributing centre, a gathering-place for tourists and conventions, a centre of education and culture. This engaging section of the book, the compilation of Mr. J. H. Woods, is illustrated with views of public buildings and principal streets. In these days when illustration is so common a feature of pamphlets and reports of all kinds, such a feature is especially welcome. And it leads one to hope that succeeding issues may contain something of the same sort. A pregnant paragraph of the president's address is that on page 28, where, in speaking of the water supply, Mr. John F. Ellis declares that "the supply of water all winter * * * in the high level districts has not been of a nature to grant adequate fire protection * * * The present state of affairs I regard as deplorable, and if not remedied speedily may lead to disastrous results." As indicating the activity of its committees, and of the various organizations within the Board or tributary to it, the fact that 780 meetings were held in its chambers during 1903 may be quoted from the report of the secretary; 304 of these were meetings of the Grain Exchange, 256 of the Mining Exchange—the remainder were those of sections and committees. The Wholesale Grocers' section met 33 times.

Economy in Lumber Cutting.

A prominent lumberman stated recently that, in his opinion: **Every gauge saved** on your saw meant **twenty cents per thousand** added to the value of your entire cut.

The ordinary **circular** cutting forty thousand per day is **6 gauge**. The **Band** never over **14 gauge**.

Its use therefore adds $1.60 per thousand to value of lumber produced.

Double Cutting-steam Feed Steam Niggers, Loaders, Kickers and Steam Setters — add larger percentage to daily cut reducing cost per thousand.

This Pony Band—Single or Double Cutting—using **15** or **16 gauge short saws** is within the reach of all. You should get into line—get posted —make the change—it's simple. Many hundred Bands running in Canada.

TORONTO'S REBUILDING.

The adjustment of losses by the April fire in Toronto still goes on; about four and a half millions of insurance has been apportioned and much of it paid. There is not much activity in the burned district yet, however. In but few of the lots of the fourteen devastated acres are preparations for rebuilding seen. A month has gone by since the fire; and, considering the briskness of business in that quarter in April last, one would have expected a more general attempt at a resumption of it in May. Is there any particular reason for this inactivity?

Yes, there is one thing that helps to explain why rebuilding is not more general. The city's building by-law is found by some architects to be too stringent; meetings and conferences have been held on the subject. The architects are divided into two camps, one of whom attacks and reviles the city architect, the other of whom defends and applauds his conservative regulations.

Another thing. The advanced insurance rates give people pause who are thinking of rebuilding, and stir up the architects, too. The making of more and wider passages through the burned district in the shape of streets and lanes in better proportion to the height of buildings is also a very necessary feature. But its consideration involves delay.

A high tax rate is a further thing to be considered: a dollar and ninety-five cents in every hundred dollars is not a light impost upon a man or a company whose property runs into tens of thousands of dollars in value. And then there comes the adjustment of leaseholds—yet another matter which implies delay.

Here are some considerations which must affect the mind of a man, the ruins of whose warehouse or factory still stare blankly at the sky on Wellington Street, Bay Street, Front Street. He may say to himself:

"I must have new premises, and that quickly, in order to hold my trade and to retain my staff of hands. Can I find them in some other part of Toronto? I am not bound to rebuild on this street, or even in this city. Other places in Ontario beckon me. Here, on Front Street, they are in no hurry to fix my lease; the underwriters have put up the rates of fire premium; the city regulations compel me to rebuild in a way that will add ten or fifteen per cent. to the cost of my building; labor is uncertain and the cost of building material advanced; there is nothing in the future of my business as far as I can see into it that will justify my spending in bricks and mortar on a down-town Toronto street the $100,000 insurance I now have in the bank."

Such a man is in a fit mood either to wind up his business and retire altogether, or to accept a proposal from Galt, Waterloo, Georgetown, Peterboro', or any other town which will offer—perhaps has already offered—liberal terms for his factory. If he be a manufacturer, he can get along without a factory in Toronto: an office and sample room in this city will satisfy him. The situation suggests, it seems to us, careful handling on the part of city authorities. Let us not drive capital and industry from Toronto by insisting on too high leasehold rentals at such a critical time. We have lost valuable industries before now by too great conceit and swelled-headedness on the part of our city fathers, who seemed to consider Toronto real estate precious and hallowed ground, and to forget that there were other stirring places in Canada.

As to the building regulations of the city, and their effect upon the man who intends to rebuild, it stands to reason that a lesson such as that of last month upon the reality of the conflagration hazard will dispose proprietors to rebuild more carefully and substantially than before, building by-law or no building by-law, even if the temptation of cheaper insurance for better building did not influence them. Of the two camps of architects, the ones who wish to rebuild with solidity and permanence, insisting upon restricted openings in walls, and the ones who are in haste to rebuild cheaply with as little wall thickness and as many wall openings as may be, our choice would assuredly be the former, for we have already contended for solidity and care in reconstruction.

Besides, our architects, many of them, have something to learn about fire-resisting construction. Discoveries in design and material have been made during the fifteen to forty years since the present burned district was covered with buildings. Conflagrations in the United States and elsewhere have in the meantime shown that steel covered with terra cotta or concrete is a good fire-resistant; that cement or concrete walls can be depended on to stand where stone would crumble; that brick is a more trustworthy material for inner or outer walls than stone. And our own big fire

has shown the value of thick brick walls, and especially of dividing walls with no apertures in them; the value of water-curtains; of private fire brigades; of metal-covered window shutters; of substantial roofs of other material than wood. Certainly it has given us this lesson: that a stand-pipe in every mercantile building is a good thing.

The city authorities of this place have it in their power to help or to hinder the rebuilding of the burned quarter. 1st. By a sympathetic attitude toward the sufferers who are, perhaps, wavering whether to rebuild or no. 2nd. By liberal treatment in the matter of leasehold—by half-term leases, a sliding scale, or what not. 3rd. By timely conference as to new streets or widened lanes that shall make future fires less destructive. Above all, let action be prompt, so that we may encourage rebuilding.

REBUILDING MATERIALS.

Commenting on the fire waste of the previous year, one hundred and thirty-six millions of dollars, this journal said, in January, 1900: "We hear much of the skill and value of American firemen and apparatus, and it is largely deserved; but we do not hear so much of the care and common sense with which Americans build premises, or supervise them. The continued fire-waste is a blot upon the intelligence of the American people, and of Canadians as well." Some progress has been made in the United States, however, in construction methods of late years. It will be profitable for Canadians to observe and probably to copy.

What materials should be used in rebuilding Toronto's burned district? In 1903, there was completed at a cost of $1,500,000, the Continental Trust Company's building in Baltimore. In this a steel skeleton frame carried the walls of each story. The floors were of flat hollow tile arch, the partitions four-inch hollow tile, the columns surrounded with a fire-proofing of flat tiles. The outer walls were of brick.

This building passed through the conflagration of February, 1904, in Baltimore. Every vestige of ornamental work, surface flooring, interior finish, was destroyed and consumed. But the architect of the building, D. H. Burnham, of Chicago, who examined the structure after the fire, reports that he found "its steel structure from basement to roof intact and good as the day it was put up. This applies to the supporting columns, girders, and joists. . . . . The structural parts of the floors of the building are unaffected and need no removal. I advise you at once to proceed to repair the building." The vice-president of the company, who, along with engineers, also examined the building, declared "the structural parts to be in superb condition," but everything else to be a total loss.

It was stated by a group of engineers as a result of examination into various buildings which had been swept by the Baltimore fire, that the steel skeleton frame construction, with its proper protection encasement of burnt clay, has withstood the severest and supremest practice-test to which any construction has ever been subjected. Among these authorities are E. C. Shankland, of Chicago; Corydon T. Purdy, of New York, and William B. Parsons, engineer of the great new subway, of the latter city

In the opinion of Mr. J. C. Bayles, who inspected the burned district of Baltimore in company with Mr. Woolson and other experts, "the most important lesson to be drawn from the Baltimore fire is that of the exposure hazard. Rising sheer from the widespread area of devastation are a number of the so-called fireproof type. As regards a fire originating within their own walls, they are fire resistant in high degree, but by reason of their size they present a great area of wall space to the attack of flame from without. He tells the New York Times that:

> "It is the unanimous opinion of the fire engineers whom we have met, that had the Calvert, the Equitable, the Continental Trust, and the few other steel frame buildings in the city been provided with efficient window protection, such as wire glass in metal or metal protected frames, with some type of fire resisting shutters, they would have suffered no more serious damage than the clipping of corners from the stone facings of their lower floors, and some of them would have escaped that. On the first attack of flame from without, these structures took fire at their unprotected windows on several floors at the same instant. The fire swept through them *like water through a sieve*; and instead of standing as invulnerable barriers to the spread of the conflagration, they transmitted it to the buildings beyond. Their burning furniture inside converted them into furnaces, and every window to leeward became a blowpipe nozzle, pouring out an irresistible tongue of flame to reach and consume what lay beyond."

Some of our Toronto people have been in Baltimore since the fire; insurance men and architects have been there; we have not heard that any of our builders went down. In view of the valuable lessons to be learned it is desirable that a committee of our engineers and architects should investigate the burned buildings and satisfy themselves as to the fire-resisting character of these and other materials and devices. A correspondent in Montreal, in urging us to "advocate, and keep on advocating, the building up of the burned district of your city with modern fireproof material," adds that: a deputation of Toronto officials might go to Cincinnati, Ohio, and see the sixteen-story Ingalls building recently built of reinforced Portland cement concrete. An Ottawa subscriber sends us a cut of the new arts building of the University of Ottawa, now under construction, to be built of solid reinforced concrete, veneered with Indiana stone. The resolve to use this material, he tells us, arose from Father Emery and some other officials of the College going to visit the States and being shown some *really* fireproof buildings while there.

THE BOOM IN WINNIPEG.

There is a boom, of pronounced proportions, in Winnipeg real estate. The "Commercial" stands up for genuine progression rather than for a bolstering up of the booming element. For this reason the remarks of that paper in a recent issue upon the present state of things in Winnipeg will prove of interest, and should give pause to those who are prone to lend a helping hand to the wild inflation which seems to be now the object of many parties. The article in question, after pointing out the differences between the conditions now existing and those in 1881-2, just before the collapse, and acknowledging that the present boom is based on the foundation of a fairly well organized city, with a large and growing country contributory to it, goes on to show the dangers as they now exist. Five or six years ago Winnipeg had less than fifty men, firms or corporations in the real estate business, and these were practically all of good reputation and in strong standing. At present the city possesses nearly

500 recognized real estate men, with at least another 500 "hangers-on."

"Three-fourths of the entire number," contends our contemporary, "are not only unnecessary, but simply barnacles, sucking the life blood out of the city's prosperity, and gnawing at the vitals of the legitimate real estate interests of the city. The city is supporting at least 750 useless loafers, who contribute nothing towards the city's upbuilding, but live and wax fat upon the same. Of that 750 at least 500 do not contribute one dollar a year towards municipal taxation. Such is the mixture now engaged in causing real estate inflation, and making, and adding to, future burdens for industrious citizens."

The "Commercial" believes that the present ratio of increase in Winnipeg's population, which, owing to the efforts of this army of real estate men, and to the effects of the Dominion Exposition, is likely to reach 100,000 by the end of the present year, is too artificial to continue for long, and that such a number is more than a purely distributing commercial centre can carry. Some other ground-work, on which the population can depend and keep on increasing, must be found or a backward movement, it thinks, is inevitable. To obviate such a current setting in, manufacturing industries on a large scale are a necessity. But (here comes in the rub) under present boom conditions their location in Winnipeg would be madness, as artisans would insist upon double or treble the remuneration usually given their class in the east.

So far central business property has not as a rule been hoisted above a fair present or prospective value, but unimproved property around the city has been inflated to ridiculously high prices, and while this lasts it will be impossible for an industrial population to obtain comfortable, moderate-priced homes. The reliable real estate interests, adds our contemporary, are not responsible for this; it is the work of the irresponsible boomster.

BUSINESS IN NOVA SCOTIA.

Business conditions in Nova Scotia vary according to the district and the industry therein represented. Cape Breton has had a particularly trying winter, but the clouds appear to be lifting, and a more encouraging outlook now presents itself. In the boom times of the Dominion Iron and Steel enterprise merchants stocked up liberally with goods, and not a few appear to have stocked also something less remunerative, and which, unlike the goods upon their shelves, vanished altogether when the slump in the stock market took place. Then came the smallpox epidemic of last winter, which at some points led to a practical suspension of business for a time. Naturally the spring months found some overdue balances against retailers on the books of their supply houses, and had not a good deal of consideration been shown, the list of failures might have been large. Such accounts appear to have been carefully nursed, however, and now collections are much improved, some payments being received from unexpected sources. Wholesale houses are, however, showing a wise discrimination in the matter of further indebtedness. There is no doubt if they supplied all the demand for goods as freely as they would have done a year ago the volume of their sales would be much larger than at present. In cases that we have been told of retailers have been advised by letter that it would be better business to devote their energies to the collection of accounts rather than to the sale of goods.

In Western Nova Scotia times are good. The fisheries have opened well, and, as prices of both lobsters and cod are high, there will be a lot of money in circulation in the towns and villages along the shore. In the Valley of Annapolis, we are told, over a million dollars was netted by the farmers on last autumn's crop of apples. The winter's cut of lumber was large, and whether the speculators make or lose the people generally have benefited. There is not a factory or mill in the Province that is not fully employed, and many of them are seeking to increase their working staffs. Building does not promise to be as brisk as last year, but still it will probably be an average season in that respect.

Halifax advices of Monday last tell us that orders have been received by the management of the Dominion Iron and Steel Company at Sydney to relight the open hearth furnaces, now idle, and put the blooming mill and other departments on double shift. These instructions are taken to mean that the company has booked large and important orders for the output of billets and rods.

THE TRUST COMPANY IDEA AND ITS DEVELOPMENT.

(2)

THE CANADIAN TRUST COMPANY.

The history of trust companies in Canada was for some years practically the history of one company, the Toronto General Trusts Corporation, which was organized in 1882 under special charter granted by the Government of Ontario. From its incorporation it has enjoyed the confidence of the Government and courts of the Province; it invests the court funds of the Government in mortgages guaranteeing the principal and interest, and has full control and management of all lunatic estates in Ontario. The company has invested for the court over $6,000,000, and has assumed for the public and the courts trust and estate business amounting to over $40,000,000. In 1898 the company absorbed the Trusts Corporation of Ontario. In 1901 an important branch was opened in the Province of Manitoba, when the company acquired the business and assets of the Winnipeg General Trusts Company, and in 1903 the company absorbed the Ottawa Trusts and Deposit Company, and established an office in the capital city of the Dominion. The capital stock of the company stands at $1,000,000, all paid up, with a reserve of $300,000. From its inception the policy of the management has been dictated by a high sense of its paramount obligations as trustee. It has not used its wide powers except as incidental to the purpose for which it was created. It has not risked its character and capital by underwriting the stock of industrial enterprises; it has not received deposits.

There are to-day seventeen trust companies in Canada, counting the branches of the Toronto General Trusts and the Royal, the Eastern and the National Trust Companies all in as separate institutions. Of these, five are in Toronto, two in London, Ont., one in Ottawa, one in Vancouver, one in St. John, New Brunswick, two in Montreal, four in Winnipeg, and one in Halifax. Some of the existing companies are closely associated with a loan company, and trust and loan companies appear under the same headings in the Government reports and some of the City Directories.

It is not impossible that the American type of trust company may find a foothold in Canada. The trust company charters that are granted by the

Dominion and Provincial Governments contain very wide incidental powers. There is nothing to prevent a trust company holding one of these charters from making a living by one or more of their powers without doing a trust company business. If any new trust companies were organized to-day in Ontario they might be forced to make a living out of something else than the business of executor and trustee. Some of the existing companies have shown a tendency to depart from the more conservative line of policy. Public opinion is unformed, and no general principles appear to have been laid down to govern legislation in the various Provinces.

Canadian legislation affecting trust companies is generally in an incomplete and tentative condition. Charters are granted by the Dominion as well as the Provincial Governments, and there is no understanding between the authorities as to the powers which shall be granted. But inasmuch as the control of the courts lies within the jurisdiction of the Provincial Governments, a company possessing a Dominion charter must obtain an order-in-council from the Province before it can act as trustee and administrator under the order of the court. The Province of Quebec, like the State of Louisiana and most European countries, is governed by laws founded upon the Roman civil code, under which the old rule still obtains that a corporation cannot be a trustee; consequently no corporation can be appointed executor or administrator by the courts of this Province. The old Roman office of curator still exists, and individuals are appointed trustees by the court under this title. Ontario and New Brunswick are the only Provinces which have passed a general law affecting trust companies; and in both cases this general law is incomplete. In Ontario, trust companies are governed by the Trust Company Act and the Loan Company Act, as well as the General Companies Act. The provisions sometimes conflict, and are liable to different interpretations.

Manitoba is the only Province which has expressly prohibited a trust company from receiving deposits. (1) The Province of Prince Edward Island in 1900 provided for the requirements of that Province by creating the office of the Registrar of the Court of Chancery, a corporation with perpetual succession. Trustees and administrators may transfer their trust to the Registrar, and the court is authorized to appoint the Registrar as trustee (2); but there is not much business done in his name. Where a trustee dies, property is frequently vested in him as an interim trustee; mortgages are sometimes taken in his name, but not to any great extent (3). The New Brunswick statute (4) authorizes the appointment as trustee of a trust company which is approved by the Lieutenant-Governor. The company is subject to inspection at any time, and is required to deposit with the Receiver-General such sum of money or amount of securities as he may deem sufficient as security for the proper performance by such company of its trusts within the Province. A trust company may not issue debentures.

The Ontario Statute (5) provides that the High Court may appoint a suitable person to investigate the affairs and management of a trust company, and the Lieutenant-Governor may appoint an inspector to examine the affairs of such company and report on the security afforded to those for whom its engagements are held; and the Lieutenant-Governor-in-Council may refer an application for incorporation to the High Court of Justice for the opinion of the Divisional Court as to the necessity for incorporation of the company having regard to the business to be done, and companies already incorporated and doing business, and whether public convenience and advantage would be promoted. The court shall receive affidavits filed by any parties interested and hear counsel, and if the opinion is unfavorable to the proposed company the application shall not be proceeded with. This provision, however, does not appear to apply to companies who have obtained a Dominion charter.

It will be seen that at the present time the general spirit of legislation in Canada is adverse to the American type of trust company; and if there is no departure from the present policy which has guided legislation, it is not likely that the banking business will be invaded or that trust companies will be allowed to multiply beyond the wants of the State, so that to make a living they will be forced to take up other lines of business. Some of the existing companies may find it difficult to keep strictly to the one line of business, but the mass of the public is still uninformed, and there is a rich harvest to be reaped by educating the people in the useful services to be rendered by the trust company as a trustee.

THREE DECLINING EXPORTS.

Firewood, tanbark, pot ashes, are three items which used to bulk pretty largely in Canada's exports during the earlier years of Confederation, but the sale of which has very greatly declined. The change is natural and proper. Canadians have learned that there are better uses for our woods than burning them. It grieves one to remember the thousands of cords of beautiful woods that used to be sold for fuel to steamboats on the western lakes and rivers forty, and even thirty, years ago. Dainty whitewood, bird's-eye maple, elm, ash, beech, butternut and hickory—fifty cents a cord for the first; a dollar-fifty for the last-named. The export of firewood to the United States still goes on. In 1873 the quantity was 263,000 cords, valued at $2.75 per cord; it came down to 118,000 cords at less than $2 a cord in 1896, and to 48,815 cords at a higher price last year.

Bark for tanning is the second item of this triad; that is to say, the bark of the hemlock tree. In the days when pine was plentiful, close to the lakes, and when pine and oak were the woods in great request, the hemlock wood was despised, and thousands, perhaps millions, of hemlock trees were cut down for the sake of their bark alone, to be used by Canadians or else exported for tanning purposes. For a long time a liquid extract of hemlock bark was largely produced in Quebec and New Brunswick. This was exported, too, to the extent of two to three hundred thousand dollars a year, and continues to be exported still, but in a small way. The value of what was sold for export in 1881 reached $481,000; it has come down now to $74,816 last year, all of which went to the United States. In a few former years we shipped hemlock bark to the United Kingdom—1,114 cords, valued at $16,969 in 1877, for instance—and several times at long intervals to other countries. Hemlock has been slowly coming into the market for building purposes, since it possesses great strength of fibre, and since people have discovered that they cannot use pine

for everything, as they practically did for many years.

Ashes, pot and pearl, we described not long ago, in answer to a correspondent, as the lixivium of the ashes made from our forest woods, barrelled up and sold abroad at the price of from $23 to $32 per barrel, for use in manufacturers and the arts. In twenty years, ended with 1888, we had realized between eight and nine millions of dollars from this source, but of late years we only get $50,000 a year, so much is the export reduced. We Canadians as a people have learned that this process of using up our forests was not economical —and was only justifiable because of settlers clearing their land—and that there are better uses of our woods than to burn them to ashes. Would that we might learn also that there are better uses for our dwellings and warehouses than to let them burn at the rate of millions a year.

This enquiry about potash from Portneuf, and a letter received not long since from England asking about the export of hemlock bark extract, coupled with the fact that the Blue Book of Exports for 1903 was in use at the moment on the desk, led the editor to suppose that his readers may be interested in these three items of ashes, firewood, and hemlock bark, side by side in the return under "Produce of the Forest, Exported." Their declining export is not to be regretted, for it was extravagant rather than otherwise. At any rate, the changes in the uses of our woods indicate the progress of the country. Forestry, the conservation of our forests rather than their wasteful denudation, is occupying attention, as a reaction from the prodigal uses of earlier days. And so the reduction of these three items of export from two millions of dollars a year in the aggregate to three hundred thousand last year needs not be deplored. It is no longer a reproach, as it used to be, that this is "a wooden country." We realize twelve dollars the thousand for hemlock wood to-day; twenty to forty dollars per thousand for basswood, elm and ash; thirty dollars the thousand for chestnut, butternut and hickory for building purposes and for manufactures. And this is better than converting them into ashes or selling them abroad, as used to be done, for firewood.

AGRICULTURE IN BRITISH COLUMBIA.

The great mining and fishing industries of Canada's Pacific Province have occupied so large a share of public attention in the past that its agricultural possibilities have been in some measure relegated to the background. This is often the case, it is needless to say, in a country where prospective wealth from mining forms such an alluring temptation, and where the majority of new settlers do not readily take to the generally more monotonous or less exciting requirements of farm life. Until the last few years agricultural operations in British Columbia were conducted, as a rule, in a haphazard fashion, which, together with the difficulties met with in the clearing of land in many sections of that Province, oftentimes discouraged their authors, and led them to abandon their enterprises.

But a new era seems to have set in. British Columbia has not only tracts of very rich soil, but a climate which admits of the cultivation of a wonderful variety of products, many of them of great value. And this is an asset which increasingly draws within its boundaries many a man who has already made money in the less auspicious surroundings of Manitoba and the North-West. Then, again, the rapid growth of the latter regions in recent years provides a large and profitable market for articles these cannot produce for themselves, but which flourish amid the milder conditions of the Pacific slope.

The Year Book of British Columbia, recently issued by the Provincial Government, gives some very interesting information upon the subject of recent agricultural development. In the interior, we are told, with the exception of the Okanagan district, wheat, though sufficiently hard for other purposes, is only grown for feeding, owing to the absence of milling facilities. Oats, however, is grown everywhere, and the consumption is large. The quality is good, and oatmeal and rolled oats made therefrom hold a high reputation. The growth of Oriental markets will mean a good deal to British Columbia in the matter of grain. The country as a whole is well suited to sheep raising, but coyotes, their natural enemies, are disagreeably numerous, especially in the southern interior, and the present absence of local woolen mills renders their care comparatively unprofitable. The interior is adapted to horse breeding on a large scale, and these have lately increased materially in value. Many sections are most admirably adapted to dairying, and this is an industry which has made gratifying progress, but it has until quite recently been overshadowed in importance by live stock. Poultry-raising offers great inducements, too, as both eggs and carcases fetch a high price, and the climate is especially suitable. But, perhaps, the greatest progress now being made in an agricultural direction in British Columbia is in fruit-growing, for which there appears to be practically an unlimited market in the climatically less favored regions further east. In the Okanagan Valley, more particularly, where Lord Aberdeen is the possessor of splendid apple orchards, rapid strides are being made. Besides apples, excellent returns are realized for plums, prunes, pears and all small fruits, while in certain locations near the Lake of Okanagan, such tenderer fruits as grapes, peaches, and apricots do well. There can be little doubt that the possibilities of British Columbia in the way of fruit and mixed farming loom up big on the horizon of Canada's realizable resources.

OUR HALIFAX LETTER.

There has been a great increase in the amount of through freight handled at the I.C.R. terminals here during the past season, and also in the number of passengers landed by the Atlantic liners, as compared with 1902-03. During the six months—December 1st to May 1st—8,518 cars of deals and other lumber were loaded. Lately there has been landed at this port large cargoes of sugar, which were weighed and forwarded at the rate of ten carloads a day. Over twelve thousand passengers from Europe were landed here during the season, which is by far the largest number on record.

The Provincial Government has appointed Mr. C. R. Coutlee, of Aylmer, Quebec, to the newly-created office of Good Roads Instructor. Mr. Coutlee is a member of the Canadian Society of Civil Engineers, and has had considerable experience in the construction of roads. His appointment has the approval of the Good Roads Association. Some years ago a brilliant, but erratic, doctor created much excitement in some of the towns of eastern Nova Scotia by appearing upon the streets with rake and shovel and persisting in improving the thoroughfares on his own account. He came into violent collision with the authorities, and on one or two occasions suffered imprisonment, which but served the more to call attention to his crusade. In the town of Truro at the present time, a number of leading citizens are banded together in a club, one of the rules of which is that each member must rake the stones off that portion of the street which may be allotted to him by the committee in charge. At

the last meeting, a large number, including the Mayor of the town, became members. In Halifax, also, there is quite an agitation for more tidy streets. The Acadian Recorder has had a number of editorials on the subject, and has succeeded in arousing considerable interest in it.

Some months ago a wealthy citizen bequeathed several thousand dollars towards the founding of a Home for Aged Men. A committee formed to take advantage of this provision having received substantial subscriptions from other sources, lately purchased a site and are now asking that payments be made at the Union Bank to Mr. E. L. Thorne, honorary treasurer. Applications for admission to the institution have already been received, and in order to make progress, it is necessary that the amount subscribed should be placed at once at the disposal of the committee. So far, no contributions have been received from any one outside the city, although the institution is intended to be for the province as a whole.

Two Halifax firms and a number throughout Nova Scotia lost heavily last week through the failure, in Boston, of the big sugar commission house of Whitney, Poulsand & Co., whose liabilities totalled nearly half a million, with assets of only $413. The firm operated chiefly in sugar, but also handled considerable lumber and fish from this province. The Nova Scotia firms affected are strong ones, and well able to bear their losses.

Arrangements are now complete for the tercentenary celebration of the landing of Sieur De Monts, at Annapolis, Nova Scotia, in 1604. It is proposed to erect a monument in honor of De Monts, and the Dominion Government will be asked for an appropriation. The celebration is to take place next month when a French, a British, and a United States warship will participate.

The first factory in the province to manufacture enamelware was started at Amherst last week, in connection with the Amherst Foundry Company. It is said there is only another of the kind in the Dominion. This department, which is in charge of Mr. Fred. Schuler, who has had many years' experience in the United States, will employ 50 hands, and will make bath tubs, sinks, preserving kettles and similar classes of goods.

A public meeting was recently held at Sydney at which it was decided to take steps to bring about the establishment of a shoe factory and tanning establishment at that place. A board of provisional directors was appointed to organize the company, which is to be capitalized at $35,000, and it seems not unlikely that the project will be carried through.

Work at the Joggins' Colliery has been partially resumed. The men have five weeks' arrears of pay due them, and last week they sent a delegation to interview the local Government to see if steps could not be taken to ensure payment. What transpired was not made public, but the men decided to put sufficient hands at work in the mine to prevent the destruction of the property through accumulation of gas and water. In the Supreme Court, last week, the mortgage was foreclosed, and James Rodger, of Montreal, was appointed liquidator.

Halifax, 16th May, 1904.

QUEBEC AND LAKE ST. JOHN RAILWAY.

The annual general meeting of the Quebec and Lake St. John Railway Company was held on the 13th inst. in Quebec. By the report read by the chairman, we see that the number of passengers carried during the year on the whole system was 247,905, and the number of tons of freight 318,730. The dairy industry of the Lake St. John region continues to show gratifying results, the quantity of cheese carried by the railway in 1903 having been 2,318,276 pounds, as compared with 1,711,000 pounds in the previous year. The company's engineers have now completed the survey of the proposed branch from the main line, near the River Jeannotte, to La Tuque, for which the Dominion Government have already voted a subsidy. This branch will give access to one of the largest water-powers in the province, will develop 12,000 miles of timber limits, and a very large area of agricultural land. Some portion of a proposed branch also from Roberval towards James' Bay are expected to be placed under contract this year. There has been a satisfactory progress in the colonization movement to the St. John region, no less than 2,927 new settlers and their effects having been carried into the district during the year, of whom 1,114 were from the United States.

The following were elected officers and directors for the ensuing year: President, Gaspard LeMoine, Quebec; first vice-president, Wm. Hanson, Montreal; second vice-president, John Theodore Ross, Quebec. Directors: T. A. Piddington, E. Beaudet, Hon. P. Garneau, Hon. Jules Tessier, H. J. Beemer, Charles A. Hanson, Edwin Hanson and F. W. Ross; also S. N. Parent, Mayor of Quebec, ex-officio; Hon. Judge J. A. Gagne, representing Chicoutimi, and Alderman George Tanguay, M.P.P., (representing the Provincial Government.)

TRADE IN GROCERIES.

Some little improvement has begun in the movement of general groceries since the opening of navigation, but the volume of business even now cannot be said to be large. Another advance of 5c. has taken place in sugar, in sympathy with the strong statistical position in New York, where supplies are considerably smaller than this time last year, and that market has no doubt been affected also by the reports of premature heavy rains in Cuba. The movement from the local market to outside country points is very fair. Still, higher prices in the Canadian market are not unlikely. European beet is held at higher figures, too. Molasses and syrups are also very firm, though some fairly large shipments of New Orleans molasses are now arriving in Canada.

A very firm feeling prevails regarding canned goods, and this is increasing. Fair stocks of tomatoes remain on hand, but supplies in other lines, notably corn and peas, are becoming very deficient. There is an improved demand for fruit, which is held at steady prices.

Much interest is still maintained in the tea market, which continues strong, with a good business being transacted. Some first samples of Japans were received in New York this week. The increased duty on tea, in Great Britain, amounting to 2d. per pound, has caused an advance in price to the consumer, one consequence being an increased demand for proportionately low-priced teas. Reports from London state that Indians are in increasing demand, and medium to common qualities realize a lower price. Ceylons have also been in good request, especially the poorer grades, of which the values have already risen slightly.

In dried fruits, no particularly noteworthy feature calls for comment, excepting, perhaps, the increasing strength of currants, due largely to the apparently authoritative rumors that the Grecian Government is in earnest in its proposals to take immediate steps for the benefit of the grower. Trade in California fruits is described by most parties as very dull, though prunes seem to be holding their position. Reports from Asia Minor speak of damage to the Sultana raisin crop, through cold, and somewhat higher prices are looked for.

THE FAMOUS ROSSLAND CAMP.

A very fair idea of the activity of Rossland as a mining camp is obtainable by perusing the resume of the work for 1903 of the Rossland Board of Trade, of which Mr. Lalonde has kindly sent us a copy. It is, in fact, the report of the retiring president of the board, Mr. A. H. MacNeill, supplemented by statistics which are the compilation of Mr. A. B. Mackenzie, the secretary. The meetings of the Associated Boards of Trade for the Kootenay District are referred to, the first being at Fernie in March, the second at Rossland in December. And the September visit of the Canadian Manufacturers' Association is described with warmth. The various subjects considered by the board embraced tariff in lieu of bounty on lead; railway freight and passenger train improvement; the imposition of duties upon rough lumber from the States, as a protection to the British Columbia mills; a bounty on zinc; the provincial mineralogist's department.

Some particulars are given respecting the effect of the encountering large bodies of high-grade ore in the lower levels of the Le Roi mine; of the Government bounty; and the rise in price of silver, on the mining interests of Rossland and the district tributary to her. It is a year or more since the Elmore Oil Company began the erection of a concentrating plant at the Le Roi No. 2 mine; and somewhat later the Rossland Power Company went ahead with a concentrator for low grade ores from the War Eagle and the Centre Star. This is built near Smelter Junction, and its initial capacity is to be 200 tons in twenty-four hours. It is a water concentration mainly, the material is automatically handled, and the plant—the first of its kind in British Columbia—is of the "level site" type, instead of the usual hillside type. The motors are to turn out close upon 500 horse-power, and the plant is expected to start reducing this spring.

From the statistics supplied, we select the following, as being probably the most interesting to our readers. The estimated value of mineral produced, in the districts of Southern Kootenay and South Yale, in 1903, are thus given:

	Quantity.	Value.
Gold, ounces	204,147	$4.219,718
Silver, ounces	3,471,421	1,839,953
Copper, pounds	24,866,977	3,332,175
Lead, tons	10,168	489.793
Total metallic production		$9,881,639

It is claimed that Rossland produced more than forty-three per cent. of these quantities, her share being $4,251,625. The number of men employed in the principal mines of the camp last year was 1,041. Among the development work of the year in the Rossland camp was 13,025 feet of diamond drilling in four mines, the Le Roi No. 1 and 2, the Centre Star and the War Eagle; drifting and cross-cutting was done in all of nine prominent mines; shafting in the White Bear, Le Roi, Spitzee and Jumbo. There was an output of 366,625 tons of mineral from sixteen mines, the Le Roi putting out just half this quantity. The division of this total into various values was as under: Gold, $2,856,469; silver, $96,864; copper, $1,004,309. The disparity of this aggregate of three metals ($3,857,642) with the total above quoted ($4,251,625), arises from the output of the Velvet mine, and the Le Roi No. 2 being stated in the list as gross values, and not submitted into gold, silver, and copper values.

Finally, we quote from pages 8 and 9 the comparative yearly output in tons and value of Rossland Camp for the past ten years:

Year.	Tonnage.	Value.
1894	1,856	$ 75,000
1895	19,693	702,359
1896	38,075	1.243,360
1897	68,804	2,007,780
1898	111,282	2,470,811
1899	180.300	3,211,400
1900	221,902	3,500,000
1901	279,133	3,700,000
1902	329,589	4,274,352
1903	366,625	4,251,463
Totals	1,617,259	$25,436,525

The producing mines, which contributed to this total of 1,617,000 tons, valued at twenty-five and a half millions, an average of about sixteen dollars per ton, were the Le Roi, 974,285 tons; War Eagle, 240,305 tons; Centre Star, 22,9498 tons; Le Roi, No. 2, 115,000 tons; Iron Mask, 17,655 tons; Rossland-Great Western. 12,331 tons; Rossland-Kootenay, 7,790 tons; Velvet, 5,416 tons; Jumbo, 4,395 tons; Giant, 4,344 tons; I.X.L., 2,900 tons; Evening Star, 1,500 tons; Spitzee, 900 tons; Monte Christo, 400 tons; White Bear, 300 tons; Homestake, 140 tons; Virginia, 100 tons.

LONDON AND LANCASHIRE FIRE.

A remarkably successful exhibit is made by this company in its report for 1903. The total premium income from fire and accident business amounted to £1,297,962, the highest the company has ever known, whilst the percentage of loss has never been lower; the fire loss ratio was only 43.57 per cent. There is an underwriting surplus of £274,242, while the interest gives a credit balance of £323,337. The same dividend is paid as for last year, after strengthening the surplus security fund by £30,000 and writing off £90,000 against the loss on the Baltimore fire. It is, perhaps, sufficient to add that the total reserve fund of the company is £1,821,033, as against £1,680,104 last year, behind which there is a capital subscribed and uncalled, of over two million pounds sterling. The Canadian business contributed to the successful result of the year, for out of premiums amounting to $275,349, all the company suffered in fire loss was $130,421 or say 47.36 per cent., which is less than the average of the year. For, as the Government Abstract shows, the average loss by the fire insurance companies in 1903 was close upon 51 per cent. of the premiums.

TORONTO INSURANCE INSTITUTE

In last issue, we remarked upon the main features of the report of the Institute for 1903-04. Since then we learn that the successful candidates at the recent examinations were:

First examination: Adams (Imperial Life), Aitkin (Western), Campbell (Canada Life), Crosby (Western), Cuthbertson (Canada Life), Domelle (Canada Life), Esler (Crown Life), Gallow (Imperial Life), Gibson (Western), Hines (Canada Life), Lanskail (Canada Life), Macklin (Canada Life), Martin (Western), Macdonald (Canada Life), MacKenzie (Imperial Life), McIlwraith (Canada Life), Nosworthy (Imperial Life), Ohlen (Manufacturers' Life), Pringle (Royal), Reynolds (Canada Life), Robertson (Canada Life), Rossler (Imperial Life), Robb (Canada Life), Salmon (Canada Life), Starr (Canada Life), Stuart (Canada Life), Woodcock (Canada Life).

Second examination, life branch: Macorquodale (Manufacturers' Life), Portch (Canada Life), Prest (Manufacturers' Life), Winkfield (Manufacturers' Life).

Second examination, fire branch: Fudger (British-America), Hall (Norwich Union), Jozelin (Norwich Union), Lauder (General Fire Equipment), McLean (Western), Roberts (Norwich Union), Rodgers (Norwich Union), Shaw (Norwich Union), Singer (London and Lancashire), Szoliski (British America).

Two awards of $25 each in gold were made to E. L. McLean, secretary of the Fire Underwriters' Inspection Bureau, and to John B. Hall, A.I.A., of the Imperial Life, these gentlemen being the successful competitors in the Institute's two essay contests on Fire and Life subjects, respectively.

The election of officers for the session of 1904-05 was then held, and resulted as follows: President, F. Sanderson, M.A., F.F.A., actuary, Canada Life; vice-president, C. C. Foster, secretary, Western Assurance; treasurer, D. E. Kilgour, B.A., A.I.A., North American Life; secretary, S. R. Tarr, M.A., Canada Life; curator, J. K. Pickett, assistant secretary, Imperial Life.

FIRE AND MARINE INSURANCE.

The following suggestions are contained in a circular issued by the Factory Insurance Association, of Hartford, U.S., to its members and policyholders for a spring inspection of all fire apparatus: (1) Examine all pipes and sprinklers where water has been turned off, and be sure there are no low points or traps where water has accumulated, frozen and burst the pipes. This should be done before water is turned on, to prevent leakage and possible water damage. (2) Where water has been turned off from sprinkler pipes, be sure to wash the rust and sediment out of mains before turning on. (3) Where valves without indicators are to be opened or closed, be sure to determine the proper direction to turn them, and when positive that they are as required (open or closed), then seal them with riveted strap passing through hand wheel on valve and around pipe. (4) If there are any leaks when pressure is turned on underground pipes, make prompt repairs, so that water may not damage underpinning or flood basements. (5) Try all hydrants while under fire

pressure to see that they open easily, and where necessary apply lubricants. (6) Make actual tests of fire pumps, through several lines of hose, working pumps to full capacity. The Association again urges the adoption of the dry pipe sprinkler system for the protection of unheated buildings.

The Montreal Harbor Commissioners have passed a resolution in favor of constructing a powerful fire tug for the protection of the water front property from fire. It is likely that the tug "St. Pierre" will be equipped temporarily for this purpose.

In Parliament, on Monday last, Mr. Rosamond presented a bill respecting the Ottawa Fire Insurance Company, which, he said, desired authority to increase its capital to meet the difficulties arising out of the recent fire at Toronto. We have not yet seen the provisions of the bill.

The thirty-eighth annual meeting of the National Board of Fire Underwriters of the United States was held last week in New York. It closed on Friday. Fifty-eight companies were represented. The meeting chose John H. Washburn president, to succeed Henry H. Hall.

The total value of property lost by the Toronto conflagration of 19th April, reported at the office of the general committee of fire insurance companies up to noon yesterday was $5,279,261. The insurance declared upon this sum was $4,384,012. But it is reasonably safe to say, estimating the individual losses of companies which this committee was not needed to adjust, that at least $5,000,000 of insurance has been represented in adjustments.

Some three weeks ago, an explosion took place in the basement of Mr. Gartshore's residence on Eglinton Avenue, off Yonge street, which set fire to the house. Investigation showed that it was a Siche acetylene gas machine which exploded and caused the mischief. Adjustment of the loss has been made this week: the Royal Insurance Company pays a loss of $1,400 on the building, while the British America pays $850 on contents. It will now be in order for Mr. Frederick L. H. Sims to explain how one of his non-explosive machines came to explode, for he has declared that it was immaculate, infallible, and any other term that would indicate perfection.

That great problem of the fire insurance business—how to reduce the expense ratio, seems to be as far removed from solution as ever. A few weeks ago managers appeared to be of the unanimous opinion that a reduction in commissions must be made. At the meeting of the Union it was decided that reductions should be made in the excepted cities if non-union companies would co-operate. But last week's meeting of the New York Fire Insurance Exchange has made it doubtful whether anything will be done. The meeting was to take action on a resolution to reduce brokers' commission to 5 per cent. upon surplus line risks, 10 per cent. on ordinary mercantile and special hazards, and 20 per cent. upon preferred risks. Knowing that such action was to be taken, brokers had been busy before the meeting using all the influence at their disposal to induce members of the exchange to vote against the resolution. It is stated that some of them went so far as to threaten to boycott companies friendly to the proposed reductions.—The Investigator.

We are informed by Mr. Matthew C. Hinshaw, Canadian manager of the Atlas Insurance Company, who was in Toronto on Wednesday, that a provisional agreement has been entered into for the transfer of the business of the Manchester Assurance Company, of Manchester, England, to the Atlas Assurance Company, Limited, of London. The New York Journal of Commerce learns by cable that the terms of the Atlas-Manchester deal are as follows: The Atlas Assurance Company has a subscribed capital of £1,200,000 in 24,000 shares of £50 each on which £5 was paid up, making with £24,000 since added from profits £144,000 paid up, or £6 per share. The Manchester Assurance Company's subscribed capital is £2,000,000 in 100,000 shares of £20 each on which £2 is paid up. By the terms of the transfer one Atlas share is given for five Manchester shares. Additional capital of £1,000,000 is issued by the Atlas, 12 per cent. paid up, which goes to the Manchester shareholders. Mr. James Boomer has been the esteemed manager of the Manchester Assurance Company here ever since it began business in Canada in 1890.

LIFE ASSURANCE MATTERS.

The general manager of the Canada Life, Mr. E. W. Cox, has gone to England, intending to be away about ten weeks, and his trip is stated to be a purely business one. The Canada Life has no less than twenty-six established branches in Great Britain and Ireland, and has been forging ahead rapidly in the Motherland. The business written during the first quarter of 1904 is much larger than in the same period last year.

The granting of nine, fourteen, or nineteen-payment policies of assurance is the subject of much controversy on the other side of the line. From a theoretical point of view, a nine, fourteen, or nineteen-payment life policy can be granted, and the adequate premium determined just as easily and as accurately as ten, fifteen and twenty-payment policies and premiums. But why have these odd payment policies been introduced? In our opinion, they are simply aids to twisting. A person, who has paid a year's premium under a twenty-payment life policy is approached by the agent of an opposition company, and is offered a nineteen-payment life policy at his advanced age at about the same premium as he has been paying, and he is told that he will lose nothing. In some cases the "twister" will be successful; but it stands to reason that the policyholder is not receiving as good goods as he gave up, for the simple reason that any company which charges the same rate for a nineteen-payment life policy at an advanced age, that other companies charge for a twenty-payment life policy, is doing business below standard rates, and the policyholders generally must suffer thereby. It is not only a cheap bargain plan, but one of those nasty tricks which tend to degrade and lower the system of sound life insurance. We know of no company attempting these methods in Canada, and we hope we never shall.

An article entitled The Blessings of Matrimony, appears in the March issue of the Australasian Review, Insurance Section. In it the writer supposes it to be discovered that the principal reason why married men on the average outlive their single brethren is because married men are, on the average, more abstemious in the matter of alcoholic liquors. He repeats his firm belief that the beneficial effects of marriage are direct, not indirect. That is to say, that bachelors would live longer than benedicts, provided that the bachelors chose celibacy so that they might devote their continent, rational lives to the achievement of some worthy object. He tells of a bachelor, whose life was in the main exemplary. He was an abstainer from birth, a non-smoker, a moderate eater, was morally above reproach, was fired with a noble ambition, was clever, but had a poor idea of taking care of his constitution. He would work at his calling as a printer till ten o'clock at night, would then walk through the rain to his lodgings without overcoat or umbrella, to sit down in his wet clothes and study till three in the morning. That foolish "clever man" died at thirty years of age, literally for want of a wife to make him take care of his exceptionally valuable life. Again, we quote: "Another case comes to our memory of a single man of high character, whose life was very suddenly cut off from a cause that would probably not have operated had he been married. For want of better company, he sedulously smoked hard throughout a long Sunday, and at the end of the day died in an apopletic fit. Another, who was about to take a trip, and had something under a hundred pounds in his pocket for expenses, found himself at his lodgings the next morning absolutely without a penny. Whether he had lost it at gambling, or had been robbed while under the influence of liquor, was never discovered. Rather than 'face the music,' the victim committed suicide. These are the kinds of deaths that marriage prevents to a large extent."

BANKING AND FINANCIAL MATTERS.

The Royal Bank has opened a branch at Cumberland, B.C., and the Union Bank one at Kinburn, Ont.

The Sovereign Bank has established a branch at Niagara-on-the-Lake, Ont., under the management of Mr. A. W. Clark.

In London, England, a banking combination is said to be in progress, which will outshadow in size any financial institution in the world, even eclipsing the big Government banks.

The premises in the Canada Life Building, recently occupied by the Bank of Nova Scotia, are being refitted for the Metropolitan Bank, who will occupy them when alterations are completed.

The Moore Carpet Company, Limited, will take over the property and business of the Dominion Carpet Company, Sherbrooke, Que., now in liquidation, and any others of a similar character. Its capital stock will be $100,000, and it will carry on the business of merchants, manufacturers, and dealers in carpets, rugs, mats, and such articles.

The Bank of Montreal statement for the half-year shows good profits. They amounted, for the half year ended with April, to $804.833.79, which, added to the balance of profit and loss on account, $311,903, and the balance of profit and loss on October 31st, 1903, makes a total of $1,178.821.85. After deducting the half-yearly dividend payment of $700,000, the balance of profit and loss carried forward is $478,821.85.

The National City Bank, of New York, has addressed a circular to its clerks offering, in addition to the usual two-weeks' vacation this summer, a two-weeks' trip to the St. Louis Exposition, with all expenses paid, to the clerk who makes between now and June 1st the best suggestions for facilitating the work of the bank, improving existing methods, or for increasing the bank's business. The suggestions must be made in written form and handed to some officer of the bank before the date specified.—Bankers' Magazine.

It is predicted by the Economiste Francais that there will be an increase in gold output of the world at large this year, but not a large gain. That paper calculates an increase of $2,000,000 over 1903 in Africa's production, but points out also, as regards Russia's annual output of 1,000,000 ounces, or say $20,000,000, that war will interfere seriously with it. It concludes: "The existing state of war, rendering the Trans-Siberian Railway useless, or nearly so, for ordinary business, and paralyzing trade in the district traversed, will necessarily injure Russia's gold-mining industry. Still, barring a very severe reaction in Russia's output because of war, there is a hance for considerable increase in the world's gold production in 1904. Such a result would be due to the United States product and especially to that of the Transvaal."

The concentration of banking resources and the power which is derived from co-operation among the banks and a few resolute leaders in times of crisis are generally recognized to be one of the most potent factors in our recent industrial progress and our present financial security. If the recent decline in the price of securities had found the market depending upon a large number of banking institutions with small capital, indifferently managed, and divided by petty jealousies, it might have tumbled them over like a row of bricks, and made the declining market of 1903 a repetition of the panic experiences of 1873 and 1893. Combination has vindicated itself the world over in banking; it remains to be seen whether, after due experimentation, it will not also vindicate itself in railway management and manufacturing.—"Wall Street and the Country," by Charles A. Conant, in "Atlantic Monthly."

How many folk who work every day in the year who use the phrase "pounds sterling" are aware of its origin? Probably not one in a thousand. Yet the adjective "sterling," which apart from its commercial sense has come to indicate worth and genuineness, has a curious historical significance, and is a distinct survival of the times when England did not weigh so heavily in the balance of power as she does now. In the fourteenth century the trade of the known world was, almost without exception, in the hands of the Hanseatic League. Within this league there were many towns, most of which coined money, some using better metal than others. Lubec, a Baltic city, made the best money, and the English merchants, who even then knew a good thing when they saw it, used to contract for payment in the "moneys of the Easterlings"—Easterlings being their name for the Baltic merchants. Shortened for convenience, the word still obtains, and has all its original force.—Liverpool (Eng.) Post.

Not a few persons have imbibed the notion, from seeing fire underwriters so often reviled in the country press, that insurance companies are greedy corporations, making needless exactions of merchant or manufacturer. People who will think over the circumtances, however, usually come to see that there is reason in the contentions of the underwriters, troublesome though they may be. To those, however, who have not thought the matter out, but are content to quarrel with the insurance companies, we offer the following extract from the London Economist, the well known Old Country financial journal, under date 7th inst.: It is fortunate for the British insurance offices, which transact fully 70 per cent. of the whole fire business of Canada, that the last two years should have been exceptionally good. As a rule, a profit, even at the high premiums charged, can only with great difficulty be extracted out of Canadian fire risks, and there is always the conflagration hazard casting its shadow even over good years. Had the official returns for 1903 reached this country before the news of the Toronto fire, one might have been disposed to argue from the results of British companies that the premiums were put up too high after the Ottawa blaze of 1900, but no such contention can now be made. Large as the profits have been in 1902 and 1903, they are not much more than enough to cover the losses in this single disastrous conflagration, and another blaze in a Canadian city may happen at any moment. Canada is, like the United States, a country of conflagrations.

ANSWERS TO ENQUIRERS.

C.P.P., Bridgetown, Barbados.—(1) We have heard of the Montreal concern you name, but its reputation is that of a speculative association, of the nature of a lottery. No one has got a prize yet, to our knowledge. (2) Upon communicating with the managers of two mortgage loan companies in Toronto, neither of them is disposed to undertake loans in the West Indies. You might, however, apply to C. H. Longard, Halifax, secretary of the Nova Scotia Permanent Building Society. The business men of that city are much more acquainted with West Indian affairs than we, up here.

A. B., City.—At your suggestion, we enquired if the Toronto Guild of Civic Art would take part in such a conference, but the reply made by a member was that it is outside their province. The proposal to widen lanes from and west of Bay street, the city to pay part of cost, was "turned down" by city authorities, who recommended, instead, the extension to Yonge of Piper street, which runs east from York. It all takes time, as you say, but it should not take too much time. Some things cannot wait.

D. R., Windsor, Nova Scotia.—Apply to George Johnson, F.S.S., Ottawa.

FOR GROCERS AND PROVISION DEALERS.

While in 1893 no Ceylon tea was imported into Canada, it is worthy of mark that last year something like $625,000 worth came in.

The Executive Committee of the British Cotton Growing Association has, according to a London cable, decided to apply for a royal charter. The capital of the concern will be $2,500,000 in shares of $5 each.

A recent report by the Dominion Analyst upon Canadian brands of canned goods makes pleasing reading. A hundred samples of all kinds of canned vegetables were subjected to a vigorous examination, the result being that not one was found

A CANADIAN GUARANTEED BOND,

TO THE INVESTOR. Particulars from
OSBORNE & FRANCIS. STOCK AND BOND BROKERS, Mail Building, TORONTO.

to contain any adulterant coloring matter, or even chemical preservative. Two cases (only), were found to be other than strictly first-class, and these were tins of corn, which had evidently decayed, and would not have been thought of as food. Only two cans of Canadian peas were found to contain traces of poison, and these showed an infinitesimal amount of copper.

WEATHER REPORT FROM MANITOBA.

We have received the following telegram from our correspondent at Winnipeg, dated noon of Thursday, 19th May:

With scarcely any exceptions, all points in the West report weather as most favorable for farm work, it being cool, clear and dry. In a few districts there has been delay, but altogether the showing is very favorable. The farmers in many localities are now engaged fitting the ground for coarse grain seeding, and indeed have made a start with oats and barley. There will be a largely increased acreage sown in coarse grains if the weather holds favorable.

—The remarkable increase in the last two or three years in the number of new settlers pouring into the Canadian North-West is having its effect across the line, where it cannot be truly said that all the available good land has already been taken up. A body has been formed of land agents and dealers, under the name of the American Immigration Association of the North-West, headquarters, St. Paul. Minn., for the purpose of drawing attention to these vacant lands. At the same time, it is not its aim to engage in a land business. It will simply set forth to the world what it considers to be the advantages of the American North-West. and incidentally to obtain from the railroads good rates, etc. Even in such old states as Minnesota, Wisconsin and Michigan, it is claimed the good land still open is by no means exhausted. There can be little doubt that the real object of the new association is to offset the growingly successful efforts of the Canadian Government to attract high-class settlers, especially from the United States, to this country.

—The intelligence is satisfactory that another furnace is being lighted at the Hall Mines smelter, Nelson, B.C. We take the following announcement from the News of that place: "Yes," said manager Robert Hedley of the Hall Mines smelter yesterday, "I can give you some news of general interest here. We have decided to blow in the second furnace at the smelter immediately. We have just received a fine consignment of concentrates from the Highland mine, at Ainsworth—about 320 tons—representing the shipment for April." The News comments, as under: "Evidently the smelter in question is beginning to feel the beneficial effects of the lead bounty in common with the rest of the community. As has been already stated, the shipment from the Highland mine is the largest ever sent out from that property in any single month, and doubtless from this time on the output from the mines to the north will steadily continue to increase.

—Mr. Edwin Greenacre, of Durban, Natal, who has been travelling in this country for some months past, is of opinion that a trade between that part of South Africa and Canada might be worked up without difficulty. If trade is to be secured in any volume, however, it is absolutely necessary that the manufacturers here should send out to Natal numerous samples of the goods they wish to introduce. There is now direct transportation between the two countries, but it is not very regular, and much of the space is booked weeks ahead by United States firms.

—On one day last week, in the British House, so the London papers say, a parliamentary question was addressed by Mr. Morrell to the Chancellor of the Exchequer: "Could he state, approximately, the amount of indirect taxation carried by a glass of light beer and a half-pint cup of tea of moderate strength?" "I fear it is impossible," replied Austen Chamberlain, "to give an accurate reply to this question. The answer must depend on the lightness of the beer and the strength of the tea." It might help the Right Honorable Austen, or anybody else, who desires to reach an answer to such a question, to know that in 1902 a calculation was made by the Midland Mail of the incidence of taxation, under the system of duties levied in the United Kingdom. Here follows the table that paper published, illustrating the addition to the consumer's cost made by taxes upon the seven articles which furnish the bulk of the revenue. Necessaries and luxuries alternate, as will be seen:

	£.	S.	D.
72 shillings worth of beer pays	0	8	0
72 " " spirits pays	1	9	6
72 " " wine pays	0	9	0
72 " " cheap tea pays	1	4	0
72 " " coffee pays	0	9	0
72 " " sugar pays	0	16	0
72 " " threepenny tobacco pays	3	0	3

CLEARING HOUSE FIGURES

The following are the figures for the Canadian Clearing Houses for the week ended with Thursday,, May 19th, 1904, compared with those of the previous week:

	May 19th.	May 12th.
Montreal	$20.644,099	$20,909,015
Toronto	17.979,835	16,618,624
Winnipeg	4,825,880	5 420,466
Halifax	1,742,365	1,681,997
Hamilton	1,211,101	1,069,306
St. John	956,354	915,693
Vancouver	1 447,776	1,509,828
Victoria	644,699	586,628
Quebec	1,524,741	1,157,416
Ottawa	1,909,246	1,990,625
London	846,431	846,906
Total	$53,732,527	$52,766,504

THE FORTY SECOND ANNUAL REPORT of this Company contains a large number of facts which ought to be of decided interest to all who are interested in fire insurance. From the report it is gathered that in the fire department (for by the way, the Company also writes accident insurance) the net premiums, after deducting all reinsurance, amounted to $6,193,845, an increase over 1902 of $146,255, while the net losses incurred amounted to $2,698,760, a decrease of $197,875. The trend of things, as revealed by these figures, is certainly in the right direction, and the management is to be congratulated thereon. In the accident department an increase of $34,065 is shown in net premiums as compared with 1902, while the net losses, including full estimates for all claims outstanding, amounted to $143,590, a slight increase over the previous year. A most gratifying feature of the report is that the surplus on the two departments, after providing for all expenses, taxes and charges of every kind, amounts to the handsome sum of $1,371,215. Interest on investments amounted to $245,470, making the total credit balance on the entire operations for the year $1,616,685, which, added to the balance of $2,536,080, carried over from the previous year, less an interim dividend of $111,440, paid last November, makes a total of $4,041,325, a truly magnificent sum, and one which indicates the immensity of the Company's transactions.

The following propositions made by the Directors will be considered by all to be wise, and in the best interest of all concerned, policy-holders and shareholders alike. First:—To transfer to the reserve fund the sum of $750,000, making that fund now $5,000,000; they further propose to write off the sum of $450,000, to cover fully the loss sustained by the Company in the Baltimore conflagration. Two hundred and fifty thousand dollars have been placed toward the staff pension fund, which will be recognized as a very liberal amount.

The following figures will show just how the Company stands financially, at the present time:—

Capital Paid-up	$1,114,435
Reserve Fund	5,000,000
Accident Fund	300,000
Staff Pension Fund	250,000
Balance Carried Forward	2,440,730
Funds	$9,105,165
Capital Subscribed but uncalled	$10,029,935
Total Security	$19,135,100

($5 taken as equivalent of £1 sterling.)

The foregoing facts and figures regarding this Company, which has had so long and honorable a career, cannot but impress the reader that its affairs are wisely managed, and that it is more than equal to the responsibility placed upon it by the insuring public throughout the world.

AFFAIRS IN EUROPE.

Some interesting statements about financial and industrial conditions in Europe are made by Mr. William Hanson, of the firm of Hanson Bros., Montreal, who has just returned from a three months' visit to Great Britain. That gentleman says that when he reached England in February, things were in a very unsatisfactory, almost critical, state. "Every banker and financial man to whom you would speak, whether on the Continent or in Great Britain, was fearing some political complication as a result of the war in the East. Never had I experienced such a disheartening and pessimistic feeling. About a month ago, however, things took a decided turn for the better, and to-day a very much better feeling prevails. This is largely attributable to the successful conclusion of the 'entente cordiale' arrangement between France and England, which has inspired the confident hope that, come what may between Russia and Japan, none of the larger powers will now become involved.

"The first securities to benefit in the market from these improved conditions were naturally Home Government and Home Rails. Both of these had, during the depression, receded to abnormally low prices. To such an extent had this taken place that the profits of the leading banks during the past year were thereby considerably reduced, and in the case of several life insurance companies, whose quinquennial distribution of profits occurred this year (and whose assets had, therefore of necessity, to be valued), the whole of the profits for the past five years was practically wiped out.

"Kaffirs, too, in which such fabulous sums of British capital are invested (which, during and since the war, had practically gone to smash), have commenced to boom, and I have little doubt will go much higher, largely in consequence of the settlement of the labor question by the importation of the Chinese, and the increased output, which, in March last, about equalled that of September, 1899.

"To give you an idea of what the improvement already means, I may say that taking about 150 of the leading securities dealt in on the London Exchange, the increase in the market value of such securities alone since the last settlement (say for a period of between two and three weeks), has amounted to about £50,000,000."

In Mr. Hanson's opinion, the municipalities during the past three years have under their powers been even more improvident. To such an extent have these powers of borrowing been used, "that the Government has become alarmed and the Chancellor of the Exchequer in his budget speech, intimated that they would be henceforth curtailed, I understand that in most cases the demands of the municipalities for further loans have been absolutely refused during the present session. At least £300,000,000 of new and contemplated municipal loans, I was told, will thereby, for the time being at least, be held up and practically blocked. Reaching Paris before matters had been smoothed between France and England, he found much the same feeling prevalent as in London, and although in Paris money seemed to be abundant and easy, still they were marking time and sitting tight and practically taking up nothing new."

What he has to say of Germany is very noteworthy:

"I was greatly impressed with the great improvements everywhere observable in Germany. 'A new era,' Reorganized Germany, has taken the place of old regime—magnificent new factories, improved machinery and up-to-date methods are visible in every direction, and it seemed to me, the world, and especially Great Britain, has more to fear, commercially, from Germany, than from any other country."

Up to the early part of this month, Winnipeg building permits totalled $2,318,300, an increase of $1,283,450 over that period of last year.

quite so high prices as they did, about $6.15 being now apparently a fair quotation for No. 1 pots; seconds, $5.65 to $5.70. First outgoing steamers have taken out about 60 barrels thus far.

Groceries.—As anticipated by us last week, the sugar market has taken a further upward turn, both local refineries having established an advance last Monday of 5c. per cental on all grades, making the present factory quotations as follows: Standard granulated, $4.35; Phœnix, $4.25; bright coffee, $4.15; yellows from $3.70 to $4.10; powdered, $4.50; extra ground, $4.70; Paris lumps, $4.85. Outside markets for raw continue very firm, with an upward tendency, and it would not be at all surprising if a further revision of quotations took place within the near future. The Milling Company's quotations for new crop rice were recently fixed for the year on the basis of $3 for B quality, which is a little lower than last year. Tea importers report rather light business, the high prices having a deterrent effect on buyers. Cables from Greece announce a further advance in currants of 1s. 6d., following the late marked rise. This is said to be the result of a decision on the part of the Greek Government to enact further remedial legislation for the benefit of the growers. The stock of old crop is also said to be now very small, only about

THE COMMERCIAL
ESTABLISHED 1882
THE WEEKLY FINANCIAL COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST

Reaches direct 90 per cent. of the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

Do you want to sell or increase the sale of your goods in these, THE BEST BUYING PROVINCES IN CANADA?

Estimated that 200,000 new settlers will arrive this year. Will the retail merchant offer them your goods? Our advertisers our best references. We beg the favor of an enquiry.

THE HUGH C. MACLEAN CO., LIMITED, Publishers, Winnipeg.

Eastern firms should subscribe for THE COMMERCIAL and keep posted on Western trade

10,000 tons, which is barely two months' supplies.

Dry Goods.—The credit and financial man of a leading house in this line of merchandise, who has just returned from a trip down by the sea, reports that retailers in the Maritime Provinces, generally, had a no better winter trade than their conferes in the central and western provinces, and that a comparatively large quantity of goods will be carried over, causing a considerable degree of conservatism in the placing of new orders. At the moment, sorting letter orders for small lots are fairly numerous, but travellers' efforts are now mainly directed to the selling of fall goods. Money is coming in a little better, and May collections are expected to be materially ahead of April, which was a very poor month. The markets, domestic and foreign, present no special features. Japan silks are much in demand, and are very firm. Linens also incline to further stiffness, owing to the curtailment of flax-growing in Russia.

Dairy Products.—The export movements has begun; seven steamers took out last week 33,574 boxes of cheese, and 429 packages of butter. For the corresponding week of last year the figures were 42,064 boxes of cheese and 452 packages of butter. Cheese prices seem to be a little steadier, and 6½c. per lb. is about the figure paid this week on the wharf for Quebec cheese, while finest westerns are quoted at 7 to 7⅛c. Butter continues easy on the basis of about 15 to 15½c. per lb. for good to fine new creamery.

Hides.—Business is quieter. Beef hides are comparatively dull, and receipts of calfskins are beginning to slacken up. Lambskins are advanced this week to 15c. each. Beef hides are unaltered in price at 9c. per lb. for No. 1, and calfskins at 13c. per lb. for No. 1.

Metals and Hardware.—Heavy metal men report a little better demand, and a fair aggregate of business is being done in general hardware, but the spring trade, as a whole, will fall short of that of last year. A fair number of non-union plumber shops are open, but the stone cutters' and soft stone workers' strike is still on, and building operations are still being seriously hampered. In values, there are no marked changes. Pig iron quotations, net terms, ex-wharf, are as follows: No. 1, Summerlee and Gartsherrie, $19.40; Clyde, $19.30; Eglington, $18.15; No. 3, Middlesbro, $16.80. Domestic brands are quoted at $18.50 to $19. Bars, boiler plates, iron piping, etc., all remain as before quoted, also Canada plates and sheets generally. Some fair lots of Terne plates are coming to hand and are quoted at $6.35. Ingot tin is easy at 31 to 32c., and lead at $4.30. Copper and antimony, as last quoted.

Oils, Paints and Glass.—Wholesale men appear to be fairly satisfied with the volume of business doing in these lines, but remittances are not wholly satisfactory. Linseed oil continues very easy at 45 to 46c. for raw, and 48 to 49c. for boiled. Turpentine is slightly easier at 85c. Ground lead nominally $4.50 for chemically pure, but it is being sold in some cases at figures quite a way below that. Fish oils dull and little asked for. The production of glass in Belgium is said to be greatly curtailed owing to labor troubles, but no change in local prices is noted.

TORONTO MARKETS.

Toronto, May 19th, 1904.

Chemicals, Drugs, Etc.—The firmness in quinine and in carbolic acid, owing to the war in the East, continues. Opium is still very dull and unsettled. New York market reports strong news from Japan about menthol, though so far prices remain unaffected. Codliver oil is a good deal easier, owing to lack of demand. Nitrate of silver has advanced ½c. in sympathy with the metal.

Dry Goods.—The cool weather militates against any great activity in seasonable lines. That the tone of the market is good was shown by the few days of summer weather we experienced a week or ten days ago. Stocks in many lines, however, are very light, and retail merchants manifest some anxiety to be forehanded in providing for their requirements. There is a brisk demand for men's domestic suitings. Tweeds and cheviots have been selling quite freely, and there has been an active sorting demand from tailors. Canadian dress goods are another line which have been favored by the backward season, as being often of a somewhat heavier character than those imported. Values in all goods are still very firmly maintained. Linen is almost prohibitive in price.

Merchants Fire Insurance Co.

CAPITAL AND ASSETS OVER HALF A MILLION

HEAD OFFICE
TORONTO.

Agents Wanted in All Unrepresented Districts.

Flour and Grain.—Ninety per cent. patents are a trifle higher at $2.65, while Manitoba is about at the same figure. Millfeed continues firm. No change has taken place in oatmeal. Ontario wheat has gone up a cent, and is firm at the advance. Oats are a cent higher. Rye is 1c. to 2c. lower. Little business is being done and practically no receipts are coming forward, the farmers being busy seeding.

Fruits and Vegetables.—The demand for all lines of seasonable fruits and vegetables cannot be complained of considering the weather. Pineapples are plentiful, but the demand keeps up. Strawberries have been scarcer this week, but prices are easy. Prices are quoted as follows: Apples, 75c. to $2.50 per barrel, according to grade and quality; cocoanuts, $3.50 to $4 per sack; oranges, California navels, $2.75 to $3.50; Valencias, ordinary, $5 to $5.50; large, $6 to $6.50; lemons, Messina, 360's, $2 to $2.50; 300's, $2.75 to $3; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; dates, Sair, 3½c. per lb.; Hallowee, 4c.; figs, 8c. to 12c.; tap figs, 3½c.; pineapples, $3 to $3.25 per case; strawberries, 11c. to 17c. per quart box; Egyptian onions, $3.50 per sack; tomatoes, $2.25 to $2.50 per case

Hardware.—No changes have taken place in values, which remain firm. The demand for farm implements, building hardware, and other goods needed at this season of the year, is quite brisk. There is no feature worthy of special comment.

Hides and Leather.—A steady market exists for hides at old prices. The demand is fair. Sheepskins are scarce, but the demand is very light. Calfskins are a little higher. Tallow is dull. The demand for leather is not brisk just now, but is expected to improve.

Provisions.—The butter market continues weak under over-plentiful offerings. Cheese is still very dull. In eggs, the tone continues very good, with demand larger than supply. The hog product trade is about normal for this time of the year.

Wool.—No change has occurred since last report. Some lots of unwashed are coming forward, but they do not amount to much. For pulled wools the market is quiet.

30 Days of Grace

for the payment of Renewal Premiums is one of the many privileges the SUN LIFE OF CANADA grants its policy-holders. Should the Assured die at any time within the days of grace the claim would be promptly paid, even though the premium had not been paid.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policy-holders and addition to Reserve.
$53,841.18 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1,800,000.00.

Liberal commissions paid for desirable business. Applications for agency to be made to
DAVID BURKE, A.I.A., F.S.S.
General Manager.

Sometimes a revision of policy forms means little. It stands for

THOROUGHNESS
in every detail in the changes that have been made by the Union Mutual—re-arrangement of features, reduction of rates, liberalizing of rights, a contract modern to the highest notch. A policy that looks well, sells easily and pleases long.

UNION MUTUAL LIFE INSURANCE Co.
Portland, Maine.

FRED E. RICHARDS, President. ARTHUR L. BATES, Vice-President.

Agents always desired—the kind who write policies and hold them.

Protection from Loss.

The business of boiler insurance is an engineering business; the insurance is only a guarantee of the trustworthiness of the engineering services.

Measure the value of those services and then consider the guarantee. In doing this remember that EXPERIENCE, SKILL, and ABILITY are the determining qualifications of the value of those services.

Insure your boilers in

THE BOILER INSPECTION & INSURANCE CO. OF CANADA,
Canada Life Bldg., Toronto,

which has been in this business for nearly THIRTY YEARS.

Then Insurance.

PAID-UP CAPITAL, - - $ 6,000,000.00
RESERVE FUND, - - - 1,750,000.00
INVESTED FUNDS, - - 23,300,000.00

MONEY RECEIVED ON DEPOSIT.

ABSOLUTE SECURITY
3½% interest allowed. Compounded half-yearly.
EVERY FACILITY

The Corporation is frequently made the Depository of large sums which firms and individuals may have on hand and of which they may not require to make immediate use, or which they may be holding or accumulating for some specific purpose. While such deposits may be withdrawn when required, if left for a specified time they may be received on special terms.

We shall be glad to meet or correspond with any merchants, manufacturers, or others, who have funds at their disposal for which they desire to obtain a liberal rate of interest combined with undoubted security.

THE Profits of Speculation are large, but the risk is generally great. But when you invest your money in our debentures, you combine good profits with the safety of a gilt-edged investment.

You can invest as little as $100.00 or as much as you like, with an absolute guarantee against loss—with an assurance of five per cent. per annum, payable half-yearly.

Write for our Booklet "An Investment of Safety and Profit." 12

—The Intercolonial Railway's earnings for the nine months ending with March 31st, were $4,709,561. Operating expenses showed a considerable increase over last season, so that there is a net deficit for the nine months of $643,079. This is attributed to the severe winter, the growth of wage bills, increase in prices of raw material, etc.

THE UNITED STATES MARINE.

The Marine Review, of Cleveland, O., has an editorial upon the aptness of the present opportunity for raising a great American merchant marine, a commission having been appointed by Congress to look thoroughly into the whole subject. This commission has been subdivided into committees, one for the Atlantic coast, another for the Pacific, and the third for the Great Lakes, the three great divisions, from a maritime standpoint, of the United States. The Review takes to task those people who are alleged to have found grounds for hostility between the lake and the other shipping interests. Chicago, it points out, is as much an American seaport as New York. It is not separated by the sea, but is joined to it by 2,000 miles of fresh water. Ships have gone from Chicago to Liverpool and will go again. It is not conceivable that the Welland and other canals will be allowed to remain with a draught of only 14 feet. But what has already been done by the Federal Government, for the improvement of American waterways, thinks our contemporary, is but a beggar's pittance wealth and population considered, in comparison with what Canada has done to improve her channels of communication with the sea. A 20 ft. draught is the commercial minimum which may be expected in these days of great ships. "But," remarks the Review, "in the great question of maritime development, shipping interests are, after all, only an incident. The commerce which it quickens into life is the thing. It will serve to give to the United States a proportionate share of the markets of the world to which its resources, its various industries, and its population entitle it. Is there a man alive to-day who would dare to dream what it would mean to the United States in the contest for the world's markets, if she had as many ships as Britain has, in proportion to her resources, her coast line and the number of her people? What a frightful handicap it is for a manufacturer of reapers who, in order to send his output to South America, has first to send it to Liverpool, where it may be transferred to a ship engaged in the South American trade."

—Mrs. Leo Hunter, that society-loving blue-stocking of the Pickwick papers, is never extinct. When the late Lord Tennyson visited the Royal Academy with his wife, an interested female dogged his foosteps, trusting to hear some gem fall from his lip which she—and she alone—might enshrine for the benefit of posterity. Patience was rewarded. The amateur shadower was justified, at length, by hearing the poet say to his wife: "You hold the catalogue while I get a glass of beer." That most loveable of men, the late Sir Edwin Arnold, was once pursued in a similar manner. The dodger longed for a pearl of wisdom from the grand old journalist. She was rewarded also. "I think I could eat an oyster," said Sir Edwin. Mrs. Hunter did not think the oyster much of a "pearl."—London Opinion.

GEO. A. STIMSON & CO.,

34-36 King Street West TORONTO, Ont

THE Canadian Economic Lubricant Company, Limited, Montreal, has been incorporated with a capital of $50,000. It will deal in all kinds of oils and grease, railway contractors' and manufacturers' supplies, refine oils and own tank cars and boats, etc.

THE Kamloops Lumber Company, Limited, headquarters Toronto, capital, $500,000, has received a Dominion charter enabling it to deal in timber limits, sawmills, and machinery, tugs, rafts, etc. Among the charter members are: Wm. Irwin, of Peterboro; Col. J. I. Davidson, and Hon. G. E. Foster, of Toronto.

A DESPATCH from St. John's, Newfoundland, to hand Wednesday, stated that the Allan Line steamship "Hibernian," which left Montreal on the 14th inst., with cattle and a general cargo has gone ashore during a dense fog at Stormy Point, 30 miles north of Cape Ray, at the entrance to the Gulf of St. Lawrence. The crew are reported all saved, but it is feared the vessel will become a total wreck. The Hibernian is a steel screw steamer, of 4,305 tons, 385 feet long, built in 1902, and classed 100 A1. She is valued at $350,000, and the cargo at $250,000.

Mercantile Summary.

THE Conestogo flour mills, at St. Jacob's, Ont., have been burned down, together with a quantity of flour and wheat. Loss about $12,000; insurance, $8,000.

ST. CATHARINES, Ont., ratepayers have voted in favor of giving a bonus to J. M. Ross & Co., of Brampton, who propose establishing a factory for traction engines, harvesting machines, etc.

THE Moore Investment Company, Seattle, Wash., proposes to erect a sawmill on the north end of Vancouver Island, with a capacity of 50,000 feet of lumber per day.

B. LEDOUX & Company's carriage factory, in Montreal, a long-established place, and one of the largest of the kind in the Dominion, was on Friday last completely destroyed by fire. The loss is estimated at nearly $300,000; partially insured.

So great is the interest in the new turbine steamer coming out next month from Scotland for the Hamilton and Toronto Steamboat Co., that the Montreal Board of Trade are arranging to give the steamer a reception when she reaches the St. Lawrence. The "Turbina," which is to run between Toronto and Hamilton, was given a trial last Saturday, and easily covered twenty-two and a quarter miles an hour.

MESSRS. Charles Cockshutt & Co., of Toronto, have notified their customers that owing to the total destruction of warehouse and stock in the conflagration, which occurred on April 19th last, they have deemed it advisable to retire from business, and have accordingly disposed of all their contracts and purchases for fall and winter seasons to Messrs. Thos. Ogilvie & Sons, of Aberdeen, Scotland, who are opening a large branch in Toronto, and will carry on business of a similar nature. Messrs. Thos. Ogilvie & Sons have arranged with Mr. T. Foster Hire, manager of Messrs. Cockshutt's business for many years, and Mr. John B. Canavan (formerly with The Wyld, Darling Company, Limited), who will jointly manage the new business.

NEXT month, in the leafy month of June, we are to have Spring—it is impossible to say with truth that we have had much of it yet. But it will soon be time to plan vacations. Our Ontario and Quebec people should remember the charms of the Maritime Provinces. Mr. Tiffin says that the Intercolonial Railway will have the finest passenger service this summer it has ever had. By 1st July he expects to have two luxurious trains leaving Montreal for Sydney and Halifax every day but Saturday. The time of the Maritime Express, which now leaves at noon, will be changed, and she will leave in the morning about 8 o'clock. The Ocean Limited, a new train, will be put on at night, leaving Montreal at 8 o'clock and making the trip to Halifax in twenty-four hours.

Mercantile Summary.

THE Trust and Loan Company of Canada, which has had a long career and been known for many years in Toronto, has removed its head office from this Montreal. The office in that city is situated at No. 26 St. James Street.

"CANADA Lines, Limited," is the name of a company recently formed in Toronto, under Dominion charter, for the purpose of acquiring ships, building vessels, and carrying on the business of a shipping company. Its authorized capital it given at $1,000,000.

EMMA DUGAS, wife of Gilbert Labonte, Montreal, and registered owner of the dry goods business carried on under the style of "Maison Labonte," has assigned. Mr. Labonte at one time did quite a considerable business in the western suburbs, but failed in 1902, when he owed some $60,000, and did not get a settlement. He then engaged in a general store business at Terrebonne for a short time, but recently returned here and resumed in the dry goods line, using his wife's name.

FAILURES for the week in the Province of Quebec are few. P. Bernard, of Notre Dame des Anges, reported recently as seeking a compromise, has amended his offer to 40 per cent. cash.——The estate of E. F. Lavoie & Co., grocers, etc., at Hedleyville, is to be wound up by the assignee. Lavoie was originally in the flour business in Quebec, where he failed fifteen years ago, and then moved to his present address, where he did business for a time in his sister's name. His present liabilities are $7,485.——Mrs. A. Desgres, in a small millinery way at Granby, is reported insolvent.

A COMPROMISE arrangement at the rate of 35 cents on the dollar is being sought by B. A. Savage & Co., dry goods dealers in Westmount suburbs, Montreal. The business record of Mr. Savage has not been a favorable one. He was formerly a general dealer at Granby, one of the firm of Savage & Vittie, who failed some years ago. He then removed to Montreal and engaged in the dry goods line, failing in 1897, when he arranged a compromise at 45 cents, but he again became involved in 1900, and the business has since been registered in the name of his brother-in-law, G. F. Payne, Postmaster at Granby, Que., and formerly a general merchant there, who has been latterly interested in several manufacturing concerns in that place, which have not turned out very well.

ELECTRIC LINES DON'T PAY ON LONG REACHES.

Promoters and investors interested in electric lines will not find consolation in the last report of the Railroad Commissioners of Massachusetts. Out of 105 companies in that state no less than 65, new and old, declared and paid no dividends. A gentleman of very large experience interested in electric lines' operations in Massachusetts recently stated that electric lines do not pay ex-

cept when operated within densely populated city districts or within a very short radius thereof—like Boston and its immediate suburbs. Judged by this standard, electric lines in Ontario, outside of those operated within cities, will not be able to earn dividends, at least for many years to come, when the population of that province becomes more dense than Massachusetts, where so many electric lines are not profitable. At present there is in Massachusetts a population of 340 per square mile, against approximately 10 per square mile in Ontario, or, roughly, 34 to 1. Aside from this indication as to Ontario being an unfavorable field for electric line operation, it is interesting to note that Ontario now enjoys three times as large steam railway mileage as Massachusetts to each one thousand of population—Kingston News and Times.

CITY OF GUELPH

Tenders for Debentures.

The Corporation of the City of Guelph invite Tenders for Debentures as follows:—

City of Guelph Debentures payable in Guelph at the City Treasurer's Office under By-Laws as follows:—

By-Law No. 438—$23,972.59, 13 Debentures issued October 15th, 1902, payable in thirteen yearly instalments, re Iron Pipe Mills, Interest 3¼ per cent.

By-Law No. 441—$14,600.00, issued December 31st, 1902, payable December 31st, 1932. Half-yearly, authorized by Ontario Legislature. Interest 3¼ per cent.

By-Law No. 455—$155,000.00 payable in 30 yearly instalments, issued April 15th, 1903, By-Law confirmed by Ontario Legislature. Interest 3¼ per cent.

By-Law No. 462—$5,063.04, issued July 15th, 1903, payable in 30 yearly instalments, School Debentures to build Public Schools. Interest 4 per cent.

By-Law No. 472—$30,000.00, issued November 2nd, 1903, payable half-yearly, June 30th, December 31st, to pay for Street Railway. Interest 4 per cent.

By-Law No. 476—$14,900.00, issued December 31st, 1903, payable half-yearly, June 30th, December 31st, payable December 31st, 1933. Authorized by Ontario Legislature. Interest 3¼ per cent.

Total amount $243,535.

The Tenders are invited to be sent in:—

1. For the several Debentures to yield the City par value, that is the tender to state what rate of interest will be required in order to yield the City par value for the Debentures.

2. For the Debentures bearing their present rate of interest.

By the Municipal Amendment Act, 1904, passed by the Legislature of Ontario at its late Session, the Corporation can by By-Law increase the rate of interest on these Debentures. They reserve the right to do so in order to enable them to sell the Debentures at par should that course be deemed expedient.

Tenders may be for the whole or any portion of the Debentures.

Tenders addressed to Alderman George Hastings, Chairman of the Finance Committee, Guelph, to be received here not later than 31st May, 1904, at 12 o'clock noon.

Further information will be supplied on application to the undersigned.

No Tender necessarily accepted.

(Sgd.) GEORGE HASTINGS,
Chairman Finance Committee, Guelph.

Dated Guelph, 17th May, 1904.

LITERARY NOTES.

Through the courtesy of the Provincial Government, we have received a copy of the Year Book of British Columbia for 1903, compiled by R. E. Gosnell, secretary of the Bureau of Provincial Information, at Victoria. The book, which is handsomely bound and profusely illustrated, is intended to give reliable information to those interested, concerning all aspects of the province. We hope, as space, permits, to be able to give from time to time, summaries of the more prominent features.

TORONTO STOCK TRANSACTIONS

The following summary of transactions during the past week on the local 'Change shows that while the volume of business has not been large, and was further lessened by the occurrence of the holidays, the market retains its steady tone:

Bank of Ontario, 50 at 126¾; Commerce, 23 at 151½; Dominion, 104 at 226½-227; Hamilton, 10 at 207½; Traders', 10 at 136½; Sao Paulo, 731 at 97¾-97⅞; Tor. Gen. Trusts, 20 at 165; Niag. Nav., 35 at 118-118½; Nova Scotia Steel, 260 at 73⅜-71¼; Bonds, $3,000 at 108½; Pref., 25 at 116½; Dom. Steel, 101 at 10¼-10⅜; Bonds, $21,000 at 66¾-68¼; Dom. Coal, 134 at 64½-65; Nat. Trust, 4 at 135; Consumers' Gas, 20 at 205-205½; C.P.R., 590 at 116⅞-117½; Twin City, 284 at 94-94¾.

WESTERN CROP REPORT.

Our usual weekly crop report upon farm prospects in Manitoba and the Territories continues to be of an encouraging tone. This week's telegram, dated Winnipeg at noon of yesterday is in the following terms: "The weather throughout the west during the past week has been cool with frequent showers. The crops are all doing fine from appearance of fields; the grain planted has all germinated, the shoots are healthy and of splendid color. If anything, the area sown is somewhat larger than was estimated two weeks ago."

WORK AND LIBERTY.

President Elliot, of Harvard University, puts the question of modern unionism in a nutshell when recently in a lecture, at Cambridge, he said it was simply a matter of liberty. "The love of freedom," he said, "is so ingrained in modern civilized society that the abridgement of personal freedom is everywhere recognized as an obstacle to the winning of either private or public happiness. The surrender of personal freedom to an association is almost as great an obstacle to happiness as its loss to a despot or to a ruling class, especially if membership in the association is compelled and the association touches livelihood. This is the principle upon which all progress in government and social condition has been based and heretofore the contest for individual liberty and personal right has been waged by the "toiling masses" and their sympathizers against the despots and the ruling classes. In this country (United States), there is supposed to be no despot and no ruling class, but we have the spectacle of a despotism and a would-be ruling class rising from the bosom of the "toiling masses" themselves, to curtail personal liberty and restrict human rights in matters that most nearly touch the life of the people, the earning of a livelihood and advancing in the social scale. The New York Journal of Commerce, in commenting on this in relation to some present day struggles between employer and employed, remarks that the open-shop does not necessarily mean a non-union shop any more than it means a union shop. The open shop means the right of men to work at their trade without joining a union if they so prefer, and the right to hire men whether they belong to a union or not and to give them an equal chance. These rights are fundamental in a land of liberty and law, and their denial is the principal of despotism and not of

Middlesex Four per Cent. DEBENTURES.

Sealed tenders endorsed "Tenders for Debentures," will be received at the office of the undersigned up to two o'clock p.m. on Monday, June 6th, 1904, for the purchase of $12,000.00 County of Middlesex Consolidated Debt Debentures, bearing interest at Four per cent., payable semi-annually, on the 15th of December and the 15th of June. Principal payable in gold on the 15th of June, 1924.

Each tender must state a lump sum, payable at the Bank of Toronto, in London, Ontario, on the 15th day of June, 1904,—where and when the Debentures will be delivered.

A. M. McEVOY,
Treasurer

County Buildings,
London, Ont., May 5th, 1904.

freedom. Leaders of labor unions fear this kind of liberty as destructive of their organization, just as despotic governments fear personal freedom as destructive to their system; but if it is a menace it is because the unionism is not sound or in harmony with the real interests of workingmen and their employers. If membership in labor unions is made entirely voluntary, free from coercion, intimidation or discrimination in the privilege of working at the organized trades, and if they can win to their ranks the most efficient and valuable workmen of their several trades and offer conditions for employment that will be advantageous to the industries concerned, they will not lack any legitimate power of union and organization, and will have nothing to fear from the principle of freedom and equal rights. Union men will be employed because they are preferred, and competent workmen will join unions because they find mutual benefit in them without surrendering freedom or sacrificing self-respect. The open shop can be an object of dread to unionism only so long as unionism is conducted on false principles and in disregard of equal rights and common justice in the relations of men to each other. Unionism has "run up against" the fundamental principles of modern institutions, and one or the other will have to give way. Unless the former can reconcile itself to the latter and work in harmony with them, there can be no progress of unionism without a decadence of free government.

FINANCIAL CONDITIONS.

Henry Clews & Co., New York, in their weekly circular, dated May 21st, say: More concern has been shown over gold exports than necessary. Thus far this season, or since April, the total shipments have been nearly 60 millions, but many millions have been imported during the same period, chiefly from Japan, and our net imports during the last ten months have been over 46 millions; so that the recent net loss this spring has been comparatively unimportant if our previous imports, our home production and our present heavy stock of gold are taken into consideration. It is probable that we could easily lose $100,000,000 net without giving any cause for anxiety, but there is at present little likelihood of the movement attaining any such volume. In the first place, the supply of bars is exhausted, and gold coin, which is less profitable, must now be shipped. Next, as shipments increase, money rates tend to rise here and fall abroad, so that the movement corrects itself automatically. Indications already point to the movement having reached its climax. The fact that really does give reason for concern, however, is that Government receipts are steadily falling below expenditures. This is a movement which, if not checked, will eventually oblige the Treasury to face an awkward deficit, for since we are burdened with the recent addition of 200 millions in our bank currency, which refuses to contract when demand for money declines, it follows that we may have to face a

Treasury deficit and a depletion of our gold reserve both at once if present conditions continue.

The April statement of foreign trade was better than expected. Our exports were $109,995,000, a slight increase over last year, while our imports declined over four millions to $83,496,000, leaving an excess of 26½ millions in exports, compared with 22 millions last year. Had it not been for the high price obtained for our cotton, however, there would have been a material decrease in exports, the general tendency of which has been to diminish. The decline in imports is, of course, attributable to lessened trade activity at home. Evidences which confirm the latter are decreasing railroad earnings, the shrinkage in bank clearings, depression in the iron trade, and increased curtailment in the cotton industry. These factors, however, are exerting little effect upon the stock market, because they have already been well discounted by the previous decline. First-class securities are well held in spite of such developments, and one of the most satisfactory features of the situation is the good demand for prime investments. This is usually one of the first signs of approaching recovery, and it must not be forgotten that Wall Street has an odd fashion of apparently running counter to prevailing conditions, because it discounts them ahead. The war continues to exert an important indirect effect upon this market. Aside from the Panama Canal payment, we should probably export little gold were it not for the war.

A SUMMER SCHOOL FOR NATURE STUDY.

The Macdonald Institute, situated on the grounds of the Ontario Agricultural College, near Guelph, will provide a summer school for teachers during the coming vacation. The term will extend from July 5th to July 29th, inclusive, and the work will consist, we are told, of practical nature study, suitable for our Public Schools. The classes will be under the direction of Dr. W. H. Muldrew, of the Macdonald Institute, and Professor Wm. Lochhead, of the Biological Department in the Ontario Agricultural College, assisted by teachers of special fitness in the various subjects of the course. The course is to be thoroughly practical, involving daily excursions, lectures and laboratory work, the preparation of nature study collections and courses of reading in illustration of the subjects discussed.

—Under an opinion handed down by the Supreme Court of the United States a telegraph operator for a rail road company, and a fireman on a railroad engine are "fellow-servants." Negligence of the former causing the death of the latter in the operation of trains is declared a risk the fireman assumed, and not a ground for damages against the railroad company. The case was that of Allene A. Dixon against the Northern Pacific Railway Company for damages caused by the negligence of a telegraph operator.—Detroit News.

Rooms 23, 24, 25 and 26, Sun Fire Building,
13-15 Wellington St. E., TORONTO.

Reduced Cost of Production

is the goal all are striving for.

One of our Band Mill customers in comparing the **Band** with the **Gang** said:

"It's quality, not quantity, I'm after. I have stood over my men this year and insisted on quality. In selling my cut I arranged for an advance of 25c. per M for every 1% advance in quantity of the cutup and better grades. By the use of the Band I have secured 8% advance, which means $15,000 extra profit this season."

Several gangs have been discarded for the Pony Band double cutting, adding much to quality while only slightly reducing quantity. Many hundred single and double cutting bands running in Canada. Simple—easily managed—it's worthy of investigation.

HOW TO BUILD FIREPROOF.

In view of the very general interest taken at the moment in fireproof and slow-burning construction, not only by those proprietors in Toronto whose buildings were destroyed in the April fire, but by many elsewhere, we think it well to reprint the following "Recapitulation" from the pamphlet on the subject published four or five years ago by Mr. Francis C. Moore, of the Continental Fire Insurance Company. As expressing the views of a man of long experience in fire-underwriting and careful study of the effects of fire on buildings, this pamphlet, entitled "How to Build Fireproof," is worthy of careful study by architects, builders, insurance men and property owners.

RECAPITULATION.

In order to save anyone who contemplates erecting a fireproof building the trouble of revising the preceding pages, I have prepared the following recapitulation of important points to be observed, in order that he may be able to check off his plans and specifications, and see that all important features have been duly attended to.

Enclosing Walls.—Should be not less than 16 inches thick for the top story, increasing four inches in thickness for every 25 feet to the bottom. Should be built of hard-burned brick, the lower stories (if not all) laid in cement mortar.

All weight-carrying walls should be separated by air spaces from furnace walls.

All templates should be of cast iron, especially for beams which support tanks. Stone templates should not be used.

Iron Members.—All ironwork should be fireproofed; i.e., protected by not less than four inches of fireproof material. Brick is best, well-burned terra cotta second, metallic lathing and plaster third. If plaster or metal lath be relied on, wrap the column with asbestos, quarter inch thick, bound with wire. If mercantile or manufacturing building, protect the fireproofing material of the lower four feet of columns with a metal cover to prevent its being knocked off by roller trucks and merchandise. Heavy hardwood cleats may secure this.

Columns should be cast-iron, the beam-bearing corbel brackets being cast in one piece with the column. Columns should be cylindrical (not square) to secure more perfect castings. See that top and bottom bearings are planed smooth and true; no wedges or shims allowed.

Allow for expansion in long systems of beams or girders. Avoid steel rivets; all rivet-work dangerous on account of rust. Beams should be bolted to lugs on cast-iron columns.

All ironwork should be well painted with good linseed oil paint, the iron being first thoroughly cleaned. Avoid turpentine, dryers, etc.

See that fireproofing is applied in such a way that columns may be stripped and examined from time to time.

Beams should not be spaced wider apart than five feet on centres.

Bond Stones.—Avoid in piers.

Stone Columns.—Avoid.

Tie Rods.—Do not omit them.

Floor Arches.—Best old-fashioned brick arch; next best, terra cotta segmental arches, end construction. If patent concrete arches used, be careful to see that good quality of cement is employed and the stone or gravel thoroughly washed. Arches should not be laid in freezing weather. Only cement mortar should be used, and every square foot carefully watched in process.

Cover top with cement concrete to insure waterproof floors. Leave scuppers or water-vents at each floor to carry off water thrown by fire department.

Leave no hollow spaces below wooden floor boards.

Stairways.—Elevators, dumb-waiters, etc., should be cut off in all buildings by a brick partition between the hallways and main rooms, with fireproof doors (for which see underwriters' specifications). It is best to have all stairways enclosed in brick wall.

Avoid stone treads, slate or marble, unless web support of iron beneath. It is claimed wrought-iron support is better than cast-iron open work.

Thoroughly fire-stop all openings for gas, steam pipes or electric wires, to prevent fire travelling from story to story. These should be in staircase tower.

Glass Windows.—If on exposed sides, protect with fireproof shutters (underwriters' specifications). Set eyebolts for hinges when building walls. If wire glass be used, they should be glazed in metal frames, and if on exposed side, should have double sheets with one inch space between them.

Dynamo Room.—Avoid water or steam pipes over switch-board. Have glass floor.

Fire Extinguishing Appliances.—Have six-inch standpipes, with outlets for hose at each story for use of firemen; Siamese connection at street. Arrange signals to street and hose on each floor to reach most remote point.

Have pressure tanks in basement, and support all roof tanks on iron beams (fireproof) resting on cast-iron templates on brick walls, where they cannot endanger staircases.

Vertical pipes should be in staircase tower.

Roof.—Avoid all woodwork in roof, even outriggers for cornice. Avoid slates on slanting roofs, as in falling they would injure firemen. Best roof is flat brick or tile.

Partitions must not rest on wooden sills or bases.

Night-watchman.—Have somebody on premises at night and on holidays understanding elevator, force-pump, etc. Have enough steam up at all times to run one elevator.

Skylights.—Protect with wire netting above and below, and arrange so as to be opened by firemen for letting out smoke and gas. If wire glass is used, then no overnetting or undernetting will be required.

Cut-offs at street for gas and electric installations should be provided where firemen can see and use them in case of fire. This is an important matter.

BUTTER AND CHEESE.

Dealers in Great Britain just now seem to be asking themselves, which is the poorer property, butter or cheese? The trouble seems to lie deeper than a mere dullness in those lines, or even in an over-supply of them, but to be due to a general depression of business in the Old Country, with a consequent low consumptive capacity. In cheese, the fact that grass flavor has now become more prominent, together with the abnormally low prices at which it was obtainable a few days ago, gave a sort of small spurt to the trade, but this did not last long, dealers wishing to clear out old stocks first. One feature of the Old Country markets worthy of attention is the fact that quite recently there has been a revival in the importation of cheeses from the United States, and these have been sold at very low prices, some at only 30s., while finest has only brought 40 to 41s. Probably this is due to a reaction after the very high and stimulating prices in the States a year ago, which caused over-production for the country's present diminished needs. The above state of things has, it is almost needless to say, produced very depressed conditions in the dairy industry in Canada as evidenced by the extraordinarily low prices prevailing now in the country compared with a year ago. It may be said, however, that during the present week a certain amount of improvement has been visible, the ruling prices at the boards having ranged between 8 and 8¼c.

With regard to butter, the trouble is that in Britain supplies are coming in from almost every quarter, though not to any extent from Canada, while stocks are already over-large, no doubt from the same causes as have affected the cheese market. In the local market also there is an accumulation of stocks due to the heavy receipts, while much of the butter offered is of poor and inferior quality. This not only sells very slowly itself and at low prices, but affects the demand for the better grades as well.

BANKING REVIEW.

We present below a condensation of the monthly statement of Canadian banks for April, 1904. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities; average holdings of specie and Dominion notes, etc.:

CANADIAN BANK STATEMENT.

	Apr. 1904	Mar. 1904.
LIABILITIES		
Capital authorized	$97,546,666	$97,046,666
Capital paid up	78,738,355	78,727,552
Reserve Funds	50,971,115	50,892,024
Notes in circulation	$58,649,870	$59,760,119
Dominion and Provincial Government deposits	8,536,941	9,239,464
Public deposits on demand in Canada	104,112,729	106,484,714
Public deposits at notice	301,044,721	297,913,232
Deposits outside of Canada	34,663,824	40,506,257
Bank loans or deposits from other banks secured	677,305	680,491

Specie	$16,813,380	$16,805,962
Dominion notes	30,251,958	30,422,417
Deposits to secure note circulation	3,130,844	3,130,844
Notes and cheques on other banks	15,536,206	16,759,669
Loans to other banks, secured	602,305	707,322
Deposits with other banks in Canada	5,207,827	5,493,626
Due from banks in Great Britain	2,551,004	5,482,816
Due from other banks in foreign countries	10,211,489	12,138,236
Dominion or provincial Govt. debentures or stock	10,576,950	10,441,895
Other securities	53,876,748	53,288,086
Call loans on bonds and stocks in Canada	36,771,611	37,553,851
Call loans elsewhere	36,426,920	41,004,443
	$221,957,243	$233,229,167
Current Loans in Canada	409,196,073	403,566,588
Current Loans elsewhere	18,872,814	18,523,514
Loans to Dominion and Provincial Governments	2,974,624	2,500,970
Overdue debts	2,002,802	2,390,807
Real estate	723,863	726,434
Mortgages on real estate sold	752,511	736,501
Bank premises	9,383,194	9,238,012
Other assets	3,843,270	4,931,790
Total assets	$669,706,579	$675,843,963
Average amount of specie held during the month	16,292,799	15,532,100
Average Dominion notes held during the month	29,809,788	30,483,050
Greatest amount notes in circulation during month	61,645,746	60,947,515
Loans to directors or their firms	11,033,680	10,871,685

Not much that is novel can be extracted from the Banking Return for April. Circulation has gone down about two million; and deposits in Canada are reduced from $444,900,000 to $439,700,000 while those outside of Canada are six millions less. There is a considerable falling off in call loans, while current loans in the Dominion have gone up from $403,000,000 to $409,000,000. Money is fairly easy in Toronto. There is a disposition to lend more money on call, and while 5 is the usual rate, 4½ has been taken. Good commercial demand exists for money, and the current rate for discounts is from 5 to 6 per cent. Montreal money market is also easy for legitimate wants; operations in stocks in that city are extremely quiet, not to say dead for the moment. The New York market for call money is easy; 2 per cent. being the prevailing rate.

Accounts from the western peninsula of Nova Scotia are satisfactory: the fisheries are successful, both codfish and lobsters bringing good prices; the

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending April 30 1904.

J. M. COURTNEY,

apple districts along the Bay of Fundy yielded a million dollars last year; there was a large cut of lumber, and every sort of manufacture is active and apparently profitable. In Cape Breton, on the other hand, the almost feverish activity of a year or two ago has given place to dullness, and in retail trade, the result of restricted manufacturing at the Sydneys, stocks on shopkeepers' shelves are too heavy. Happily, last week orders were given to relight the open-hearth furnaces and to run the blooming mill day and night, which will give a fillip to the whole neighborhood. Advices from St. John are of a fairly favorable character. At that city, as well as at Halifax, there has been an unusual influx of immigrants from across the Atlantic, and St. John's winter port business has been very satisfactory, causing an activity of movement that sent the bank clearings in that city up to close upon a million a week. But other parts of New Brunswick must feel such misfortunes as the closing of the pulp mills at Mispec, and the destruction by fire of the Shediac Shoe Factory.

Quebec province has felt the drawback of an exceptionally severe winter and late spring. The volume of spring trade in dry goods, groceries, metals, and hardware will fall short of that of last year; the carrying over of retail stocks caused by the blocking of country roads and the congestion on Ontario and Quebec railways must cause an enormous difference in the turn-over. Strikes in the building trades of Montreal, such as the stone-cutters and marble workers, plumbers and painters, have caused a serious lessening of city retail trade. Dry goods houses and stationers in that city, it is true, have experienced some unusual demand by reason of the destruction of stocks of these goods in the Toronto conflagration.

In southwestern Ontario, the extraordinary depth of winter snows and the severity of the weather in March and April not only paralyzed railway traffic for many weeks, but has left deep traces of its effects upon farm, orchard, and garden. The Ontario Government report up to 16th May states that from 20 to 90 per cent., in different districts, of the fall wheat is winter-killed, the most serious damage being along the Lake Erie shore. Clover is a failure, also, in this district. Fruit trees have suffered severely from frost and from girdling by field mice, and the crop of small fruits is reduced from like causes. Young farm stock has suffered from the severity of the winter, many calves and young swine having died. The wholesale trade of Toronto necessarily loses in volume from the diversion to other centres of orders which would have come to it but for the destructive April fire. Strikes are "in the air" here, too, in the building trades and in the printing and allied occupations. Preparations for rebuilding the burned districts go on, but not with especial alacrity. In residential parts of the city building is fairly active. Lumber prices are firm.

In Far West Canada, one finds the usual hopeful activity, and decided evidences of development. There is a real estate boom in Winnipeg, which is being carried to dangerous lengths, but the healthy growth of the current business of that place is undeniable. For several weeks the reports of farming operations in Manitoba and the Territories have been buoyant. To-day's telegram from Winnipeg to this journal describes the weather as cool and showery, the grain planted has germinated well, and the area sown is believed even greater than already stated.

A report from Atlin, dated 30th April, says the situation generally is a promising one. Business men, who had done a business of more volume than last year, because of the growth of the camp, and carried heavy stocks to supply their customers (the miners) during the winter, have been well paid after the spring wash-up. Placer mining has been active; and hydraulicing, which was an experiment last year, is this year promising, for both new capital and new skilled operators have come in to pursue it.

ABSTRACT OF BANK RETURNS.

THE TRUST COMPANY IDEA AND ITS DEVELOPMENT.

(3)

THE TRUST COMPANY IDEA IN ENGLAND.

As an English institution the trust company idea has made little progress in Great Britain in comparison with the colonies and the United States, although safe deposit companies and companies doing fidelity insurance have existed for a number of years, and there have been many agency concerns which take up some of the other incidental duties of a trust company. One obstacle has been the absence of any provision for the remuneration of trustees. This has been removed by the Judicial Trustee Act of 1896, which provides that the High Court and certain other courts may upon application appoint a trustee who will act under the direction of the court, and also provides for the remuneration of such trustees. The opening for the corporate trustee was further advanced by the Bodies Corporate (Joint Tenancy) Act of 1899, which was specially designed to facilitate the holding of trust funds jointly by corporate bodies and individuals. This appears to be a popular method, as it enables the settlor or trustee to associate the company with any personal friends in whom he has confidence. The trust company need not interfere with the income; its services can be used only to render secure the corpus of the company; and the company does not interfere with the duties of the family solicitor, in whom the confidence of the settlor or testator is reposed. There are no special laws governing trust companies in England, but they are subject to the ordinary laws which govern private trustees.

There are but few companies which make a

specialty of the trustee business. In London we find the Trustee, Executors and Securities Company, which in the fiduciary business has not fulfilled the expectations of its promoters, and the Law Guarantee and Trust Society. The latter company, which has an active trust department, was established in 1888, and has a capital of $2,000,000, of which $200,000 is paid up, and a reserve of $180,000. Over three-quarters of the paid-up capital is invested in the names of the judges of the Supreme Court as trustees for the society. Many of its shareholders are connected with the legal profession and it has branches in Dublin, Edinburgh, Birmingham, Glasgow, Leeds, Liverpool, Manchester, and Newcastle-on-Tyne. This company also undertakes fidelity insurance and guarantees the payment of mortgages and debentures.

In 1897, the Law Guarantee and Trust Society acquired a large number of the shares of the Public Trustee, Limited, of Edinburgh, and it now carries on its business in co-operation with the Scottish company. In Scotland many of the functions of a trust company are undertaken by the judicial factors, who, in their various classes, correspond very closely with the curators appointed under the old Roman Civil Code. The Court of Session has exercised the right of appointing judicial factors for centuries, but it was not until 1730 that the powers and duties of these officials came to be regulated by the Act of Sederunt, which governed all factors until the year 1889 except certain classes which came under the Pupils Protection Act of 1849. In 1889 the Judicial Factors (Scotland) Act was passed, which applied to all judicial factors, and brought their administration under the superintendence of the Accountant of the Court. As a matter of practice, judicial factors in Scotland are only appointed by the court, and are rarely, if ever, appointed by private parties. The office of the Judicial Trustee, appointed by the English Courts under the Judicial Trustees Act of 1896 and the Judicial Trustees Rules of 1897, is very similar to the judicial factor in Scotland. The appointment may be applied for by the trustee or any person interested in the trust. The judicial trustee is required to lodge with the court a complete statement of the trust property, and to correct it from time to time; to give security, unless otherwise ordered; to keep a separate trust account at a bank approved by the court; to lodge all documents of title with the bank, subject to inspection by any person authorized by the court, and to make up annual accounts and deliver them to the court at fixed dates for audit.

Interest in the trust company idea has been chiefly aroused in the United Kingdom by the success of the American and colonial companies, some of whom have a London office; and the trust company idea is growing in popularity. In transactions with another country there is always a difficulty in knowing exactly whom to rely upon. The element of personal acquaintance is often impossible; so with the growth of business the English public are learning that the established colonial trust company can be made very useful.

English companies and estates who have money to invest upon mortgage and municipal debentures are glad to make use of a responsible management and a reliable local advisory board. Capitalists who look for a larger profit than four or five per cent. find the trust company the best medium to collect, sift and report upon specific investments in real estate, mines, or whatever else they may want. Better results can be obtained in this way than by relying upon the advice of an agent sent from home without knowledge of the country. In closing negotiations the trust company is a useful agent to hold deeds or money in escrow pending the fulfilment of a condition. Many people who have investments and interests in the colonies are learning to make use of the trust company as they do their family solicitor at home. It collects and remits rents, interest and dividends; it pays taxes and keeps insurance paid up; it will accept and act under power of attorney for the execution of deeds; it will take out letters of administration and probate and hold property in trust; it will advise as to the best course to pursue in the disposal and management of properties; and it is a convenient medium to represent English shareholders by proxy at the meetings of companies to protect their collective interests and urge any special line of policy. In many respects the trust company in the colonies may be compared to the great agency firms, whose example originated the idea in the United States, (1) and who have with profit to themselves done much useful work in India.

ERNEST HEATON.

(1) Sketch of the Pennsylvania Company for insurances on lives and granting annuities.

AGAINST THE METRIC SYSTEM.

A codicil to the will of the late Herbert Spencer read to the effect that, should a bill be introduced into Parliament within ten years of his death for the compulsory adoption of the metric system of weights and measures, he desired the reprint of his pamphlet entitled "Against the Metric System," and its distribution amongst those likely to be interested. This has now been done, and the booklet, including appendices containing quotations from the Emperor Napoleon, Sir Frederick Bramwell, and other noted opponents of the system, has been issued by Williams & Norgate, London. The great philosopher, at the outset, takes exception to the allegation that opposition to the compulsory adoption of the decimal system results from ignorant prejudice, and contends that, far from this being the case, there are strong grounds for rational opposition to it, both special and general. This is a fact which is certainly too often lost sight of. As long ago as 1863 Sir John Herschel, no mean authority, found fault with the very basis of the metric system, and incidentally destroyed its chief *raison d'être*, for, apart from the great advantages undoubtedly to be derived from a uniform structure based on a rational and scientifically accurate unit of measurement, few people will be found to argue in favor of such a radical alteration in popular customs as would be required. Change for change's sake is the last thing desired in such a matter. The French metre as it stands professes to be the 10,000,000th part of the quadrant of the meridian passing through France from Dunkirk to Formentera, and, therefore, is a local, not a universal, measure, and one which is too short by a sensible quantity. A better unit of dimension, in his opinion, would be the polar axis of the earth, which measures (supposing we take the inch for a unit) 500,497,056 imperial inches, or only 82 yards short of 500,500,000 inches, an error in the whole diameter of the earth of 8,000 miles, which amounts to practically nothing. Thus, by increasing our present yard, or its multiples by precisely one one-thousandth part, we should be in possession of a system of linear measures as nearly perfect as possible and much more so than the metric system.

There are several other objections to the decimal system, however, as Herbert Spencer points out, and many of these arise from what may be called the natural order of things. To be brief, among these may be mentioned the division of the circle into 360 degrees, each of 60 minutes, and each of these comprising 60 seconds. Should these be divided into 100 degrees, 100 minutes and so forth? And what about the year—shall it be divided into ten months? If so how could that be reconciled with the fact that the moon becomes full twelve times in the course thereof? Why should not the day consist of twenty hours? In the mariner's compass, too, the divisions hinge upon the natural relations of the cardinal points, thus precluding a division into tenths.

Even in countries where the decimal system has been in force for years, either wholly or in part, for example, in France, where it was made compulsory after the Revolution, all sorts of nomenclatures are still in force. A sou is the common name for five centimes; precious stones are sold by the carat, firewood in cordes, milk in pints, grain, etc., in boisseaux, wine in half a dozen different kinds of measures, sugar in livres and half-livres. In the United States and Canada the application of decimals is only partial; we have a hundred cents to the dollar, but, though we have the dime or ten cent piece, we have also in just as frequent, though perhaps not as logical use, the half dollar and the quarter.

But turning away from the practical anomalies of daily life, there is, Spencer argues, a fundamental reason why the decimal system should not be established and why it has not made better progress even in the countries where its adoption should, if it were really as perfect a method as has been represented by its advocates, have become well-nigh universal. This reason is that the unit ten is unsusceptible of being divided into several aliquot parts. Divide it by three for example, and we have a quotient represented by 3·33333—and so on ad libitum; there is never a completion. With the duodecimal division, on the other hand, it is easy to make definite calculations; twelve, for example, is easily divisible into halves, quarters, thirds and sixths, This means an economy of time and mental effort and points out an ineradicable difficulty to the universal use of the metric system. It suggests, too, in our author's opinion, the possibility of establishing, with but a few minor changes a really uniform system upon that at present in use in Great Britain.

AN INTERVIEW WITH THE JAPANESE CONSUL.

The Monetary Times had the opportunity last evening of an interview at the King Edward Hotel with Hon. T. Nossé, Consul-General for Japan at Ottawa. Mr. Nossé has been for many years in the consular service of the Empire, has resided at Seoul, and is familiar from repeated visits with the present seat of war. He was most earnest in asserting that the present conflict was forced upon Japan. "We are fighting for our very existence," said he. "The manifest policy of Russia was to overrun and dominate first Manchuria, then Corea, and having secured and fortified the eastern coast of Corea, they would be within two hours' sail by swift torpedo destroyers from the coast of Japan, which is only 64 miles away. With the Russians in possession of all that vast territory our national life would be endangered. So you can see that we are fighting for our very life."

Being asked who he thought had instigated the arrogant policy which led to the present war, Mr. Nossé was inclined to think that Alexieff and the two members of the Russian Legation, Lassar, at Pekin, and Poparoff, at Seoul, had planned the scheme; as also probably a future descent on Thibet, and a southward movement about Turkestan, both portions of a slow and crafty policy of aggression.

Turning to the subject of Canadian trade with Japan, the Consul-General regretted that its progress was slow. Canadians have been preceded by the English in the sixties, by the Germans in the eighties, and by the Americans since the early nineties. The French had some foothold in Japan, but since the failure of the Comptoir Disconte de Paris, some fifteen years ago, there is not so much doing with that country, except the export of unbleached silk, which is finished in Lyons. 'You are late comers," said Mr. Nossé. "and you cannot expect to catch up with your competitors all at once. The American policy is just now especially aggressive. J. J. Hill, with his railway and steamships from Seattle, is pushing Oriental trade, at the same time that he cultivates the friendship of the Japanese by employing them by the thousand on his road, which is something that the British Columbians decline to do." Then Rockefeller's octopus, the Standard Oil Company, has bought the coal oil mines in North Japan, and calls the concern out there the International Coal Oil Company. A monopoly has been secured in Japan by the American Tobacco Company, which is said to have spent five million dollars in doing so. It has bought up and practically controls the cigar and cigarette trade of the country. They bring over from the States Virginia leaf tobacco and mix it with the native weed. In such goods as cottons and tobaccos Canadians have a poor prospect of successful competition; but there are goods in which Canada may by persistent effort do a larger trade. Among these may be mentioned flour, butter, condensed milk, field implements, leather, woodpulp. He approved highly the idea of a resident Canadian agent in Japan, and was disposed to hope good things from the present residence there of Mr. MacLean.

THE MONTHLY BANK STATEMENT.

The suggestion has been made to us that many bank managers would like the Bank Statement which appears monthly in our columns, arranged in such a manner that it could be removed from our pages and hung up, or perhaps pasted into a book. In order to accommodate those who desire this arrangement we make the experiment to-day. The Bank Statement for April will be found in the middle of the paper, and can be lifted off by simply unbending the wire fastening. We should, however, before continuing this change, like an expression of an opinion from some of our banking readers whether it is worth while.

THE LUMBER SITUATION.

Very little change has taken place in the situation of the lumber market since last report. Values remain quite firm, and are likely to continue so for some time. The demand from builders is of fair volume, though perhaps not quite so brisk as was anticipated. The following is a summary of Farnworth and Jardine's (Liverpool), last monthly circular: The business of May was very disappointing; the arrivals in the aggregate were very light, but the deliveries far short of expectations, and stocks are more than sufficient for present requirements. Contracting for the coming season progresses very slowly. As to Canadian woods, of waney pine about 24,000 cubic feet have again been imported via Portland, Me.; the consumption has been fair, prices are steady, but stocks are too heavy. Square pine has not been imported, the demand is very limited, but stocks are large; values remain practically unchanged. There is very little enquiry for red pine. Oak logs continue in very poor demand, and the consumption during the past month has been nominal; stocks are heavy. Elm is in fair request, and prime wood still commands full value; the import during the past month has consisted chiefly of round logs. There has been a fair enquiry for ash; the import has chiefly been in round logs. The import of pine deals has been light, but the consumption has been very disappointing, and the stock remains too heavy;

there is little change in value to report. Red pine deals are in very little demand. Of New Brunswick and Nova Scotia spruce and pine deals, the arrivals have again been on too large a scale, the consumption has barely kept pace, and consequently the yarded stocks have not been drawn upon to any considerable extent, consignment parcels by the liners continually arrivng have overstocked the market, and prices are lower. Pine deals are in little demand. Birch logs, both from Quebec and St. John, have been imported freely; there has, however, been a fair consumption, prices are well maintained, and stocks are not excessive. Planks have been imported to a moderate extent, there has been more enquiry, and the stock is not excessive, prices show a little improvement. The import of British Columbian and Oregon pine for the past month has been about 166,000 cubic feet, half logs and half lumber; there has been a fair consumption, but the stock is too large; values are steady.

SHIPPING ANOMALIES ON THE PACIFIC COAST.

A committee of the Victoria Board of Trade has for some time past been anxious for the preservation of Canadian trade to local interests instead of letting it slip into the hands of Puget Sound ports. They have come to the conclusion that the present regulations with regard to the shipping of crews on foreign-going vessels are prejudicial to the interests of Canadian trade on the Pacific coast, and work to the favor of the United States. Shipping masters will not undertake the responsibility of finding crews for outgoing vessels, and captains are not permitted to employ any other person to assist them in securing crews. Vessels arriving here from long voyages invariably lose a portion of their crews by desertion, and often the whole crew of seamen has to be replaced by the time the vessel has completely loaded. The Canadian regulations have always made it difficult to secure crews with facility, whereas boarding-house masters in the United States ports on Puget Sound are always ready to supply crews, and in many cases have yearly contracts with shipowners. Although the charges made by these men are often extortionate, owners of vessels would sooner pay these excessive charges than have their vessels delayed after loading, and it has been not unusual to tow vessels, after loading, to Puget Sound ports to pick up their crews. The extra cost involved in this course has caused a discrimination in freight rates against British Columbia, and it has also resulted in vessels obtaining their sea stores in the United States port instead of at the British Columbia loading port. British Columbia shipping interests are naturally desirous of putting an end to this state of things.

WESTERN BOARDS OF TRADE.

It has been well observed that much of the effect of the efforts of the various boards of trade in the West is lost through lack of cohesive action on the part of these organizations. And it has been thought that a more expeditious and satisfactory system of dealing with such questions would be to arrange an annual convention of delegates from Western boards of trade and business men's associations which could discuss and forthwith act upon all resolutions of general interest.

Some time ago the Calgary Board of Trade brought this matter before certain boards in the Territory of Alberta, and suggested that such a convention should be called. The idea was favorably received, and that board has, therefore, decided to invite all the boards of trade and kindred organizations in the North-West Territories and the easterly portion of British Columbia to elect delegates to a convention to be held at Calgary on the 15th and 16th of June next, and also to submit subjects for discussion and action.

Each board of trade or kindred organization in the North-West Territories and that portion of British Columbia lying east of Kootenay Landing and Revelstoke will be entitled to send one delegate on a basis of a membership of twenty or less, and one delegate for every additional twenty members.

In order to convey some idea of the scope it is proposed the deliberations of this convention should cover, the following subjects have been suggested, and these, or any other, may be introduced by any delegate in attendance by complying with the temporary rules of the convention.

1. Change of Legislation respecting Small Debt Procedure.
2. Government Inspection and Grading of Westbound Grain.
3. The Organization of a Good Roads Movement in the West.
4. The Passage of Equitable Insolvency Legislation.
5. Immigration.
6. The Chamberlain Imperial Trade Policy.
7. The opening up of a Transportation Route via the Hudson Bay.
8. The Exclusion of United States Currency.
9. Shall Colonization Railways be subsidized by the Dominion Government?
10. Permanent Organization of an Annual Board of Trade Convention.

W. Whyte, Esq., vice-president of the C.P.R., F. W. G. Haultain, Esq., Premier of the Territories, and other leading men have signified their intention to be present at the convention. A half rate to Calgary and return will probably be granted by the railway from all points within the district covered.

A BEAUTIFUL BRITISH COLUMBIA VALLEY.

Who that has travelled west on the main line of the Canadian Pacific Railway could imagine when at Sicamous Junction that he is at the gateway of the most lovely and fertile valley in British Columbia. If we except the placid Shuswap Lake, in whose peaceful bosom the mountains surrounding are mirrored, all else is "stern and wild." The traveller southward on the Shuswap and Okanagan Railway is conveyed past the screen of rugged rocks, however, and then, opening to the view, he will see well-tilled farms and comfortable looking farm houses. In fact, the smile of plenty is over all. Prosperous towns are growing up. The first of these one comes to is Enderby, with its grist-mill and lumber mill. The shunting done at the station, and the delay of which some fellow-passengers strongly complain as a hindrance to our getting through, is all an indication of business, which is increasing so that better accommodation will in the nature of things have to be provided, and that before very long. The next town reached as we travel south is Armstrong, fourteen miles from Vernon; and we note how clean and neat the residences are. Lawns and gardens grace and add a charm to the town. Wealthy farmers are quite numerous hereabout, for this is the centre of one of the best agricultural districts in British Columbia. Formerly the land was held by large land-owners who raised stock; but latterly the land has been subdivided and worked. The shipments from Armstrong last year were 65 tons of apples, 307 tons of grain, 281 of hay, 2,009 of roots, 2,493 of flour, 113 of millstuffs, about 50 head of cattle and horses. A creamery, sawmill and flour mill are the leading industries of the place, and give employment to a large number of men. Its up-to-date stores and excellent hotel accommodation are really noteworthy.

As we continue our journey south we note the well-kept farm stock, the orchard breaking into bloom, while, in the field, seeding is in full swing, and he of the furrow is "at it" early and late. Vernon is the next stop: a charming rural city, decidedly English. The swain hereabout conveys a suspicion of Surrey or Kent, "don't ye know," and has his "club" and everything quite English, even to exaggerated riding unmentionables. The population of Vernon, which must now be a thousand or more, is being added to steadily. The small holdings of well-to-do fruit farmers are increasing in number, and soon the thousands of acres that were used for the pasturing of cattle only a few years ago will be converted into farms of from ten to a hundred acres. It can be easily understood how these changed conditions are favorably affecting the general prosperity not only of Vernon, but of the entire valley. On every train coming in are settlers,

mostly from Manitoba and the North-West Territories, who, after years of wheat-growing on the prairie, look for a more moderate climate. The climate in this Okanagan Valley is almost ideal; extremes of cold and heat are unknown. From Sicamous to Penticton, on Okanagan Lake, at its southern end, there is not anywhere in the Dominion a more excellent country. Here we are only thirty or forty miles from the United States boundary. Coupled wth its vast resources of fish in lake and river, and game of every kind in abundance, a market for the products of this district lies near at hand on these vast prairies, so rapidly filling up, with prices for these products always good. VIATOR.

MANUFACTURERS' ASSOCIATION SUMMER TRIP.

A recollection of peculiar social enjoyment belongs to those who have taken part in the Manufacturers' Association trips of 1902 and 1903. The first was from Montreal to the Maritime Provinces by rail; the second was from Toronto to the Pacific Coast, also by rail. No one who was privileged to be on either of these trips will ever forget their delights. The news that the trip of 1904 is to be to the Maritime Provinces and Newfoundland will carry pleasure to many hearts. Not to every heart, for there are those, both male and female, who have a great and unconquerable dread of being seasick. However, the greater part of this journey, down the St. Lawrence and along the shores of the three Maritime Provinces and Newfoundland is smooth sailing, and the boat is a good one.

The circular descriptive of the trip tells us that the steamer secured is the "Prince Edward," one of the Dominion Atlantic Company's line, and that the excursion is under the management of the well-known tourist house of Thos. Cook & Son. The boat is to sail from Montreal on Saturday, July 2nd, 1904, at noon, and the trip will occupy three weeks. The following points will be visited: Quebec, Father Point, Gaspe, Perce, Summerside, P.E.I., Charlottetown, P.E.I.; Georgetown, P.E.I.; St. Pierre, Port aux Basques, Nfld.; St. Johns, Nfld.; Sydney, N.S.: the Bras d' Or lakes, Halifax, and possibly St. John, N.B. Four or five days will be spent in Newfoundland. Applications for berths should be made at once to the secretary, accompanied by deposit cheque for $25 per passenger. Plan of the steamship can be forwarded in a few days if desired.

LA BANQUE NATIONALE.

The statement of this bank for 1903-04, submitted at the recent annual meeting in Quebec, shows an increased business over the previous year, at a rate of profit pretty well maintained. The net profits of the year were $152,777, which is almost exactly the same figure as those of the previous twelve months. Deposits continue to increase, while the circulation keeps well up to the limit. The capital paid-up was increased two years ago to $1,500,000 and the reserve has been added to until it is now $450,000. The discounts, which were $5,838,000, in 1901, are now $7,839,000, an increase of two millions in the interval. Immediately available assets show a distinct increase, while there is a lessening in the items of overdue bills, real estate and mortgages. New branches, opened during the year under notice, are in existence at Trois Pistoles and St. Charles, as well as in the St. Jean Baptiste suburb of Montreal. The branch opened at Marieville, near Granby, not yielding the expected profit, has been prudently closed. The same board of directors was chosen, and Mr. Audette and Mr. Dupuis were re-elected president and vice-president, respectively.

THE SOVEREIGN BANK OF CANADA.

The result of the business of this bank for its second year has been an addition of $2,438,000 to deposits, while circulation has gone up from $859,000 to $1,091,000; current loans are now $4,753,000, and demand loans $1,960,000, where a year ago they were, respectively, $2,706,000 and $1,715,000; assets have reached a total of $8,604,074, an increase of nearly three millions in a year, and about 44 per cent. of them is in the shape of readily available assets.

The net profits were $119,760, or at the rate of 9.21 per cent. After paying dividend, which has been wisely kept at the low rate of five per cent., and writing $5,000 off bank premises, besides rebating interest on discounted bills not due. it is found possible to add $25,000 to rest, making that fund $350,000, and to carry a few thousand dollars forward. The bank has made progress on which its management is to be congratulated. The inflow of deposits manifests confidence, and the character of the statement indicates a healthy business.

COMMERCIAL UNION ASSURANCE COMPANY, LIMITED.

For a good many years, this company has maintained a deservedly prominent place among British underwriting offices. It has accumulated large reserves and its shares command a handsome premium. The company's total assets approach seven millions sterling. The aggregate of its reserve funds, fire, life, marine and accident, is £4,946,450, which is almost exactly $24,700,000. It does business in Great Britain, Canada, Australia, South Africa, and other British possessions, as well as in the United States, Germany, Japan and Argentine.

The Canadian business of the Commercial Union is large: in volume at risk, namely, $45,586,000, it ranks fifth among those British fire companies, nineteen in number, doing business in this country. With fire premiums of $458,743, taken in the Dominion in 1903, the ratio of losses was 55.95 per cent. But on the whole business of the company for the year, the loss ratio was only 48.7 per cent., i.e., £862,759 upon premiums of £1,771,820. This was the smallest rate of loss for a dozen years. The company's life business is a large one, and its reserves in that department amount to £2,619,000, another half million being reserved for the marine and accident branches.

UNION ASSURANCE SOCIETY.

It was perfectly natural for a proofreader of this paragraph to ask the person who wrote it if there were not some mistake in referring to the meeting of this company last month as the "190th annual general meeting." For, indeed, it would seem more probable to nine persons out of ten that the *ninetieth* meeting must be meant, since that would take us back to the year 1814, the year before Waterloo. Nevertheless, the 1904 meeting of the Union was the 190th of the Fire Branch, established in 1714, and the 91st of the Life Branch, established in 1813. But whatever the company was doing in the reign of Queen Anne or of King George the Third, it is safe to say that more interest is taken to-day in its financial condition and in its standing among insurance institutions. The company's total funds amount to £4,117,405, or, say, twenty and a half millions of dollars. Of this great sum, paid-up capital represents £180,000; the general reserve fund amounts to £400,000; the life assurance fund, £3,067,000; there is a special fire fund of £61,141; besides a reserve of £234,036 for unexpired fire risks. If any one wishes to be made easy in his mind as to the strength of the company these figures ought to satisfy him. Then as to the standing of the company in the stock market, the ten pound share is worth twenty-five pounds.

Last year's business was a satisfactory one for the Union. In the fire department the losses were only 47.82 per cent. of the premiums, which is the lowest for years, while the expense ratio was 35.59. On net premium receipts of £585,092 this yields the very comfortable return of £97,125. Then there are the interest earnings to be added: altogether there was added to the reserves £56,573 out of the business of the year. We observe with satisfaction that commission and expenses in the life department amounted to no more than 13.23 per cent. of the life premium income. The company's report refers to the acquisition of the business of the Scottish Alliance Company of Glasgow. The retiring directors offered themselves for re-election.

The Canadian record of the society for 1903 is a very satisfactory one. The loss ratio in Canada was only 37.26 per cent., where the average losses of all companies were nearly 51 per cent., and is a very much improved record, compared with some previous years' experience of this company. The volume of the Union's business in Canada shows a distinct increase.

LONDON AND LANCASHIRE LIFE.

The report of this company for the year last past exhibits continued addition to its premium income and increase of invested funds. The policies issued during the year numbered 2,362 and their aggregate was $3,500,000. Death claims totalled $595,561 and matured endowments, $204,948. The addition made to the funds out of the business of the year was $548,000, and the total funds now stand at $9,363,000. The report pays tribute to the exertions of the company's officers and agents in the United Kingdom, in Canada, and in India.

The company insures lives in Canada from the Atlantic to the Pacific, beginning on the east with the Maritime Agency and proceeding westward to British Columbia. The year's business in the Dominion shows new business of $1,011,500; premium income, $331,572; interest income, $132,352. The Blue Book shows the company's assets in Canada to be $3,191,793. The company is well known, it has a very influential board of local directors, and its policy contracts are varied and liberal. Mr. B. Hal Brown is the general manager for Canada, while Mr. A. Stevens, manager of the Western branch, has his office in Winnipeg.

FIRE INSURANCE MATTERS.

Referring to a paragraph in our last issue concerning a fire in Eglington on the 23rd April, at the residence of Mr. Gartshore, we find that the gas machine there mentioned did not explode, and remains practically uninjured. The trouble was caused by a new and uninstructed man being allowed to attempt the recharging of the machine, which had been in satisfactory use since the beginning of July, 1901, and therefore was not the standard Siche Gas Machine of to-day. We, therefore, owe and cheerfully make an apology to the Siche people, expressing our regret for the misstatement of the cause of the accident and possible injury to the business of the machine named.

BANKING AND FINANCIAL MATTERS.

A drowning catastrophe, under circumstances of extreme sadness, occurred on Sunday last, by which two well known business men of St. John, N.B., lost their lives. John H. Thompson, R. P. Foster, and E. P. Stavert, inspector of the Bank of New Brunswick, were out on Oromocto lake, trout fishing. The boat capsized; two of the three men, John H. Thompson and R. P. Foster, were compelled, owing to exhaustion, to let go their hold in the upturned boat; only Mr. Stavert was able to swim ashore. When picked up, he was near death from exhaustion and exposure, but is on the road to recovery. This gentleman is a brother of the general manager of the Bank of New Brunswick; Mr. Foster was manager of the Royal Bank branch at St. John.

Bankers in the United States are considering a plan for issuing and securing a general circulation for bank money orders. Express companies have obtained a very large amount of business in this line because of the way in which they have been able to prove their usefulness to the mail order houses. It is thought that the banks can rightfully claim a large share of this business. In order that the plan should be successful from the start it is necessary that bank money orders should be current at par anywhere in the country, and not be subject to all the expense and delay in collection entailed by the ordinary bank draft. The idea is that these money orders shall be printed for any bank desiring them, and sold at the rate of $5 a thousand, or half cent each, by a surety company, which shall in each and every case guarantee payment.

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing Houses for the week ended with Thursday, May 26th, 1904, compared with those of the previous week:

	May 26th.	May 19th.
Montreal	.....	$20,644,099
Toronto	13,386,415	17,979,835
Winnipeg	4,350,109	4,825,880

LA BANQUE NATIONALE.

The forty-fourth annual general meeting of the shareholders of this institution was held at the office of the bank, in the city of Quebec, on Wednesday, the 18th of May, 1904, at three o'clock p.m.

There were present: Messrs. Rodolphe Audette, Alphonse B. Dupuis, Hon. A. Chauveau, Narcisse Rioux, Nazaire Fortier, Révd. Chanoine P. N. Thivierge, Révd. Tancrède J. Paquet, Révd. F. Cléophas Gagnon, Charles Brochu, Cyrille E. Delage, N.P., M.P.P.; Révd. Elzéar Dionne, Révd. Victor Huard, Ulric Tessier, J. B. B. Letellier, Eusèbe Belleau, Elzéar Labrecque, M.D.; A. A. Dechêne, Thomas Duchaine, J. Ernest L'Arrivée, N.P.; Cyprien Labrecque, N.P.; N. Arthur Drolet, Zotique Turgeon, Charles Cloutier, Odilon Turgeon, Joshua Thompson, P. Ferdinand Rhéaume, Cyrille Kirouac, Narcisse Rhéaume, François Délisle, James McCone, Chas. A. Chauveau, Ls. Cyrille Marcoux, Joseph Samson.

Mr. Rodolphe Audette was called to the chair and Mr. P. Lafrance was required to act as secretary.

Before proceeding to the reading of the annual report, the following gentlemen were elected scrutineers, viz.: N. Arthur Drolet, Zotique Turgeon, and Chas. Cloutier.

The president read the following report of the affairs of the bank:

Report.

Your directors have the honor of submitting you the forty-fourth annual report of the operations of La Banque Nationale, being for the year ending 30th April, 1904, with usual statement of assets and liabilities.

The profit and loss account stands as follows, say:

By balance to credit of profit and loss on 30th April, 1903		$ 69,704 27
By profits of the year, after providing for interest accrued on deposits, and for bad and doubtful debts		152,777 40
Forming a total of		$222,481 67
Which was appropriated as follows:		
Dividend No. 78, 3 per cent., payable 2nd November, 1903	$45,000	
Dividend No. 79, 3 per cent., payable 2nd May, 1904	45,000	
Transferred to rest account	50,000	
		$140,000 00
Leaving a balance at credit of profit and loss account of		$82,481 67

During the year, branches have been opened at Marieville, Trois-Pistoles, St. Charles and on St. Lawrence St., St. Jean Baptiste suburb, Montreal. Not responding to our expectations, the branch at Marieville was closed.

The inspection of the head office and of all branches has been made with great care, and we have the pleasure to mention that we have remarked a large increase in the volume of business everywhere.

Your numerous employees have fulfilled their respective duties with efficiency and zeal, and we are glad to be able to render them this testimony.

All of which is respectfully submitted.

R. Audette, President.

N. LAVOIE, Inspector. P. LAFRANCE, Manager.

Moved by Mr. Rodolphe Audette, seconded by Mr. Narcisse Rioux: "That the report of the directors and the statement now read be adopted, printed and published for distribution among the shareholders." Adopted.

The election being then proceeded with, the following gentlemen obtained the largest number of votes, and were consequently duly elected directors for the ensuing year:

Mr. Rodolphe Audette, Honorable A. Chauveau, Messrs. Victor Châteauvert, A. B. Dupuis, J. B. Laliberté, Naz. Fortier and Narcisse Rioux.

The president left the chair, and Mr. Charles Brochu being called thereto, it was moved by Mr. James McCone, seconded by Mr. Cyprien Labrecque, N.P.: "That the thanks of this meeting are due and tendered to Mr. Rodolphe Audette for his services in the chair, as also to the scrutineers and secretary for the fulfilment of their respective duties." Adopted.

Moved by Mr N. Art. Drolet, seconded by Mr. Zotique Turgeon: "That thanks be tendered to the president and directors for the services they have rendered to the shareholders during the past year."

The motion was adopted, and the meeting adjourned.

R. AUDETTE, President. P. LAFRANCE, Secretary.

Quebec, 18th May, 1904.

At a meeting of the directors, held on the same day, Mr. R. Audette was re-elected president, and Mr. A. B. Dupuis, vice-president of the bank for the ensuing year.

P. LAFRANCE, Manager.

London and Lancashire Life Assurance Company

Head Office for Canada - - - Company's Building, Montreal.

TURQUAND, YOUNG & Co., S. LEEKE. } Auditors.

W.-P. CLIREHUGH, General Manager and Actuary.

London, Eng., 14th March, 1904.

Issued by order of the Board.

B. HAL. BROWN, Attorney and Manager for Canada.

Montreal, April 25th, 1904.

Commercial Union Assurance Co., Limited.

The directors have much pleasure in submitting to the shareholders their forty-second annual report, with the audited accounts.

FIRE DEPARTMENT.

The net premiums for 1903 amounted to £1,771,820, being an increase of £31,768, as compared with the year 1902, and the losses paid and outstanding to £862,759 or 48.7 per cent. of the premium income.

From the profits of this department the sum of £100,000 has been carried to profit and loss; and, after providing for outstanding losses, the fire fund stands at £1,781,576 as against £1,538,901 at the same time last year.

LIFE DEPARTMENT.

The new business of the year consisted of 1,122 policies assuring £954,780, while the new premiums included in the account amounted in gross to £52,619.

The claims by death, £142,519, were within the amount expected.

Notwithstanding the quinquennial payments of £118,363 in respect of profits to policyholders and shareholders, the life fund at the end of the year showed an increase of £26,817, and stood at £2,619,089.

MARINE DEPARTMENT.

The net premiums received were £231,684, and the net losses paid and outstanding amounted to £113,147.

From the profits of this department the sum of £40,000 has been carried to profit and loss; and, after providing for outstanding losses, the marine fund stands at £485,094 16s. 11d.

ACCIDENT DEPARTMENT.

The net premiums received amounted to £117,548, and the losses paid and outstanding to £55,825.

PROFIT AND LOSS.

This account has been closed with a balance of		£169,998 13 0
and out of that amount the directors recommend:—		
(*a*) The payment of a dividend of twenty-five shillings per share (free of income tax), making, with the interim dividend of fifteen shillings paid in November last, forty shillings per share for the year 1903	62,500 0 0	
(*b*) The provision for an interim dividend on account of the year 1904, of twenty shillings per share to be paid on the 4th Nov. next	50,000 0 0	
leaving a balance to be carried forward of	57,498 13 0	
		£169,998 13 0

A SMALL BOY'S DIARY.

There is a certain nine-year-old kid in this city who is keeping a diary. The book was given him last Christmas by a relative, and his father had forgotten all about it until he accidentally found the volume the other day. Curious to see what his small son had written in it, he opened the book and found that the diary had been faithfully kept. Here are a few of the entries:

"I am nine years old to-day. Looked in the glass, but whiskers aint sproutin' yet."

"Sassed a boy. Got lickt."

"Pop borrid ten cents for carfair. that makes $1.15 he owes me. Wonder if He ever get it."

"Jimmie ——— stole my ball. I lickt him for it."

"Ast Pop for some of my money and he giv me a nickil. I want that doler."

"We feloes got up a base ball club to-day. Ime pitcher. If I had that doler 15 I could get a unaform."

"Pop got paid to-day and giv me my money."

"Mamma borrid a doler. Dam these people anyway. A feloe cant save nothin'."

"Ast Pop about banks. I want to put my money ware carfair aint so skarse."

"Got lickt again."

There was more of this, but "Pop" had read enough. As a result, there was a conference, and now the arrangement is to pay five per cent. a week interest, and settle every payday. The kid got his "unaform."—Philadelphia Telegraph.

MONTREAL MARKETS.

Montreal, May 25th, 1904.

Ashes.—The market is still disposed to ease off a little, and business is light for the season. For first quality of pots, we would quote $6.10 to $6.15, and for seconds, $5.60 to $5.70. Pearls are altogether nominal, at $6 to $6.25.

Cements and Firebricks.—Receipts of firebricks for week ending May 18th were 178,800, and of cements, 2,950 barrels and 8,500 bags of Belgian, and 420 barrels of English. For week ending to-day, the figures are: 570 barrels of Belgian, and 640 barrels of English, and 121,000 firebricks. Business is a little livelier, and prices are as quoted last week.

Dairy Products.—There has been some little further improvement in cheese quotations, but 8¼c. would be about the extreme figure for prime Westerns. Full grass butter is now coming to hand, and brings about 17c., fine fodders quote at 15 to 16c. The exports of cheese last week amounted to 32,670 boxes, nearly 7,000 less than same week of last year. Shipments of butter were 1,479 packages.

Dry Goods.—Payments are reported to be showing some improvement, and the month of May is expected to pan out much better in this respect than April. City retailers are fairly busy, and some pretty good sorting orders for light summer fabrics are still being placed, but reports from travellers are to the effect that country storekeepers are carrying over a good many of last winter's goods, and it is hardly probable that fall business will be as good as last year.

Groceries.—The sugar market keeps moving steadily upwards, and local refiners to-day advanced all grades another 5c. a cental, making standard granulated $4.45, with yellows ranging from $3.85 upwards. The demand from jobbers is good, a considerable business being reported to-day even at the advance, and there is apparently no anticipation of any break in the raw sugar market in the near future. In other lines there is nothing to note. There is a little better movement, but business cannot be called brisk. Money is coming in a little more freely.

Hides.—Business in this line is assuming a quiet tone. Beef hides keep fairly steady, No. 1 being bought by dealers at 9c. Receipts of calfskins are declining, but quotations are steady at 13c. for No. 1, and 11c. for No. 2. Lambskins are quoted at 15c. each.

Metals and Hardware.—Receipts of sheets, plates, and other iron products this spring from Britain are reported to show quite a falling off from the figures of last year at this date, and wholesalers in these lines report just a fair business, no special briskness of demand being noticeable. No noteworthy variations are reported in quotations. Domestic bars

Head Offices—Queen City Chambers, Toronto

SCOTT & WALMSLEY,

ESTABLISHED 1858.

Managers and Underwriters

are quoted in a jobbing way at $1.65 to $1.70, but a good round lot could be done at the mill probably at $1.60, or under. Iron pipe is steady at $4.42 for inch. There is no change in tinplates or Canadas. Quotations of galvanized Canadas seem to vary a good deal, and while the general quotation for small lots is $4 for 52 sheets, some claim they can buy at $3.90 or less. Galvanized sheets quote at $4 to $4.25, and Ternes at $6.25 to $6.50. Copper rules steady at 13¾ to 14c., and tin at 31½ to 32c. Lead inclines to easier figures, $3.25 being about the present quotation. Spelter is firm at $5.75 to $6.

Oils, Paints and Glass.—With the broken holiday week, business has been on the quiet side, and little change is reported in prices. Receipts of turpentine are now fairly liberal, and the quotation is now 84c. by the single barrel. In other lines, there is really nothing to note.

TORONTO MARKETS.

Toronto, May 26th, 1904.

Chemicals, Drugs, Etc.—No change has taken place in the local drug situation since last report. Prices remain steady to firm for most lines, except

THE COMMERCIAL

Reaches direct 90 per cent. of the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

Do you want to sell or increase the sale of your goods in these, THE BEST BUYING PROVINCES IN CANADA?

Estimated that 200,000 new settlers will arrive this year. Will the retail merchant offer them your goods?

Our advertisers our best references. We beg the favor of an enquiry.

THE HUGH C. MACLEAN CO., LIMITED, Publishers, Winnipeg.

Eastern firms should subscribe for THE COMMERCIAL and keep posted on Western trade

opium, which continues quite dull. From Great Britain comes word that trade has become quieter during this month, but it is not unusual to see some falling away in March. The demand from the textile trades shows, of course, no improvement, and seems likely to continue unsatisfactory for some time to come, and from other trades the demand for chemicals is not brisk. The trade all round is at present not in good condition, and any sound reason for expectation of early improvement is difficult to find, especially in view of the disorganization to trade, and the want of confidence, caused by the recent heavy failure in the New York cotton market. In the heavy alkali branch there is quietness.

Dry Goods.—A better volume of business is reported, the result of more seasonable weather conditions. This has reacted very favorably upon the demand for dress and other goods usually required at this time of the year. Travellers throughout the country state that prospects for a good season's trade should be good.

Flour and Grain.—The demand for flour is not up to the mark, or rather the divergence between the views of holders and buyers is too great to admit of the carrying through of any large amount of business. The price quoted by exporters for ninety per cent. patents is $3.65, in buyers' bags, east or west. Rolled oats are steady at $6.50. Bran and shorts remain at old prices, but the feeling in these lines is quite firm. Ontario wheat is a cent higher owing to comparative scarcity; it is firm at the advance. Manitoba remains unchanged. Barley is dull and unchanged. Oats are steady at unchanged prices. Peas are 2c. to 3c. lower. Buckwheat is 4c. to 5c. lower, and dull at the decline.

Fruits and Vegetables.—The fruit trade during the past week has been pretty active. Not many oranges are coming forward now, but pineapples, strawberries, etc., are plentiful. Prices for these are becoming easier. Prices are quoted as follows: Apples, 75c. to $2.50 per barrel, according to grade and quality; cocoanuts, $3.50 to $4 per sack; oranges, California navels, $2.75 to $4; Valencias, ordinary, $5 to $5.50; large, $6 to $6.50; lemons, Messina, 360's, $2 to $2.50; 300's, $2.75 to $3; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; dates, Sair, 3½c. per lb.; Hallowee, 4c.; figs, 8c. to 12c.; tap figs, 3½c.; pineapples, $2.75 to $3.50 per case; strawberries, 11 to 17c. per quart box; Egyptian onions, $3.50 per sack; tomatoes, $2.25 to $2.50 per case.

Groceries.—Refined sugars have made another advance of 5c. per hundredweight, and there is great firmness, in sympathy with the statistical position and report from New York. Canned goods continue very strong, especially peas and corn, which are becoming scarcer. In dried fruits, not very much is doing. Teas are held very firmly, and an active trade is going on. Reports from Japan and from London refer to increasing prices, the latter no doubt owing to the increased taxation for revenue recently imposed in this line.

Hides, Skins and Tallow.—Receipts of cow hides are about normal, and prices continue steady. Steers have gone up about ½c.. Calfskins are steady, and so are lambskins. Tallow, rendered, is a little weaker.

Hardware.—Business is of fair volume now that transportation facilities have been opened up in earnest. Seasonable lines of goods are in good demand, and travellers in the country report prospects good. In metals the movement is only fair, but prices keep up pretty well. A report received recently from the Old Country said: "A month ago we had to report the pig iron markets firm and prospects considered good. Since then the position has been well maintained, and during the last fortnight the prices have advanced strongly, the total increase since a month ago being some 1s. 0d. to 1s. 4d. per ton. Consumers have been buying freely during the last few days, and the market is at present firm with good prospects. The higher-priced metals have been moving well. Copper has improved steadily, and with a good consuming demand is tending further upwards. Tin, after easing in the early part of the month, has improved rapidly and is strong at an advance of about £4 during the month. Spelter has fluctuated mildly and is now steady. Lead has advanced 12s. 6d. per ton, and is firm.

Leather.—Trade in leather is dull just now. Prices keep up well, however, and there is a promise of better conditions coming in the trade before long.

Provisions.—Not only are the receipts of butter increasing largely, but the quality of much that is offered is distinctly inferior, so that the conditions in this branch of the trade are by no means good. Stocks are accumulating. Cheese retains its slightly firmer tone, but the volume of trade is small. Receipts of eggs the last few days have hardly been up to average, and the market is firmer. Hog products are in only fair demand just now, but an improvement is looked for before long.

Seeds.—Business now is becoming smaller, with the advance of the season. Prices, however, remain about as before.

Wool.—Some lots of new fleece are now coming forward, but the total quantity is but small. Pulled wools, too, are in dull demand.

R. G. DUN & CO.
Toronto, Montreal, Hamilton, London and Cities in Dominion, U.S. and Europe

Mercantile Summary.

THE Dominion Government are dissatisfied with the steamship service given by Colombier Bros., of Bordeaux, between France and Canada, and have served notice that they will within a short period cancel the contract.

A FIRE which started in the pit-head of one of the largest of the mines in Nanaimo, B.C., caused a good deal of alarm in that community early this week. As it was, the pit-head, fan-house, engine-room, car shop, blacksmith shop and a large number of cars were destroyed at a loss of nearly $75,000.

MR. FOSTER, of Dawson City, has, it is said, interested eastern capitalists in the organization of a company with not less than $5,000,000 capital, to operate a group of claims in the Klondyke. Mr. Foster owns about 2½ miles on the lower Bonanza Creek, besides several other large more or less desirable properties.

THE tanners' section of the Montreal Board of Trade have agreed to act in unison with the Quebec tanners in the adoption of shorter terms and smaller discounts on leather, the change to take effect on June 1st. This action was taken in order to protect themselves from loss, and the members were of the opinion that an increase in the prices of leather might shortly be expected, the present figures not being deemed satisfactory.

THE Ontario Government are about to construct a canal between the upper waters of Sturgeon River and Wahnapitæ Lake, to facilitate the passage of logs. These have heretofore had to be brought down a circuitous route by way of the Sturgeon River to Lake Nipissing, and thence through French River to Lake Huron. The Government has decided to complete a short canal, formerly begun by some lumbermen, to expropriate the land through which it runs, and to charge a toll sufficient to pay construction expenses and maintenance.

THE shareholders of the Toronto, Hamilton and Buffalo Railway held a meeting in Toronto on Tuesday last, and authorized an additional issue of $1,000,000 second mortgage bonds for improvements, of which about $200,000 is to be spent this year. Directors, etc., were elected as follows: President, J. N. Beckley, of the New York Central; Sir Thomas Shaughnessy, of the C.P.R.; W. K. Vanderbilt, New York; William N. Newman, of New York, president of the New York Central; Henry B. Ledyard, president of the Michigan Central; Mr. D. McNicoll, of the C.P.R.; Charles F. Cox, of New York, secretary-treasurer. Hereafter the annual meetings will be held in Hamilton. The road will continue to be operated under the joint control of the New York Central and the C.P.R., the largest interest being with the former company.

GEO. A. STIMSON & CO.,

24-26 King Street West TORONTO, Ont

In Brantford a good deal of interest is centred just now in municipal ownership. The other evening there was a meeting of a special committee of the city council, and this declared in favor of the public ownership principle, but asked for time in which to go into the question more minutely and report results.

A number of prominent retail merchants of the Eastern Townships met together in Sherbrooke a few nights ago in order to form a branch of the Retail Merchants' Association of Canada. While the objects of the new Townships association have not yet been definitely formulated, they will accord with those of the parent association; it hopes soon to include in its membership every retail merchant in the Townships. The following officers were elected: President, L. A. Bayley; first vice-president, W. G. Brown; second vice-president, M. Marchessault; secretary, J. J. Mullin; treasurer, A. J. Hudon; board, John McMorine, G. E. David, Arthur Deseve, A. Trudeau, John McKechnie, T. Belanger, J. S. Mullin, C. Fox, P. A. Bissonette and L. E. Dyer.

Mercantile Summary.

Mr. Farneau, the promoter of the proposition to build another smelter in British Columbia, is said to have decided in favor of Fernie as the site for its erection.

Last week a by-law was presented to citizens of Strathroy, Ont., to grant $10,000 for electric light and waterworks improvements, but it was defeated by a large majority.

Brown Bros., Toronto, have purchased the factory and book-binding plant of Wilson, Munro & Company, and will continue the business as an adjunct to their own.

The Great Northern Railway is to proceed immediately with building an extension of the Jennings branch from Morrissey to Fernie and Coal Creek in British Columbia. The work is to be completed by September 1st.

Recent heavy rains have considerably improved the prospects for the lumber drives up the St John's river in New Brunswick, and it is now hoped that not much more than 30,000,000 feet will be tied up.

Barrie, Ont., ratepayers have authorized by vote the issue of $18,000 worth of debentures for making cement pavements and extending and improving the waterworks and fire protection systems.

Kirkpatrick & Company's shingle mill in New Westminster, valued at $35,000, has been burned down. Chinamen were employed, and, according to a dispatch, it is believed the mill was set fire to in order to frighten them away.

Prince Albert ratepayers have voted in favor of granting $25,000 as a bonus for the building of a joint railway and traffic bridge over the Saskatchewan river at Prince Albert, providing the Government gives assistance. This is an incentive for the Canadian Northern to hasten operations.

The Rossland Miner of a recent date had an interesting description of the development work now under way at the White Bear mine, the chief feature of which is the installation of a concentrator plant. Special efforts are being made, under the system being put in, to gain economy in the handling of the ore. A 350 horse-power motor for driving the 20-drill compressor has already been installed. The aim of the owners is eventually to mill 300 tons daily.

We are informed that the Canadian Westinghouse Company, Limited, of Hamilton, Canada, have sold to the Northern Electric and Manufacturing Co., Limited, of Montreal, who are large manufacturers of telephone apparatus, a 300 k.w. steam turbine unit, consisting of a Westinghouse-Parsons turbine and a Westinghouse turbo-alternator. The company report numerous enquiries for these units, and anticipate a brisk demand for them in Canadian territory.

Mercantile Summary.

IT is stated that the London (Ont.) Tinplate Company will shortly remove to Hamilton.

A MUSIC dealer at Brockville, Ont., T. R. Bach, who took over the branch business of Orme & Son, of Ottawa, several years ago, has become embarrassed, and has had to assign.

O. G. AND A. McK. ANDERSON, and others, of Fredericton and other New Brunswick points, are organizing a company to manufacture furniture, under the name of the Anderson Furniture Company. The capital stock will be $150,000.

AFTER having shown signs of considerable financial strain for some time past the Ottawa firm of Leblanc, L'Ecuyer & Co., furniture dealers, have made an assignment, though they are said to have claimed a surplus last fall of some $9,000.

WE hear of the assignment of R. C. McKay, confectioner, in Hamilton. His creditors are requested to file claims with F. H. Lamb, assignee, up to 15th June. A meeting of creditors was called for 2nd June at 3 p.m. We have not heard its result. The volume of Mr. McKay's business was too small and competition in his line too keen to permit him to succeed.

J. B. TURNER & Co., small dry goods people at Montreal, have assigned. Turner was formerly unsuccessful in business at St. Barnabé, Que., in 1902, and has been doing business under cover, latterly making use of the name of Mrs. H. Lazarius.—D. Angus, of Montreal, is a skilled mechanic, working in a leading foundry establishment. Last spring he put his little savings into the purchase of a retail shoe business, of which his wife took charge. Too much was paid for the stock, and the venture has proved disastrous, his assignment being now reported.

THE Department of Trade and Commerce of the Dominion Government is calling for tenders for two monthly steamship services between Canada and Mexico for a period of five years. One will be between Montreal in the summer and Halifax in the winter and the Mexican ports of Progreso, Coatzacoalcos, Vera Cruz and Tampico, touch at Nassau, the Bahamas and Havana, Cuba, and the other between Vancouver, B.C., and the Mexican ports of Mazatlan, San Blas, Manzanillo, Acapulco, Puerto Angel, Salina Cruz, Tonala and San Benito. The vessels are to have a carrying capacity of not less than 3,000 tons, with adequate passenger accommodation, and maintain between ports a minimum speed of ten knots per hour. The Mexican Government have expressed their willingness to give a subsidy of $100,000 in Mexican currency for the Pacific service, and $20,000 for the Atlantic service, while the Dominion Government will supplement this sum by such subsidy as they may deem expedient.

Mercantile Summary.

MRS. MARY GENTLES, carrying on a bakery business at North Sydney, N.S., is asking a general extension, owing to poor business.—J. R. Hoey, a miller in a small way at Hardingville, N.B., has assigned to the sheriff.

L. BERGEVIN, tailor and haberdasher, Quebec, recently failed, has been endeavoring to settle liabilities of $16,000 at 75 cents on the dollar, but his offer is apparently not acceptable, as the assets are advertised to be sold June 7th.

THE Canadian Pacific Railway recently made an important contract, which will help to make up for the lightness of wheat shipments. It has arranged to ship 15,000 tons of lead ore from the Kootenay district of British Columbia direct to England.

THE contracting firm of J. Lambert & Fils, in a considerable way of business at Montreal, have assigned. Just about a year ago they became involved and failed, owing some $70,000, and they have since been doing business under cover of the junior partner's wife's name.

THE traffic of the Toronto Railway Company on Victoria Day last week was the largest for any 24th of May in the history of the company. The receipts were $10,882.95, against $9,670.25 in 1903, or an increase of $1,212.70. The passengers carried, excluding transfers, numbered 255,554, against 225,071 in 1903.

U. PHOENIX, general store, Windsor Mills, Que., lately insolvent, has arranged to pay 30 cents.—The creditors of F. Parizeau, lumber dealer, Beloeil Station, Que., have accepted 50 per cent. of their claims, amounting to $21,000.—Mrs. W. Robinson, milliner, at Terrebonne, Que., has assigned. She owes about $1,500.

THE death, on Saturday night last, of Mr. J. C. Copp, removes a man who has been long in active business life in Toronto. That he had reached the sixty-fifth year of his age surprised many who had known him well, so active was he, so cheerful, so capable of work of any kind—and indeed since he left his native Devon his has been a hard-working life. In Jacques and Hay's furniture establishment thirty or forty years ago he was the almost omnipresent man of the place. As instances of his warmth in social and religious directions, he was a director of the Upper Canada Tract Society, as well as of the Upper Canada Bible Society, treasurer of the Lord's Day Alliance, president of St. George's Society, and prominent in the Congregational Union. In business circles Mr. Copp was manager of the Toronto Loan and Investment corporation, director of the Crown Bank, and in request as a skilled accountant and a fair-minded arbitrator. The deceased gentleman was one of those sturdy persons who well illustrate the line—of Charles Mackay, if we do not mistake—"the upright downright Englishman."

Take Advantage
of reduced rates, and spend a few days at the greatest World's Fair, St. Louis, Mo. The largest exposition ever held. Fifty-four states participate, and fifty foreign countries have their exhibit. Return tickets now on sale via Grand Trunk Railway at single fare, good for 15 days; fare and one-third good for 30 days, and at 80 per cent. of double one-way fare, good for season, allowing stop over at any intermediate Canadian station, also at Detroit and Chicago. Tickets and information on application to Grand Trunk agents, or to J. D. McDonald, District Passenger Agent, Toronto, Ont.

ST. CATHARINES, Ont., council favor the city's subscribing for $20,000 worth of stock in the Niagara, Queenston and St. Catharines Railway Company, which purposes building an electric line from St. Catharines to Niagara-on-the-Lake, and thence along the bank of the Niagara River to Queenston. A by-law will be submitted to the ratepayers for their approval on the 22nd inst.

A FIRM named Patterson & Baird started up in the grocery line last January in the north-eastern suburbs of Montreal, and have already collapsed.—Another short-lived venture in the same line is that of B. O'Connell, who began keeping shop in the western suburbs less than two years ago, but who has now assigned, owing about $2,000.—A. Perrault, grocer and butcher, of the same city, makes an offer of 35 cents in the dollar on his small liabilities.

THE Twin City Tramway Company has declared the regular quarterly dividend of 1¾ per cent. on preferred stock.

DURING last month, the sales of land by the Canadian Pacific Railway amounted to 51,552 acres, the sum realized being $203,993.

THE new grain elevator of the Canadian Pacific Railway Company at Port Arthur, one of the largest, as it is perhaps the most modern in the world, was opened for traffic this week.

SAMUEL R. CALLAWAY, president of the American Locomotive Company, and formerly president of the New York Central Railroad died in New York on Wednesday last. He was born in Toronto 54 years ago.

THE W. R. Brock Company, Toronto, are now carrying on business in the warehouse recently purchased on Front Street, opposite the Queen's Hotel. It is 175 feet long, with a basement of three floors, all devoted to showing fine stocks of thoroughly up-to-date goods.

MCWILLIAM AND EVERIST, the well-known Toronto wholesale fruit dealers are issuing a neat little memorandum book, with an almanac from May 1st, 1904, to April 30th, 1905. An old proverb says, "misunderstandings are often best prevented by pen and ink," and so in this diary, plenty of room is provided for memoranda.

AN offer of compromise is being made by J. F. Norton, general merchant, at Cardigan, P.E.I., at the rate of 50 cents in the dollar. Norton has been in business a dozen years or more, but has shown an inclination to speculation, and has not been at all times prompt. Liabilities amount to $13,750; estimated assets, $10,860.

AUSTRALASIAN trade in 1903 totalled greater than in any previous year. The preliminary custom house returns of the six states of Australia and the colony of New Zealand show that the aggregate value of imports and exports last year was £171,769,100, exceeding the record total of 1901 by £4,106,000, while the increase on the 1902 returns was £8,327,000.

THE annual general meeting of the Quebec Central Railway Company was held in London on the 18th ult., Mr. Edward Dent in the chair. The president stated that the gross earnings for 1903 were the largest in the history of the company—$682,757, or $13,416 in excess of those for the previous year. The working expenses, however, were $492,698, or an increase of $25,077, owing to high price of coal. There was also an advance in wages, and in the cost of raw materials. The net earnings were $190,059, showing a decrease of $11,661, but in spite of this the directors had been able to pay the same dividend on the income bonds—2¼ per cent.—as in the preceding year, and to carry forward $10,989, as against $8,745, after charging against revenue $14,730 for various renewals and for ballasting.

Debentures for Sale.

Sealed Tenders addressed to the City Council and marked "Tenders" will be received by the undersigned up to Monday, June 20th, at 4 p.m., for any or all of the following Debentures offered for sale by the City of Niagara Falls, Canada:

$ 1,896.59 Local Improvement Sidewalk, 20 year Debentures.

$15,828.85 Local Improvement Sewer, 30 year Debentures.

$12,000.00 Water Works, 15 year Debentures.

All Debentures guaranteed by the City at large and bearing interest at 4% are repayable in equal annual consecutive instalments of Principal and Interest.

Highest or any tender not necessarily accepted.

JOHN ROBINSON,
Clerk.

Niagara Falls, Canada, May 28th, 1904.

JUDICIAL SALE OF
Valuable Woollen Mills

PURSUANT to the order of the High Court of Justice bearing date 26th April, 1904, for the winding up of Canada Woolen Mills, Limited, sealed tenders will be received by the undersigned at his Chambers at Osgoode Hall, Toronto, up to the 28th day of June, 1904, for the mill properties and supplies of the Company.

The following are the properties:

1. WOOLLEN MILL at Hespeler in the County of Waterloo.
2. WOOLLEN MILL at Waterloo in the County of Waterloo.
3. WOOLLEN MILL at Carleton Place in the County of Lanark, known as the Gillies Mill.
4. WOOLLEN MILL at Carleton Place, known as the Hawthorne Mill.
5. SITE OF WOOLLEN MILL at Lambton in the County of York.

Tenders must be sealed and addressed "J. S. CARTWRIGHT, ESQ., K. C., OSGOODE HALL, TORONTO," and marked "RE CANADA WOOLLEN MILLS, LIMITED—TENDER FOR PROPERTY," and each tender must be accompanied by a certified cheque for $2,000 which will be returned in the event of the tender being rejected.

Tenders may be made for the purchase of all the properties en bloc or for each separate property. Tenders for the supplies and goods in process of manufacture shall be made separately.

Full particulars and permission to inspect the properties may be had from GEORGE DAVIDSON, Liquidator of the said Company, 108 WELLINGTON STREET WEST, TORONTO, or from MESSRS. CASSELS, CASSELS & BROCK, 19 WELLINGTON ST. WEST, TORONTO, his solicitors.

Dated at Toronto this 31st day of May, A.D. 1904.

THE Canadian commercial agent in Melbourne, Mr. D. H. Ross, reports that while several Canadian manufacturers of pulp have sent samples to Australian paper mills, nothing suitable to local requirements has, so far, been received. They require sulphite (not mechanical) pulp, in unbleached and bleached sheets, packed in bales weighing about 3½ cwt. The unbleached pulp is used in the manufacture of brown wrapping paper, which industry is protected by a customs duty of £3 (say $14.60) per ton. The bleached pulp is required for strong cartridge papers, etc. It is essential to make a dry pulp equalling in quality that now received from Norway and Germany, in order to obtain a footing in this market. The landed cost of last shipments from Norway were £10 for unbleached pulp, and £11 for bleached, per long ton.

AMERICAN SHIPBUILDING.

A feature of the proceedings of the United States Merchant Marine Commission now being held in New York for the purpose of investigating and of recommending the legislation most likely to improve the American Marine was the evidence tendered by Mr. C. B. Orcutt, president of the Newport News Shipbuilding Company, who said that ships could be built in England for 40 per cent. less than in the United States. The cause of this great difference was that 75 per cent. more is paid for labor in the yards of the United States than in those of Great Britain, and at the same time there is 40 per cent. in the cost of material in favor of the English builders. For the difference in the cost of raw material, the high percentage tariff was responsible. And in answer to a query as to what materials the duty would have to be taken off in order to benefit the shipbuilding industry, it was noted that the tariff would have to be taken off everything "because everything goes into the making of a ship." Not only would the high tariff have to go, but labor would have to come down also. Admiral Bowles, who at one time was Chief Naval Constructor of the United States having remarked: "I believe it is worth while to have a merchant marine, and the cheapest and most direct way to get it would be for the Government to step in and equalise the cost of building ships; and then it should pay a bounty to the ship-owners for the additional cost of running the ships under American laws. This could operate for a fixed period, so that capital might be invested."

LITERARY NOTES.

A book is shortly to be published entitled "Canadian Banking Practice." Its compiler is Mr. John T. P. Knight, editor of the Journal of the Canadian Bankers' Association. Much of it will consist, we understand, of replies given as to questions of banking law since 1895, by Z. A. Lash, K.C., who was until recently the legal adviser to the Association. Says Mr. Knight: "The work of collecting and classifying the questions which have appeared in the Journal has been made easy by the extreme care displayed by Mr. Vere C. Brown during his occupancy of the editorial chair of the

The British Canadian Loan and Investment Company, (Limited).

Dividend No. 53.

official organ of Canadian bankers, and the compiler of 'Canadian Banking Practice' cheerfully admits that, if this book is favorably regarded by its readers, any praise bestowed upon it belongs in great measure to Messrs. Plummer, Henderson, Hay, and the present Journal Questions Committee." It is stated, and we can quite believe it, that the hundreds of questions received and answered during these eight or nine years deal with nearly every possible point of practical interest likely to present itself during the daily routine of a bank. The book may therefore be expected to be one of interest and value.

—The customs collections at Toronto for last month amounted to $742,988, an increase of $175,005 over the month of May last year.

—Speaking on Wednesday evening to a Montreal reporter about the strike of the employees of the Dominion Iron & Steel Company at Sydney, which we mention elsewhere, Senator Forget, one of the directors said: "This strike is the best possible thing for the company. We have been running along, not making a dollar, the plant being operated clearly in the interests of the men, and with the hope that the Dominion Government would see fit to give us the benefit of a protective tariff. As it now stands, we simply close down the manufacturing plant indefinitely, and proceed with the work of building up the different mills now under construction."

—A report from Belfast, Ireland, says that the linen trade keeps fairly satisfactory. The volume of business is fully maintained, and values continue firm and steady. Business in the yarn market is very fair. Buying is somewhat of a hand-to-mouth character, orders being given for what is actually required, and these in the aggregate total up equal to production. The deliveries of some yarns are inconveniently in arrear. Prices are maintained. In the brown cloth market trade has an improving tendency. Unions are in growing request, and the warmer weather is having a good influence on the sale of dress goods. Damasks and household linens generally are the turn better. The handkerchief trade is moderate, and the making-up factories are doing a little more. The shipping trade shows signs of improvement. There is further increase from the United States, and the demand from Cuba is steadily growing. The South American markets are also doing better. Canadian trade is fair.

—A Bradford (Yorks) correspondent of the Drapers' Record says there seems to be every reason to expect that the present prices of merino will be fully sustained for some time to come, although to-day's prices are actually higher than they have been at any time since the high period immediately preceding the opening of the present century. Cheaper kinds of crossbred colonial wools are actually over 100 per cent. higher than during the lowest point of 1902. These coarser grades are, however, without doubt, relatively dear and only the shortage in the supply and the high price of cotton can account for such values.

FISHERIES OF BRITISH COLUMBIA.

A week or two ago, we gave a summary of the more prominent features of British Columbia from an agricultural point of view, which we condensed from the Year Book of that province for 1903, recently received. This book also contains, we find, an admirable exposition of the resources of our Pacific coast in the way of food fishes. And not only is the section treating of this subject brimful of facts and figures useful to those interested in the trade itself, but some of the principles governing the run of fish, together with their habits and haunts, are set forth in such entertaining manner as to make useful and captivating reading from a merely popular point of view.

British Columbia waters are prolific in food fishes of many varieties, but the one par excellence is, of course, the salmon. Of the Pacific genus salmo, which differs from that found in the Atlantic, there are five well-marked species. Strictly, perhaps, the Pacific kind should not have received the name of salmon at all, one of the most important features distinguishing it from the true "salmon" being the fact that it dies shortly after spawning once. But while the Pacific fish are not salmon in a scientific sense, they have become, owing to their abundance and excellent canning qualities, "the" salmon of the commercial world. The five different kinds are known as: (1)The Sockeye, in form and color perhaps the most beautiful; they enter the Fraser river as early as April, though they must not be taken before July 1st, and the run is usually at its height about the first week of August. (2) The Spring or Quinnat salmon, which is known under different names in different lakes, such as the King or Tyee, the Chenook, Quinnat, etc. For many years this was the only salmon used for canning, though now it takes second place to the Sockeye. It attains an average weight of 18 to 30 pounds, but specimens of 60 to 100 pounds have been reported. At times, especially at spawning, this fish becomes almost black, with little or no red color, and as the British market demands a full-colored salmon, this fact goes against its popularity. (3) The Coho, or fall or silver salmon, has become of late years a considerable factor in the market. On an average, specimens of this variety weigh from three to eight pounds. In color they are silvery, greenish above, with a few black spots on the head and fins. They are not strong swimmers, and do not usually seek the extreme head waters. (4) The Dog salmon, run late in the fall. They are captured by the Japanese, who dry-salt them and send them to the Orient. The name is derived from the fact that at a certain period the heads of the males undergo a marked distortion, the teeth in front becoming large and dog-like. (5) The Humpback is the smallest of the species found in Pacific waters. They have been but little valued in the past, but with the desire to provide regular and continuous employment of the fishermen, a considerable development of such among the cheaper fishery products has taken place.

As yet, a wide field remains open for investigation into the habits of Pacific salmon. The conditions affecting spawning, the effects of dumping cannery offal into the sea, hatchery methods, the degree of protection necessary, are all matters upon which great difference of opinion still prevails. And experience elsewhere is not the only thing to be taken into account; local observation and systematic investigation are needed. It seems to be proven that unvarying regulations are a mistake; the run and habits of the fish are so different, comparing one year with another, that the rules which show their value at one period seem injurious, or at any rate of no benefit, at another.

LABOR MATTERS IN THE EAST.

While Ontario and Quebec cities are disturbed by actual or threatened strikes, and the commercial situation is thereby rendered uncertain, it is agreeable to learn that at least one leading city is free from any trouble or anxiety on that score. Halifax, which is just now starting upon its season of industrial activity, finds all branches of labor enjoying and profiting by the stir which usually begins at this period of the year. The building trades of that

place, in particular, are actively engaged. All other phases of manual employment find abundant work. In fact, we are assured that the condition of the labor market there is excellent. The relations between capital and labor are harmonious to a degree to which larger western towns are strangers, and "there are no indications," says a business man, "that the upheavals occurring in various parts of the continent will visit this city."

Unfortunately, Sydney has been disturbed by an occurrence which is most unfortunate at a time when the confidence of the investing public is beginning to be restored in the industries there located. In November last, the employees of the Dominion Iron and Steel Company accepted a reduction of wages. In April of this year the men asked to have the pay restored to the old figure, but were granted instead an advance of three per cent., which the workmen consider wholly inadequate. On May 23rd the Provincial Workingmen's Association, which has 1,000 employees of the company enrolled as members, submitted an ultimatum giving the management until Tuesday, May 31st, to adjust the grievance. A peculiarity of the affair is that the men do not propose in the first instance to enforce their demands by means of a strike, but to rely upon the Federal Government to bring about the accomplishment of their purpose. In the session of 1900, a resolution was unanimously adopted at Ottawa, under the provisions of which all contractors employed on Government work or any work receiving Government assistance, are to pay the wages current in the trade. Inasmuch as the Dominion Iron and Steel Company is in receipt of Government assistance in the shape of bounties, this regulation is construed by the men to apply. The men struck at midnight on 31st May, and as the president of the company is in England, he cannot well reach this side before the 16th June, at which date the Workingmen's Association is asked to meet him. The stoppage of the works, meantime, is unfortunate for the company.

STRIKE AFFECTING AMERICAN LAKE TONNAGE.

The strike of the masters and pilots on the American side of the Great Lakes continues, and is causing incalculable loss and inconvenience. Millions of bushels of grain and thousands of tons of coal and ore and merchandise are still on wharves and in elevators awaiting transportation, while workmen in dozens of industries, not directly allied with shipping, are suffering in consequence. As an indication of what it means to have practically the whole steam shipping of the Great Lakes of America "tied-up," we may cite the fact that at the 31st May last year the port of Buffalo had received 31,657,596 bushels of grain. Up to May 21st of this year the receipts were 694,300 bushels. At the latter date only the smoke of a lumber craft or of a tramp steamer was to be occasionally seen on the lakes, the great liners being withheld from traffic by this strike. The Masters' and Pilots' Association demand that none of its members shall be discharged without having his case submitted to arbitration, because (it claims), a man who has sufficient skill and experience to reach the position of captain, must probably be of an age when to change his occupation is practically impossible, his dismissal thus meaning a permanent loss of livelihood. The vessel owners declare that the demand of the masters and pilots, if granted, would destroy the discipline of the service. The captain of a steamer, with half a million dollars' worth of property under his temporary control, is discharging a most delicate industrial duty. To keep him in office a minute after he had shown himself unworthy of office would be, say the owners, an outrage against property and against life. In this case, above all others, they claim, the right of instantaneous discharge must be kept intact. The masters and pilots also demand more money, and the owners contend they cannot afford to raise wages.

CROP PROSPECTS.

As the cold and wet weather is continued into June, in Ontario and Quebec, one wonders more and more what effect all this prolonged cold will mean for vegetation, and those in Eastern Canada who are not farmers or horticulturists are puzzled at the contradictory stories we hear about the probable yield of orchard, garden, and farm. But in Manitoba and the Territories there appears to be no apprehension —no reason for it, indeed. Our Winnipeg despatch of noon yesterday says: "There have been good rains throughout the West during the past week. The growing grain is well above the ground and making remarkable progress. Its height varies in different localities from one to seven inches. No districts report drought, and the prospects for grain could hardly be more favorable."

PROTECTION FOR GARDEN PRODUCTS.

With the cry heard in the land for increased protection for so many other goods, the market gardeners feel impelled to range into line. And they have a good many reasons for adopting that attitude. The present tariff on vegetables, which is very much smaller than that imposed by the United States, does not prevent a large influx from that country, and this is increasing year by year, while Canadian gardeners, hampered by this competition and by scarcity of good labor, find it more and more difficult to obtain a living profit out of their productions. The matter is aggravated by the fact that what duty does exist is of an ad valorem nature, and as this naturally is calculated on a basis of value at the place where the article in question is grown, it represents very little in the way of protection. The subject was brought up again in the Dominion Parliament on Wednesday last, when a resolution was introduced by Mr. Richard Blain, of Peel County, to urge the revision, during the present session, of the duties upon farm and market-garden products, so as to preserve the market for the Canadian producer. A strong point in the plea of the Canadian agriculturist is that the things he has to buy are largely protected, and some such as iron and steel, and binding twine, receive

bounties, while what he has to sell receives only nominal protection. Not only this, but in the case of the vegetable grower, climatic conditions are against him, for his most valuable market, the early one, becomes more or less the possession of his southerly rival, the United States.

But, while the Canadian grower's position is unenviable from these causes, and while, if there is to be any general revision of the tariff, he should certainly be among those principally favored, it must not be overlooked that there is another side to the story, and that the controversy really represents in a nutshell the whole argument of Free Trade versus Protection. It is only fair that such a deserving (and, as a rule, not grasping) class as the gardeners should receive their due share of any general system of high protection to Canadian industries which may be inaugurated; but what about the consumer in such case? The opponents of the proposed higher tariff for garden stuff claim that it would, partly owing to the exigencies of the climate, merely result in a decreased consumption by the average household, and in higher prices to those who could afford to give them. Early vegetables cannot, it is claimed, be grown in sufficient quantities in this country to meet the demand in any degree; therefore, let them come in from elsewhere at a reasonable rate. There is sense in this; but we do not see why it should be nonsense when applied to other lines of production as well.

DRY GOODS PROSPECTS.

Apparently, what is keeping trade dull more than anything else, is the protracted cool weather, which, though it has had some beneficial results in the way of clearing out the heavier woolen goods, deters people from buying seasonable lines of dress goods, etc. However, the retailers now have these in hand and are prepared for the big demand which many of them think will surely come any day. Both they and the travellers for wholesale houses report that all the prospects for the coming summer's trade look very good, though whether it will come up to that of this time last year in volume is a doubtful point. Payments continue pretty good, though some complaint is heard as to those due from the North-West. Some say that speculation in land is at the root of this slowness. The wonderful growth of that country, and the indications pointing to a bumper crop this year, should make it a large factor in the prosperity of the dry goods trade for some time to come.

One feature of the trade at the moment is the large demand for tailors' trimmings, which is even better than it was last year. The custom tailors appear to be having an extra good year. Home-made suitings are being increasingly favored. In dress goods the materials likely to be most popular would appear to be alpacas, serges, voiles, etc., while colors in great evidence will be cream and white. Domestic makes of "Scotch" goods are in great request, as they look just as well as the German imitations, and wear better, besides being adapted to Canadian requirements.

THE TRUST COMPANY IDEA AND ITS DEVELOPMENT.

(4)

THE NEW ZEALAND PUBLIC TRUST OFFICE.

In all of the Australian colonies, the Government has directly or indirectly the charge of trust funds. It was found that there was a temptation for the treasurer to use the money for Government purposes, which resulted in extravagance. It was consequently decided in New Zealand to place all trust funds in the hands of a separate official specially appointed for the purpose. (1) This led to the creation of the Public Trust Office, which was constituted by the Public Trust Office Act of New Zealand in 1878; (2) and was "designed to afford a convenient recourse where persons are in doubt as to the choice of a trustee and to relieve those who may be unwilling or unable to continue administration." The scope of the office was enlarged to include additional agency functions by the Public Trust Office Consolidation Act of 1894.

The Public Trust Office is a department of the Government service. The good faith of the administration is guaranteed by statute and the credit of the colony is pledged to maintain the integrity of the capital funds placed in the Trust Office and a common rate of interest to be determined from time to time by order-in-council to be credited quarterly to the properties, free of all charges of the Public Trust Office.

The advantages of the office are thus set out in the New Zealand Year Book: "A person making a will or arranging a trust or purposing the appointment of an agent or attorney, must always be seriously concerned as to the security of the funds and the larger the amount of the funds the greater will be the concern for the security, and the less for the rate of interest. Private executors, trustees or agents or attorneys may be without the means of repairing the errors for which they are accountable or may in cases where their acts are justifiable make disastrous and ruinous investments." The draft of a will, deed of trust, settlement or power of attorney, will, when required, be examined in the Public Trust Office free of charge for the purpose of bringing to light any provisions which may be ambiguous, wills of living persons may be deposited for safe keeping."

By the Lunacy Act of 1882, the public trustee is authorized to undertake the administration of the estates of lunatics in every case where no committee may be appointed for the estate. Ninety per cent. of the estates of the lunatics in the asylums are administered by the public trustee.

The total value of the estates in the hands of the public trustee, in 1903, was as follows: Wills and trusts, £1,279,743; intestate estates, £197,368; real estates £7,585; lunatic estates, £170,585; native reserves, £375,000; West Coast settlement reserves,

(1) Handbook of the Seven Australias.

(2) For full account of Public Trust Office see New Zealand Year Book, 1898.

£655,000; unclaimed lands, £21,504; making a total of £2,706,785. (3).

New Zealanders apparently do not believe in giving a monopoly of the trust business to the Government. The Public Trustee has to compete with the private enterprise of the Trustees, Executors, and Agency Company of New Zealand, at Dunedin.

ERNEST HEATON.

(3) New Zealand Year Book, 1903.

FIRES OF ELECTRICAL ORIGIN.

Among the many causes of fires on this continent, lists of which causes have been many times tabulated, there is a considerable proportion which might be grouped under the general heading of *carelessness*. Fires caused by matches, by defective stove-pipes, improperly built chimneys, gas jets, hot ashes, cigar stumps—all this class are "carelessness fires." A new group of causes has become operative of late years in the too negligent use or the careless installing of electrical wires or machines. One of the most valuable things done by the National Board of Fire Underwriters in the United States was the appointment a few years ago of an electrician, paid by the board, his duty being to investigate and report upon fires caused by, or supposed to be caused by, electricity. The report of this official, W. H. Merrill, Jr., states that reports of one hundred and thirty-five electrical fires, losses aggregating over $420,000, have been received by his bureau during the last quarter. One fire, with a loss of over $3,000,000, has also been reported as probably of electrical origin. There were likewise reports of one hundred and eighty-one fires, losses aggregating $2,280,000, supposed to have been due to electricity, but they are not included in this report, inasmuch as the causes could not be definitely proven as electrical, principally because the fires destroyed the conclusive evidences of their origins.

But there has been sometimes shown a disposition to lay the blame on electricity for a number of burnings with which electricity had nothing to do. And Mr. Merrill exposes this clearly in the following paragraph of his quarterly report for April last: "Fifty fires, losses aggregating $535,425, reported as due to electricity during the last quarter, have, upon further and more reliable investigation, been found to have been due to other causes. Of these: A $115,000 loss, a $30,000 loss and a $25,000 loss, respectively, were caused by overheated stoves; a $200,000 loss was occasioned by an overheated furnace; one of $20,000 by a defective chimney; a $17,000 loss was of incendiary origin. Other fires attributed to electricity were found to have been caused by matches and cigar stubs (seven fires), spontaneous ignition, hot ashes, gas from unlighted burner, steam pipe in contact with wood, etc."

Still, the record for a series of years makes it manifest that the multiplicity of electrical wires, used for telephone, telegraph, and power, especially in cities, has been rightly blamed for causing many fires. A glance at the particulars given in this report shows this in a signal way. No fewer than twenty-four fires are reported as due to crosses of telephone, telegraph and signal wires with high potential circuits. Six fires were caused by crosses of low and high potential circuits. Thirty fires were due to the grounding of circuits, of which eleven were on gas pipes, and in nine cases the pipe was punctured and the gas ignited.

Eighteen fires in electric cars are reported, of which six were caused by resistance coils. Eight fires were caused by short circuits in flexible cords. Seven fires occurred in show windows. Seven fires are reported the cause of which was grounding of circuits in damp moulding. Five fires were occasioned by open link fuses. Six fires were due to loose connection in switches, arc lamp terminals, etc. Strong arguments are presented by these facts for good mechanism in electrical machinery; careful and experienced workmanship in putting in electric wires and appliances; and for practised skill in the management of dynamos and switches. There is much faulty wiring, both in the States and Canada; imperfections are too often found in appliances; and electrical engineers sometimes are either careless or incompetent.

A BANK STAFF IN CONFERENCE.

A novel gathering was held in the Queen's Hotel, Toronto, one afternoon and evening last week. It was held upon a holiday, Victoria Day, for indeed it would not have been practicable upon any ordinary week day. This was a meeting for conference of principal officers and the branch managers, in Ontario, of the Sovereign Bank. So far as we know, this scheme of a conference is a novelty. One who was present on the occasion we describe gives us an idea of the remarkable amount of knowledge conveyed to all of those present by an interchange of experience in different places. It is certainly an unusual thing to find that thirty-six men willingly gave up the recreative benefits of an inviting holiday to sit in a room nearly all day and discuss business with their general manager and each other. It says a good deal for the loyalty of the staff and the "esprit de corps" existing in the bank. One thing, which perhaps makes it easier to understand why the proposal of this conference was so cheerfully taken up is that, as we are informed, there was only one person in the gathering whose age exceeded forty years. The staff of the Sovereign Bank, therefore, is an uncommonly youthful one, and we know that young men are apt to be more taken with novelties, as well as more likely to display enthusiasm than their elders. This we say in despite of Thackeray's lines telling us that one must wait till his fortieth year for wisdom:

> Forty times over let Michaelmas pass,
> (Grizzling hair the brain doth clear;)
> Then you know how a boy is an ass,
> Once you have come to forty year.

It was a shrewd provision on the part of the general manager, however, to let it be known that a generous dinner would follow the business conference, for, as we learn on the distinguished authority of William Scott, Lord Stowell, "a dinner lubricates business." The prudent provision was made that this dinner should be absolutely without alcoholic stimulants, the view prevailing that without them diners are best preserved in good physical and mental condition. A word as to the utility of such conferences by the members of a banking staff. Such things may be new to the banking world, but they are not unknown in commercial circles. We happen to know that the whole staff, editorial and reportorial, of one of the most important trade journals in the United States hold a conference every week; which is found of distinct benefit to every department of the paper. And manufacturing firms, here and there, as well as wholesale firms in the large cities, confer weekly with their travellers and heads of departments, meetings which convey information of mani-

fest value to the proprietors. The general manager, Mr. D. M. Stewart, and the following officers of the bank were in session during the whole of the morning and afternoon: W. G. Browne, R. H. Fulton, L. P. Snyder, H. B. Orde, H. T. Rance, W. W. Bruce, J. Parker, G. J. Reid, Jos. Snell, A. P. Smith, R. R. Corson, T. H. Pringle, H. Arnold, S. McDougall, W. M. Chandler, W. J. Boyd, R. A. Williams, M. I. Lane, C. A. McMahon, G. T. Kirkpatrick, C. J. Sewell, F. A. M. Lister, G. S. Walsh, J. C. Massie, H. A. Ambridge, R. J. Ranney, A. W. Clark, C. R. Cumberland, G. E. Wills, Bruff Garrett, W. A. Grasett, E. O. S. Strange, W. J. Hill, W. J. Stark, C. Urquhart, F. E. Karn, D. B. Crombie.

BANKING AND FINANCIAL MATTERS.

The manager of the Bank of Hamilton, at Owen Sound, Mr. Ewing Buchan, has been transferred to Vancouver, B.C., to a similar position in the same bank. His Owen Sound friends presented him with a purse containing a goodly sum in gold.

The American Institute of Bank Clerks will hold its second annual convention, at St. Louis, Mo., August 25th, 26th and 27th. It is expected that the interest manifested in the work of the Institute, and the Exposition as an additional attraction, will serve to draw a large attendance.

The private banking business of Jacob Fuller, at Thedford, Ont., has been taken over by the Sovereign Bank of Canada, which will run it under that gentleman's management; also the private bank of E. A. Westland & Company, at Wyoming, Ont. The bank has established a branch also at Thessalon, Ont., under the managership of Mr. W. A. Parker.

Milwaukee's first modern skyscraper, the thirteen story Pabst building, corner of East Water and Wisconsin streets, has been purchased by the Wisconsin National Bank to establish a permanent home for the Bank and the recently organized Wisconsin Trust and Security Company. The building is central; it occupies the original site on which the only trading post in Milwaukee was erected. This post was started by Solomon Juneau, the first white settler of Milwaukee, in 1822.

Speaking of the accident at Oromocto Lake, where Mr. Foster and Mr. Thompson were drowned, our Halifax correspondent says: "Mr. Stavert, whose life was saved, was at one time in the Bank of Nova Scotia here, and all the parties are well known in Halifax, where regret is universal at the loss of valuable lives. On receiving notice of the drowning of its St. John manager, the Royal Bank, which has its headquarters in this city, instructed Mr. Hornsby, of their staff, to take charge of the St. John branch temporarily.

Week by week, if not day by day, we are getting nearer to a correct idea of the amount of loss sustained by the great fire of April, in this city. Up to yesterday noon, the total losses reported to the General Committee of Underwriters amounted to $7,512,778. The amount of insurance for this loss was $6,153,734, which is not far from 82 per cent.

OUR HALIFAX LETTER.

Nova Scotia has another new town. On Wednesday last, the Mayor and councillors for the newly incorporated town of Oxford were sworn into office. Oxford is a thriving little centre in the County of Cumberland, and is the site of several manufacturing establishments, including the Oxford Woolen Mills, whose tweeds have won more than a provincial reputation.

The board of examiners of colliery officials, which has been at work in Halifax for the past week going over the papers of candidates, has completed its labors. The result of their work is that 52 out of 120 candidates passed, ten receiving the manager's certificate, ten the under-manager's certificate, and thirty-two the overman's certificate. There is some talk of a new company being formed at Montreal to operate the Joggins colliery, the Chignecto mine, at Maccan; the Jubilee, at Maccan; the Strathcona, at River Hebert, as well as the Kimberley on the other side of the river. These properties are at present all being worked by comparatively small companies. Coal freights from Bay of Fundy ports to New York are now 20 cents lower than at this time last year.

The Dominion Tar and Chemical Company, whose plant is located at Sydney, has recently chartered a steamer to convey a cargo of pitch to Italy. The company has been shipping a good deal of its product to Europe, since the plant was started last October, but this is the first occasion when an order so large as the present has been executed. The company has now 130 men employed, and the bulk of the summer's output has already been sold.

Mr. John McGowan, of Sydney, has recently patented a new railway crossing gate, and a company is being formed to take over the rights and manufacture the gate at Sydney. The gate works by means of a third rail parallel to the ordinary rails and raised above them sufficiently high for the car wheels to strike and depress, which action closes the highway gate to traffic. When the train has passed and the weight is off, the rail opens automatically. The gate is considered one of the most important connected with railway matters that has been patented for some years.

Dalhousie College is about to add another department, that of Civil Engineering, to her schools of instruction. Steps are being taken to obtain a qualified professor to organize the department and construct a course leading up to the degree. The new school will strengthen the School of Mining and has been rendered possible through the generous support of a number of public-spirited citizens of Halifax. To the young men of Nova Scotia, this opens up a new career from which the heavy expense of attending existing engineering schools of standing has hitherto debarred them. The extent to which development work in this province demands skilled direction is illustrated by the fact that at one time the Dominion Iron and Steel Co., of Sydney, had no less than one hundred and twenty engineers in its service. The new department places within the reach of young men the means of qualifying for many of the best industrial positions our country has to offer.

Mr. William Mackenzie, of Mackenzie & Mann, has been in the province for some days, and last week went over the route of the Halifax and Southwestern Railway, now being constructed for this firm. He has stated that passenger trains will be running between Halifax and Bridgewater in about two months' time, and that the section from Mahone to Chester will be open for traffic by July 1st, in order to accommodate this summer's tourist travel.

Halifax, 30th May, 1904.

OUR SAINT JOHN LETTER.

St. John suffered a very great loss in the death, last week, by drowning in the South Branch Oromocto Lake, of Messrs. John H. Thomson and R. P. Foster. Mr. Thomson was one of the city's wealthiest and foremost men, a member of the big shipping firm of Wm. Thomson & Co., owners of the Battle Line of steamers, and agents here of the Allan, the Manchester, the Furness, and other big companies. He was prominent as a member of Board of Trade in all public matters, and was largely interested in many enterprises, including the proposed dry dock. He was well known all over the Dominion and in the neighboring republic, and his death is regretted by friends everywhere. Mr. Thomson was only 56 years of age, and was in the full enjoyment of life. His death resulted from a sudden squall upsetting his boat while he was enjoying a holiday fishing on his preserve on the South Branch Lake. Mr. R. P. Foster, who perished with him, was a much younger man, being only 35 years of age, and filled the important position of resident manager of the Royal Bank of Canada. He was a native of St. John, and was considered a particularly capable bank man.

Another prominent business man of St. John, Mr. Daniel N. Vanwart, head of the big retail grocery firm of Vanwart Brothers, has passed to his reward. The deceased gentle-

man was a farmer lad who came to this city and built up the biggest grocery trade in the city, their store being one of the most modern in Lower Canada. By hard work and careful attention to business Mr. Vanwart and his brother made a good deal of money, which they invested in real estate, building some of the finest blocks in the city. Mr. Vanwart was planning a year's trip to the Old World when erysipelas attacked him, and he passed out in a few days.

A failure of considerable importance, in fact the heaviest this year in New Brunswick, is that of R. A. Estey, the Fredericton lumberman, whose creditors at a meeting on Friday directed that he assign to Messrs. George McKean, John E. Moore, F. C. Beatteay and A. H. Randolph. Mr. Estey's liabilities are placed at $134,675, and his assets at $104,801. Mr. Estey was thought to be doing a safe business and the news of his difficulty was a great surprise to the business community.

Indications to-day are that between forty and sixty million feet of the logs cut on the St. John river and its tributaries last winter will be hung up. There may yet be heavy rains that will bring down some of these logs, but the outlook is not promising. The total cut was about 135,000,000 feet. Notwithstanding the large quantity of logs likely to be hung up, there is little danger of the supply falling short because the cut was a heavy one, and the quantity got out is augmented by about 40,000,000 feet hung up from the previous winter that came down with the spring's freshets. Prices are low at the present time, and the lumbermen are particularly gloomy over the general outlook. Lumbering is the chief industry of New Brunswick, and a tight year in the lumber business means tightness in all trade.

Announcement is made to-day that the machinists employed by the Canadian Pacific Railway Company in the shops at McAdam Junction, close to the Maine boundary, have gone on strike. The reason of the strike has not been learned here, but it has caused a tie-up of all work going on at McAdam. The city of Saint John and the Canadian Pacific Railway are at loggerheads over the agreement under which it is expected new berths will be built to carry on winter export business here. The railway company is willing to pay a rental for the wharves when built, and there is no difficulty about adjusting all details connected therewith, but another matter has been worked into the agreement and causes the hitch. The railway people want 20 acres or more on the outskirts of the city for a yard. The city authorities are willing to give it in exchange for 1,600 feet of harbor frontage given the railway company some years ago, and which it has never used. The railway company are unwilling to surrender this property, and the city say then it is useless to try and negotiate on the other points. The 1,600 feet in dispute is property on which harbor works must be built in the future.

A dozen or more journeymen tailors employed in different St. John shops are now on strike because their employers have declined to submit to certain demands of the unions. The strike is a small one, and so far as can be seen is not crippling the business of any of the merchants. The strikers are in receipt of good pay from their international union, and are not believed to be worrying much over the situation.

* * *

St. John, New Brunswick, 31st May, 1904.

FIREPROOF CONSTRUCTION IN OTTAWA.

A week or more ago there was laid, with impressive ceremony, the corner-stone of the new arts building of the lately-burned Ottawa University. With true foresight, Father Emery and the board of trustees decided to have a fireproof building of the most modern kind to replace the structure burned in December. Being advised by Mr. J. S. Irvin to go to the United States and investigate modern fireproof construction, Father Emery did so. The result is a decision to use ferro-concrete fireproofing in the new building as being the safest and at the same time the cheapest of present fireproofing systems.

After considering the Milan arch system of low, flat spans used in bridges, the Monier system of parallel rods or a network of wires imbedded in concrete, the Ransome system, the expanded metal system, it has been determined to use in this building the Hennebique system of armored concrete, which is of European origin. It is designed, in technical language, to resist both a bending movement and a shearing stress, and is a combination of iron beams, bars, straps and cement, which makes light and yet strong construction possible. Columns and other supports are built out of Portland cement, so mingled with iron framing, a fire-resisting form of construction that has commended itself to building authorities in Baltimore, Cincinnati, and other United States cities. We congratulate the authorities of the University on the wisdom of their resolution. It is stated that the new University, when completed, will be absolutely fireproof. The same system, as is here intended, was used in the fifteen story Ingalls' Building, in Cincinnati, we are told.

SOCIETY OF ACCOUNTANTS AND AUDITORS.

We acknowledge the receipt from London, England, of the nineteenth annual report of the council of the Society of Accountants and Auditors for the year 1903, which was to be presented at the annual meeting, to be held at Salisbury House, E.C., on the 12th inst. The report contains the following information: During the past year 149 new members were added to the roll, which at the close of the period contained 2,060 names. Two hundred and twenty-five candidates sat at the society's examinations in 1903, of whom 161 passed and 64 failed. The council dealt in the report with legislation for the profession, the accounts and audit of municipalities, the conference of incorporated accountants held in Liverpool in October last, the decimal system of weights and measures, and other matters of professional interest. The gold medal, annually presented to the best candidate in the final examination, has been awarded to Mr. Ernest Snowden, of Keighley. The accounts for 1903 show that the society's income exceeded £4,000, and the investments at the close of the year were £6,000 and over.

FIRE INSURANCE AGENCIES.

Editor, Monetary Times:—

Sir,—You have heard a great deal about the fire insurance companies losing money, but nothing is said about the grievance the agent has to contend with. The thing has been brought to the notice of the managers time and time again, but nothing has been done in regards to allowing everybody to canvass, and allowing the commission to be paid to outsiders, instead of the authorized agent. This is very unfair to every fire insurance agent. The sooner this is stopped the better business will be, and the companies will have less losses. This will be a benefit to every agent in the business. Trusting that some other agent will express his views on the situation, and that the managers will take this matter up. Yours truly,

London, Ont., May, 1904. INSURANCE AGENT.

ANSWERS TO ENQUIRERS.

J. E., Ottawa.—Your letter was probably wrongly addressed. Should it not have been the village of St. Jacob's instead of St. Agatha. The places, it is true, are not far apart, but the latter is a very small place; whereas St. Jacob's is a thriving village of 500 to 600 people, mostly thrifty Germans. There are several Ste. Agathes in Quebec Province and one in Manitoba. The number of towns and villages in Quebec named after saints, male and female, is very great. Our office boy tells us that they are 535 in number, whereas there are only 30 in Ontario.

La Compagnie de Pret d' Epargne, Limitée, which in

English is the Loan and Savings Company, Limited, has been the subject of two enquiries from subscribers. We reply that its office is at No. 20 St. Alexis Street, Montreal; it partakes of the speculative or lottery character, having "drawings" of some sort of premium bonds for those who want to get-rich-quick. Its promoter is A. Milette, also the promoter of the Transit Insurance Company, of which we have had something to say. The concern was incorporated by the Quebec Legislature in February, 1901, with an authorized capital of $250,000, and startlingly wide powers; for instance, power to issue bonds to the extent of $1,000,000. Ten per cent. of the capital was at that time deposited in bank, it is understood, by some of the parties interested, but subsequently withdrawn. How much real cash is in the thing we cannot find out. They only began doing business in the spring of 1903.

S. R., Peterboro.—We do not know any reason that no answer came, but you may have noticed that it was decided on Thursday or Friday of last week to suspend business on the New York Stock Exchange, on Saturday, 28th May, so as to give the members three days' vacation, last Monday, Memorial Day, being a legal holiday. The mercantile exchanges in that city—the Produce, Cotton, Coffee, etc.—also observed the same holidays, and we believe that in Philadelphia and Boston the same arrangement as above stated was made.

B. T., Cornwall.—The company has a Quebec charter, and is almost unknown in this part of Ontario. Write to the provincial secretary of Quebec.

CROWN BANK OF CANADA.

On Wednesday of this week, the Crown Bank of Canada opened its office, 34 King St., West, Toronto. The first story of the front has been rebuilt in pink stone and a convenient entrance made. As one enters the building two things will strike him very forcibly, namely the symmetry of the arrangement and the pleasing effect of the wood-work and decorations. The wood-work, which is in dark oak, is produced by the Chas. Rogers & Sons Co., of Toronto, is dignified, without being too elaborate as is sometimes the case. The grille work and cages are the product of the Canada Foundry Co., and a feature of this work is that the cage doors instead of opening on hinges are made to slide on rollers on an inclined plane, so that they close automatically. Black iron predominates and a pleasing effect is produced, which will be heightened when the dark green cork matting is laid. An interesting feature of the office is the women's department. Immediately to the left on entering is the ladies' waiting room, which is intended to be furnished tastefully. The savings bank is directly next to this room, and a lady clerk will be installed there to wait upon the female patrons of the bank. The vault, which is the work of the J. & J. Taylor Safe Works, is at the rear of the counting house. The vault extends upward with nothing but the clear blue sky above, thus avoiding the possibility of its being damaged by falling walls in case of fire or other causes. Altogether, the office is a modern and convenient one, and well situated for business.

HINTS TOWARDS SAFETY FROM FIRE.

It is significant to find so competent an architect as Mr. E. J. Lennox expressing the opinion that half of the fires which occur in the downtown districts result from the electric wiring being out of order. In order to avoid this state of affairs, he suggests the passing of a by-law which would compel these wires to be placed in iron insulated conduits, especially in the basements, where the rough handling of boxes and the constant rubbing against the wires tears the insulation off. Another improvement would be a water curtain at the back of all mercantile buildings, the water in which could be easily turned on and the rear of the buildings kept wet. The curtain only costs a few hundred dollars.

This last recommendation is emphasized by Mr. J. B. Laidlaw, of the Norwich Union, in a letter to the Globe. Further suggestions from this gentleman are that all openings in a building looking towards adjacent premises without a clear space of 50 feet should be protected by fireproof shutters, the windows fitted with metal frames, or with wooden frames covered with metal, and metal sashes with wire glass inserted, and a water curtain, or pipe with open spraying nozzles at the top of each window. The water curtain on the west wall of the Brock building, he points out, prevented the flames from the Rolph, Smith Company entering the windows on this side even when the front of the warehouse was burning.

A fact of serious import is the extent to which elevator shafts endanger the safety of buildings which take fire. Any person, who has read the papers for the last five or ten years, must be familiar with the phrase, describing any interior fire: "When the flames reached the hoist, the wooden shaft enclosing it became a blazing flue, up which the flames rushed to every floor of the building." This might be obviated by placing automatic traps in elevator shafts, which would open after the elevator goes up or down, and close after it passed, while in addition the staircase should be enclosed in a tight partition with a door at the top or bottom. Better still, says Mr. Laidlaw, would be to place the elevator and staircase in a separate and protected compartment.

LIFE ASSURANCE NOTES.

We learn that Mr. Jos. Lawson has secured an appointment as district manager at Guelph, for the Imperial Life Assurance Company of Canada. Mr. Lawson is well acquainted with Ontario insurance affairs, having been for some time general agent for the great West Life Insurance Company.

Mr. J. W. Mackenzie, chief agent for Canada of the Maryland Casualty Co., leaves to-morrow on a trip to the Eastern provinces. He expects to return about the 15th, and will immediately leave for the Coast, meeting Mr. James H. Stone, the auditor of the company, at Vancouver. The two gentlemen referred to will then work their way east again, calling upon agents, and in various ways strengthen the grip the company has in Canada.

The presentation of prizes to those members of the staff of the Canada Life Company, who had been most successful students in the educational course of the Insurance Institute of Toronto took place last week. Prizes in gold, furnished by officers of the company, were handed by Senator Cox to W. N. McIlwraith, of the Eastern Ontario branch office, and to C. C. Macklin and A. E. Cuthbertson, the two latter dividing the second and third prizes. Two members of the staff received special mention for the excellence of their work, one of them also receiving promotion.

We have frequently seen portraits of lady agents for insurance companies, and while some were good looking and some were not, this is hardly the point. Business is business, and a woman who really understands her business ought to be able to effect insurances easier than a man. Now we have the woman actuary. Fraulein Marie Loewy has been accepted by the Berlin Chamber of Commerce as an actuary, being the first of her sex in Germany who has filled such an honorable position. One thing is certain; that if this lady can condescend so far as to look into the household accounts, the tradesmen will have a bad time of it. There will be no tricks with those books!—The Review, May 13th.

The great duty of every man, whether he be a man in a profession with a fixed income, or a man in business with a non-fixed income, no matter how large his income, is to have regard to all the chances and contingencies of life, and to assure against his own death for the sake of those he may leave behind. And having made that provision, then the business man may go ahead, with more business enterprise or more risks than he would have any right to do if he had not made that provision. I feel sure that the attitude toward life insurance on the one hand, and the fullest use of all possible surplus capital after life insurance has been effected on

the other, accounts for a great deal of the extraordinary enterprise and success which is shown by Americans as compared with ourselves. The existence and progress and management of our assurance companies form a favorable example of that self-aid and self-management which is characteristic of our race.—J. H. Yoxall, M.P., at the annual meeting of the British Equitable Life.

Mr. F. H. Russell, manager for Canada of the Railway Passengers' Assurance Co., has just returned from a three weeks' tour of the Maritime provinces in the interests of his company. He reports conditions down there as perhaps a little brighter than some of the papers have pictured them. So far as his own company is concerned, its business in that section of the country is growing nicely.

FIRE INSURANCE MATTERS.

Dr. F. P. Dunningham, of Virginia University, suggests the use of calcium chloride in order to lay the dust of burnt districts. This substance, when it is sprinkled in a dissolved condition over the area to be treated, prevents the latter from drying thoroughly, even under a hot sun.

Our Halifax correspondent tells us that the council of that city, after a good deal of discussion, has decided to distribute the civic insurance this year equally between the five non-tariff companies having offices there, viz., the Acadia, the Halifax, the Anglo-American, the Nova Scotia, and the Ottawa. The rate at which the risk was accepted was 1¼ per cent.

The Maryland Casualty Company, of Baltimore, will not erect an eleven story head office building, as at first proposed, but instead will construct a lower edifice to be occupied solely by its own force. The main reason for this change in plans is that the company's directors consider its records would be more secure in a low building in the event of fire than in a high structure.—Chronicle, 19th May.

A new and what should prove a profitable departure in liability insurance has been inaugurated by the Ocean Accident and Guarantee Corporation, says an exchange. It has engaged Mr. Arthur J. Slade, a well-known consulting engineer of New York City, who will examine the engineering and building plans of all large contract applications submitted to the company for liability coverings.

The annual meeting of the Mainland Board of Fire Underwriters took place in Vancouver last week. It was announced that there would be no increase in insurance rates in British Columbia as a consequence of recent fires in the East. The following officers were elected for the ensuing year: President, Mr. Thomas Pearson, New Westminster, vice-president, Mr. A. McC. Creery, of H. Bell-Irving & Company, Vancouver; executive committee, Messrs. F. J Procter, C. H. Macaulay and A. C. Stirret; secretary, Mr. C R. Gilbert. After which, the underwriters left for a pleasure outing through the various interesting sections of the province.

Last year the fires reported to the London Metropolitan Fire Brigade numbered 3,400 in all, or 174 fewer than in 1902, while those classed as serious declined from 76 to 61. The lives lost were 86 against 116 in 1902. These satisfactory results are attributed principally to the increased staff and appliances, and consequent efficiency of the brigade. The causes of the fires last year were many, and some of them curious. The largest number, 680, are classified as unknown, while 481 are attributed to a "light thrown down." Sparks from fires were responsible for 186, while candles caused 183. The whole force of the brigade numbers 1,347 men. There were 1,006 false alarms, of which 126 were malicious.

A report upon the Baltimore fire has been made by the United States National Fire Protective Association: "The Baltimore conflagration is directly chargeable," says the report, "to unprotected floor openings. Had the stair and elevator openings in the building, where the fire originated, been properly protected, there is every reason to believe that the fire department would have been able to control the fire at the start. Vertical openings throughout buildings, as for stairs and elevators, rapidly communicate fire to all stories. With buildings of considerable height or combustible contents, this is likely to result in fire conditions beyond fire department control. All such floor openings should be enclosed in brick-walled shafts crowned by a thin glass skylight and extended through roof, and with fire doors at openings to stories."

HOW UNITED STATES LIFE INSURANCE COMPANIES INVEST THEIR FUNDS.

The following table indicates how the life insurance companies of the United States had their funds invested on the 31st of December, 1903. As a great deal of interest attaches to the investments of the four large United States companies operating here, the Mutual Life, Equitable Life, New York Life, and Metropolitan, the percentages are given separately for those companies.

Percentum of Various Investments to Total Assets.

Mutual.	Equitable.	New York.	Metropolitan.
8.54	9.84	3.61	14.08
22.21	19.66	6.96	30.19
3.54	5.37	1.50	.....
4.71	4.98	8.97	1.99
53.43	51.07	70.32	45.72
5.59	6.78	6.27	5.03
.74	.67	.62	.65
1.24	1.63	1.75	2.34

	For all companies.
Real estate	7.60
Loans on bonds and mortgages	27.31
Loans on collateral	2.99
Premium notes and loans	6.75
Stocks and bonds owned	47.99
Cash	4.80
Interest and rents due and accrued	.93
Unpaid and deferred premiums, etc.	1.63

The noticeable features in connection with these figures are (1) the large proportion of the Metropolitan's funds invested in "Real Estate," and "Loans on Bonds and Mortgages," and the absence therein of the asset "Loans on Collaterals," (2) that over seven-tenths of the New York Life's assets are invested in "Bonds and Stocks," while its "Real Estate" stands at but 3.61 per cent of its total investments. The formal heading of the Connecticut State Insurance Department is as above given, "Bonds and Stocks," but we understand that the great bulk of the property which the company holds under this heading really consists of bonds.

BOOKS RECEIVED.

Cooldom.—The pocket pamphlet which bears this title is a Tourists' Guide to the Maritime Provinces and Newfoundland. Its six chapters embrace appreciative descriptions of charming localities in all the provinces. The introduction is eloquent, and at the same time concise; the reading matter throughout being broadly descriptive and not tedious. In the matter of illustrations the book is profuse. Delightful scenes and incidents are portrayed concerning Digby—Weymouth—Annapolis Royal—Kentville—Wolfville—Grand Pre—Fredericton—Dalhousie—Rustico—as well as the better known Halifax, St. John, Sydney and Charlottetown. Those who are planning holidays, whether tourists or fishermen, should buy this guide; it costs only ten cents; a route map is bound with it. The publisher is W. G. MacFarlane, Saturday Night building, Toronto.

DRY GOODS ITEMS.

The credit and financial man of a leading house in this line of merchandise who has just returned from a trip down by the sea, reports that retailers in the Maritime Provinces generally had a no better winter trade than their confreres in the central and western provinces, and that a comparatively large quantity of goods will be carried over, causing a considerable degree of conservatism in the placing of new orders.

Suckling & Co. announce that on June 1st and 2nd they will sell by auction at their warerooms in Toronto, 75 bales and cases of worsteds and woolens, valued at about $20,000. They were imported for the present season's trade by the Wyld-Darling Company, and at the time of the fire were in bond or in transit. The company have now no facilities for manufacturing. The goods comprise tweeds, worsteds, crossbreds, friezes, vicunas, beavers, and cottonades. Messrs. Suckling & Co. have also received instructions from the Underwriters' Salvage Company, of New York, to sell at the same time the woolen salvage stocks of the Robert Darling Co., the W. R. Brock Co., the Wyld-Darling Co., amounting in value to over $50,000.

The New England cotton manufacturers held a conference recently at which some important and interesting topics were brought forward. One entire session was devoted to a discussion of remedies for the trouble and uncertainty caused by the shortage of cotton. It was conceded that recent high prices were not due wholly to speculative influences, but that the world is to-day calling for more cotton than can be grown in the Southern States. That is, under the conditions which have prevailed up to the present; for owing to the negro element, immigration from the Eastern States and from Europe has not gone to the South. Latterly, it is true, Italians have gone there in increasing numbers, and these make good settlers, and will no doubt prove a factor in the production of cotton. But, failing this, the suggestion was made that Japanese labor should be imported on a large scale, as the only hope for any notable increase in cotton-raising.

The annual meeting of the Canadian Colored Cotton Company took place in Montreal on the 27th ult. The report which was read by the president, Mr. D. Morrice, was not deemed so satisfactory by many of the shareholders as they had hoped. He explained that in his view this was caused by the inadequacy of the protection afforded by the Government, as the mills in the South American States, especially, were enabled, by means of cheap labor and long hours, to invade this market. Besides this, he said, good grades of colored cottons were imported into England from the Continent of Europe, and were there finished and re-exported to Canada under the preferential tariff. The net earnings of the company for the year were $224,000, from which must be deducted the bond interest, amounting to $111,000. A dividend of 4 per cent. was declared, leaving a surplus of $4,000 to be carried forward to profit and loss account. The total sales were about the same as last year. Assets were placed at $5,215,000, and the stock on hand at $503,000. Mr. C. D. Owen has retired from the board of directors and his position has not been refilled. The other directors were re-elected as follows: D. Morrice, Hon. George A. Drummond, J. King, E. S. Clouston, and D. Morrice, Jr.

A writer in a recent issue of the Globe backs up Mr. Thomson's suggestion, quoted a week or two ago in these columns, that there should be a Government system of inspection of all woolens, both domestic and imported, requiring a tag stating their composition, to remain on the goods until sold. "Our Government," remarks this correspondent, who, by the way, resides in the woolen centre of Almonte, "is very solicitous for a high standard of development of our farm products. If a man offered adulterated butter for sale as openly as shoddy cloth is sold to our people for all-wool goods, someone would get into trouble. Why allow our long-protected woolen industry to become demoralized and degenerated by allowing the indiscriminate dumping of cheap imitations of woolen cloth on our market, without warning to our people or a means of knowing the character of the goods until one is swindled by them? Or why allow our own manufacturers to sell such goods without the character and quality being stamped on them, so there would be no occasion for our people being deceived in the quality? There would then be a clear opportunity to educate our people to buy and use reliable Canadian-made woolens, very much to the advantage of our Canadian woolen industry."

FOR GROCERS AND PROVISION DEALERS.

Canadian sugar refiners have made another advance of 5c. per hundred on all grades. The position of the market is very strong.

Puddy Brothers, Limited, Toronto, have received a Dominion charter authorizing the company to slaughter animals and prepare, pack and cure the same. The capital stock is $100,000.

Though the state of the market, both here and in the Old Country, is still easy, cheese made some little advance during the week. At the country boards the prices realized were an average of from 7¼ to 7¾c., or fully a cent higher than last week.

Cables from Greece announce a further advance in currants of 1s. 6d. following the late marked rise. This is said to be the result of a decision on the part of the Greek Government to enact further remedial legislation for the benefit of the growers. The stock of old crop is also said to be now very small, only about 10,000 tons, which is barely two months' supplies.

Seventeen or eighteen of the largest broom manufacturing concerns in the United States are to be combined under the name of the National Broom Company, with a capital stock placed at about $4,000,000. One of the advantages aimed at is said to be uniformity, for, instead of there being ten varieties of brooms to each individual factory, there would be ten standard varieties in the entire country. Brooms will also be shipped from the nearest factory and all settlements be made through a central office.

A report from London dated 6th inst. stated that the quantity of butter shipments into the Old Country from all sources during the previous five weeks had been 93,600 cwts. greater than in the same period of last year. Not much of this excess, however, had come from Canada, the greater part having come from Australia and New Zealand. Cheese, both Canadian and New Zealand, was still continuing its downward movement, prices being about 2s. per cwt. lower than the previous week.

There is a serious decline in the famous Maryland oyster beds. A writer in Collier's Weekly gives statistics showing that the number of raw and steamed oysters marketed in Baltimore has decreased from 7,500,000 to about 2,800,000, and there has been a proportionate reduction in other parts of the State. Many of the oyster packing houses in Baltimore are now closed, and many employees thrown out of employment. Measures are now being brought before the State Legislature to remedy the matter.

The crop of leaf tobacco in Cuba last year was 342,748 bales, a falling off of 56,096 bales, compared with 1902. The exports were 303,116 bales, which were 42,424 bales less than in 1902. It is worth noting that Canada has increased her consumption of Cuban tobacco by 400 per cent., compared with 1902. Of the countries importing Cuban tobacco, the United States stands at the head with 187,745 bales, but with regard to cigars, Great Britain is in the lead with 92,277,137 cigars, though this is a falling off from the previous year of over 5,000,000. The number of cigarettes exported increased by 2,671,290 to 14,341,445 packets, three-fourths being sent to Colombia. Altogether the value of Cuba's shipments of tobacco and its products last year was $25,127,871.

A despatch from Halifax says that almost simultaneously with the legalizing of whale fishing by the Canadian Government, large shoals of those animals have made their appearance on the Nova Scotia coast. They are particularly numerous in the vicinity of North Sydney. They have followed the herring, which are shoaling in large numbers on that coast. Their presence so near the coast is considered a good omen for the successful operation of the Canadian whaling industry, which will probably be started this year.

James Nelson & Sons, Limited, Liverpool and London, the large company of meat importers, have just issued their annual report for the year 1903, and it reads very differently from the last one. In the latter, profits amounted to £397,-101; last year they were only £3,870. The difference is attributed by the directors to the high cost of beef and mutton in the Argentine Republic, also to the high cost of shipments to South Africa; in addition to the reduced selling price of beef. The present state of the frozen meat trade does not seem satisfactory. This state of things, however, should, redound to the interests of Canadian live stock interests, as the British public apparently is a little tired of frozen carcases.

—The German surtax seems to be powerful in its effects. For the nine months ending with March 31st last, the importation of German raw sugar into Canada was 530,000 pounds, whereas during the same period of last year it amounted to 150,000,000 pounds. The total dutiable goods entering Canada from Germany during the same two periods was $5,076,383 and $7,776,205 respectively, a falling off of $2,699,822. In sugar at any rate, what is Germany's loss is evidently the Empire's gain. The quantity brought to Canada from the West Indies and British Guiana having increased from 40,000,000 to 162,000,000 pounds.

—It is sixty years since the sending of the first cablegram across the Atlantic by S. F. B. Morse. The event was celebrated in New York last week, when a banquet was given by Mr. Clarence Mackay, on Victoria Day, to one hundred representatives of cable and telegraph people, the majority being the leading officials of the company of which he is the head, the Commercial Cable and Postal Company. Mr. Charles R. Hosmer, of Montreal, vice-president of the Commercial Cable Co., was present. So were Messrs. Jas. Kent, manager, and W. J. Camp, electrical engineer of the Canadian Pacific Railway Telegraph. While the banquet was in progress the fact was noted, and will be of interest to Canadians, that Mr. O. S. Wood, in former years president of the Montreal Telegraph Company, is still living, on Staten Island. Mr. Wood was taught telegraphy by Morse himself, in the early forties.

It is twenty years, says the Banker's Monthly, since the Dime Savings Bank, of Detroit, opened its doors for business in the old flat-iron building at Michigan and Lafayette avenues, and the directors feel that the institution has made a wonderful record during these two decades. The capitalization was originally $60,000. Then it was increased to $100,-000, and later was brought up to $200,000. The bank now has 23,000 active savings depositors, and its commercial accounts number some of the largest firms in the city. The officers and first board of directors were: A. M. Henry, president; James E. Scripps, vice-president; Frederick Woolfenden, cashier; S. M. Cutcheon, J. F. Roehm, William Livingstone and William Hull. Of the original board, three are still members, William Livngstone, J. L. Hudson, and Charles A. Warren.

In writing of the reorganization of the Banking and Currency committee of the United States House of Representatives, the Editor of "Sound Currency" says that a striking feature in the history of the current session of the 58th Congress is found in the reconstruction of the Banking and Currency Committee of the House of Representatives, which has been effected by Speaker Cannon. In distributing the places upon the different committees, Mr. Cannon has removed from the Committee on Banking and Currency several important members who have been prominently connected with currency reform legislation, and has put in their places certain other men who are either unknown or slightly known in connection with currency reform, or who are absolutely opposed to the principles of credit-currency. . . The action of Speaker Cannon in taking Mr. Hill, of Connecticut, and Mr. Overstreet, of Indiana, from the personnel of the committee, and in substituting men opposed to credit currency legislation, or ignorant of the whole subject, is reminiscent of the days of Speaker Reed, and suggests the possibility that that gentleman's tactics are to be repeated. It has long been known that certain influences in the Senate ardently desired to see the House Committee on Banking and Currency largely weakened in order that it might become merely an echo of the measures originating in the Senate Finance Committee.

—There are some merchants who, after they have given an order for goods, and after perhaps the manufacturer has secured materials, and has partially or wholly prepared them, found they can get the same elsewhere at a cheaper price, and then send an order cancelling it. The Clothier and Haberdasher calls this unfair disposition a disease under the name of cancellitis, and describes the many people who are unfortunately afflicted with it, as "commercial anarchists." Let us suppose, says our contemporary, that the merchant had given an order for C.P.R. stock, for wheat, or cotton, or pork, and repenting the next day, had tried to cancel the order. We all know how much cancelling would be done. With some men, buying clothing is not a serious matter, but rather a diversion. They have learned that they can cancel orders, and as a consequence, they are like the little boy who plays marbles for fun and not "for keeps." It is astonishing to what an extent this practice is carried on, and it is even more astonishing to what an extent cancellations are accepted by the manufacturers with little or no remonstrance. A crisis is at hand, however, in this matter and before many moons a strong association composed of the leading manufacturers, will be formed to cope with this and all other abuses in our trade. As an example of what can be done towards curing merchants who are afflicted with cancellitis, the action of the National Association of Clothiers of the United States may be cited. Last year this Association notified sixty-four retailers that they had been condemned as chronic cancellers of orders and returners of merchandise, and that if at the end of six months their record did not show a reform on their part, no member of the association would sell them a dollar's worth of goods. This notification had a marvellously good effect and shows what concerted action can accomplish.

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing Houses for the week ended with Thursday, June 2nd, 1904, compared with those of the previous week:

	June 2.	May 26.
Montreal	.....	$14,582,519
Toronto	$17,022,249	13,386,415
Winnipeg	.....	4,350,109
Halifax	1,803,447	1,702,488
Hamilton	1,098,706	977,878
St. John	909,792	773,226
Vancouver	1,453,072	1,172,346
Victoria	690,274	568,848
Quebec	1,570,873	1,181,149
Ottawa	1,846,901	1,631,725
London	847,004	676,043
		$41,002,746

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

THE TORONTO BURNED DISTRICT.

The burned portion of the commercial district of Toronto is showing, in parts, signs of active rebuilding. Beginning on Wellington Street, beside the Union Bank, the extensive premises of Kilgour Bros. are being steadily rebuilt in a style which, inside and out, will be durable as well as convenient, with especial regard to the fire hazard. Next door westward is the Bradshaw's clothing warehouse, in process of rebuilding in better style than before. At the next corner was the warehouse of the Wyld-Darling Co. As yet nothing is done towards its reconstruction, the owners being in England. Next door to the staunch and strong Telegram building, which proved a barrier to the flames on Bay Street, was the Office Specialty Company. As we have already noticed, they have removed elsewhere in the city, near the Toronto Club. Their former building is being reconstructed. The Crown Hotel is quite refitted; so are Sharpe & Co. and G. H. Hees, Son & Co. farther to the south. Looking across Bay Street from the Hees premises, one finds that Dignum & Monypenny have begun their new warehouse, corner Bay and Wellington. It will be a five-story building, 32 feet by 110. C. H. Westwood & Co. have also started to rebuild. Davis & Henderson have resolved to put up a new blank book factory on Bathurst Street. Wm. Jessop & Sons, of Sheffield, having settled their loss, are about to rebuild their next premises, and will raise them two if not three stories.

Good progress has already been made in arrangements for the reconstruction of the W. R. Brock Company's large dry goods warehouse on the corner of Bay and Wellington. The style of the building is to be of the best fire-resisting kind. Southward along Bay from this lot to the corner of Front Street there is no relief to the desolation of unrelieved bricks and ashes. On this corner, however, is a scene of cheerful activity. Scores of masons and laborers are at work on the lower walls of the Gordon, Mackay & Co. dry goods warehouse, which, judging by its foundations and by what we were told of its intended superstructure, will be a most creditable building, substantial inside and out. At the site of W. J. Gage & Co., and Copp, Clark, there is also much busy clearing away, looking to reconstruction. Warwick Bros. & Rutter, as we have previously said, have gone elsewhere to rebuild. The opposite corner to the east, formerly the site of Robert Darling & Co.'s warehouse, shows no sign of rebuilding; indeed, we were told that the proprietor is not likely to rebuild at once. Looking northward from this point to Wellington Street, there is nothing doing to relieve the mass of ruins except the clearing up which is going on upon the Bradshaw lot and the one next to it.

Scaffolds are erected about the still standing walls of the building where the fire broke out, the E. & S. Currie silk-wear factory, indicating that it is to be rebuilt. The same is to be said of the tall Pugsley building to the eastward on Wellington Street, corner of Mincing Lane. On the opposite side of this street, and farther west is the ruin of the substantial Brown Brothers' binding establishment, being emptied of its salvage and cleared of its debris in the confident hope of being ready for business again at the old stand in a few months. We have noted the amalgamation of Rolph, Smith & Co., lithographers, with the Barclay & Clark establishment. Their new factory will be not on the site of the old ones on Wellington Street or Lombard Street, but on King Street, west of Simcoe.

Apparently, nothing is settled yet by the merchants or manufacturers on the south side of Front Street from Lorne Street to Bay Street. This delay is presumably caused by the negotiations going on between the city and the railway companies looking towards a removal of the Union Station to a site east and north of its present position. Charles Cockshutt & Co. have gone out of business, as we have stated; the Gutta Percha and Rubber Company, whose warehouse was on leased ground, will not rebuild it, having bought the Royal Insurance building on the corner of Yonge and Wellington. Coming further east along Front Street, where the buildings were mostly on leased ground, there is similarly no sign of life. The "Iron Block" remains as it was on the morning of the 20th April; but across the street the Minerva building is already bright with fresh paint and other renovation. In some cases the provisions of the new building by-law, and in others negotiations as to fresh leases, has delayed rebuilding. But many firms have shown their enterprise and faith by immediate preparations to rebuild.

We learn upon enquiry that the total loss of the Land Security Company on buildings on Bay and Front Streets has been adjusted at $198,000. The insurance is $128,000. The loss of the J. B. Smith estate on warehouses at 29, 35, 37, 39 and 43 Front Street and south side has been adjusted at $100,000; insurance, $75,000.

TO GET SATISFACTION

From your steam plant is the crucial basis of economy to all manufacturers. A satisfactory steam plant is one that produces the greatest needed power at the lowest cost.

WRITE TO-DAY ABOUT IT.

A. G. C. DINNICK, Managing Director

PROSPECTS AT THE SOO.

At length it seems that brighter days are in store for the consolidated industries at Sault Ste. Marie, Ont. The work of reorganization is about complete, and unless some hitch occurs the works are expected to start up again after their long silence. The new company, of which Mr. C. D. Warren, of Toronto, is president, are now in full possession of the properties, the money owing to Speyer & Co., of New York, amounting to $5,050,000, besides interest and other charges, having been paid over. The loan of $2,000,000, guaranteed by the Ontario Government, was financed by Orvis Bros., New York, successfully, after the passing of an order-in-council authorizing the same. The reorganized company has a cash working capital of $1,000,000, and those unsecured creditors who were unwilling to accept first mortgage bonds as security have been paid in cash.

CHARLOTTETOWN VINDICATED.

A letter comes to us this week from Prince Edward Island, defending the capital of that Province from the charge of being old-fashioned and slow in the

matter of hotels. Mr. H. F. Coombs is the writer, and he dates from Tignish, Prince Edward Island, May 21st. He says:

"Enclosed find cutting from your issue of May 6th, which is scarcely fair to Charlottetown. The extraordinary influx of passengers into Charlottetown on the particular day mentioned was caused by the visit for a day of the members of a fraternal society, who are usually to a large extent billeted on their brothers of the order on such occasions. Owing to a difference between the owner of the largest hotel in Charlottetown and the Scott Act inspector as to how the Scott Act should be enforced, that hotel was closed at the date of the "Minto's" arrival. But such things have happened elsewhere. In addition to the Davis Hotel, with 100 rooms, which will be reopened under new management in a few days, there is the Queen, having, with additions now being built, say, 60 rooms, one of the cleanest and best-kept hotels in Canada; the Revere, having 30 rooms, is a good house, and a number of smaller houses are open in our capital city, most of which are fairly comfortable, some of them particularly so. In fact, Charlottetown will offer ample accommodation for more than the normal number of visitors this summer.

The country is putting on its summer dress of green, and is looking charming. So, Mr. Editor, when the July sun makes life a burthen in your hot inland cities, get out your fishing tackle and come to Charlottetown, and its people will use you well, and demonstrate that their houses of entertainment merit a better title than old-fashioned boarding-houses."

TORONTO still hankers after a competitive telephone service. Montreal has a large amount of experience with this sort of thing that it will cheerfully place at the disposal of its sister city. It is to the effect that a good service at a fair price is much to be preferred to a competitive service at a lower rate.

A WINNIPEG dispatch of Saturday last says that the largest land sale of the season was closed on the previous day, when 40,000 acres in eastern Assiniboia was purchased by Chicago capitalists, represented by Messrs. J. E. Holland and E. W. Stees. It is the intention of the new proprietors to put the whole tract under cultivation at once, and they say the land will be under crop by a year from this spring. This, they declare, is but the start of a series of such gigantic farms. The highest market price was paid, the total transaction involving an outlay in the neighborhood of $500,000. The land is situated north of Qu'Appelle.

MONTREAL MARKETS.

Montreal, June 1st, 1904.

Ashes.—The market has an easier tone for both pots and pearls, and buyers quote about $6.10 for first quality of pots; seconds would realize about $5.60 to $5.65. For pearls, from $7 to $7.50 is a nominal quotation. Receipts continue light for the season of the year.

Cements and Firebricks.—Receipts of cement for the week ending to-day have been small, comprising 300 bbls. of English cement, and 1,500 bbls. and 1,800 bags of Belgian cement; firebricks, 124,600. A fair aggregate of moderate orders is reported, but no large sales. We quote: Belgian cement, $1.70 to $1.95; English, $1.95 to $2.10; German, $2.35, but none coming in owing to the surtax. Firebricks, $16 to $22, as to brand.

Dairy Products.—After last writing prices of cheese continued to advance, about 9c. being quoted as the spot price for finest Western at the end of the week; but there appears to be an easier feeling at the moment, and New York quotations are reported relatively lower than here. Quebec-made cheese sold at about 8⅜c. on the wharf Monday. and 8¾ to 8⅞c. seems about outside figures for Westerns. Full-grass fine Townships creamery butter quotes at 17 to 17¼c.; dairy makes at 13 to 14c. Cheese shipments are light as compared with last year at this date. Exports for last week were 32,502 boxes, as against 53,488 boxes for same week of 1903. Of butter there were shipped last week 2,448

packages, as against 3,573 packages a year ago.

Dry Goods.—Most of the larger houses are now busy stock-taking, and some very fair sized sales of clearing jobs are reported to buyers from the larger towns, quite a few of whom have been in town looking for bargains in this direction. Travellers are doing fairly, but those in the West report a backward season. Collections have caught up pretty well, considerable improvement being noted during the past ten days, and some houses figure that May payments are not so very much behind the same month a year ago.

Groceries.—The week has developed nothing of special interest in this line, and the movement, while a fair one, shows no special activity. The sugar market is stationary, but steady at last advance, standard granulated being quoted at $4.45, as against $4.95 in New York; the refineries are reported to have good orders in hand, and are very busy with deliveries. Two large cargoes of West India raw sugar have arrived in port within the last few days. Molasses is very dull. Notwithstanding the war, the market for new Japan teas has opened up slightly lower than last year, this being no doubt due to the increasing demand for Ceylons and Indians,

THE COMMERCIAL
Established 1868
The Weekly Financial, Commercial & General Trade Newspaper of the Great West

Reaches direct 90 per cent. of the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

Do you want to sell or increase the sale of your goods in these. THE BEST BUYING PROVINCES IN CANADA?

Estimated that 200,000 new settlers will arrive this year. Will the retail merchant offer them your goods? Our advertisers our best references. We beg the favor of an enquiry.

THE HUGH C. MACLEAN CO., LIMITED, Publishers, Winnipeg.

Eastern firms should subscribe for THE COMMERCIAL and keep posted on Western trade

which both show much steadiness. In other lines there is nothing interesting.

Hides.—The volume of business in hides is comparatively light, and receipts of calfskins are declining. In both these articles prices are without any change. Lambskins are now put up another 5c., making the present quotation 20c. each.

Leather.—Boot and shoe manufacturers are not finding orders for fall footwear coming in so well as last year at this time, and are not cutting stock very freely, with the result that the demand for leather is not active, but values are all well held. Jobbing sole is in light supply, and manufacturers' No. 2 is quoted at 23½ to 24c. Best Western splits are firm at 22c., and black leathers generally incline to stiffness. Moderate export business is reported.

Metals and Hardware.—Business in heavy metals is better than a month ago; hardware men are fairly busy; but imports of iron and iron manufactures for May have been notably light. In pig-iron quotations there has been no recent variation. No. 1 Summerlee is quoted ex-wharf at $19 to $19.25; No. 3 Middlesboro, $16.50; Londonderry and Hamilton, from $18.50 to $19. Bars are easy, but unchanged. Boiler plate, $2.10. Tinplates, $3.90 for charcoals, and $3.65 for cokes of standard brands and weights; tinned sheets, 6¾c. for 24 gauge; galvanized sheets, $4.25 to $4.30 for Queen's head and equal; Canada plates and black sheets unchanged. Ingot copper is a little easier, at 13½ to 13¾c.; tin, 31½ to 32c.; lead, $3.25 to $3.30.

Oils, Paints and Glass.—Linseed oil continues to be sold at much cut prices, and while 45c. for raw and 48c. for boiled are supposed to be the regular quotations, orders are accepted at materially lower figures. The same is true of white lead, $4.40 to $4.50 being the supposed quotations for pure, but business is reported at figures considerably lower. Turpentine is again easier by a cent, the present quotation being 93c. Owing to the cool weather the demand for Paris green is still light; we quote 14½ to 15c. in lb. packages.

TORONTO MARKETS.

Toronto, June 2nd, 1904.

Chemicals, Drugs, etc. — Not much change in conditions has occurred in the local market, and general trade may be described as normal. Across the line they complain of dullness, both in drugs and chemicals. Quinine is lower, in sympathy with the results of the sale recently in Amsterdam. Opium continues dull. Cod liver oil is becoming still easier. Higher prices are being asked for chlorate of potash. English reports say that trade, both in the home market and for export, remains on the dull side. However, the feeling in most quarters is still hopeful.

Flour and Grain.—A firmer tone exists in the flour market, and ninety per cent. patents are offered at $3.70 in buyers' bags, middle or east freights, with holders as a rule asking 5c. more. No appreciable change has occurred in millfeed, and prices keep steady. Ontario wheat has gone down 1 to 2 cents, and oats likewise. Other grains are not altered. Some receipts are beginning to come in now, but so far not in large quantities.

Fruits and Vegetables.—Fairly large is the volume of business being transacted by the fruit and vegetable merchants. Strawberries are becoming cheaper, and so are pineapples, with the larger quantities coming forward. Prices are as follows: Apples, 75c. to $2.50 per barrel, according to grade and quality; cocoanuts, $3.50 to $4 per sack; oranges, California navels, $2.75 to $4; Valencias, ordinary, $4.50 to $5.50; large, $6 to $6.50; lemons, Messina, 360's, $2 to $2.50; 300's, $2.75 to $3; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; pineapples, $2.50 to $3.25 per case; strawberries, 10 to 12½c. per quart box; Egyptian onions, $3.50 per sack; tomatoes, $2 to $2.50 per case.

Groceries.—Sugar continues strong at the recently reported advance. Trade throughout the country districts is reported by travellers as fair for this time of the year. Teas retain their firmness, especially Indians and Ceylons, and a good trade is being done. No change has taken place in canned goods, which are very firm.

Hardware and Metals.—The situation in the hardware trade presents but few features of interest. In volume it is about average, and it is doubtful whether it will be found to have equalled that of last spring. The heavy metals are moving out, but without any great alacrity. From Scotland comes word that the month just past was a disappointing one, values for nearly all metals having declined. Pig iron was strong at the early part of the month, but a change for the worse speedily set in, and Cleveland declined 1s. per ton. Consumers have held off from a declining market. Copper fell 30s. per ton, though the visible supply was small. Tin, lead and spelter also dropped considerably.

Merchants Fire Insurance Co.

CAPITAL AND ASSETS OVER HALF A MILLION

HEAD OFFICE TORONTO.

Agents Wanted in All Unrepresented Districts.

Hides and Leather.—Under fair receipts there is a steady market for hides, and prices are the same as quoted last week. Sheep and lambskins are both firm, and prices a little higher. Calfskins are in better demand. The tallow market is quiet. Leather shows an improving tendency, with a stiffening in prices.

Provisions.—Except for extra choice lots, for which the demand is nearly always good, butter is in over-supply and the market flat. Cheese continues on a better basis, though it is doubtful how long such will last. Eggs are in good demand, the picklers' requirements having now begun in earnest. New-laid eggs fetch 15½c. Hops are nominal, the usual quotation being 28 or 30c. for Canadian crop. Hog products are somewhat easier under slack demand, but a rise of 10c. per cwt. in live hogs will, perhaps, improve the situation.

Wool.—The receipts of new clip wool are becoming a little larger, and washed fetches 17c. for good quality. The demand is improving. Pulled wools are quiet. In the Boston market the volume of business is reported to be a little larger, with some fair-sized lines of old territory wool cleaned up at unchanged prices, but which are lower than the cost to replace. A line of 300,000 pounds of Idaho fine and fine medium sold at 14c. That price has been paid in the States by Boston dealers. There is no let up in the excitement in the West. Active operations have commenced in Oregon, and three-fourths of the new clip of Utah, Wyoming and Idaho has been sold or contracted for. At Newcastle, Wyoming, the Morton clip of 500,000 pounds sold at equal to 17½c., landed Boston.

30 Days of Grace

for the payment of Renewal Premiums is one of the many privileges the SUN LIFE OF CANADA grants its policy-holders. Should the Assured die at any time within the days of grace the claim would be promptly paid, even though the premium had not been paid.

THE METROPOLITAN LIFE INSURANCE CO.
(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policy-holders and addition to Reserve.
$53,841.18 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1,800,000.00.

—"The best time to stop a strike is a long time before you begin it; which is true, if it is Irish," Thus spoke Terence V. Powderly, former President of the Knights of Labor, at the annual banquet of the Shoe and Leather Association of Chicago, in a speech recently. "The labor leader who has the interest of his men at heart will fight the strike to the last ditch," continued Mr. Powderly, "for of all the costly, cumbrous, wasteful, cruel methods of settling a difficulty in labor matters, the strike and lockout are the worst. Let the labor union incorporate. The Union has nothing to fear from incorporation; there is nothing the law can reach under incorporation that it can't reach now."

THE POPULAR INSURANCE AGENT.

An officer of one of the big American life insurance companies thus answers the question of how the life insurance agent can achieve real popularity: "Not by being able to tell the funniest stories and crack the best jokes. The funny man and joker are all right as entertainers, but life insurance is serious business in which frivolity has little part. There are some insurance people who are hail fellows well met, but with few exceptions their popularity seems only skin deep, not very impressive, and when it comes right down to the big cases they usually slip to the other fellow who is a little more solemn and earnest. Be genial without being frivolous. Don't tell your client what you think he might like or prefer to have in his policy. Tell him only the facts, the plain, unadulterated, unvarnished facts, just what the policy will do, just what is guaranteed, just how it will turn out, or as nearly that as you can. In after years he'll be your friend, feel that he was treated right, and send his friends and his friends' friends around to you to get insured. Many a man's popularity has been spoiled when his policyholders woke up in later years to find that their policies were not as represented—with rankling and bitterness to pay.

"'Honesty is the best policy'—the cheapest one you can carry. The popular man should know his business and be posted in all its phases and particulars. You will run against very smart people, you will have to match your wits with theirs, and there is liable to be a drop in their esteem if you show ignorance of your subject. It's as natural for business to go to the well-posted man as for water to run down hill. The professionals best paid to-day are the specialists, and there can be no higher, no more dignified, no more remunerative calling than that of a specialist in life insurance. There are D.D's., M.D's., and other D's., let your diploma read I.D., Doctor of Insurance, and live up to your title. Don't make the error of picking out for a man the policy with the biggest commission in it—for you. That is a fatal mistake. Work on a higher plane. Fit a policy to your client's needs as his tailor fits the clothes to his body. Prescribe insurance for your client as his physician would prescribe medicine for his malady. In other words, be earnest, industrious, reliable, well-posted, scientific, and you will be 'popular.'"

The date of the banquet to President Drummond, of the Montreal branch of the Canadian Manufacturers' Association, has been changed to the evening of July 1st. The date will be the eve of the departure of the Canadian manufacturers from that city for Newfoundland, hence it is expected there will be a representative gathering at the testimonial to Mr. Drummond.

GEO. A. STIMSON & CO.,

24-26 King Street West TORONTO, Ont

THE will of the late John Lyman, of Northrop & Lyman, Toronto, who died recently in Syracuse, N.Y., has been entered for probate. The estate is valued at about $1,185,000, and $83,000 is given to Toronto charitable and educational institutions.

IT is said by Mr. James Mitchell, manager of the Sao Paulo Tramway Light & Power Company, who has been on a visit to this country recently, that the amount of illumination in the go-ahead city of Sao Paulo has increased over 100 per cent. since the company started operations. Much of the increase must be credited to electricity, but the use of gas for cooking has become very popular.

THE Temiskaming & Northern Ontario Railway Commissioners have awarded the contract for the extension of the line north from New Liskeard to Mr. A. R. Macdonnell, who had the contract for the present line of about 112 miles. The extension is intended to intersect the Grand Trunk Pacific, and the distance will be in the neighborhood of one hundred miles. Twenty-five miles or more will be built this season.

Mercantile Summary.

A LARGE falling off in the traffic through the Soo canals is reported for the month of May. Traffic through the Canadian was very little lighter than through the American.

WE hear from Sault Ste. Marie, Michigan, that a metal-working plant of very large proportions is shortly to be established in that city. Power to the amount of 2,000 horse-power will be taken from the Michigan Lake Superior Power Company's canal.

THE Department of Justice of the Dominion Government is calling for tenders (receivable up till 24th inst.), for supplies for penitentiaries. Separate tenders will be received for each of the following. Flour (Canadian Strong Bakers'), beef and mutton (fresh), forage, coal (anthracite and bituminous), cordwood, groceries, coal oil (in barrels), dry goods, drugs and medicines, leather and findings, hardware, tinware, paints, etc., lumber.

FORTY-SEVEN years ago J. Dillon, of Kingston, Ont., began business in the boot and shoe line, and of late years his son has been a partner, under the style of J. Dillon & Son. The business has never been a very active one, and evidence of dry-rot has been shown of recent years in slow payments and occasional suits. An assignment is now reported.

SOLOMON MILLMAN, originally a pedlar, for a time keeping store at St. Paschal, Que., and since the spring of 1903 at Fraserville, Que., is reported to have assigned.——J. Tremblay, log jobber and storekeeper, of Tremblay, Que., lately reported as in difficulty, has arranged to pay his creditors 60 per cent. of their claims in cash.——Mrs. Robinson, milliner, Terrebonne, Que., has compromised at 20 cents, cash.

A. J. CARON, who recently went into the boot and shoe business at Chicoutimi, Que., is reported as having assigned. He formerly was in the same line at Quebec, but with poor results, having failed there in 1900, and also on a previous occasion.——Emerilde Laliberte, who for the past 6 or 8 years has carried on a small general business about 2 miles from Lotbiniere, Que., has made an assignment. His liabilities are reported at $2,250.

AT a meeting of the creditors of Simon Peters, contractor and planing mill proprietor, Quebec, held last week, an offer of 25 cents on the general liabilities of $90,000 was made, and will likely be accepted. A transfer of certain mining shares is to be made to secure the preferred creditors.——A demand of assignment has been made upon J. Nadeau, a small lumber dealer of the same city, whose affairs have not received, it is said, the closest attention.

AGENTS WANTED in every unrepresented District in Canada.

F. J. J. STARK, Acting Manager.

Two prospectors are said to have uncovered a remarkable shoot of ore six feet wide, near Poplar, in the Lardeau district of British Columbia. Lumps of gold the size of wheat kernels are said to have been found. This is not the only valuable gold find reported from this district during the last few weeks.

THE liabilities of R. A. Estey, sawmill owner and lumberman, of Fredericton, N.B., whose bankruptcy was noted in a late issue, are much larger than was first calculated. A meeting of his creditors was held last week. When a statement was submitted last week showing that he owed $134,675, with apparent assets of $104,800. An assignment has since been made to A. H. Randolphe.

A NEW steamer, the "Athenia," has arrived in Montreal, for service with the Donaldson line. She is 478 feet long, with a breadth of 55 feet 10 inches, and a depth of hold 35.6 inches. She has six large holds with a measurement of 363,933 feet, with a corresponding number of 'tween decks, capacity 125,126 feet, with space in the shelter deck for cattle or cargo to the extent of 170,459 feet, or over 16,000 measurement tons. Her engines are triple expansion, with cylinders 27 x 44 x 72 inches, and six steel boilers with 180 lbs. pressure, and developed a speed of 15.2 knots on her trial trip. A portion of her 'tween decks has been insulated with the latest system of cold storage, which is divided into separate compartments, enabling the successful carriage of fruit, butter, dressed meats or any kind of produce which requires different temperatures. The cattle trade is also provided for, her deck fittings being of a permanent character and unsurpassed with high 'tween decks and large alleyways, with water pipes and connections conveniently arranged throughout the decks, making the watering of the live stock a very easy matter. The vessel has accommodation for about twenty-five saloon passengers.

SOLE CANADIAN DEALERS.

THE courts have ordered the sale of the Quebec Southern and South Shore Railway for the benefit of the creditors.

WE understand that Rolla L. Crain Co., Ottawa, are making enlargements of their plant in order to meet the growing demand for their loose leaf ledgers and other office specialties.

A REPORT comes from Rossland, B.C., for the truth of which we do not vouch, that plans are under way for an amalgamation of the Le Roi, War Eagle, and Centre Star mines. The combined capital of the three mines is $10,500,000.

THE Tub Target Company, Limited, Toronto, has been incorporated under Ontario charter, with a capital stock of $1,000,000. It will deal in guns and manufacture fire-arms, machinery for targets, etc. Among the incorporators are Lt.-Col. Pellatt, Toronto; Sir Adolphe Caron, Ottawa, etc.

ON the 15th, 16th, and 17th inst., the Canadian Electrical Association will hold in Hamilton its 14th annual convention. Among the interesting subjects booked for discussion, we note on the programme the following: The Development of Storage Batteries, The Curtis Steam Turbine, Niagara Power Development, The Statistics of Canadian Progress in Electrical Applications, by the Dominion Statistician, etc. There will also be a banquet and some pleasurable side-trips.

THE Tough Sole Shoe Company, of Toronto, are negotiating for the location of their factory in Cornwall. They propose to erect a factory, to install machinery to cost $16,000, and to employ forty hands, with a pay roll of $14,000 a year at the start. For this they ask the town for a free site and a loan of $7,000, with an additional loan of $3,750 when they employ sixty hands, and another $3,750 when they have eighty hands and a pay roll of $28,000, the loan to bear interest at 4 per cent., repayable in fifteen annual instalments, beginning the third year after they commence operations.

—From statistics gathered for the benefit of Torontonians who are disposed to quarrel with the Bell Telephone Company at every turn, it would appear that Canadian cities are now obtaining the cheapest services on the continent. In cities in the United States of a size approximating Montreal and Toronto, the charge is invariably higher. For instance, the thirteen cities in the U.S., beginning with Rochester, with a population of 163,000, and ending with New Orleans, with its population of 287,000, the lowest rate yearly for a residence 'phone is $42, as compared with $30 for Montreal, and the highest is $78. For business 'phones in these cities the lowest rate quoted is $60 per year, that given in Rochester, as compared with $50 for Montreal. The highest business rate quoted in these thirteen U.S. cities is $150 per year, that being the price paid in Washington, D.C., and Newark, N.J.—Montreal Star.

POPULATION OF CAPE COLONY.

The census returns for Cape Colony show that the population of the Cape proper totals 1,485,634 persons, of whom 548,926 are whites. At the census of 1891 the total was 1,039,860, the whites then numbering 366,608.

In the native territories the total is 632,239, the white population being 15,770. In 1891 the corresponding figures were 487,364 and 10,379 respectively.

In Pondoland and Bechuanaland there are 10,406 whites out of a total of 287,005.

The grand total for the whole colony is 2,404,878, as compared with 1,527,224 in 1891.

ART NEWS INDEED.

The sacred scarabei, little Egyptian charms, are manufactured by a Connecticut firm. They are carved and chipped by machinery, colored in bulk, made to simulate age, and shipped in casks to the Moslem dealers at Cairo. The Arabian guides are the chief buyers, many of them being adepts at "salting" the sands at the base of the pyramids, or about the sacred temples, where they artfully discover these scarabei before the eyes of the Yankee tourist, and sell him for an American dollar an article manufactured at a cost of less than a cent perhaps within a stone's throw of his own home.—New York Tribune.

MUNICIPAL DEFECTS.

(Traction and Transmission).

A miserable exhibition of incompetence is to be witnessed in the tabulated financial return of municipal electric-lighting schemes. The long list of deficits is headed by Glasgow and Dublin with balances on the wrong side of £13,800 and £5,500 respectively. These towns are both in their tenth year of business, and cannot plead their youth in extenuation of their failure to make both ends meet. Glasgow has the happy thought of transferring this loss "to gas account"; Dublin, calmly adds it to the outstanding deficit, making a total of £24,785. Most of the other towns bluntly charge it to the rates, and start afresh. Taken altogether, municipal electricity has been a sorry business, and the worst part of it is yet to come.

BRITISH AND AMERICAN STEEL.

In the course of the hearing of evidence before the United States Com-Commission now sitting, some interesting remarks are sometimes heard. For example, the following, taken from the report in the Marine Review, the opinions uttered by Mr. E. L. Cramp, in answer to a question by Senator Mallory, as to which steel he considered the best quality, that produced in America or in England. "I would rather not answer," replied Mr. Cramp.

of reduced rates, and spend a few days at the greatest World's Fair, St. Louis, Mo. The largest exposition ever held. Fifty-four states participate, and fifty foreign countries have their exhibit. Return tickets now on sale via Grand Trunk Railway at single fare, good for 15 days; fare and one-third good for 30 days, and at 80 per cent. of double one-way fare, good for season, allowing stop over at any intermediate Canadian station, also at Detroit and Chicago. Tickets and information on application to Grand Trunk agents, or to J. D. McDonald, District Passenger Agent, Toronto, Ont.

When pressed to give the commission the benefit of his knowledge he declared that the English steel was the best. Mr. Cramp in his address said:

"Preceding the Spanish-American war, prices of materials entering into ship construction were at the lowest point ever known and lower in this country than in Europe—so much so that the price ruling then was one cent a pound for all plates and shapes at Pittsburg. At the same time the prices ruling in England were from $25 to $27 a ton. The difference between the price at Pittsburg and the price charged by the English mills afforded a ready market for the surplus of this country, so that many hundred thousands of tons of materials were delivered at Glasgow and other ship-building points in Great Britain in competition with the prices ruling there. Subsequently the Spanish war and the great prosperity following the first year of McKinley's administration caused prices to become so high in

this country that in the course of the next two years the exportation of such materials ceased altogether. The extreme range of prices within four years varied in England from $27 to $37 a ton, whereas, in America, materials under the same tests of Lloyd's and other classification societies have varied in price from $20 upward to $60 a ton. To-day the prices which have been maintained by the manufacturers are as follows: Steel plates, 1.75 cents; shapes, angles and channels, 1.75 cents, and bulb angles, 1.75 cents a pound. On the other hand, the price ruling in England for steel plates and shapes delivered clear of insurance and freight at Philadelphia, but not duty paid, is 1.40 cents a pound. The ability to consume steel in this country increased beyond the most sanguine expectations, so that in six or seven years we more than doubled the product of our pig-iron. Yet the delivery of these materials was so slow and uncertain that frequently we were compelled to wait a year before our orders were finally completed. This, as you may see, interfered with output, and necessarily increased the cost of production, where, as in England, an order for all the material entering into the construction of a vessel could be delivered inside of two months."

THE CURRANT CROP.

We are indebted to the courtesy of Messrs. P. L. Mason & Co., Toronto, for a copy of a report on the Trade of the Morea and the Provinces of Œtolia and Arcanania. It is written by Mr. Consul Wood, and dated Patras, April 1st, 1904. Naturally the most interesting and prominent part of the report is devoted to the subject of currants, this being the chief mainstay of the Grecian rural population. It is interesting to note, however, that the people there are gradually learning to rectify their mistake of "putting all their eggs in one basket," and are now beginning to undertake the cultivation of other products adapted to the fertile Grecian soil. Formerly, the great demand in France for currants gave them a fictitiously high value, and all classes were enabled to live in comparative luxury on that one crop; the recent heavy decline in value, owing to the disappearance of this French demand may in the end be really a benefit to the country.

During the last few years, all classes of the Greek population, and the Government also, have given great energy in the attempt to discover some method by which the conditions of the currant growers may be definitely improved. Over-production no doubt is the root of the present evils, and it is argued by many that the only cure is to uproot a certain proportion of the vineyard. Against this, however, the growers point to the cost of bringing a field into full bearing, and to the possibilities which

JUDICIAL SALE OF
Valuable Woollen Mills

PURSUANT to the order of the High Court of Justice bearing date 26th April, 1904, for the winding up of Canada Woolen Mills, Limited, sealed tenders will be received by the undersigned at his Chambers at Osgoode Hall, Toronto, up to the 28th day of June, 1904, for the mill properties and supplies of the Company.

The following are the properties:

1. WOOLLEN MILL at Hespeler in the County of Waterloo.
2. WOOLLEN MILL at Waterloo in the County of Waterloo.
3. WOOLLEN MILL at Carleton Place in the County of Lanark, known as the Gillies Mill.
4. WOOLLEN MILL at Carleton Place, known as the Hawthorne Mill.
5. SITE OF WOOLLEN MILL at Lambton in the County of York.

Tenders must be sealed and addressed "J. S. CARTWRIGHT, ESQ., K. C., OSGOODE HALL, TORONTO," and marked "RE CANADA WOOLLEN MILLS, LIMITED—TENDER FOR PROPERTY," and each tender must be accompanied by a certified cheque for $2,000 which will be returned in the event of the tender being rejected.

Tenders may be made for the purchase of all the properties en bloc or for each separate property. Tenders for the supplies and goods in process of manufacture shall be made separately.

Full particulars and permission to inspect the properties may be had from GEORGE DAVIDSON, Liquidator of the said Company, 108 WELLINGTON STREET WEST, TORONTO, or from MESSRS. CASSELS, CASSELS & BROCK, 19 WELLINGTON ST. WEST, TORONTO, his solicitors.

Dated at Toronto this 31st day of May, A.D. 1904.

may exist as to the failure of wine crops in foreign countries, or the abolition or reduction of the almost prohibitive import duties imposed on currants intended for wine-making or distilling in France, Germany, and elsewhere. Temporary measures of relief, such as the Retention Law of 1896, having not proved very successful, a company was formed in London last spring for the purpose of obtaining from the Government a concession granting it the sole right to export currants from Greece for twenty years. In return, the company which had a capital of £1,000,000, agreed to purchase at a fixed schedule of prices the entire crop up to 150,000 tons each year for twenty years, during which period no new plantations were to be started. The only class which favored this proposition, however, was the growers; discussion in Parliament showed up the defects of the plan, and the Government was compelled to abandon it. After much heated discussion and some rioting, the latter brought in new measures in the attempt to remedy matters. These took the shape of a minimum price of 130 dr. per 1,000 lbs. of dried currants, equal to about $2.80 per cwt., f.o.b., payable by the Currant Bank up to July, 1904; the fruit thus bought by the bank not being exported, but sold locally for wine and spirit-making. Since the highest price ever paid for currants used for such purposes does not exceed 80 dr. per 1,000 lbs., the bank has already lost a very large sum. To such an extent indeed, that it has exhausted its funds and is no longer able to buy a pound of currants, so that prices are now again regulated by the ordinary commercial considerations.

IN EULOGY OF COBDENISM.

Not only in England, Cobden's native country, has the centenary of his birth been fittingly honored, but in America, where his doctrines cannot be said to have met with any very wide-spread acceptance. In Boston, Mass., on the 3rd inst., the American Free Trade League held its annual banquet, which was rendered notable by the fact that the occasion marked the twentieth year of its formation, as well as the hundredth year since the birth of the father of Free Trade. The most noteworthy speeches were made by Chas. F. Adams, the first president of the League, who arraigned the policy of protection as being unjust to the common people, and by Edward Atkinson, the well-known economist of Boston. The latter reviewed Cobden's life work and sketched the conditions which turned England to free trade, taking occasion to deny what he styled the error that Great Britain was enabled to adopt free trade through having fully attained the purpose of protection. The fact is plain, he said, to all who are unprejudiced that the prosperity and progress of the United States had been due to the continental system of free trade among the States under the conditions of their organic law, bringing the benefit of free commerce to the enjoyment of a greater number of civilized people occupying a wider area than have ever been permitted to enjoy that heritage before. He went on to say that if the United States would, in truth, become a world power and take its true position in the great commerce of the world, it would remove

the burdens upon its agriculture, manufactures and commerce now embodied in a restrictive tariff, and, by opening the door to the mutual service and mutual benefit of nations, to compel European States to disarm, in order to maintain any chance of competing, except in the more products of hand work and of labor verging on pauperism.

TESTS OF A SMOKE PREVENTER.

The Royal Automatic Smoke Consuming Co., not desiring to have their machine classed with the so-called smoke consumers now on the market, have decided to change the name to the Royal Automatic Smoke Preventer and Fuel Saving Co. The reason for this is that the machine does precisely what the new name indicates. The steam blanket covering the fire arrests the carbon and other escaping gases, which, with the proper admixture of oxygen taken through the orifices in the fire door, causes almost perfect combustion, reduces the smoke to a minimum, and consequently increases the boiler efficiency by from 5 to 25 per cent.

Recently several newspaper articles have appeared, and literature has been distributed claiming that any and all devices in which the steam jet is used to disperse smoke require more steam than is actually saved.

The Royal Automatic Smoke Preventer and Fuel Saving Co. claim that such is not the case with their device, a fact whichhas been emphatically demonstrated. Only this week, after a most severe test made at the Bertram Engine Works, this city, the net saving effected was most remarkable, being about 18 per cent., and doing away with about 85 per cent. of the smoke.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their weekly circular dated June 4th, 1904, say:

The stock market moves along quietly hoping for favorable developments. For the time being such hopes appear to be in vain, for the average run of news is hardly of a stimulating kind. Railroad earnings, both gross and net, continue to make satisfactory comparisons with last year; complaints of inactivity in trade are more frequent, while demand and prices for iron are declining. These and other signs of business and industrial contraction all serve to impart a listless tone to the stock market. That they did not precipitate a fresh decline is probably due to the fact that present low prices largely discount such development, the large holders having anticipated them months ago. In fact, the most encouraging feature in the whole situation is the steady resistence shown to unfavorable news; for, howsoever unsatisfactory the general outlook may seem, the fact cannot be ignored that past liquidation has left the market intrinsically sounder than for a long period, and stocks generally are in strong hands.

CITY OF KINGSTON
DEBENTURES.

SEALED TENDERS will be received by the undersigned up to 3 o'clock p m. on FRIDAY, JUNE 17, 1904, for the purchase of the whole or any portion of the following Debentures bearing interest at the rate of four per cent. per annum payable semi-annually, at the City Treasurer's Office, Kingston, Ontario.

$182,000 for purchasing an Electric Light Plant, payable by annual instalments within 30 years from 1st of April, 1904.

The highest or any tender not necessarily accepted. For further particulars apply to

F. C IRELAND, City Treasurer.

Debentures for Sale.

Sealed Tenders addressed to the City Council and marked "Tenders" will be received by the undersigned up to Monday, June 20th, at 4 p.m., for any or all of the following Debentures offered for sale by the City of Niagara Falls, Canada:

$18,896.59 Local Improvement Sidewalk, 20 year Debentures.

$15,828.85 Local Improvement Sewer, 30 year Debentures.

$12,000.00 Water Works, 15 year Debentures.

All Debentures guaranteed by the City at large and bearing interest at 4% are repayable in equal annual consecutive instalments of Principal and Interest.

Highest or any tender not necessarily accepted.

Town of Dauphin
DEBENTURES

SEALED TENDERS marked "Tenders for Debentures" will be received by the undersigned up to the First Day of July, 1904, for the purchase of $11,000.00 Debentures of the Town of Dauphin.

There shall be twenty (20) debentures, each for the sum of $781.00 principal and interest.

Each of the debentures shall bear date 1st July, 1904, and one of such debentures shall be payable in each year after the First day of July, 1904, during the twenty years thereafter next ensuing, viz.: on the First Day of July in each year. The first of such debentures shall be payable on the first day of July, A.D. 1905, the last on the Firs July, 1924.

Debentures to be made payable at the Branch of the Bank of Ottawa, Winnipeg, Manitoba.

Each Tender must state a lump sum payable at the Branch of the Bank of Ottawa in Dauphin, Manitoba.

WM. RINTOUL,
Sec'y-Treas. Town of Dauphin.

Dauphin, Man., 1st June, 1904.

Town of Port Arthur.

TENDERS FOR
$147,000 DEBENTURES

SEALED TENDERS will be received up to noon of THURSDAY, 30th June, 1904, at the Town Treasurer's Office, Port Arthur for the purchase of $147,000.00 Debentures, with accrued interest on coupons next maturing—being $85,000.00 Waterworks, dated November 9th, 1903, payable in 30 years, interest 5% per annum, payable January 1st and July 1st; and $62,000.00 Sewers, dated July 30th, 1903, payable in 30 years, interest 5% per annum, payable December 1st and June 1st.

All said debentures and interest are made payable at the Ontario Bank, Toronto.

The highest or any tender not necessarily accepted.

J. McTEIGUE,
Treasurer.

Port Arthur, June 2nd, 1904.

CATALOGUES

The importance of being able to find a catalogue in the minimum of time is a problem in many many instances. Intelligent knowledge along these lines can best be secured by using a

THE NEW BUDGET.

Mr. Fielding's eighth budget speech was delivered amid rosy surroundings. That is to say, Canada is still at the height, or at any rate only just the other side of the crest of a period of prosperity unparalleled in its annals. That he should be able to announce a surplus for 1903 of $14,355,000 and an estimated surplus for the current year of $16,500,000, and that the national debt would be diminished this year by seven and a half millions of dollars were facts upon which, leaving for a moment out of consideration the purely natural causes for such buoyancy, any Finance Minister might well take credit. That Mr. Fielding did so, though in no obtrusively patent fashion, does not necessarily mean that that gentleman is not something more than a politician. It is true a Government does not generally make the prosperity which comes to a country; but it is also true that a Government, by its action or inaction, can be the means of preventing those natural forces which make for the common weal from having their due influence.

Of course, that portion of the speech which met with the most rapt attention was that relating to the tariff, and here, in certain directions, he went a good deal further probably than many people anticipated. One thing which will please the manufacturers is the hint that before long a commission will be appointed to enquire into the whole subject of duties, and to revise them where required. Mr. Fielding is still anxious to keep out of the camp of the high protectionists (vide his remarks upon the synchronous existence of a restrictive tariff and severe depression in the United States), but evidently the point the latter persist in making with regard to the probable effects of such depression there upon Canadian industries has gone home. The anti-dumping clauses in his budget show this. While theoretically it may be a very good thing, as the Absolute Free Traders say, for a country to have a neighbor's goods thrown into her below their just value, it is acknowledged that another set of conditions altogether comes into play when it is seen that the dumping country's object is not benevolence, but the ruin of a competing industry later on, and dearness to the Canadian consumer when the time shall be ripe.

The Canadian Finance Minister aims a daring blow at the solar plexus of this American system through the means of a special customs duty, chargeable in all cases where undervaluation is proven. This special charge is, with certain exceptions affecting the iron and steel trade, to be equal to the difference between the fair market value of the goods in the country of origin and the price at which they are sacrificed, so long, however, as this difference does not exceed half the amount of the ordinary duty. With this clause, attempting as it does to quash a form of competition which is manifestly unfair, general sympathy will be felt, though many think that a better weapon than this temporary expedient would be a Canadian tariff raised to a general level with that of the offending country. Doubt is expressed, too, as to how the new law can be worked out; attempts to regulate trade have from time immemorial possessed a tendency to go awry in strange and unforeseen ways, even when the tariff is of a simpler character than the one proposed.

But Mr. Fielding, in his tariff proposals, did not confine himself to future possibilities, though included in these may be mentioned his suggestion to make the customs duties of a triplicate character, one class affecting goods coming from countries themselves levying a restrictive tariff against Canada, another affecting countries of a comparatively low protective character, and a minimum or preferential tariff to be applied to Great Britain and the Empire. The agitation which has been kept up for some time past by the woolen manufacturers has resulted in an increase of minimum duties on several lines to 30 per cent. under the preference, the present rate being 23½ per cent. We have more than once in this journal asserted the necessity for some such change in order to relieve an important Canadian industry, and we believe it will meet with the approval of the majority, though as an illustration of how impossible it is to please everybody it may be mentioned that some of the dealers and importers believe it a mistaken policy. The woolen manufacturers, however, are well pleased, the only faults they find being that it is only barely sufficient, and that it did not come earlier. It will be a matter for regret to many also that relief to a Canadian industry should take the form of a blow to the principle of British preference.

There are a few other changes. The minimum duty on cordage and twine under the preference is raised from 16 2-3 per cent. to 20 per cent., while the maximum duty under the preference on china and porcelain ware is reduced from 20 to 15 per cent. ad

valorem, and on common window glass from 13 1-3 to 7½ per cent. The duty on coal oil is reduced from 5 to 2½ cents per gallon to help the consumer, while that on crude petroleum is wiped out, but in order to aid the home producers there will be a bounty of 1½ cents per gallon on the latter substance produced in this country.

As to the ultimate effect of these and other proposed changes it is, for reasons aforesaid, difficult to say, though they seem prompted by an honest wish to benefit the greatest number. That they should please everybody is an impossibility; Mr. Fielding's limited attempt in this direction is ingenious, to say the least, but its success in the instance of each individual will depend after all upon the political color of the latter.

THE REMARKABLE EXTENSION OF BRANCH BANKS IN CANADA.

The number of bank branches in Canada at the end of last year is given as about 1,020; at the end of 1902 it was 904; in 1900 it was 700. There has been, therefore, since 1900 an average increase of about a hundred banking offices per annum in the Dominion. Judging from the notices appearing in the financial press there has not been, so far in 1904, any great falling off in the rate of progress in this direction The question, then, as to how this extension has affected banking profits becomes decidedly interesting to bank stock holders, and, indeed, to all who find themselves concerned in financial affairs. It is well understood by the bankers that the opening of a new branch usually means the incurring of a new expense which will have to be charged against the profits earned by the bank as a whole. It was in reference to this that Mr. Walker said, in his address at the last annual meeting of the Bank of Commerce stockholders: "We cannot afford to carry more than a certain number of new, and, therefore, probably for the time being, unprofitable branches, at any one time." In the case of a new bank which secures at once large and profitable borrowing accounts, it may be that the head office will derive a substantial revenue from the very beginning of the venture; but such cases are rare, and even when they do happen it too often occurs that the newcomer's good fortune is won at the expense of a rival already established in the locality, or of an older branch of its own bank; and in neither event is there a real addition of any consequence to the profits earned by the country's banking capital.

Not all of the new branches are opened voluntarily, with the expectation of acquiring new business; some are established merely to hold the business already possessed. A little while ago it was the case that a bank branch, well settled in a good town, would hold all the business of a number of outlying villages. Manufacturing concerns of some little importance are to be found occasionally in these little villages. Accidents, such as the existence of good water power and the proximity of plentiful supplies of raw material frequently determine the location of the plants; and there is no place in the land where taxes are lighter, or where the cost of living is cheaper, which latter fact has an important bearing on the cost of labor, and consequently on the cost of production. Besides that furnished by the little factories and mills, there was always a considerable amount of banking business contributed to the town by the village storekeepers and by the farmers and drovers of the village districts. It is manifest that a bank would profit more by holding this business concentrated at the one office in the town than it would by having it scattered among three or more offices within a radius of ten to fifteen miles on either side, each office supporting a staff of clerks, paying rent, and working under the regular expenses pertaining to the average run of the smaller bank offices. Some one or two of the banks, recognizing this, and wishing to avoid the appearance of aggressiveness, have not until recently become active in the general movement. Rather than open in places which they did not consider large enough, they have submitted to lose connection after connection and district after district. It is true that there may have been in some quarters rather erroneous ideas as to the minimum of business necessary to make a banking office self-supporting. In the writer's recollection, one prominent banker about five years ago held stoutly to the idea that at least $200,000 in discounts was required; of deposits he took little account (they were not then competed for so eagerly because the pressure from borrowers was not nearly so great). This banker, therefore, conscientiously opposed the policy of extension at that time. The march of events proved, however, too strong; the bank to which he belonged has had to move with the others. It is quite safe to say that the majority of bankers nowadays consider that an office may give very satisfactory results on a discount business nothing like so much as $200,000. The difference has come about chiefly, perhaps, through a change in the notion as to the minimum expense on which a banking office could be run.

In the old days, when the banks were confined to the towns, the minimum salary of a bank manager, of a bank accountant, or of a bank teller, was fixed at a higher level than is the case at the present day. It must not be supposed, however, that the banks deal less generously now with their employees. The very reverse is true. It would probably be found that in the older offices as a rule the scale of pay is larger than ever before; and in the newly opened agencies, although the pay of the officers may be less than was formerly allowed for the performance of the same class of duties in the town branches, this fact cannot really be cited as an injustice or a hardship. The development of the banking business has been so rapid as to make it necessary to promote bank clerks very quickly. When a manager is wanted for a new village branch, some bright, steady young man is selected. The responsibility he assumes is not too heavy. He is given an increase with his new appointment of $100 or $200 per annum, and is put in a place where he corresponds directly with the general manager. Frequently, what he values most in the change is the opportunity it gives of showing his mettle. So far from allowing his mind to dwell discontentedly on the fact that his salary is less than that of the manager in a nearby town, he regards with satisfaction the good progress he has made, and feels confident that the appointment has vastly improved his affairs.

As the salary list is by long odds the heaviest item in the expenses of a bank, it has been found possible in this way to extend banking facilities so as to place them within easy reach of nearly every countryman and villager. Some places are served by sub-agencies, where a couple of clerks attend on two or three specified days in every week. As the cash is brought from the depot branch in the morning and

taken back in the evening, the expense of working one of these agencies is trifling.

What has been related refers more particularly to the branch extension in the older eastern Provinces; in Manitoba and the West, where the villages and towns are growing more rapidly, branches are planted in very small places indeed. In short order, so rapid is the pace of events out there that these may become profitable, provided the field is not invaded by a competitor. Generally, the Ontario and Quebec branches are expected to supply deposits which are loaned by the city branches and by the branches in the newer districts of the North-West. Some of our bankers have deprecated the progress made of late as being too rapid. Too many bank branches might work harm in several different ways. In the Eastern branches, for instance, it might be a number of years before the deposits would grow to a figure large enough to make the net cost to the bank moderate. If a branch has but $50,000 in deposits and practically no discounts the net result of its working would probably be to furnish the head office with, say, $40,000 at a cost, perhaps, of 6 per cent. per annum, obviously an unprofitable transaction; and this high ratio of cost might come down stubbornly and slowly. If new branches of this description happen to be numerous, the effect on the bank's profits would be decidedly troublesome; and its ability to write off bad debts might be seriously curtailed. Again, injury might be done to trade through the eagerness of new branch managers to increase their discounts so as to make a creditable showing for themselves.

MAY FIRE WASTE.

According to figures compiled in the office of the New York Journal of Commerce the losses through fire in the United States and Canada during the past month of May were $15,221,400, or over a million dollars less than in the same period of last year. The losses for the first five months of the last three years follow:

	1902.	1903.	1904.
January	$15,032,800	$13,166,350	$21,790,200
February	21,010,500	16,090,800	90,051,000
March	12,056,600	9,907,650	11,212,150
April	13,894,600	13,549,000	23,623,000
May	14,866,000	16,366,800	15,221,400
Totals	$76,860,500	$69,070,600	$161,887,750

The above figure for May is satisfactory so far as it goes, but it does not do much towards lightening the gloom in fire insurance circles arising from the enormous loss total for the year up to date.

WHO IS TO BLAME FOR CONFLAGRATION LOSSES?

Within a week of the Toronto conflagration, and immediately after the rates of fire insurance in the downtown portion of the city had been raised in consequence of it, Edward Atkinson, of the Manufacturers' Mutual Fire Insurance Company, of Boston, was asked to come to Canada, as an authority on fire insurance, to deliver an address, dealing particularly with the placing of insurance risks and explaining the benefits and requirements of the Mutual Insurance Companies, dealing also with mill construction, sprinkler systems, etc. The letter of invitation also dwelt upon the enormity of the increased rates of fire premium demanded in Toronto.

The reply of Mr. Atkinson must have astonished its recipients. That gentleman explained that his advanced age prevented him from accepting such an invitation as theirs, but added that there were other reasons why his address, were he to make one, would not conduce to their satisfaction. We quote from his letter, published in the Toronto Star of 30th May. It will be seen that, so far from sympathizing with the body complaining, he justifies the Canadian fire underwriters in advancing rates in the congested district of the Canadian city un-named, and reads the complainers a lesson upon the neglect of business men generally of the commonest precautions for safety from fire. We give the major part of his letter as we find it in the Star. Says Mr. Atkinson:

"The recent conflagrations are the normal results of the continued neglect of the owners and occupants of the buildings in the congested districts of cities to take suitable measures for the prevention of loss by fire by adopting safer methods of construction and suitable care in occupancy. These conflagrations are but the normal results, long anticipated, recurring with increasing frequency, as they will continue to recur until the owners and occupants of the buildings give even a moderate attention to their own duty to their own property.

"The larger part of such buildings has been constructed without the slightest attention being given to the danger of the rapid spread of fire; in very many cases they supply examples of what I have called 'the art of combustible architecture,' which seems to have been conducted as if owner, architect, and builder alike were providing for the largest possible loss by fire from the least possible cause, and in most cases the occupancy is marked by neglect of the commonest precautions for safety.

"In recent years the stock insurance companies have in many places established systems of inspection, and have endeavored to give instructions that would lead to greater safety. How have they been met? Simply in most cases as if they were meddlesome persons who might be put off with many shams, and whose precautions, after the inspectors have left, are totally neglected. They are looked upon rather as persons who are trying to get premiums out of the owners and occupants of property without rendering any corresponding service.

"Under these conditions, and in spite of every effort of the stock underwriter to change them, the insurance of property in cities against loss by fire has been for many years unprofitable. The insurance corporations have been saved from bankruptcy only by their possession of capital and of reserves previously accumulated, and by the interest recovered from the premiums during the year in which they are in their possession. Their profits, where they have made any, have been realized in their function as bankers more than offsetting the losses on their fire business.

"Under recent conditions of heavy losses they have of necessity advanced the rates of premium. This advance has been so much resisted, and is as yet so insufficient te meet the increasing hazard of conflagration, that several of the foreign companies are largely reducing their risks; and the penalty has at length fallen where it belongs—on the owners and occupants of property in the congested districts of cities. They will be no longer able to buy contracts of indemnity at less than cost.

"Under these conditions they may at length learn that the fault lies with them, and that the only remedy rests with themselves.

"Regretting that I cannot accept your invitation, even if you desired me to do so after the receipt of this letter, I remain, yours very truly, EDWARD ATKINSON.

What is said in the second paragraph of this letter about inattention to the conflagration hazard, affording examples of "the art of combustible archi-

tecture," is severe alike upon owner, architect and builder. We should be glad if we could contradict him when he says that in most cases the occupancy is marked by neglect of the commonest precautions for safety. But there is too much truth in the allegation, as a rule, to allow of the general statement being gainsaid. The property owners and occupants are in fault; and, so far from encouraging the idea that under existing conditions cheaper fire insurance can be had, this recognized authority upon the subject declares with unmistakable plainness that "the penalty has at length fallen where it belongs, on the owners and occupants of property in the congested districts of cities." Nay, more, he affirms, with what appears to us inexorable logic, that these owners and occupants "will be no longer able to buy contracts of indemnity at less than cost."

It will be observed that this insurance expert generalizes, and applies his principles to any of the recently devastated cities that his remarks will fit. For instance, he says: "These conflagrations . . . will recur until owners and occupants of buildings *give attention to their own duty to their own property.*" And elsewhere he speaks of the insurance of property in cities "as having been for many years unprofitable"; and of the systems of inspection "established in many places." Therefore, he cannot be accused of reproving Toronto business men alone, although from the concluding sentences of his reply this might very well be inferred.

LIABILITY OF COMPANY DIRECTORS.

One of the most important and far-reaching decisions of recent years upon the subject of the liability of promoters or directors of companies in case of untrue statements in prospectus or report is that rendered last month by the House of Lords decision in Broome versus Speak. Its effect should be to compel sharp and cunning promoters of schemes for enriching themselves at the expense of others to pay heed to truth and fair-dealing; or, if they find it difficult or impossible to do this, then to keep on the windy side of the law which has just been pronounced by the highest authority in the Empire after four or five years of litigation.

The case was that of Shepheard v. Broome reported in the Courts below under the name of Broome v. Speak [1903], 1 Chancery 586, where the Court of Appeal affirmed Buckley, J. On further appeal the House of Lords (May 17, 1904), Halsbury, L.C., and Lords MacNaghten, James, and Lindley affirmed the decision of the Court of Appeal, holding that while the appellant Shepheard was certainly not in fact fraudulent he was liable for the omission of documents from the prospectus of a company with which he was connected.

In 1898, a company in course of promotion, known as the London and Northern Bank, Limited, contracted, through one of its provisional directors, to buy for £142,500 the business of the Leeds Joint Stock Bank, and it was agreed that the person through whom this transaction came, one Bowden, should advance the ten per cent. deposit, amounting to £14,250, which the new company was to repay to him within a month, together with a bonus of £7,500. At this time the London and Northern possessed neither money nor credit, had no business premises even, and had not proceeded to allotment of shares. Bowden advanced the money to pay the ten per cent. deposit which the Leeds Bank people insisted on before they would agree to sell. And it appears there was a secret agreement between Bowden and the chairman of the provisional board, Speak, that the latter should share in the profit which Bowden was making out of the transaction. This and certain other arrangements "on the quiet" were not disclosed to some of the directors.

A prospectus was issued some time later, and on the faith of this prospectus Mr. Joseph Broome applied for four hundred £10 shares, and paid £1,000 upon them. Believing that he had been tricked, Mr. Broome applied in December, 1899, to have the concern wound up. He brought suit against Speak in 1901. His contention was that the prospectus, on the strength of which he purchased, did not disclose important contracts made by the provisional directors, and fraudulently made, and that he was entitled to damages. The case was tried by Buckley, J., 23rd April, 1902. He found that "there were statements made which were in fact untrue"; and that a director, Speak, was to share with one Bowden £7,500, which he had received as a bonus. In giving instruction to a master to ascertain the damages due and payable, Justice Buckley said, quoting what had already been affirmed by the courts: "The measure of damages is the difference between the price which the plaintiff paid for the thing [in this case shares] and the fair value of the thing at the date at which he got it." Broome having been misled as to the value of the thing by untrue statements of the provisional directors, was entitled to recover from those directors or some of them. Such is the effect of this twice appealed and twice affirmed decision.

It is of importance to remember in these days when in Canada as well as in England or anywhere else the genteel swindler is hovering about with get-rich-quick plans, or with attractive schemes which are alluring to the unwary, that there is no longer any doubt, as for a while there was in England by reason of the laxity of a certain statute, that the man or men who mislead investors can be made to smart for it. Nor is it only the promoter of immoral or dishonest company schemes who may be sued and recovered from, but any provisional director who sanctions mis-statements about any company which he assumes to direct. A salutary measure was passed in England in August, 1890, entitled "An Act to amend the Law relating to the Liability of Directors and others for Statements in Prospectuses and other Documents Soliciting Applications for Shares or Debentures," and it was under Section 3 (1) of this Act that Broome recovered damages.

The Ontario Act of 1891 (54 Vict., c. 34) respecting the liability of directors, while based upon that English Act, is even stronger than that Act, and its provisions are widened to include other instruments than shares or debentures, as a reference to page 64 of the Statutes of Ontario, 1891, will show. We take from the Revised Statutes of Ontario, cap. 216, the following interpretation of the meaning attached therein to promoters, directors, securities, and actionable, misleading statements in reports or prospectuses:

1. "Untrue statement" includes a concealment or intentional non-disclosure of a material fact known to the director or promoter which might reasonably influence a person in determining whether to apply or not to apply for shares, debenture stock, annuities on lives, or other securities of the company for which application is invited;

2. "Securities" includes bonds, debentures, invest-

ments bonds; also policies, certificates, or other instruments of insurance, suretyship, or guarantee, or instruments evidencing contracts in the nature thereof;

3. "Company" includes any joint stock or other private corporation which issues or is authorized to issue shares, debenture stock, annuities on lives, or other securities as hereinbefore defined;

4. "Directors" includes the officers, by whatever name known, appointed to manage the affairs of the corporation.

5. "Promoter" means a promoter who was a party to the preparation of the prospectus or notice, or of the portion thereof containing such untrue statement, but shall not include any person by reason of his acting in a professional capacity for persons engaged in procuring the formation of the company.

BOOT AND SHOE TRADE.

Trade in boots and shoes has shown considerable improvement since our last report, due largely, no doubt, to better weather conditions. The spring turnover was a little disappointing, and some of the business lost then cannot be recovered; still it is likely that part of the slackness will be made up for by increased activity during the present months. All the indications now point to such a probability; the country is still prosperous, and crops, so far as one can tell at this early day, are likely to be good. Immigrants, too, are pouring into the country at an increasing rate, and this source means an immediate expansion of consumption. Manufacturers are receiving fair-sized sorting orders, and fall orders are particularly plentiful. Quebec manufacturers recently raised their prices by 2½ to 5 cents per pair, an action which has not apparently done much good so far as Ontario trade is concerned.

In the leather business dullness has prevailed for some time past, comparatively speaking. Improvement is looked for any time. In hides the situation is not very clear. Branded hides are in somewhat scanty supply, and stocks are small.

As to styles in shoes, one feature which strikes us is the fact that not enough allowance was made for the resumed popular demand for tan shoes. For summer wear, there are many people who still think the tan is unrivalled, and a good deal of disappointment was felt when it was announced that its decline in fashion had arrived. It cannot be said, however, that the public has permitted this; and the tan shoe, especially one of good quality, is still largely called for—sometimes unavailingly, for some stocks in this line were very small. On the other hand, sales of patent leather shoes still show a falling off. Its lack of good wearing quality is its chief defect, and one that it appears impossible to avoid. As a consequence of this, and of the many poor imitations put on the market during the height of its popularity, it is rapidly losing favor. Its place in the States, we hear, is being taken by glazed kid, which is said to be much more satisfactory.

SOME ITEMS OF EXPORT.

The quantity of Canadian asbestos shipped abroad during the last fifteen years shows a fairly steady growth from 3,428 tons, valued at $228,355, in the year 1888, to 33,072 tons, worth $1,131,202, in 1902. Its distribution in the last-mentioned year was 4,088 tons to Great Britain, 25,053 tons to the United States, and 3,931 tons to other countries.

Coal has become in recent years a valuable export for Canada. Up to twenty years ago, 400,000 tons a year was looked upon as a large export, and the average export value during that period was $2.50 per ton. The quantity went up steadily from 1883 until it reached a million tons in 1895, valued at $3.22 per ton, while the three latest years have witnessed the export of 1,895,000 tons' average, yielding yearly almost five and a quarter millions a year, and an increase of price, the average being about three dollars a ton. The United States took seven-eighths of it, their share in 1903 being 1,719,000 tons out of 1,980,000, while Great Britain took 25,335 tons and other countries 235,589 tons. Among these other countries were British Africa, British Guiana, the West India Islands, Newfoundland, Denmark, France, Holland, Germany, the Hawaiian Islands, Italy, Norway and Sweden, Japan.

A product of the mine whose export has yielded Canada between four and five millions of dollars in all since Confederation, is crude gypsum, or plaster. It has nearly always gone to the United States, where it is used for building purposes and in the arts.

The value of mica for certain purposes seems to have struck the people of the United Kingdom suddenly last year, for they bought $143,000 worth, which is many times what they ever bought in a year before. Our principal customer for it has been the United States, who has taken $121,000 to $183,000 worth per annum for the last five years.

Among products of the fisheries dry salted cod, which designation includes haddock, ling and pollock, has remained for thirty years the largest and most constant item of export; never in that period returning less than $2,384,000, and often exceeding $3,500,000 per annum. They were sold mainly to distant countries. Other fish, shipped in the fresh state, have shown a decidedly increased export in the last dozen years. These went almost wholly to the United States, and among them fish from the Canadian rivers and the Great Lakes bulked largely. Pickled herrings exhibit a decline; pickled and fresh mackerel also a decline as compared with former years; but lobsters, whether fresh or canned, show a steadily increased export. The fresh lobsters went almost wholly to the markets of the eastern American cities, and the quantity taken ran from 10,000 barrels in 1884 to 30,000, and even 40,000 barrels in each of more recent years. Their increased value of late is shown by comparing the 30,039 barrels sold to the United States in 1888 for only $109,024 with the 33,292 barrels sold last year for $398,267; that is to say, they are worth $11.96 per barrel to-day as compared with $3.60 per barrel fifteen years ago. The fact is they have been taken on our shores too freely, and the restrictions lately put upon the catch were highly necessary.

The figures of the canned lobster trade show a wonderful alteration from the time when, in 1881, 1882 and 1883, Great Britain took 10,600,000 pounds at a cost of $1,000,000 up to last year, when her purchases were 4,009,000 pounds, costing $925,000. United States purchases of canned lobsters ran down from 6,853,000 pounds in 1891 to 3,585,000 pounds last year; their price being in 1891 about 14 cents the pound, and last year nearly 20 cents. "Other countries" buy Canadian canned lobsters now to the extent of six or eight times as much as they did about 1890, and pay nearly twice as much per pound for them—

the proportion being 13½ cents in 1890 against 24½ now.

For our fresh salmon the United States has always been a good customer, paying us from one to two hundred thousand dollars a year for the delicacy. But it is only since 1891 that improved carriage and cold storage has enabled us to sell 2,250,000 pounds, in all, to consumers in Great Britain. Canned salmon, on the other hand, being a more staple article of consumption in the United Kingdom, has become an item of Canadian export to the extent of 45,867,000 pounds, valued at $4,735,000, in the banner year, 1902. Our average sales of tinned salmon to the Old Country these last ten years were 28,480,000 pounds a year. This, of course, included the produce of the Pacific as well as the Atlantic catch.

THE METRIC SYSTEM AGAIN.

The late Herbert Spencer's arguments against the compulsory establishment of the Metric System in Great Britain, to which we referred in a recent issue, have not been allowed to pass unchallenged by the Decimal Association of London, who have republished, in pamphlet form, a paper by Prof. T. C. Mendenhall, which appeared originally in Appleton's Popular Science Monthly. After remarking upon the astonishment with which the news was received that the author of the letters (for Spencer's pamphlet at first appeared in that form in the London Times), was no less an authority than the great philosopher, the Professor examines into the arguments quoted from Sir John Herschel. The famous astronomer, it will be remembered, found fault with the use of the terrestrial meridian passing through France as a basis for the Metric System of measurement, on the ground that it was not strictly accurate. The reply to this is that no metrologist ever thought for a moment of relating the standard of length accurately to any terrestrial dimension. Moreover, the alternative standard proposed by Sir John, based upon the polar axis of the earth, was even more notably a departure from strict accuracy, as scientific investigations have since proved. Besides this, Professor Mendenhall shows, in Herschel's own language, that the latter was by no means so opposed to a decimalization of weights and measures as Spencer would allow the reader to infer.

Herbert Spencer's next objection, that in spite of the fact that the Metric System is over a hundred years old in France, the old denominations still endure, is not allowed much weight by the Professor, who considers that Spencer knew better than anyone else the remarkable persistence of habit in all people.

As to the more serious argument, that there is a universal tendency to continual bi-section into halves, quarters, eighths, and so forth, Prof. Mendenhall contends that while, perhaps, there is such an inherent tendency in human nature, it cannot be said to manifest itself very strongly in the various English nomenclatures of weight and length. Neither in these or in the English money units is there much evidence of any irresistible tendency to "bisect" any more, that is, than there would be in the event of the units being of a decimal basis. It is just as easy to calculate in halves and quarters of a kilometer or kilogramme, as it is in halves and quarters of a mile, or yard, or inch. In fact, it is incomparably easier to divide, say, a kilometer into its component parts than a mile into rods, yards, feet and inches.

Even now, there is an unmistakable tendency in both Great Britain and the United States towards decimalization for convenience sake. In land surveying, the foot is multiplied and divided by tenths, and the 100-foot tape with its divisions of ten feet each, and each foot divided again into tenths is in common use. In accurate machine practice, the same thing is observable. Even in the case of the nautical compass, brought forward by Herbert Spencer as an illustration of the universal desire to halve and rehalve, it may be remarked that now-a-days a large number of charts and compasses show miles divided merely into degrees, and many mariners prefer this system.

THE WESTERN CROP.

Our Winnipeg correspondent telegraphed at noon yesterday, saying that during the past week the whole West has been visited with drenching rains, which, interspersed with fine weather, have made the conditions ideal for the growing crops. There were from twenty to sixty hours' rainfall in different localities during the week. The grain averages six inches in height, some few places reporting it one foot in height. Prospects could hardly be brighter.

MANCHESTER LETTER.

The news most nearly affecting British Canadian relations is unquestionably that which concerns the Dominion Budget. It is no shock to the woolen manufacturer of Yorkshire to learn that the tariff will be raised. Stories in circulation said that the preference would be abandoned, but that eventuality has not been seriously expected. The duty of 30 per cent. will not kill, though it must wound, the export trade. It is not only that in the Yorkshire woolen industry wages are one-third to one-half below the Canadian level. Our producers have the secret of using lower material to better effect than any other woolen manufacturers in the world. No continental or American nation rivals the Englishman in his particular speciality of woolens and worsteds for men's wear. Hence, nobody in the trade wonders that Canadians, working with pure wool, failed to make money in open competition.

Nevertheless, the purists of free trade see in Canada's action a text for their lectures. So soon as preference began to be of any use, they are saying, it was virtually withdrawn. Thus do our Liberal politicians view the raising of the minimum. Such possibly would be the verdict of our voters if an instantaneous poll were taken on the issue. But deeper down in the national breast there is a profound trust in the doctrine of live and let live. That maxim happily dominates in the end, and it would be less than justice to take the present grumble as a permanent indication of our temper. Heavier imposts fail to keep Yorkshire wool and shoddy goods out of the United States; and after an interval for adjustment it may well be that no marked diminution will be visible, while colonial enterprise will obtain a larger share. All recent history shows that the woolen, of all trades, declines to be stereotyped. When pressed here, it expends there. Individuals suffer, but the army holds its own with a steadiness which is all but miraculous. No doubt a compromise on a question of hostile interest will be regarded favorably by both parties in the ultimate.

A passage in a French consular report from Roumania should appeal to Canadians. In that country everyone wears goloshes. The demand is at present met by goods from Russia. Though elegantly formed, the Russian rubbers are of poor material and very heating to the foot. Following Russian models, but using superior material, outside manufacturers have an excellent chance of business. Such is the paragraph that will doubtless go the rounds. The justification for its appearance here is not merely the Canadian repute for rubber shoes. Something is to be said of Roumania itself. Only the very first of its firms are worth doing busi-

ness with. Low class adventurers frequent commercial circles, both in Bucharest and Jassy. Worthless commission agents abound in scores, and the morality current is not of the sort that Westerners can understand. High profits are no set-off to the risks of dealing with the baser sort of Roumanian traders. Added to this it may be noted that a new tariff is hanging in suspense. On December 1st of this year it will certainly come into operation, or if at any prior moment the Government sees fit, all or any of its unknown provisions may be enacted without warning. Manchester itself has extensive transactions with Roumania, and native buyers visit this city each year.

Some unfavorable criticism has fallen upon the Canadian Produce Corporation, Limited, which, capitalized at £200,000, has been asking for public support. It is remembered that attempts to float similar concerns, promoted by the same hands, have failed in years past. The critics, too, are quick to point to the absence of any assets, good-will or going concern to acquire. A prospectus and leaflets, filled with incontrovertible facts of general application, have been showered broadcast over the country; but these are scarcely the data that investors still suffering from the textile "combination" mania require, and in the flat state of the share markets the withdrawal of this corporation would excite no comment. Added to its other weaknesses, the prospectus bears the names of gentlemen whose acquaintance with the business in hand is obscure. The readily comprehensible feeling is evident that before appealing to the public company promoters should have some definite experience to quote and some concrete business to transfer.

Insurance companies rival banks in the frequency of their amalgamations in these days. The Manchester Fire Assurance Company is to be embraced by the Atlas Fire and Life. Foreign losses in recent years have hit the Manchester office with some severity. Beginning in 1824, it reached its zenith in 1900, when the premium income was £1,055,142. Last year, owing to the pruning of foreign risks, the receipts figured at £685,218, while the general reserve stood at £537,305. The Atlas Company has total assets of £2,651,381, and fire and reserve funds of £597,449. Last year its losses represented 51 per cent. of premium income, against 57 per cent. by the Manchester office. The name of the Manchester is to disappear, but the shareholders receive an adequate solatium. Scrip worth £5 6s. is substituted for shares that have fetched only £4 in recent transactions. The Atlas dividend has ruled 20 per cent. higher latterly, and the uncalled liability from £18 declines to £8 16s. Mr. H. S. Mallett, manager of the Manchester concern, goes over to the Atlas office.

Indications are clearly favorable to a 2½ per cent. bank rate in the near future. Improbable political complications are spoken of as the only adverse factor to be feared. The official decrease is looked for with a lively sense of anticipation. A stimulus would be given to the markets, which some financial writers have already begun to over-appreciate. To-day good trade paper at three months can be discounted at 2½ per cent. in the open market; indeed, six months' bills can be done for less than the standard 3 per cent. But a low rate and some freedom in accommodation are items that contribute materially to foster the confidence on which so much business depends. Already a tinge of bullishness is beginning to suffuse the textile and metal industries in company with the manifest growth of hope on the Stock Exchanges. The root causes are various, although they are coincident. It is not given to every trade to trace the mounting value of its shares so clearly as our brewers can to the new Government Licensing Bill, which gives them something like a fixity of tenure in definite terms.

Manchester, 27th May. NORTH COUNTRY.

—The Dominion Government is introducing an Act to bring the Canadian regulations for navigation on the Great Lakes into uniformity with those used by American mariners, the existing differences between the "rules of the road" on different sides of the boundary, resulting in great inconvenience, not to say danger.

THE ONTARIO TOBACCO CROP.

A correspondent in Kingsville, who is well informed about the position and prospects of the tobacco crop in Essex and Kent counties, Ontario, sends us the following:

Having noticed an article in the Canadian Grocer of May 20th, under the heading: "The Tobacco Growing Industry of Canada," I may say that, on the whole, the subject has been very accurately dealt with therein, excepting one or two statements which are quite wide of the mark. For instance, the writer says that in 1900, Ontario raised tobacco to the value of $3,500,000, while the Quebec crop for the following year was estimated worth $7,656,000.

In this connection, I beg to offer you some information concerning the prospects for the coming season.

Owing to the short crops and consequent high prices during the past two or three years, it was expected that an enormous quantity would be raised this year and nearly every farmer and a great number of others who could rent a few acres, either for cash or on shares, intended raising a crop, and plant beds could be seen on every hand.

The extreme backwardness of the spring has, however, greatly changed the prospect, so that now, at the beginning of June, transplanting should be commenced in order to ensure a good, heavy crop, there are no plants ready, and the greater portion will not be large enough for at least three or four weeks, even under the most favorable conditions. Unless the fall proves favorable, the season must necessarily be too short for the crop to mature properly.

Moreover, a large proportion of the seed this year sown failed to germinate, either through the lack of warm weather or else by reason of the poor quality; so that, in all probability, the yield of tobacco will not be any larger, if as large, as that of last year.

THE GERMAN CHEMICAL INDUSTRY.

In the Contemporary Review for May, there is a very interesting article on the Chemical Industry of Germany by O. Eltzbacher. Most people are aware that this, while perhaps the youngest, is the most vigorous and successful industry in Germany, as is evidenced by the fact that at present the annual production is in the neighborhood of £60,000,000. Many chemical preparations in universal use are of exclusively German manufacture, and about four-fifths of the world's entire consumption of dyestuffs comes from Germany. Yet, while most of that country's industries have been skillfully fostered by a scientifically framed protective tariff, this particular one has received comparatively little aid from that source. The development of chemical manufacture, while extremely rapid, has not been spasmodic but natural and continuous. In 1889 the exports were, in round figures, £11,335,000, in 1894 they were £13,440,000, in 1899 the value was £18,270,000 and in 1902 £19,300,000, while the imports have remained stationary. Not only have the output in the industry and the number of hands engaged increased remarkably during the last twenty years, but the average per capita wages have risen also.

But not only is the chemical business important to Germany, as a profitable means of employing labor, but other fields of labor derive enormous benefit from the research work undertaken by the men trained in chemical methods and investigations. These good effects are clearly visible in the state of German agriculture, the results of studies made in the laboratories being quite generally applied in practice by the farmers and standard proprietors. In 1884, Germany produced only 9,500 tons of manure salts, while in 1901, the quantity was 147,169, the greater proportion of which was consumed at home. The success of Germany's beet sugar industry has been due mainly to the chemist, who succeeded in raising the percentage of saccharine contents in beets from 5.72 per cent., in 1840, under which conditions beet sugar could not compete with cane, to 13 per cent. or more to-day.

Chemistry can be of invaluable assistance to many industries; furthermore, it can create unthought-of resources

out of almost nothing. Dyes are made in increasing quantities, not from the indigo and madder plants, but from coal tar. From the same source comes our vanilla flavoring. There is hardly any limit to the possibilities of synthetic chemistry. And this science, though it is true that some of the very greatest chemists of the world are and have been of British or French origin, is being carried to its most important practical results by trained Germans, with their infinite capacity for taking pains, aided by well-considered governmental encouragement. This has been at the root of Germany's pre-eminence in the chemical industry, for in the raw materials necessary thereto, she is very lacking. The organization of chemical study and research in Germany may be attributed to Justus von Liebig, who was the real founder of the first university laboratory (at Giessen), and who strove, not so much to advance science by his own investigations, as to train a large number of pupils in his methods. The several governments saw the wisdom of his suggestions, and spent money without stint, though without necessarily seeing any immediate profit, in establishing opportunities for the study of the science.

It is as a result of this enlightened policy that Germany now possesses the greatest body of trained chemists in the world. Three years ago there were more than 7,000 men of this description, who had been taught at the universities and technical and high schools. There is work for all such men, for a chemical factory, in order to retain its position in the forefront, is compelled to constant progress and to be a leader in the introduction of new and more economical methods. The secret of Germany's unparalleled success along these lines is scientific education, with close application to practical business needs.

AMERICAN MONEY IN CANADA.

Editor Monetary Times:

Sir,—I noted with interest a recent suggestion in your columns to prevent the circulation of United States money is to depreciate our currency so that $1 hereafter would be worth only 1-5 of a pound sterling, or, say, 97 cents, as compared with the present dollar. This, in my opinion, will not cure the ill, and will only add confusion and expense to commerce by changing standard of prices, etc.

Money is an obligation of a Government, bank or individual to pay the bearer a certain sum for value received. Its stability or trade value only depends on the responsibility of those who issue it, and its purchasing power cannot be changed by sentimental legislation as proposed. If the Washington Government issues a dollar bill good for one hundred cents we can be sure that our intelligent tradesman will accept it for three cents more than our own depreciated currency.

The real remedy is to make an arrangement between the banks and the Dominion Government to take it out of circulation and ship to banks across the line. This would entail expense of handling, and possibly also duty on the silver coin. The profit accruing to Canada on the increased coinage and additional bill circulation would, however, amply recoup us.

Toronto. L. S.

IMPROPER INSURANCE AGENTS.

Editor Monetary Times:

Sir,—Noticing in your issue of last week the plaint of "Insurance Agent" re commission paid to outsiders for insurance, it seems to me that both the Dominion and Ontario Governments are also to blame in allowing employees to act as agents for insurance companies. Let these men be restricted to their official duties and not be allowed to come into competition with others who are taxed for their maintenance. If their salary is not sufficient to give them a living, then increase it. The same remarks apply to bank managers and employees of other monetary institutions.

ANOTHER INSURANCE AGENT.

Barrie, June, 1904.

THE QUEBEC BANK.

At the eighty-sixth annual meeting of the Quebec Bank no notable feature came up for discussion, but the shareholders must have considered the report of the directors quite satisfactory. The profits for the year ending with the 14th ult. amounted to $283,221, after making provision for cost of management, also for bad or doubtful debts. During the year two half-yearly dividends were declared, one of 3 and the other of 3½ per cent. Besides these, the earnings admitted of the addition of $100,000 to the reserve fund and of $5,000 for the Pension Fund. It having been decided also to make several alterations and improvements in the bank premises, the sum of $25,000 has been set aside for this purpose.

BANKING AND FINANCIAL ITEMS.

We hear from Hamilton that Mr. Cyrus A. Birge has been elected a director of the Bank of Hamilton, to succeed the late ex-Mayor George Roach.

Mr. F. G. Jemmett, secretary to the Canadian Bank of Commerce, sailed on Wednesday last by the White Star SS. "Teutonic" on a trip to England, where he expects to remain about three months.

Notwithstanding the lethargic state of business on the Stock Exchange, one broking house in Toronto, Æmilius Jarvis & Co., has found it necessary to take on a man to devote his whole time and attention to their bond business. They have secured the services of Mr. W. A. Mackenzie, late of the Canadian Securities Company, who will represent them as travelling bond salesman. This firm recently purchased by tender several issues of debentures of the City of Guelph, aggregating about one-quarter of a million dollars.

The shareholders of the Bank of New South Wales have every cause to be satisfied with the cable just received by Mr. David George, the London manager, from headquarters, announcing the declaration of a dividend for the past half-year at the usual rate of 10 per cent. This is the dividend that has been paid for the last eight half-years, but the business of the bank has evidently increased, judging from the further announcement that £20,000, as against £15,000, has been added to the reserve fund, bringing this fund now up to £1,350,000, while the amount carried forward is only some £400 less. With such a reserve, no one can doubt the sound condition of this old-established and well-managed financial institution.—British Australasian.

LIFE AND ACCIDENT INSURANCE.

Mr. A. E. Kirkpatrick, of the United States Fidelity and Guaranty Co., is now away on a trip to the Maritime Provinces, in the interests of his company.

Mr. David Burke, A.I.A., F.S.S., manager of the Royal Victoria Insurance Company, has been paying a visit to Toronto on business connected with his company.

Chas. H. Booth, who has just died in New Jersey in the 101st year of his age, is said to have been the oldest policyholder in the world. He took out a policy in a New York insurance company in 1843, and the additions since declared were equal to about three times its face value.

At its recent gathering the Actuarial Society of America elected officers as under: President, Mr. Israel C. Pearson; vice-presidents, Messrs. Rufus W. Weeks and Daniel H. Wells; secretary, Mr. John Patlock; treasurer, Mr. Archibald A. Welch; Executive Council, Messrs. J. K. Gore and J. M. Craig. We observe that the following among the associates have passed the examination for membership, and have been admitted as members: Miles Menander Dawson, consulting actuary, New York, and Percy C. H. Papps, actuary, Manufacturers' Life, Toronto. The following gentlemen recently passed the initial examinations and were admitted as associates of the society: C. W. Jackson, of Liverpool and London and Globe, Montreal; J. A. McKellar, of the Equitable, New York; Abel Travassos, of Sul America, Rio Janeiro; Benedict D. Flynn, of Travelers, Hartford; H. P. Hammond, of Mutual

Life, New York; R. H. Cole, of Connecticut General, Hartford.

Mr. Charlton T. Lewis died last week in Morristown, New Jersey, at the age of seventy. Lawyer, actuary, speaker, writer, Mr. Lewis was a distinguished scholar and an able man, an authority on insurance law and a lecturer on life assurance practice. Mr. Lewis was the founder of the Chamber of Life Insurance, the society of which nearly all the leading life insurance companies were members a quarter century ago, and which was responsible for collecting the data for the thirty American Offices' Table and for deducing the same. He was a lawyer by profession as well as an actuary, and had as clients many men, now famous in life insurance. We learn from the Chronicle, of New York, that his learning was not, however, confined to these specialties; he was one of the best Latin scholars on this continent, and also proficient in the modern Latin tongues. He was a recognized critic of merit and an authority upon the poetry of Dante. In private life he was one of the most honorable and charming of men.

FIRE AND MARINE INSURANCE.

Mr. Joseph Walsh, who for some time has acted as inspector for the province of Quebec for the Norwich Union Fire Insurance Society, has been appointed to a similar position with the North British and Mercantile for Manitoba and the North-West Territories. Mr. Walsh's headquarters will be in Winnipeg.

The plan proposed by the directors of the Western Assurance Company, involving the cancellation of half of the company's present capital stock, and to replace it with new stock, was unanimously approved of by the shareholders at a special meeting this week.

Up to yesterday afternoon the total adjustments reported to the General Committee of Fire Insurance Companies, Toronto Conflagration, involved a total insurance of $7,821,785, on which the total value was $9,533,752, the difference representing a net loss to the sufferers.

To Messrs. Wood and Kirkpatrick, the general agents, for the Dominion, of the Home Insurance Company, New York, we are indebted for a copy of a map of Japan, Corea, and Manchuria. The names of the various places at the seat of war, so prominent now in the public mind, are shown in good clear type, and the map is one which will no doubt be preserved for reference a long time.

At the recent dinner of the National Board of Fire Underwriters, Mr. J. L. Cunningham said this, among other sensible things: "Remember, too, that notwithstanding insurance proved equal to its obligations in Baltimore, millions of property value was lost, and the country is that much poorer. Insurance companies are poorer by the millions they paid. It was but a transfer of money for ashes. The property loss itself exists as a loss, and this fact adds to the duty of underwriters to the public, and of the public itself, to advocate not only, but to actively, heartily, and unitedly to co-operate in every effort which promises protection against this devastating danger to our towns and cities."

THE QUEBEC BANK.

Proceedings of the eighty-sixth annual meeting of the shareholders of The Quebec Bank, held in the banking house, Quebec, on Monday, the 6th of June, 1904.

Present: John Breakey, Esq.; John T. Ross, Esq.; W. A. Marsh, Esq.; Vesey Boswell, Esq.; Edson Fitch, Esq.; John Shaw, Esq.; T. A. Piddington, Esq.; H. B. Patton, Esq.; J. H. Simmons, Esq.; Wm. Brodie, Esq.; P. Johnston, Esq.; H. Budden, Esq.; W. H. Carter, Esq.; Jas. Morgan, Esq.; T. S. Hetherington, Esq.. and others.

On motion of W. A. Marsh, Esq.; seconded by Major Morgan, the chair was taken by John Breakey, Esq., and R. C. Patton, Esq., was requested to act as secretary of the meeting.—Carried.

The chairman read the report of the directors, and Thomas McDougall, Esq., general manager read the statement of the affairs of the bank, as on the 14th of May, 1904.

Report of the directors of The Quebec Bank to the shareholders at their annual general meeting, held at the head office of the bank, in Quebec, on Monday, the 6th June, 1904.

The directors of The Quebec Bank beg to present to the shareholders the general statement of its affairs, together with its profit and loss account, for the year ended 14th May, 1904.

The profits for the year as shown therein, amount to $283,221.31, deduction having been made for the cost of management, and provision also, for bad and doubtful debts. Two half-yearly dividends have been declared: one of 3 per cent. for the fore part of the year, and the other of 3½ per cent. for the latter part thereof.

An amount of $5,000 has been reserved for the pension fund, as per authority already obtained. The sum of $100,000 has been added to the rest; and according to an estimate made for proposed alterations and improvements in the bank

Guaranteed Quality Silverware.

In buying Silverware see that it is stamped

"TORONTO SILVER PLATE Co."

as Silverware stamped in this way is not only Artistic in design, but fully guaranteed as to Quality.

Number 880—Five Light Candelabrum.

The Toronto Silver Plate Company,
LIMITED,

Silversmiths and Manufacturers of Electro Silver Plate of every description.

Factories & Salesrooms,
West King Street,
TORONTO, - Ontario.

E. G. GOODERHAM,
Managing-Director.

premises, the amount of $25,000 has been set apart for the purpose of making the necessary changes therein.

All of which is respectfully submitted.

JOHN BREAKEY, President.

General Manager.

PROFIT AND LOSS ACCOUNT

Balance at credit of profit and loss account, 15th May, 1903		$ 47,440 40
Profits for year ended 14th May, 1904, after deducting charges of management and making provision for bad and doubtful debts		283,221 31
		$ 330,661 71
Dividend 3 per cent., paid 1st December, 1903	$ 75,000 00	
Dividend 3½ per cent., payable 1st June, 1904	87,500 00	
Reserved for pension fund	5,000 00	
Added to rest	100,000 00	
Reserved for improvement to bank premises at head office and branches	25,000 00	292,500 00
Balance at credit of profit and loss account, carried forward		$ 38,161 71

It was moved by John Breakey, Esq., seconded by John T. Ross, Esq., That the report and statements now read be adopted and published for the information of the shareholders.—Carried.

The customary votes of thanks having been passed, a ballot was taken for the election of directors for the current year, and the following shareholders were declared duly elected, viz.:—

John Breakey, Esq.; John T. Ross, Esq.; Gaspard LeMoine, Esq.; W. A. Marsh, Esq.; Vesey Boswell, Esq.; F. Billingsley, Esq., and Edson Fitch, Esq.

The meeting was then closed. Immediately thereafter a meeting of directors was held, at which John Breakey, Esq., was chosen president, and John T. Ross, Esq., as vice-president.

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing Houses for the week ended with Thursday, June 9th, 1904, compared with those of the previous week:

	June 9, '04.	June 2, '04.
Montreal	$23,168,899	$18,443,213
Toronto	17,709,516	17,022,249
Winnipeg	5,697,791	5,067,324
Halifax	1,897,539	1,803,447
Hamilton	.....	1,098,706
St. John	1,052,069	909,792
Vancouver	1,607,446	1,453,072
Victoria	1,009,718	690,274

		$50,752,855

Report of Test of "Royal Automatic Smoke Consumer," made at The Bertram Engine Works Co., Toronto.

JUNE 7th and 8th, 1904

The boilers were the ordinary Horizontal Return Tubular Type, 60" diameter, by 14 ft. long, with 84 tubes 3" diam. in each.

Boilers were set in brickwork in the ordinary manner.

The total heating surface in the two boilers was 2,066 sq. ft.

The total grate surface under the two boilers was 45 sq. ft.

Particulars of Test.	Without Consumer	With Consumer.
Duration of test	8 hours	8 hours.
Total water pumped into boilers and apparently evaporated.	33,750 lbs.	43,650 lbs.
Total coal consumed	4,375 lbs.	4,522 lbs.
Total ashes	365 lbs.	507 lbs.
Total combustible	4,010 lbs.	4,015 lbs.
Mean steam pressure	64.38 lbs.	69.91 lbs.
Mean feed temperature	178.26°	172.5°
Total steam used by jets		2,707 lbs.
Percentage moisture in coal	2.5	2.5
Evaporation per lbs. coal	7.714	9.648
Evaporation per lbs., combustible	8.975	10.871
Equivalent evaporation from and at 212° per lbs. coal	8.227	10.361
Equivalent evaporation from and at 212° per lbs. combustible	8.975	11.675
Percentage of increased evaporation due to use of Consumer after deducting steam used by jets		18.18
Percentage of saving in coal due to use of Consumer after deducting steam used by jets		15.28

The steam pressure was maintained much more regularly, and with greater ease, when Consumer was in use than on the previous day when it was not in operation. The safety valves opened at frequent intervals during second day's test with Consumer.

So far as we could judge by careful observation the smoke issuing from chimney was reduced from 85 to 90 per cent. by the use of the Consumer.

O. P. ST. JOHN,
Acting for the Royal Automatic Smoke Consuming Company.

A. R. GAIR,
Acting for the Bertram Engine Works Company, Limited.

THE MODEL NEWSPAPER.

The editor of the Louisville Corner-Journal, Col. H. Watterson, delivered an interesting address at St. Louis the other day, from which we take the following excerpts: The editorial page is valuable in the degree that it aids the reader to digest the news. It should either be reformed or abandoned. Under a certain spell which has crept upon the modern newspaper it is becoming, if it has not already become, a rather useless appendage—not even ornamental—reminding one of those clusters of artificial flowers which, at the more pretentious railway eating houses are supposed to decorate the tables and to deceive the wayfarer. Yet ought the editorial page after the exhilaration — the distractions and excitements—of the news pages to be as a raised dias in the centre of a great hall, a seat of rest and charm; an elevation from which to survey the passing show, having its lights adjusted the better to set forth this passing show, and its ready chorus to explain it.

Disinterestedness being the soul, good humor is the solar system of the editorial page, which should be held subject to these precepts:—

Write of a man nothing you would not say to his face, and might not say in the hearing of decent people.

Avoid equally intimation and intimidation, making no suggestion you are not prepared to reduce to assertion and to sustain with proof.

The "leading article" being the rationale of the most important and interesting piece of the day's news, should have a beginning, a middle, and an end: should be concise and incisive, seeking to assist the reader in his effort to comprehend the situation.

Satire should keep within the bounds of the probable; wit under the restraints of sense, and even invective—shorn of adjective and adverb, and stripped to the waist—should strike out from the shoulder to hit only above the belt. The pert paragraph should be allowed to die a natural death. No flowers.

The editorial page thus conceived and executed, thus inspired and partitioned, according to Mr. Watterson, could not fail to impress itself upon the thought of the time.

—Mr. Younge, the secretary, announced yesterday that the steamer "Prince Edward," conveying the July excursion party of the Canadian Manufacturers' Association, will not stop at Georgetown, P.E.I., but will stop at Bay of Islands, Newfoundland.

A REPORT from Pittsburg, Pa., dated 6th inst., says that it is frankly acknowledged there that conditions in the steel trade are very unsatisfactory. So far as actual business is concerned, I have heard the statement made this week that the present period is the dullest known in twenty-five years. Demand is of very narrow proportions, and from hand to mouth kind. The cutting of prices of merchant steel by the Trust created no surprise here, as it was considered the only thing to do in view of prevailing conditions. It will be recalled that the "official" price was advanced $1 per ton in March, but it is now practically conceded that very little steel was sold at the higher level. Pittsburghers are still anticipating reductions in some other products. It is reliably reported that considerable quiet cutting is being indulged in, and that pool rates will be ostensibly maintained without penalizing the members for accepting business below the quoted prices. Earnings of the Steel Corporation for the quarter ending this month are estimated, by interests closely affiliated with the corporation management, at $18,000,000 to $20,000,000. In the same quarter of 1903, the net earnings were $36,642,000, and in 1902, $37,662,000.

To Get Satisfaction

From your steam plant is the crucial basis of economy to all manufacturers. A satisfactory steam plant is one that produces the greatest needed power at the lowest cost.

THE CANADIAN CASUALTY & BOILER INSURANCE CO.

Study this question. It is our business.

Fuel, Heat, Steam, Power, Labor and Time Saved — IS CASH SAVED.

How to accomplish this saving is freely imparted to all steam users who insure their boilers in

MONTREAL MARKETS.

Montreal, June 8th, 1904.

Ashes.—The market still shows gradual easing off, and $6.10 is now quoted as about the extreme figure for No. 1 pots, and about $5.50 for seconds. Receipts continue very moderate, and are absorbed as soon as they come to hand, there being no stock in inspection stores.

Cements and Firebricks.—Business in these lines is reported as just moderate, with no big lots moving, and receipts of cements are comparatively light, only 1,000 bbls. of English cement being reported for the week just closed; for the same period 196,600 firebricks have come to hand. We quote Belgian cements, $1.70 to $1.95; English ditto, $1.95 to $2.10; firebricks, $16 to $23.

Dairy Products.—Export business in cheese continues light as compared with last year; shipments for week ending June 4th, were 47,767 boxes as against 72,235 boxes for corresponding week of 1903, and there is a total deficiency for the season thus far of about 60,500 boxes. On the other hand shipments of butter are a little more liberal than at this time a year ago, the figures being 10,580 packages to date, as against 6,771 packages this time last year. Conditions in the cheese market are far from satisfactory. The recent apparent slight improvement in values was altogether artificial, and quotations are off from ½ to ¾c. since a week ago, the present outside figures for finest Western being about 8¼c., with prices ranging down to 7¾c. for Quebecs. Butter prices are also easy in tone, from 16 to 16½c. being quoted for good to fine creamery.

Dry Goods.—Fourth of June payments appear to have been very fairly met, and some of the larger houses report 85 per cent. of customers' paper as being pro-

vided for, which does not allow very much cause for complaint. The late heavy rains have not tended to activity in city retail business, and wholesalers are not particularly busy. The tariff changes as reported do not seem to call forth generally favorable comments from the trade, and the army of kickers seems to be rather increased than otherwise. The cotton men seem to be particularly sore at being completely ignored. A deputation of leading wholesalers leaves for Ottawa, to-night or to-morrow, in order to petition the Government that the changes be not put into effect until August the 1st.

Groceries.—Travellers report their movements in interior districts somewhat hampered by the bad roads caused by the continued heavy rains of the past several weeks. Farmers are also complaining for the same reason, and while meadows and pastures are showing up exceedingly well, seeding operations have been delayed, especially in low-lying districts, and there are some reports of potatoes rotting, etc. The sugar maket has taken an easier turn, and refiners' quotations are lower by 5c. a cental, the present factory price for standard granulated being now $4.40, and the lowest for yellows, $3.80. Molasses quotations at the island are again lower, and the crop is now said to be larger than first calculated, and likely to reach 60,000 puncheons. Dried fruits are in little request. No advices regarding new crops are as yet to hand from Denia or Malaga. Sultanas are reported firm at Smyrna, and the comparatively small supplies of currants in Greece are also held at steady prices. Candied peels will cost a little higher than last year. Canned corn and tomatoes are held at very stiff figures, Jobbers asking $1.20 for corn, and $1.15 for standard tomatoes.

Hides.—Dealers report business as comparatively dull, but quotations are maintained with fair steadiness. For No. 1 beef hides buyers are still paying 9c. Calfskins realize 13c. for No. 1, and 11c. for No.2, with receipts steadily declining. Lambskins are quoted at 20c. each.

Metals and Hardware.—Business is if anything quieter among jobbers, and import agents report their orders from wholesalers are much behind last year, and call forth from their British prinpals enquiries as to why they don't send in more business. In quotations there have been no recent important changes. Ingot tin is easier at 30½ to 31c.; lead and spelter are also a little weaker, the former at $3.20, and the latter at $5.75; copper about steady at 13½c.; antimony, 7¾c.; Canada plates are firm in Britain, and the jobbing quotation remains at $3.25; black sheets, $2.20; Ternes, $6.50; galvanized sheets, $4.25; tinplates, $3.90, and $3.65 for charcoals and cokes respectively. Bars, nails, wire, etc., all remain at old figures.

Oils, Paints, Glass, etc.—There is really nothing in the way of change to be noted in these lines. Through a clerical error we quoted turpentine last week at 93c., instead of 83c., and the latter figure is still the quotation for single bbls. Linseed shows some little advance in London, but cut prices still prevail here. In other lines there are no changes.

TORONTO MARKETS.

Toronto, June 8th, 1904.

Chemicals, Drugs, etc.—Little change of any importance has taken place in the situation of the local drug market. Quinine continues fairly firm, but opium is very dull, with hardly any business passing. Camphor continues strong in spite of contrary reports from New York. In the Old Country, the chemical market, both for home requirements and for export, has been for some time past on the dull side.

Dry Goods.—There can be little doubt that comparative dullness in the dry goods trade is the present order of things, though probably this is due partially to the adverse weather, so far as the sale of seasonable goods is concerned. From several country districts come reports of stocks, of more or less importance held over owing to small purchasing, and even with regard to

THE COMMERCIAL

Published 1882
The WEEKLY FINANCIAL COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST

Reaches direct 90 per cent. of the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

Do you want to sell or increase the sale of your goods in these, THE BEST BUYING PROVINCES IN CANADA?

Estimated that 200,000 new settlers will arrive this year. Will the retail merchant offer them your goods?

Our advertisers our best references. We beg the favor of an enquiry.

THE HUGH C. MACLEAN CO., LIMITED, Publishers, Winnipeg.

Eastern firms should subscribe for THE COMMERCIAL and keep posted on Western trade

about $3.70 to $3.75, in buyers' bags, middle or east freights. Manitoba is firm. In millfeed and oatmeal, no appreciable change has taken place. Wheat is dull at a decline of 2 to 3c., compared with last week's figures. Barley is dull and nominal with quotations unchanged. Oats are 1 or 2c. lower, and in poor demand. Rye, corn and buckwheat are unchanged. Little business is passing in any of the grains.

Fruits and Vegetables.—The demand for all kinds of fruits continues quite good. Strawberries are now fairly plentiful, though the Canadian crop is late and has not begun to come forward. The quantity of pineapples, for the market, mostly from Florida, is larger, but prices keep fairly good. There was a large fruit sale in Montreal of Mediterranean fruit, Ex. S.S. "Bellona," but much stock was inferior and prices ruled rather low. Oranges, however, fetched a little more than at the last sale. Quotations are as follows:—Apples, $1 to $3 per barrel, according to grade and quality; cocoanuts, $4.25 per sack; oranges, California navels, $3.50 to $4.50; Valencias, large, $7; ordinary, $6; Sorrentos, $3; lemons, Messinas, 360's, $2.50 to $3, 300's, $2.50 to $3; Sorrentos, $2.50 to $3.50; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; dates, Sair, 3½c. per lb.; Hallowee, 4c.; figs, 8 to 12c.; tap figs, 3½c.; strawberries, 12 to 15c. per quart box; Egyptian onions, $2.50 to $3 per sack; tomatoes, $3 to $3.50 per crate; pineapples, Floridas, 12's, $4.50; 24's, $4.25; 30's, $3.75; 36's, $3.50; 42's, $3; Havanas, $3 to $3.50.

Hides and Skins.—Hides are experiencing a steady market, but there is no notable feature presenting itself. Sheepskins are quite firm, while lambskins are in good demand. No great demand exists at the moment for leather, but prices keep steady.

Hardware.—While the volume of trade being transacted is not large, prices keep pretty firm. Seasonable lines are bringing fair orders, and reports from country speak of the promise for a good season's trade as good. In metals the movement is about average. Copper is easier, and so is antimony. Lead is weaker owing to somewhat heavy receipts from abroad. Pig-iron, too, is dull and weak.

"The Unexpected Always Happens."

Who is there but has had brought home to him the truth of the above statement? It is always the accident that was least looked for that actually does occur. Nobody is immune from accident. Your experience and observation confirm that fact.

WISE men prepare for such emergencies by carrying an accident policy. The WISEST men see to it that that policy is an Employers' Liability Combination Policy, issued by

THE
EMPLOYERS' LIABILITY ASSURANCE CORPORATION,
LIMITED
MONTREAL - - TORONTO

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policyholders and addition to Reserve.
$53,841.18 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, **$1,800,000.00.**

Provisions.—With large offerings of butter there is only an average demand, Prices keep as good as might be expected, however. In England the market has not fully recovered from its holiday character, but supplies from abroad are on the light side. The pastures in the United Kingdom are now at their best so there is a fairly large home supply. cheese keeps its somewhat improved tone. Eggs are firm in the local market, and receipts for this time of the year are rather light. Hops are dull. Hog products are in somewhat better demand.

Wool.—While the offerings of new-clip wool are not liberal, owing perhaps to the bad weather, they are a little better than they were, and the demand is fair. For pulled wools the demand is slow.

THIRTY DAYS' GRACE

for the payment of Renewal Premium is invariably allowed by The Canada Life. During this period the policy remains in full force, and should the Assured die within it, the claim would be promptly paid whether the premium had been paid or not.

This has been the practice of the Company for over 50 years, and is but one of many valuable privileges

Allowed by The CANADA LIFE.

30 Days of Grace

for the payment of Renewal Premiums is one of the many privileges the SUN LIFE OF CANADA grants its policy-holders. Should the Assured die at any time within the days of grace the claim would be promptly paid, even though the premium had not been paid.

FENSOM'S ELEVATORS

"ONE GRADE"

OUR BUSINESS,

from the ground up, is confined exclusively to designing, constructing and installing elevators. It is generally conceded that Fensom's Elevators are right in all respects.

THE FENSOM ELEVATOR COMPANY LIMITED TORONTO

CUTTRISS

Protection from Loss.

The business of boiler insurance is an engineering business; the insurance is only a guarantee of the trustworthiness of the engineering services.

Measure the value of those services and then consider the guarantee. In doing this remember that EXPERIENCE, SKILL, and ABILITY are the determining qualifications of the value of those services.

Insure your boilers in

THE BOILER INSPECTION & INSURANCE CO. OF CANADA, Canada Life Bldg., Toronto,

which has been in this business for nearly THIRTY YEARS.

Then Insurance.

Abraham Albin, who less than a year ago took over the branch store at Glen Robertson, of A. Markson, of Alexandria, Ont., has recently assigned to W. A. Cole, of Ottawa. His liabilities are put at $2,600.

The assignment is reported of Joseph Fisher & Co., general dealers at Jonquieres, in the Saguenay district. Fisher, who had been latterly using his wife's name, has been a good deal of a "rolling stone." He has peddled through various sections of Quebec Province, and once kept store in the Beauce district. Afterwards he was in business in Quebec City, where he compromised in 1901, and a year later he had to assign, with the result that he has since had to do business under cover.

R. G. DUN & CO.

Toronto, Montreal, Hamilton, London and Cities in Dominion, U.S. and Europe.

Mercantile Summary.

Waterworks and sewage systems are being installed at Lethbridge, at a cost of $300,000.

On the 2nd prox., ratepayers of Ochre River, Man., will vote on a by-law to raise $25,000 for bridge and road making.

The city of Kingston, Ont., invites tenders for the purchase of debentures for $182,000, for the purchase of an electric light plant, bearing interest at the rate of 4 per cent. per annum.

Up to the 1st inst., the building permits issued in the city of Winnipeg for the present year totalled $3,334,150, an increase of nearly a quarter of a million over the same period of last year.

Gilmour & Co., Trenton, Ont., are offering for sale the Trenton and Algonquin Park sawmills, and the timber limits in Peck, Hunter and McLaughlin townships, and in Peterboro, Hastings, Haliburton and Addington counties.

A meeting of the creditors of Fraser Johnson & Company, wholesale saddlery and harness dealers, Hamilton, who recently made an assignment to Mr. Frederick H. Lamb, is called for the 22nd inst., at the latter's office. The affairs of the above-named firm have been in a precarious condition for some time past. No figures are available as yet.

The Oriental Pulp & Power Company, of which the head is J. M. Mackinnon, are preparing for an immediate start in erecting a million-dollar mill and plant for pulp and paper making, on Princess Royal Island, B.C. It has leased 61,000 acres of spruce timber land.

The Kingston Milling Company, Limited, has been incorporated under Ontario laws, for the purpose of carrying on a milling business, developing water-power, generating electricity, etc. Among those interested are Mr. E. C. Gildersleeve, of Kingston, and B. W. Heaslip, of Gananoque.

Messrs. H. Appleton and P. Primeau, of Calumet, Mich., propose erecting a copper smelter on the north shore of Lake Huron. They control copper properties in Salter township. At present the ore is exported to New Jersey and other places, at a heavy expense for freight charges. Aid from the Government is sought, in the form of a bonus or otherwise.

The "Turbinia," the new turbine boat belonging to the Hamilton Turbine Steamboat Company, which will run a service from Toronto to Hamilton, has arrived in North Sydney, from Newcastle-on-Tyne, after a highly satisfactory trip across the ocean. In spite of stormy weather, the passage from land to land was made in six days, while during some periods her speed was 22¾ miles per hour, though the contract read for 19 knots only.

GEO. A. STIMSON & CO.,

34-36 King Street West TORONTO, Ont

THE warehouse and stable of A. H. Patterson, hardware merchant, Chatham, Ont. have been burned down. Loss on stock about $6,000, partially covered by insurance.

THE Canadian Northern elevators at Port Arthur are now completed, the machinery having been set in motion for the first time last week. They are built entirely of steel and cement, and their total capacity is 3,500,000 bushels.

THE Payne Consolidated Mining Company, Limited, held their annual meeting in Montreal a few days ago. The shareholders decided to issue at once $90,000 worth of bonds for further development purposes, and to pay off part of the indebtedness.

A FARMER of St. Guillaume d' Upton, Que., named O. Labranche, who has also been doing business in lumber, has been asked to assign.——Joseph Labelle, baker at Iberville, has assigned. His liabilities are small, and mostly local.——Bigonesse, & Seguin, composed of Mrs. (Dr.) J. A. Bigonesse and J. O. Seguin, carrying on a store business at Labelle, Que., since the fall of 1902, have turned over their estate to the assignee.

Mercantile Summary.

A. T. TARDIF, of Ottawa, quite a beginner in the grocery line, has become involved. A chattel mortgage on his stock has been foreclosed, and he has had to assign.

THE Cunard Steamship Company have placed contracts in Clydebank and Newcastle-on-Tyne for two turbine steamers with a speed of 24½ knots per hour and 760 feet in length.

IT is stated that the old glass factory on Macauley street in Hamilton is to be torn down; and that the Diamond Glass Co. and the Mansfield Glass Co. will erect a modern building with up-to-date machinery, in place of it.

VICTORIA and Nelson (B.C.) capitalists are organizing a company with a capital of $250,000, under the name of the Flathead Valley Oil and Development Co., to develop between 5,000 and 10,000 acres of oil land in the Flathead Creek district.

HILDEGE or Ildaige Rondeau, of St. Norbert, Que., doing business in a small way as a grocer and butcher, has assigned. His habits are reported to have been such as to call forth some criticism, and during the past few months several judgments have been recorded against him.

IN the fall of 1902, F. Gareau, who had formerly been clerk, began storekeeping at Rigaud, Que. He apparently has worked hard, going out peddling through the country himself, while his wife looked after the store, but he has not made a success of it, having had to assign, and he now proposes a 35 per cent. settlement.

THE strike of the masters and pilots on the Great Lakes, which has tied up traffic almost completely for six weeks, has now been declared off, the masters having agreed to accept the wages offered by the Lake Carriers' Association. Thus ends one of the most costly strikes, from the point of loss of wages of the men, earnings of capital of employers, and general trade of the country, in recent years.

A MOST regrettable accident occurred near Sorel on Sunday last to the Richelieu and Ontario Navigation Company's boat "Canada" while on her way from Quebec to Montreal. She was collided with in the early morning by the Dominion coal steamer "Cape Breton," of Sydney, C.B. A large hole was stove in the starboard side of the "Canada," and she sank within a few minutes in about forty feet of water. H. Banneterre, the purser; Alfred Thibeault, chief clerk of the freight department of the R. and O. line at Quebec, and three other people lost their lives, the rest of the crew and passengers being picked up by nearby vessels and barges. The "Canada" was valued at $190,000, and was not insured except against fire. The directors think it will cost $80,000 to raise her.

A Beautiful Book.

The above caption is what everyone is saying about the new publication on the World's Fair issued by the Grand Trunk Railway System. It is without doubt the most artistic and beautifully gotten up publication that has been issued in connection with the World's Fair. On the very handsome cover are illustrations of two beautiful statues displayed at the Fair, emblematic of the Atlantic Ocean and the Pacific Ocean, embossed with steel die in high relief. The book contains 48 pages with descriptive matter of the main features of the Exposition profusely illustrated, and embodies the latest and best maps of the City of St. Louis, showing street car lines and many other features, also a map of the World's Fair grounds, and a large map of the Grand Trunk Railway System showing the route to and from the Fair, as well as variable routes and attractive side trips that will appeal to their patrons. A chapter on "How to Reach St. Louis" is given, and all information that prospective visitors to the Fair are looking for. The publication is not only one that will interest everybody who secures a a copy, but will be a handy guide to those who take in the Exposition. Copy can be had for four cents in stamps, on application to J. D. McDonald, District Passenger Agent, Toronto.

The Grand Trunk will on June 13th commence to operate a double service direct to St. Louis from Montreal, Toronto, Hamilton, London, Etc.

Mercantile Summary

MR. R. E. GOSNELL, secretary to the British Columbia Provincial Bureau of Information, and compiler and writer of several useful books and pamphlets, has been appointed editor of the Victoria Colonist.

THE Western Fuel Company, whose pit-house and other buildings at Nanaimo, B.C., were recently destroyed by fire, will at once begin the work of rebuilding at a cost, it is said, of somethink like $100,000. A new electric light plant is also to be put in.

IT is announced that the Government of British Columbia has decided to issue immediately licenses for prospecting for oil and coal in the two famous blocks in South-east Kootenay, long held under reserve for railway purposes. The decision appears to meet with approval in local circles, where it is believed it will be followed by greatly increased development.

WE note the failure of D. C. Leckie, general storekeeper, at Combermere, Ont. He was formerly a school teacher, and subsequently clerk a short time for D. Johnston, who failed in the spring of 1903, when Leckie bought the stock. The latter is not reported as having given the business such attention as would inspire confidence in his success, and his assignment is not therefore altogether a surprise.

THE Lake Superior Corporation, by which name the Consolidated Lake Superior Company is now known, have elected the following officers: President, Charles D. Warren, of Toronto; vice-presidents, Charles E. Orvis, of New York, and Thomas J. Drummond, of Montreal; treasurer, John T. Terry, New York; directors, Francis B. Reeves, Philadelphia; J. Tatnall Lea, Philadelphia; John T. Terry, New York; Dumont Clarke, New York; Geo. B. Turrel, Orange, N.J.; F. H. Clergue, Sault Ste. Marie, Ont.; Chas. S. Hinchman, Philadelphia; N. W. Rowell, Toronto, and Edward Q. Trowbridge, New Haven. A cheque for $1,000,000, to be used as working capital has been, it is stated, paid into the treasury of the company.

CONFIRMATION is made of the announcement that the New York Central Railway has decided to substitute electricity for steam over part of its system. The Railway Age says it is building a number of new engines of a normal rating of 2,200 and 2,800 horse power, which is 50 per cent. more than that of the largest steam locomotives on the road. With a light train the locomotive is expected to have a speed of 75 miles an hour, and with a heavier train a similar speed can be attained by coupling two locomotives and working them as a unit. The specified requirement is that the locomotive shall carry a train weight of 435 tons from New York to Croton, thirty-four miles, in 44 minutes, and with one hour lay-over, to be able to keep up this service continuously.

Mercantile Summary.

THE awarding by the Montreal Harbor Board, of the $2,500,000 contract for steel freight sheds, to Peter Lyall & Sons, has been approved by the Dominion Government. Work is to be started with a thousand men at once.

IT is announced in Halifax that the Atlantic Grindstone Company and the Fundy Coal Company have decided to amalgamate. An up-to-date coal mining plant is to be installed at once, and an improved plan of working the quarry put into force, whereby the stone can be made ready for working in winter without exposing it to the injurious action of frost.

THE petition of the Hamilton, Grimsby and Beamsville Electric Railway to be considered a railroad for the general good of the country, and the understanding that it is to be acquired by the Grand Trunk Railway, are meeting with a good deal of opposition, especially at the hands of the important body of fruit-growers of the district through which it passes. They fear it will mean the abolition of competition and resulting high freight rates on their product.

A NEW YORKER is out with another proposition for quick transit across the ocean. Mr. R. B. Painton claims to have invented a type of vessel which would cross the Atlantic in three days, the means of propulsion being a series of multiple electric propellers, arranged along the side of the ship, and driven at great speed. A plan is under way to build a vessel 600 feet in length, and to cost about $2,000.000. A great saving in coal is looked for from the new type of vessel, it being claimed that the consumption will not be more than half the usual.

ELDER, Dempter & Co., who have, by arrangement with the Canadian Government, taken up the steamship service between this country and South Africa, propose, in order to bring about closer trade relations, to facilitate the holding of a sort of exhibition of Canadian goods. It offers to place at the disposal of Canadians, quite free of charge, a certain number of passages, with ample room for samples of goods. Each passage will represent a certain department of commerce. The boats named are the "Melville," sailing from Montreal on the 25th inst., and the "Monarch," which leaves next month.

TORONTO STOCK TRANSACTIONS.

The centres of attraction this week in the stock market have been Sao Paulo and Richelieu and Ontario, the former because of its great activity and rapid rise owing to increased dividend and bright prospects, the latter because of its weakening in consequence of the disaster to the steamer "Canada." The following summary will show the transactions in the more important stocks in detail: Bank of Montreal, 5 at 245; Ontario, 10 at 126½; Commerce, 39 at 151¾; Imperial, 139 at 217½-218; Dominion, 320 at 226⅞-227; Standard, 20 at 227½; Hamilton, 11 at 206-207; Traders, 28 at 136-137; C.P.R., 1,241 at 117¾-119¼; Rich. and Ont. Nav., 372 at 74⅞-86½; Sao Paulo, 4,771 at 104½-108¼; Dom. Steel, 75 at 8-8½; bonds, $13,000 at 55-59; preferred, 75 at 21¾-28; Dom. Coal, 429 at 51½-56; Nova Scotia Steel, 571 at 70¾-71¾.

THE DANGER OF PLAYING WITH FIRE.

We thank Mr. John B. Laidlaw for sending us a circular, issued by the British Fire Prevention Committee, offering a medal and a purse of £20 for the best fable for children in respect to the danger of playing with fire. The secretary of the committee, of which he is a member, draws attention to their offer. The competition is open to Canadians, and, as the donor is a Canadian, it is hoped that there will be a number of papers from Canada. The competition for this prize is open to British subjects resident in any part of His Majesty's dominions, and elementary school teachers are particularly invited to compete. Besides the committee's gold medal and a purse of £20, there will be other silver medals for meritorious fables.

No fable shall consist of less than six hundred words, or more than one thousand two hundred words, and no fable shall reach the committee later than the 31st of October, 1904. The conditions can be obtained at the committee's offices upon application by letter only,

UNION MEAT.

A workingman entered a down-town butcher store the other day and asked the attendant to let him have a nice piece of meat, which should be the cheapest possible for its size.

"Very well," replied the butcher, and in a moment he brought forth a calf's head, which he showed the would-be-purchaser with some degree of pride.

But the latter did not appear satisfied. "What I want," said he, "is something really nice. And be sure to give me union meat."

At this, the butcher retired, and for a few moments was very busy, after which he returned to the customer with the same calf's head.

"But what is the difference," remarked the customer, complainingly, "between this calf's head and what you were showing me a minute ago?"

"Oh," replied the man of gore, "I have now taken its brains out."

LIFE AND ACCIDENT INSURANCE.

Sterling A. Cox, an insurance man of Atlanta, Ga., has sued the Central railroad for $25,000 damages. Cox was severely beaten by some drunken passengers, and the conductor refused to come to his assistance.

An article written for the Saturday Evening Post, by James H. Hyde, vice-president of the Equitable Life Assurance Society, on "Life Assurance as an Investment for Young Men," contains much good advice. The article has attracted a great deal of attention, so much, in fact, that the society has had it reprinted in pamphlet form. It should prove an effective canvassing document.

R. H. Plant, the Georgia banker who committed suicide a few days ago, was also the general agent for a life insurance company with which he carried a large amount of insurance. When the company paid claims in his locality, a large proportion of the amount was frequently invested in Plant's bank. As most, if not all, of his insurance is incontestible, should the creditors secure the money the company will virtually have paid some claims twice over.—Investigator.

The largest burglary that has been committed in Chicago for a number of years was the stealing of $18,000 worth of diamonds and jewellery from the home of J. W. Kiser, a prominent manufacturer. The thief is supposed to have been a butler, who was discharged a few days before the loss was discovered. The United States Fidelity and Guaranty Company had a $7,000 burglary insurance policy on Mr. Kiser's property, and is co-operating with the police in endeavoring to run down the criminal. It has had a $4,500 and a $2,000 loss within the past few weeks in Chicago.

The Five Year Combined Option

Look into it. . . .
Some splendid openings for capable agents. 5
HEAD OFFICE, Temple Building, TORONTO, Ont.

In a letter of date 14th June, Mr. A. L. Eastmure tells us that the seventeenth annual convention of the International Association of Accident Underwriters will be held at the Lafayette, Portland, Me., on Tuesday, Wednesday, Thursday and Friday, July 19th, 20th, 21st and 22nd, 1904. Mr. Eastmure is on the Press Committee, and acquaints us that the hotel has furnished the association with rates of fare during the convention, where there will doubtless be a large attendance of representative casualty underwriters from all parts of the continent. They range from three to five dollars per day.

NEW SMOKE BY-LAW.

Most of our readers are aware that on the first day of July next there comes into existence in this city a by-law, the object of which is to abate the smoke nuisance. So far as we know no steps have been taken by the Toronto branch of the Canadian Manufacturers' Association with regard to this new by-law, although reports to that effect have been circulated in the daily press and elsewhere.

Some manufacturers in the city have protested against this law on the ground that there was not anything on the market which would effectively do away with the smoke. For the benefit of those manufacturers who are naturally interested in this new law, it might be of interest to say that the Royal Automatic Smoke Preventer and Fuel-saver, recently placed on the market, and handled by J. A. Whaley, Confederation Life Building, Toronto, claims to do this most effectively. Indeed, its powers have been demonstrated before some of the leading manufacturers of the city.

This machine will save from five to twenty-five per cent. of fuel, and can be attached to any boiler without interfering with the operation of the plant, a factor which will be appreciated by all manufacturers who are interested in the economical operation and maintenance of boilers, and will more than compensate for the outlay required.

TWO SIDES TO THE PICTURE.

Mr. Fielding, referring in his recent budget speech, to the fact that Canada was importing capital as well as people said this was due to the "considerable measure of incidental prosecution afforded by his tariff, which, without being excessive, was high enough to bring some American industries across the line." "Let party opponents," he added, "go up to the city of Hamilton and look at the vast industries which have been established there by American capitalists, who have come across the line under the operation of this tariff, and who are now employed in carrying on very large businesses. Let them go to the city of Toronto and they will find similar organizations of American capital starting in manufacturing business." This showed, Mr. Fielding thought, that the tariff had not only been a great revenue tariff, but had afforded a reasonable degree of incidental protection, which had worked out, as far as those particular industries were concerned, with very gratifying results.

The New York Journal of Commerce commenting on these remarks speaks as follows: "We are apt also to congratulate ourselves on the invasion of Canada by American enterprise and capital to develop industries there and divert the local labor to them; but it is the result of a tariff barrier for which our own policy is chiefly responsible, and it prevents the employment of the capital at home to furnish the products of our labor to Canada while its own energies were devoted to industries for which it was better prepared. The process of forcing over the line is less to the advantage of either country than would be a spontaneous development across the line."

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their weekly circular, dated June 11, 1904, say:

Another uneventful week has gone by, leaving Wall Street in the same conservative mood which has now prevailed for weeks and months. If anything, there is a change for the better; and the wave of pessimism which has long been heaviest here is gradually giving way to more hopeful views regarding the future. Up to date this feeling has been more in the nature of a conviction that all recent developments of an unfavorable character have been amply discounted so far as the stock market is concerned, and that no good reasons exist for any further decline. Consequently, reports of lessened business activity, decreased railroad earnings, smaller bank clearings, etc., have no effect whatever on Stock Exchange values; they belong to the past; Wall Street generally being most interested in the future and but slightly concerned with the present. Attention now is almost entirely centered upon the crops. These are generally progressing satisfactorily, the only complaints being of backwardness in some regions and injury to winter wheat. Monetary conditions, it must be admitted, are generally favorable to better prices for stocks. Loanable funds are plentiful, and gold exports have been checked by the fact that foreign demands seem satisfied for the present.

THE CHINESE TRADE.

In pointing out the serious faults of American as compared with British trade methods in China the United States consul at Hong Kong remarks that it cannot be too thoroughly understood by all interested, in fact or in expectancy, that in Chinese trade American enterprise is still confined to the perimeter of the wheel—it has no status at all in South China. Great Britain has steadily plodded on for the conquest of Chinese trade for more than half a century, never abating her efforts, but pushing patiently on, protecting her trade, whenever acquired, as circumstances demanded. Absolute force is rarely needed; it is the consciousness of force, ready to be used, if need be, that keeps the peace. And with all this struggle of years the British trade of millions upon millions is but a speck when the possibilities of the trade with 400,000,000 people is considered—if these be brought within reach of commerce. On the other hand, America's attitude to Chinese trade has been one of constant inattention to opportunity. Thus the commercial methods of the American are not perfect, in one centre at any rate.

—According to the latest report of the Interstate Commerce Commission there are in the United States, in the employ of railway corporations, 1,189,315 persons, or an average of 594 hands per 100 miles of line. Of these, 48,318 are enginemen, 50,651 firemen, 35,070 conductors, and 91,383 other trainmen. There are 50,489 switch tenders, crossing tenders, and watchmen. The services of 41,071 employees are required for general administration, 399,592 for maintenance of way and structures, 228,280 for maintenance of equipment, and 518,390 for conducting transportation.

—The American Railway Engineering and Maintenance of Way Association, whose aim is the advancement of knowledge pertaining to the scientific location, construction, operation and maintenance of railways, has recently constituted a new standing committee to look into the economics of railway location. Its purpose will be the consideration of all questions connected with railway location, grades and improvement of grades and lines, affecting the economic operation with relation to traffic, tonnage ratings, speed, density of traffic and financial considerations. The special aim of this committee will be to establish uniform methods and unit values for investigating and analyzing the relative advantages and costs of comparative routes on proposed grade reductions and time connections. One of its officers will be Mr. W. McNab, of the Grand Trunk Railway, Montreal.

The British Mortgage Loan Co.
OF ONTARIO.
Dividend Number 52.
Notice is hereby given that a Dividend at the rate of Six per Cent. per Annum, on the Paid-up Capital Stock of this Company, for the half-year ending the 30th June, instant, has this day been declared, and that the same is payable at the office of the Company, in the City of Stratford, on and after
Saturday, 2nd Day of July next.
The Transfer Books will be closed from the 16th to the 30th instant, inclusive. By order of the Board.
WM. BUCKINGHAM,
Stratford, June 6, 1904. Manager.

CITY OF KINGSTON
DEBENTURES.
SEALED TENDERS will be received by the undersigned up to 3 o'clock p.m. on FRIDAY, JUNE 17, 1904, for the purchase of the whole or any portion of the following Debentures bearing interest at the rate of four per cent. per annum payable semi-annually, at the City Treasurer's Office, Kingston, Ontario.
$182,000 for purchasing an Electric Light Plant, payable by annual instalments within 30 years from 1st of April, 1904.
The highest or any tender not necessarily accepted. For further particulars apply to
F. C. IRELAND, City Treasurer.

Town of Dauphin
DEBENTURES
SEALED TENDERS marked "Tenders for Debentures" will be received by the undersigned up to the First Day of July, 1904, for the purchase of $11,000.00 Debentures of the Town of Dauphin.
There shall be twenty (20) debentures, each for the sum of $781.00 principal and interest.
Each of the debentures shall bear date 1st July, 1504, and one of such debentures shall be payable in each year after the First day of July, 1904, during the twenty years thereafter next ensuing, viz.: on the First Day of July in each year. The first of such debentures shall be payable on the first day of July, A.D. 1905, the last on the Firs July, 1924.
Debentures to be made payable at the Branch of the Bank of Ottawa, Winnipeg, Manitoba.
Each Tender must state a lump sum payable at the Branch of the Bank of Ottawa in Dauphin, Manitoba.
WM. RINTOUL,
Sec'y-Treas. Town of Dauphin.
Dauphin, Man., 1st June, 1904.

Town of Port Arthur.
TENDERS FOR
$147,000 DEBENTURES
SEALED TENDERS will be received up to noon of THURSDAY, 30th June, 1904, at the Town Treasurer's Office, Port Arthur for the purchase of $147,000.00 Debentures, with accrued interest on coupons next maturing—being $85,000.00 Waterworks, dated November 9th, 1903, payable in 30 years, interest 5% per annum, payable January 1st and July 1st; and $62,000.00 Sewers, dated July 30th, 1903, payable in 30 years, interest 5% per annum, payable December 1st and June 1st.
All said debentures and interest are made payable at the Ontario Bank, Toronto.
The highest or any tender not necessarily accepted.
J. McTEIGUE,
Treasurer.
Port Arthur, June 2nd, 1904.

CATALOGUES

The importance of being able to find a catalogue in the minimum of time is a problem in many many instances. Intelligent knowledge along these lines can best be secured by using a

SOME BANK MEETINGS.

The Standard Bank has arrived early—it is twenty-nine years old—at what is often considered a goal in a bank's career, namely, the time at which the accumulated surplus profits equal the amount of its paid capital. The reserve fund of this bank, with the sum added this year, is now a million dollars, and its capital a million; this reserve having been gathered year by year from earned profits, with the exception of $55,470, which between 1882 and 1886 arose from premium on stock issued. The earnings of the year have been good, as usual, sufficing to pay ten per cent. dividend, to add $75,000 to reserve, and to carry $12,000 forward. Business continues active, circulation showing increase to $908,606. Deposits are larger by a million or more, and the management is fortunate in securing an increasing proportion of them without interest. The president, vice-president, and directors of this well-conducted bank are unchanged from last year. Mr. Cowan's view of the outlook is not exactly rose-colored. He sees industrial and financial conditions threatening in the United States the outcome of which may mean trouble for Canada, which may be made a dumping-ground for American merchandise overproduced.

Large figures have been reached by the Imperial Bank. Its liabilities to the public in the shapes of deposits and circulation now exceed twenty-four and a half millions, while the totals of its assets and liabilities are close upon thirty-one millions. Very large earnings are shown for the last twelve months. They suffice, adding the balance brought forward and a sum received on account of premium on new capital stock to pay 10 per cent. dividend, to add $213,688 to rest account, to place $25,000 to bank premises and furniture account, and to carry $140,000 forward. We are glad to observe, also, that the authorized contributions to pension and guarantee funds have been made; made, too, before the net profits were declared. At the customary rate of addition to reserve, that fund will next year be equal to the capital of the bank, which is three millions of dollars. The report mentions the opening of a branch at Trout Lake, B.C., during the year, to which has been transferred the business of the Ferguson branch. The quite recent death of Mr. T. Sutherland Stayner is referred to by his surviving directors with great regret. The number of the board has been increased to eight by the addition thereto of Mr. James Kerr Osborne and Mr. Charles Cockshutt, both desirable members, being men of shrewdness and of wide business experience.

The president of the bank referred, in the course of his address, to the remarkable way in which the banks of Canada had helped the development of our great West. The fact of an establishment having a capital of millions placing its resources at the disposal of merchant, miner, lumberman, made a striking contrast with the United States western bank with a capital of perhaps $50,000. Mr. Wilkie was emphatic in upholding the need of providing against a depreciation of securities, seeing that, all over the world, from consols downward, the tendency to a fall in price had been shown. Another of his points, made at the meeting, appears to us worthy of being emphasized. This was the importance of adequate insurance by merchants and manufacturers in case of fire. He was able to give testimony from experience of customers in the Toronto conflagration of the value of full insurance in sound companies in enabling business men to meet their obligations, to rebuild their premises, to carry on their business with the minimum of interruption. We must take another opportunity, when more space is at our disposal, to dwell on the danger to the community of bucket shops, referred to by Mr. Wilkie. Many people know of the existence of these conveniences for gambling, but comparatively few people know what harm they do—how they lure the innocent and tempt the man or lad in a position of trust. They exist now not only in Canadian cities, but in towns and villages, offering inducements to "get rich quick."

We have already noticed the report of the Sovereign Bank, whose annual meeting was held this week. In his address at that meeting, the president devoted a paragraph to the recent purchase by the bank of a site in Montreal for a larger banking office than the present one in that city. It is on St. James street, between St. Peter and McGill; and although we have no information on the subject, we may surmise that it will be an addition to the dozen handsome and tall structures of late years which adorn that too narrow street.

WEATHER CONDITIONS IN THE WEST.

Our telegram of yesterday from Winnipeg informs us that cool weather with plenty of rain has prevailed throughout the West during the past week. "Some points were visited with so great a downpour that it was feared some harm would be done. Nothing but benefit, however, has resulted. Crops are reported ahead of their condition at this time last year. Better growing weather than the present could not be wished, and every condition is good. Wheat is well advanced and all grains doing splendidly."

THE BINDER TWINE SITUATION.

The situation in the binder twine business can be described as fairly satisfactory. In many sections of Ontario, the promise of crops is only fair to middling, especially in Essex, Middlesex and Kent counties, though, fortunately, in other parts, the outlook is better. The season opened somewhat poorly, throughout practically the whole province, but now, owing to seasonable sunshine and to frequent warmer rains, the prospects are considerably more promising, and the outlook is for an average good crop. The general conclusion, formed from the above data, is that there will be about as much binder twine used this year as last. As far as the North-West is concerned, owing to the increased acreage in grain crops, and to the excellent conditions so far this season for plant growth, there is every prospect for a great abundance of straw, which will in all probability mean an increased consumption of twine, compared with last year.

As an indication of the satisfactory state of business throughout the country, and of the prosperity, especially of the rural classes, it may be stated that one binder twine concern reports that last October, an important settling date for this business, 96⅝ of its paper was met.

Across the border, conditions do not seem quite so bright, and the market is distinctly weak. Complaint is heard of quotations made at lower rates than the schedule adopted last April by leading companies. But little business is being done, however, even in the present easy state of values. The fact seems to be that there is in sight a total supply of binder twine for the coming season considerably in excess of the largest estimate of consumption. The fibre market is weak also. How far this state of things will affect the situation here remains to be seen.

FOREST WEALTH OF BRITISH COLUMBIA.

After minerals, in the list of available natural resources of British Columbia, comes timber, the claim being made that that province possesses the greatest compact area of forest on the North American Continent. Had it not been for the serious fires which have raged in the interior during recent years, the consequence of carelessness on the part of railroaders, hunters, and settlers, the supplies would have been even much larger. Heavy timber fringes almost the whole coast region as far north as Alaska, logging operations extending as far as Knight's Inlet, a point on the mainland opposite the north end of Vancouver Island. A great feature of the British Columbia coast is the famous Douglas fir, named after David Douglas, a noted botanist, of the early part of last century, and the fact that the largest specimens are found in the moister belt near the ocean, is one which greatly facilitates the work of transporting logs. Mr. J. M. Macoun, the Dominion Government naturalist, says that this tree, which is the most abundant, as well as the most valuable, tree in British Columbia, has a range from the international boundary to the Skeena river, or, in the Rockies to a somewhat more northerly latitude. It attains its greatest size on Vancouver Island, or along the shores and the river valleys near the coast. Trees 300 feet in height and ten or eleven feet in diameter are not uncommon. The wood is chiefly used for structural purposes, or ship-building, bridgework, wharves, etc.

Next in importance to Douglas fir, is the giant arbor vitæ, or red cedar, used mainly for shingle making. This wood takes a brilliant polish, and is well adapted for interior finishing of all kinds. It is now largely exported to foreign countries, as well as sent to Eastern Canada. It has great lasting properties in damp situations, and is useful for posts, etc.

Another even more valuable wood, speaking pecuniarily, is the yellow cedar or cypress, though at present the cost of transporting it to the seaboard renders it too expensive for ordinary use. One drawback this wood possesses is its great liability to shrink, lengthwise as well as laterally, which necessitates very thorough seasoning before use.

Other valuable trees worth mentioning as products of our Pacific province are the western white pine, very useful for window-sashes, doors, powder barrels, and so forth, but liable to decay owing to its tendency to absorb moisture in outside situations; the Engelmann spruce, largely used for bridge and trestle and other heavy construction work, as for example to a great extent on the Canadian Pacific Railway, from the Rocky Mountains westward; the broad-leaved maple, so effective in the Pacific province as a shade tree, and, from its "curly" character, valuable for making furniture. There are hosts of other trees in the province, indeed British Columbia may be said to enjoy a larger variety than any other part of Canada.

One of the most prominent industrial developments of recent years in Canada, is that of the lumber business of British Columbia. For a while it lagged, but during the last few years, owing partly to the great growth of population in the treeless prairies of the North-West and Manitoba, it has shown wonderful vitality. Not only this, but Eastern Canada and Great Britain as well as the United States have shown that they require several products which can be economically turned out by the British Columbia lumberman, while the Orient is only beginning to hint its needs. The manufacture of wood pulp and numberless by-products present, too, almost limitless possibilities.

Even in this region, however, peculiarly favored as it is by climate for the production of vast and varied timber wealth, the problems of forestry are beginning to present questions. In the past, great wastefulness has been a feature of most of the lumbering enterprises in the far West; but, already an interest is being taken in the question how best to conserve these assets of trees, so as, without hindering any legitimate industry, to keep them for the enjoyment and enrichment of future generations. And this is what the science of forestry can teach—how to eat our cake and have it.

THE TRUST COMPANY IDEA AND ITS DEVELOPMENT.

(5)

The Australian Trust Company.

Australians do not believe in the financial departmental store. No provision has been made in the Commonwealth, as in Ontario, to limit the number of trust company charters that are granted so that they will not exceed the public demand, but they have done their best to frame their legislation so as to confine the trust company to its duties as trustee, and to prevent the abuse of incidental powers that are granted for this object.

Incorporation is obtained under the General Companies' Act, but power to act as executor and administrator must be granted by special act of Parliament, and the incidental powers that are given by the Legislature are limited to such as are strictly incidental to the functions of a trustee. Some companies are permitted to guarantee the fidelity of an executor. All companies are responsible to the Supreme Court, and accounts are from time to time filed there, which accounts are open to inspection by the public. Every company is required to make a deposit in cash or securities with the treasurer of the State for the proper performance of its fiducial obligations.

The public trustee of New Zealand is not found in the other Australian colonies, but in Queensland and Western Australia there is a public official deputed to act as trustee in the case of unclaimed and intestate estates. Evidently, the trust company idea is firmly established in Australia. There are thirteen trust companies in the Commonwealth, some of which have branch offices. Of these thirteen, five have their head office in Melbourne, one in Ballarat, one in Bendigo, two in Sydney, one in Adelaide, one in Hobart, one in Launceston, and one in Perth, They all pay a fair dividend to their shareholders. In 1903, the total net profits of the thirteen companies was £39,273, and the value of the estates in hand is estimated at between £21,000,000 and £22,000,000. (1).

The first trust company to be formed in Australia was the Trustees, Executors, and Agency Company of Melbourne, which was incorporated in 1879. This company, which to-day ranks first in the Commonwealth, has a London agency at 1 Delahay St., Westminster. It has a subscribed capital, with double liability, of £150,000 of which £90,000 is paid up, and a reserve fund of £11,043. The amount at the credit of estates, trusts and clients, on the 30th June, 1903, was £7,467,202, and in the last sixteen years it has sold over £3,000,000 of real estate. It is on record that the promoter of this company received his inspiration from the local demand for a perpetual executor, and the example of a successful trust company which had been established in South Africa. (2)

The Australian press generally speaks of the usefulness of the trust company in terms of high praise. Thus, "The Age," on 12th June, 1901, says: Trustee companies are to most people preferable to private trustees, inasmuch as the best management of any estate can be insured, owing to specific knowledge being brought to bear on all points, as well as to the fact that companies cannot walk off with the ease of a private individual. The Australasian Insurance and Banking Record, on 21st December, 1903, says: "The usefulness of trustee companies in Australia has long been demonstrated and the record of progress which we give is satisfactory." And "The Australasian," in its Jurist column, under date 15th August, 1903, says:

> "One is led to wonder at times, on the one hand, that any testator cares to trust the execution of his will to a friend, who may die just after his own decease and leave the administration of the estate to strangers; and, on the other hand, that any private person is ready to take the risks of trusteeship. After the death of the trustee, the children of the testator may bring proceedings against the trustee's representatives for perfectly innocent breaches of trust, and also for breaches of trust by a co-trustee, which the deceased trustee never dreamt of, but which the court thinks he ought to have discovered. The assumption by individuals of trust obligations is an integral part of the system of English law, but in these States the formation of trustee companies with staffs whose duty it is to look after estates and see that the rights of beneficiaries are preserved, gets rid of the necessities of the situation, as experienced in England, and the marvel is that any person who is making a will should hesitate to appoint such a company to stand in his shoes when he is gone. In the uncertainties of death the certainty (morally speaking) of an efficient trustee is a rock to which the wise will cling. The fixed charges of the trustee companies are a kind of insurance premium against the ordinary risks of trusteeship."

THE TRUST COMPANY IDEA IN OTHER COUNTRIES.

(6)

The South Africans have copied the United States in building the trust company business upon the foundation of life insurance. In Johannesburg there are four trust companies, two of whom also do life insurance. There are no other trust companies in the world, except in Mexico, which have been invaded by the American spirit. In the city of Mexico we find the Mexican Trust Company, a purely American foundation, and one or two other companies, which have lately been organized. (1).

In the older countries the ground is fairly well covered by other machinery. In India the agency firms attend to the management of estates and perform many of the functions of a trustee. Their wealth and prestige, combined with good management, commands public confidence. In Germany, Austria, and some other parts of the continent, mortgage banks exist in great numbers. These institutions, originally created to aid agriculture, undertake some classes of the work assumed by trust companies in the United States, such as receipt, exchange, and distribution of securities in cases of organization, reorganization and consolidation.

In France, the Boards of Trade, Chambers of Commerce, and other quasi governmental bodies act as trustees in matters of bankruptcy, receivership, and liquidation, and institutions, such as the Société Generale, the Crédit Lyonnais, and the Crédit Foncier, undertake on a huge scale, with remarkable success, what is perhaps the most prominent function of the American Trust Company, viz., to gather together the long-time funds of the community, which are not wanted in daily commerce, and to lend them on the pledge of first-class securities.

It is interesting, incidentally, to note that in

---

(1) The Australasian Insurance and Banking Record, December, 1903.

(2) Report of the select committee of the Legislative Assembly of Victoria, on proposed bill of incorporation, 1879.

these countries, where people do not, as in America, move from place to place, credit is more highly valued by the borrower, and the banks are, therefore, able to lend vast sums of money in small amounts to poor men on personal security, where elsewhere they would be forced to pay exorbitant rates of interest.

ERNEST HEATON.

(1) Paper by Hon. Chas. Francis Philips, read before the meeting of American Bankers Association, held at Milwaukee, 16th Oct., 1901.

TOWN AND VILLAGE STREETS.

The poor condition of many streets in Canadian towns is the result of neglect. The council will perhaps spend a large sum in putting a principal street into good condition, and then for a series of years do nothing to maintain it. Possibly they think no maintenance is necessary. But the frequent poor condition of roads and streets may also arise from ignorance. It is said, in an article on street cleaning, by the Municipal Magazine, published in St. Thomas, that town and village authorities generally consider that only asphalt or vitrified brick require daily cleaning, and that a broken stone or gravel roadway, if scraped two or three times a year, has had all the attention it requires. This is a great mistake, for no kind of street will respond more satisfactorily to constant care than will a macadam roadway. In a paper on the subject of street cleaning and repair, Mr. A. W. Campbell, instructor in roadmaking for the province of Ontario, declares that a macadam roadway, if it receives the attention commonly given to an asphalt pavement, will resemble asphalt in many respects. It will not be dusty, it will not be rutted, but will have a smooth, attractive appearance. He instances the town of Galt as one of the few that have followed the practice of keeping its main and other macadam streets in proper repair. In that town, "a man with a broom and cart is in constant attendance to remove dirt, fill depressions and keep the surface drainage unobstructed. This is the only manner in which a town can derive complete satisfaction from a macadam roadway. In the end the cost is less, or at least no greater, than if the street is neglected until extensive repairs are necessary. The method of constant attendance, in point of cost, merely means that small amounts are paid out annually instead of a lump sum, while the results are much more satisfactory."

Attention should be given to what this expert says about the result of allowing mud and dirt to accumulate on the surface of a street. As any observer knows, and as the unobservant do not appear to see, the amount of mud and dirt that accumulates on any pavement is very great. "How great this is can best be understood by observing the quantity removed from an asphalt pavement. It is largely brought from side streets by the wheels of vehicles. The quantity is no less for a macadam than for an asphalt street, and if allowed to remain on macadam does much more harm than it would in the case of asphalt." Mud on macadam or gravel roadways, says Mr. Campbell, assists wear, retards surface drainage, and for permanently improved streets in towns there should be a system for its constant removal.

OUR AUSTRALIAN LETTER.

Trade does not revive in Australia as it was hoped it would do on the advent of good seasons. It is duller in New South Wales than in the other States, though neither Queensland nor Victoria is too prosperous. City missionaries say that there are more men out of employment in Sydney and more distress than has been experienced for nearly thirty years.

Failures and arrangements with creditors are more than unusually numerous. The business man has one explanation for this state of things—"Labor politics." The labor party without holding office has ruled this State for ten years, and there can be no doubt the result has been a tendency to deprive the workingman of initiative, self-reliance, and a determination to do his best, and to deter capital from entering into new enterprises. The business man, however, does not trouble himself why it is that there are such "Labor politics." It is due to unwise action of employers, who have shown small judgment in their dealings with their employees, and the indifference of the business classes, who will not take their fair share in the work of securing good government.

The labor party is in power in the Commonwealth, and is the dominant section of the coalition that rules Queensland, but the labor party in office is less dangerous, because more moderate when actually governing than when it is only King-maker. The Commonwealth Government has only twenty-six votes in a House of seventy-five, and yet many men opposed to it hope it may continue in power as the best means of showing the workers the limitations of Government. The other two factors in the Commonwealth are endeavoring to form a coalition, and if they succeed, of which there is some doubt, the Commonwealth Government will live about a week longer. One of the members of the Government is Mr. Mahon, once a journalist in Canada.

In consequence of this state of the labor market there is a great desire to go to Canada on the part of workers. A number of fine young fellows are going, but fortunately for Canada many of the class who desire to go have not the money to pay a passage. They endeavor to stow themselves away, and the "Miowera," despite watchfulness and examination of her holds, found six undesirables on her last trip. She left them in a Suva gaol.

The Canadian-Australian Line is putting on a new twin-screw ship, the "Manuka," for a trip or two. She is said to be the finest ship of her size afloat. Her passenger space is filled, and steerage accommodation has been made in the hold and extra cabins constructed. Among her passengers is Mr. D. Kircaldie, one of the Railway Commissioners of New South Wales. He was offered but refused the position in Victoria now filled by Mr. Tait, of Canada. He will be at the King Edward, Toronto, and the Windsor, Montreal, between the 20th of June and the 1st of July, and Canadian manufacturers of railway material might make a note of it.

The Royal Commission appointed to investigate the bribery charge against Dr. Montague has concluded its work and reported. As I have intimated previously, there was no desire to push the enquiry. Rev. John McNair wanted to be represented by counsel, but was refused, and there was a disposition not to call him as a witness, though it was clear that he knew more about the matter than anyone else. A document turned up which required that he should be called, but he was severely repressed when he volunteered testimony. He got in one point, however, when he stated that Dr. Montague had been to see Sir Alexander Peacock, the Premier, and returned very much disappointed. He said to McNair, who was an officer of the Foresters: "Draw me a cheque for fifty pounds. I'll get under his skin yet." The counsel for the Government prosecuting the enquiry did not make a speech, though the numerous barristers acting for Sir Alexander Peacock, the Foresters and Dr. Montague did. The finding of the judge is all the more severe from the moderation displayed. He found that Dr. W. H. Montague did offer money to Mr. Mitchell, a candidate for Parliament, for the purpose of corruptly influencing him, and did give money to Sir Alexander Peacock, the Premier, with the object of corruptly and improperly

influencing him. He also declares the society of Foresters to be guilty of corruption and responsible for the action of its agent, Dr. W. H. Montague. This last finding, which was unexpected, was due to the extraordinary affidavits put in by the officers of the society, the failure to put in evidence which it was declared it wanted time to put in, and the failure to disavow the acts of its agent, and also the fact that the money came out of the society's treasury.

The effects of the scandal have been serious. Sir Alexander Peacock resigned his position as leader of the Opposition some time ago. The work here of the Independent Order of Foresters, Dr. Oronhyatekha's organization, has been paralyzed, if it has not been destroyed. Canada has got a worse name over the matter than would appear to be reasonable to a Canadian. The Foresters have become known as a Canadian organization, and its agents, for the purpose of inducing Canadians to join it, have claimed that Sir Wilfrid Laurier, Premier of the Dominion; Hon. G. W. Ross, Premier of Ontario; Hon. G. E. Foster, ex-Minister of Finance, and other prominent Canadians, judges included, are not only members of it, but some of them are closely connected with its workings. The organization, if this be true, should take steps to clear itself of the charge of participating in the crime which Judge Hood has fixed upon it, both in its own interests and in the interest of the reputation of these distinguished public men.

It has been circulated that the operations of Dr. W. H. Montague were not confined to Sir Alexander Peacock, nor to the State of Victoria; and in the singular affidavit the doctor sent out in his defence he stated that it was his practice to help his friends in elections. The enemies of the organization have, therefore, pointed out what small chance the policy-holders have of getting their money if, in addition to general extravagance, its funds are drawn on for election purposes. The heads of the organization should move, and move more quickly. F. W.

Sydney, New South Wales, May 16th, 1904.

OUR SAINT JOHN LETTER.

No body of men in the city have had more work in the past week than the firemen. They have been called out at all hours of the night and day by alarms, some of them false alarms, some for incipient fires, and some for blazes of considerable magnitude. Two of the fires were particularly bad. One burned the corn meal mill of the Dominion Milling Company, occasioning a loss of upwards of $50,000. With it was destroyed a coal shed belonging to the Intercolonial Railway. The shed was not valuable, but it was filled with coal, on which there was quite a loss. The other fire took place on Saturday evening, and destroyed five large wooden buildings on Mill street, near the Intercolonial passenger station. The buildings were in the centre of a wooden district, and were occupied as stores and dwellings. The insurance loss is figured at about $14,000, and the actual loss at close to $40,000. A number of those burned out were people of the poorer class who did not carry insurance because of the heavy rate, 3½ per cent. A Chinaman, Fooh Wah, who had opened a novelty store on Saturday morning, had his stock worth about $4,000, completely wiped out. W. A. Wetmore, a dry goods merchant, also lost heavily. The others were dealers in a smaller way, and their losses will not figure so high. There is a suspicion that some of the recent fires were of incendiary origin, and a careful investigation is being made to try and discover the guilty parties.

On one or two occasions mention has been made in this correspondence of the McAdamite Metal Company, now it is announced that the factory of that material in this city is to be reopened. C. D. Jones, a local man, has been appointed resident manager, and has gone to New York to spend a time in the head office of the company. Some New Brunswickers have a large amount of money invested in this enterprise, and they seem confident that ere long the metal will be in general use, superseding brass in many of the uses to which it is put.

All prospects of additional deep-water wharves being built at St. John during the present year were knocked on the head by Mr. D. McNicol, general manager of the Canadian Pacific Railway, who visited here a few days ago. Mr. McNicol said last winter's business had not been profitable and that the company were not prepared at the present time to discuss further expenditures. There is now talk of turning the harbor over to the control of the Dominion Government. It is felt that the burden of making improvements to carry on the export business is greater than the city can bear, and that it would be better to put the whole harbor in the hands of the Government to do with as it thinks best. Agitation along this line will likely take definite shape at an early date. Some years ago the citizens voted down a proposition to place the harbor in commission. Then there were many private wharf owners, but now there are very few private owners, the city having acquired most of the private wharves. The harbor is a source of revenue at the present day.

The outlook in the lumber market is so bad that many New Brunswick millmen are talking of leaving their logs in the streams until another season, with the hope that prices will then be better. Bank logs that sold last year for $13 per thousand, are now selling for $7. A reason for this is believed to be the over-production due to the fine prices prevailing during the past year or two. The only shipments of lumber now being made are on orders booked previous to the British depression. These will not keep the mills busy more than a month or two. Stagnation in the lumber business is a serious thing in New Brunswick.

St. John will be in holiday attire next week when the people are to celebrate the 300th anniversary of the discovery of the St. John river by Champlain. It was on St. John's Day, June 24th, 1904, that he sailed into this harbor saw the river and named it in honor of the day. The Royal Society of Canada is to meet here, and distinguished Canadians and visitors will participate in the ceremonies. English, French and American warships will lend their presence, and a gala week is anticipated.

Saint John, New Brunswick, 14th June, 1904.

TRADE WITH NEW ZEALAND.

Mr. Larke, the representative of Canada in New South Wales, has returned from his New Zealand trip. He found in every city, says our correspondent in Australia, a strong desire to do business with Canada, but as yet the volume of trade was not large, though larger than either the Canadian or New Zealand returns show. The chief obstacle is the inability of so many of the Canadian manufacturers to undertake any foreign trade just now. Some who do are shipping the orders sent slowly. Just fancy it taking two years and a half between the giving of an order and the receipt of the goods! And yet a newspaper publisher turned up his books and asserted that was the time, and added: "When I got the paper, it was poor stuff." Another obstacle is lack of direct freightage. All Canadian goods come via Vancouver and Sydney or via New York. The Government is negotiating with the Canadian steamers to make a New Zealand port instead of Brisbane.

Many New Zealanders are going to Canada seeking to make arrangements with Canadian exporters, but care must be taken that an agent understands the goods entrusted to him. There is the same disposition in New Zealand as elsewhere on the part of some manufacturers' agents to undertake to sell everything they can get hold of, and the consequence is that some Canadian goods are badly handled there. New Zealanders certainly expect that Canadians will take large advantage of the preferential tariff, and think if they do so the list of favored articles will be extended. The Massey-Harris Company sell over sixty per cent. of the agricultural machinery imported into New Zealand in the face of as sharp competition as there is in Canada. This is an indication of what can be done by the use of proper methods. Canadian goods are certainly in favor, and Canadians should take advantage of the opportunity.

FAR WESTERN MINING NOTES.

By a Man on the Spot.

Notwithstanding all that has been said regarding business "picking up" in the Kootenay district, there yet remains much room for improvement. Nearly every mining town or camp has at its inception been "boomed." Business premises far beyond the needs of the young community are rushed up, the place wears an air of prosperity for a time and business "hums." After a while dreary lines of empty stores, that are, of course, the aftermath of the giddy boom days, invest these remains of brighter times with a depressing and dejected air. There is nothing more mercurial than a mining camp: it is either up or down. "When times are good, they are very good, indeed, and when they are bad, they are horrid."

The Boundary country is slowly recovering itself. The mines are turning out more ore now than at any time in their history. The people know where they are at, the fun, flare, and music are hushed, the propositions are being worked in a business way, and the country is now earning its own living. The froth chaps are blown away; the solid business man remains, and will tell you that he is doing a nice, steady business. Such towns as Greenwood, Phœnix and Grand Forks have, so to speak, come through the fire; they are slowly but surely establishing themselves as permanent camps. Month by month the pay-rolls are growing, and from the least to the greatest all share in an unbounded faith in the ultimate recognition of their own particular locality as a place of fame and bonanza for the investor.

Rossland just now is guessing; all her business men are in a quandary, and don't know where they are at, and won't until this Le Roi deal goes through. The way this property has been worked recently has been most whimsical. Three or four hundred men put on the pay-roll. Times are good. Merchants smile. A sudden turn of the crank: an order comes from London, and the pay-roll is cut pretty close to the neck, and our business man is "Jim Dumps"; and men discuss under their breath what these mighty ones who hold them and the fortunes of the camp in the hollow of their hands, will do next. The Slocan is now endeavoring to drink in the Government restorative, the bonus on silver lead. In silver lead properties up to quite recently zinc has been one of the bugbears of the miner. If his ore went over a certain percentage of zinc he was fined 50 cents per unit, or often got $5 less than nothing a ton at the smelter because of the presence of too much zinc. Tons upon tons of this valuable ore in consequence of this law have been tossed over the dump. Now than is changed. Representatives of a Belgium concern are at Snowdon, and are buying zinc, the price of which is now higher than lead. The miner is now no longer discouraged when in tunnelling or cross-cutting he runs into a vein of zinc. He is able to sell that product; and now, as often was the case formerly, does not quit the working in disgust when he finds himself up against a body of what was then regarded as objectionable ore. In this connection there is a little transportation difficulty. On the other side zinc is carried from Pueblo, Colorado, to Iola, Kansas, 800 miles, at the rate of $2 per ton, while on the C.P.R., from Sandon to Minnesota Transfer, a distance of, say, 1,500 miles, $8 per ton is the charge. The C.P.R. quotes a rate from Sandon to St. John, 3,600 miles, of $11 per ton; from thence to Antwerp, 2,500 miles, by water freight only $2 per ton is charged, all of which shows that something remains to be done in modifying railway charges so as not to hamper unduly the development of our mining lands.

THE CALGARY SUMMER FAIR.

The prize list of the Calgary Summer Fair is now ready for distribution, and bears evidence that the directors are determined this year to make a strong bid for a large exhibit of live stock. The rules and regulations have been entirely recast, and arranged in more convenient form. The class for agricultural horses, which has in the past been very popular, has been increased in value. In many instances sections have been nearly doubled. Another satisfactory feature is the increase in the prizes for saddle horses, the Territories being especially fortunate in the quality of that class of live stock.

It is, however, in the cattle classes that the most sweeping changes have been made. The Shorthorn class has been more than doubled in value, and it is now reasonably certain that this class is going to be second to none west of Lake Superior, a total of $700 being offered for competition. The Hereford class has been raised from $140 to $400, chiefly due to the action of the American Hereford Breeders' Association in giving a grant of $200.

In the sheep, swine and poultry classes considerable changes have been made. Better prizes than hitherto are now offered for pigs of the bacon breeds. The poultry classes have been entirely reconstructed, and the directors feel that an honest effort has now been made to bring out a good poultry exhibit. The ranchers' and farmers' wives have not been overlooked. Large increases have been made in the domestic departments. The class devoted to ladies' work has also been entirely reconstructed and materially augmented.

Western Canadian exhibitions lose much of their interest by reason of the decision of the Retail Implement Dealers' Association not to exhibit at fairs. At British shows the implement classes are among the most instructive and attractive on the grounds. Classes are made for implements in the Calgary prize list. The implement men will, however, probably be conspicuous by their absence as usual.

Copies of this prize list may be obtained on application to the manager of the Calgary Fair, Calgary, N.W.T.

A ST. LAWRENCE TRIP.

Leaving Toronto by the R. and O. steamer "Spartan" on Tuesday night in a drizzle of rain, we touch at Port Hope, Cobourg and Brighton, and reach Trenton about nine on Wednesday morning. This after passing along the Murray Canal, a Government work, through the neck of land which connects Prince Edward County with the mainland of Hastings, formerly the Carrying Place. A succession of quiet pastoral views is to be had along here, the luxuriant spring greens giving freshness everywhere. At Trenton, where the river Trent, of lumbering fame, pours its waters into the Lake, we find the water so high as to be level with the top of the wharves, as it has been all spring, and to flood even the dry dock, where the venerable propellor "Clinton," condemned by the authorities, exhibits the remains of herself on the ways.

For forty, perhaps fifty, years the Messrs. Gilmour have had sawmills and lumber camps on this river. Their substantial brick mills rise on the east bank at Trenton, and their lumber piles and booms appear to encircle the harbor. A curious, antiquated, wee side-wheel steamboat of the Robert Fulton type (a boy-sized boat with man-sized upper works and a top-heavy funnel) was towing a schooner overladen with fence-posts and telegraph poles to the open lake. Beyond them a sort of Mackinaw skiff, manned by four raftsmen of the "Johnnie Courteau" order, armed with pike-poles instead of oars or paddles, patrolled the bay, apparently for stray logs. Occasional fishermen arrived from inspecting or stripping their night lines. It was curious to see scores of boxes of Mediterranean fruit discharged from our steamer upon the wharf of a place celebrated, as Trenton is, for its output of native fruits, especially apples and berries. There are two fruit and vegetable canneries here; and the walls of the four-story stone warehouse at the wharf, burned last autumn, had contained a refrigerating plant for export fruit. Not less than a thousand barrels of apples were consumed in that fire.

A pretty place, Trenton; quaint-looking and quiet. As we approached it, a striking feature was a conical wooded hill, arising, as it were, in the midst of the town, with two graceful church spires relieved against it. Across the bridge are three more churches. This bridge is of the old-fashioned

wooden covered kind, with a more modern steel draw. Old buildings of stone, with the solid look of manor houses of a former time, are to be seen here and there. Brick dwellings, too, of a more recent date, enclosed in handsome grounds, some of them probably the residences of the Gilmour proprietary. For it is presumably as true of this neighborhood and the Messrs. Gilmour as of the Saguenay and the Messrs. Price, that: "Whatever you see round here, afloat or ashore, steaming or moving, mostly belongs to Price Brothers." This was declared gravely to the writer one day at Tadousac as he looked and wondered at the panorama.

The number of sailboats, skiffs and canoes to be seen afloat indicated that the residents of Trenton take their share of the boating and fishing delights to be had on this charming Bay of Quinte. By the way, we heard an old-timer rebuke one of our passengers by saying that the word must be pronounced, not as the English spelling would indicate, but as if spelled "Kantay." The Trentonians have a handsome stone post-office, and the down-town portion of the main street contains good brick shops and banks. Could we have gone ashore—which the high water would not permit—we might have seen more life and motion in the town. But as it was seen from the deck of a steamer, discharging freight and taking on cheese and fruit-crates, Trenton gave one the impression of a town where life is not too strenuous, and where there is plenty of summer recreation to be had in very agreeable surroundings. J. H.

16th June, 1904.

FIRE INSURANCE.

Under the name of the Dominion Messenger and Signal Company, Limited, Toronto, a concern with a capital of $100,000 has received a Dominion charter for the operation of a general messenger business, and of a signal, police, burglar, fire alarm and time service apparatus, of electrical call-boxes, watchmen's signals, etc.

At a general meeting of the Winnipeg Board of Trade, held a few days ago, much of the discussion hinged upon the proposition that the city needed more and better protection against fire. Not only was there a strong opinion expressed in favor of increased water pressure, but a resolution was passed, urging the city council to purchase another engine, an aërial ladder, and a water tower.

The growing recognition by the Canadian Manufacturers' Association of the necessity in Toronto for better protection against fire took crystallized form on Tuesday last, when a deputation asked the city council to consider the question of providing a system of special high-pressure water mains for fire purposes only. The reply was satisfactory, in that it assured the manufacturers that the Board of Control intended to take up the whole question, and at a near time to fix a date at which it would be glad to hear the views of owners in greater detail.

"How long will it be," asks the Insurance Age, "how long before the fire insurance companies in the United States will, by concerted action, stamp upon and kill the evils connected with loss adjusting? Too often a dozen men, or twice, or thrice that number, are permitted to gather around the ruins left by some paltry fire, only to select two or three to do the actual work, while the remainder junket, rest or roister. We would take no man's occupation from him. so long as in pursuit of it he was rendering a useful service to his employers. But many a damaged stock or building is surrounded by enough men to pick it up and carry it away. Not thus are expenses reduced and dividends paid."

The mayor of New York has gone a step further than some of the other theatre building reformers, and has signed an edict requiring that all new theatres shall have at least one front on the street, and in such front there shall be suitable means of entrance and exit for the audience not less than 25 feet in width. In addition to these entrances and exits on the street, there shall be reserved for service in case of an emergency an open court or space in the rear and on the side not bordering on the street where said building is located on a corner lot, and in the rear and on both sides of said building where there is but one frontage on the streets as hereinafter provided. The width of such open court or courts shall be not less than ten feet for a seating capacity of not over one thousand people, fourteen feet where it is above one thousand and not more than eighteen hundred people, and fourteen feet in width above eighteen hundred people.

A LIVE BOARD OF TRADE.

We reprint below a circular issued last week by the Board of Trade of Kings County, Nova Scotia, as an instance of how such a body may intelligently help the interests of a district. Kings County is one of the favored counties of our Atlantic provinces; the Bay of Fundy and the classical Basin of Minas wash its shores; it is one of the counties which form the famous Annapolis Valley, since that river flows through it. Kings is an admirable horticultural and pastoral locality, and contains the pretty towns of Kentville, Wolfville, Aylesford, and Berwick. We quote the circular, signed by the secretary, Mr. H. G. Harris:

Kings County Board of Trade will hold a meeting in the opera house, Kentville, Thursday evening, June 16th, at 7.45 o'clock. Prof. James Fletcher, of the Central Experimental Farm, Ottawa, will give an address on injurious insects, and how to treat them. Prof. Hodson, Live Stock Commissioner, for Canada, will also deliver an address upon a subject of interest to all farmers. His address will be illustrated with lantern views. Prof. Fletcher's subject is one that should interest every fruit grower in the Valley, and should not be missed. Ladies are particularly invited to be present and hear of the treatment of plants and shrubs. The Kings County Board of Trade invites everyone to be present at this free lecture. Most interesting discussions are likely to arise.

ANSWERS TO ENQUIRERS.

S. B., Montreal.—If you will address our advertising department you will receive some suggestions that may help you to make up your mind. It is, as you say, possible to squander some of the money spent on advertising for want of "Knowing how." If you want advertisements to be read you must take some pains with them. The most irregular and wild-worded advertisements are not always the best. It is not well to make people laugh at you. For instance, a western farmer put this at the conclusion of a notice of a farm for sale: "The surrounding country is the most beautiful the God of Nature ever made. The scenery is celestial, divine; also two wagons to sell and a yoke of steers." This may be funny, but it does not convince any body.

Agent, Winnipeg.—(1) It was on the 1st July, 1902, that the event happened. (2) The paid capital of the Canadian chartered banks on 30th June, 1902, was $69,584,000, and their total assets at that date were $581,876,000.

Enquirer, Rat Portage.—The fire waste of Canada and the United States for the first five months of the present year was $161,887,000; for the same period of last year it was $69,070,000; of 1902 it was $76,860,000, and of 1901 it was $79,336,000.

TRADE OPENINGS.

The following were among the enquiries relating to Canadian trade received at the Canadian Government Office in London during the week ending 3rd June, 1904:

A firm of hosiery manufacturers make enquiry respecting the opening that exists in Canada for such goods as they turn out. A wholesale agent in Edinburgh asks to be referred to Canadian houses requiring the services of an agent (not buying) to introduce or extend their butter trade. Enquiry is made for the names of one or two leading Canadian importers of galvanized plain steel sheets. A London general, export, import merchant and agent is looking out for Canadian shippers of flour, butter, etc., as

he is in a position to dispose of considerable quantities. A gentleman with business connections in South Wales and the West of England is shortly leaving for a trip to Canada, and desires to meet millers and others contemplating appointing a representative in England.

CANADIAN YEAR BOOK.

The seventh issue of the Canadian Year Book, which brings it up to 1904, is to hand, and, as usual, is wonderfully replete with useful information. The list of post-offices in Canada forms a valuable gazeteer, in itself worth the price asked for the book. The militia list, and one of members of the Senate, House of Commons, etc., names of collectors of customs, tariff changes, etc., make it a handy book to have at one's elbow at all seasons. The portraits of many prominent public men add largely to its interest, and help, with other features, to prevent its being thrown in the limbo of dry-as-dust literature of the purely reference type found on back book shelves. The records of walking, running, racing, swimming, bowling, and all forms of athletic sports are also to be found within its 350 odd pages, so, as may be seen, this is a book which should appeal to everybody, young and old. It is published by Alfred Hewett, Toronto; price, 25 cents.

BANKING AND FINANCIAL ITEMS.

The Canadian Bank of Commerce has opened a branch at Lloydminster, Saskatchewan.

The directors of the Sao Paulo Tramway Company have declared a quarterly dividend at the rate of 8 per cent. per annum, an increase of 2 per cent.

The Hudson's Bay Company have declared a dividend of 35s. per share, together with a return of £1 per share. This good result is the outcome of the company's extensive land sales.

The annual general meeting of the Trusts and Loan Company of Canada was held in London on the 26th ult., Mr. Charles Morrison, the president, in the chair. A dividend at the rate of 6 per cent. per annum was declared for the six months ending March 31st last, and a bonus of ½ per cent. upon the capital of the company, and the sum of £19,501 was carried forward as a reserve fund. It was stated that owing to the large influx of new settlers into Canada the company's business has been on a considerably increased scale during the last year or two.

Senator Domville's bill to make the British shilling legal tender in Canada meets with considerable opposition. The argument that the statutes provided a value for the English sovereign and the American eagle but not one for the shilling is disposed of by the opponents of the measure by pointing out that the eagle and the sovereign are gold coins, their intrinsic and face value being the same, while the intrinsic value of the silver shilling is much below its face value. Canadian silver also is not a legal tender in Great Britain, so a refusal to make the British shilling legal tender in Canada cannot justly be construed there as an unfriendly act. The Department of the Interior has made arrangements for the exchange of money at authorized rates at Halifax, St. John and Montreal, so that the chief raison d'être for the proposed change, namely, to protect newly-arrived immigrants from being fleeced, becomes unnecessary.

We thank Messrs. Baillie Bros. & Co., stock-brokers, Toronto, for a copy of a tabulated sheet issued by them showing at a glance the important facts concerning the more active of the Canadian securities, comprising banks, steam railroads, street railway and light companies, navigation companies, industrials, and insurance, trust, and loan companies, sixty-six in all. To show the completeness of the information we give the headings of the columns into which the table is divided, viz.: Par value of shares, paid-up capital, amount of bonds when such exist, reserve fund, percentage of reserve to capital, present amount of dividend, and when payable, together with its yield at current prices, earnings for the past four years, with the percentage these make compared with capital, date at which the fiscal year ends, highest and lowest quotation records for the past 4 years. The sheet is one which may be profitably preserved for reference.

OBJECTIONS TO THE METRIC SYSTEM.

The Editor, Monetary Times:—

Sir,—Advocates of the metric system claim sometimes that its compulsory establishment is opposed only by theorists, while the practical men, the men who have to do with machinery and the measurement of metals and other materials requiring delicate adjustment of their parts, are a unit in its favor. That this is far from being the case, I think I can show to the satisfaction of your readers. I will give some illustrations from the United States because the Americans are looked upon *par excellence* as a practical people, not likely to be frightened away from the making of any drastic change owing to its mere novelty. It is perhaps generally known that a bill is now in the hands of Congress making it compulsory from the present time for all the Government Departments to use the weights and measures of the metric system, and making these the legal standard for the whole of the United States after January 1st, 1907. Against such a compulsory change the following bodies, who certainly may be considered as being possessed of some weight of a practical and scientific kind, have already taken their stand: the American Society of Mechanical Engineers, the Railway Master Mechanics' Association, the Furniture Association, the National Metal Trades Association, the Association of Machine Tool Builders, the Society of Naval Architects and Marine Engineers, and several others.

Not only this, but it may be mentioned that not long ago a ballot was taken of members of the National Association of Manufacturers, an important organization numbering some 3,000 members, including many of the most prominent manufacturers in the country. To these was sent a circular embodying explicit questions such as to whether in their foreign trade there was, in their opinion, any call for adopting the metric system in their factory work, what would it cost to adopt, and would this be compensated for by any equivalent advantages, and several other questions of a similar character, adapted to draw out definite information on the advisability or unadvisability of making such an important compulsory alteration. The result of this ballot, which was taken part in by 774 members, is well worthy of study by those who still cling to the notion that the opposition to the metric system is only carried on by old fogies.

In practically all lines of engineering, the vote was distinctly adverse to the proposed adoption of the decimal system, in many cases overwhelmingly so. In the metal industries, and more especially in those characterized by extreme refinement of measurements, such as machine tools, and steam engines, the feeling was decidedly antagonistic to the change. To the question, "should the system be adopted in the government departments," 82 per cent in the metal class answered no, and 70 per cent. in the non-metal, while of the remainder, several were non-committal. Among the makers of electrical machinery, the class supposed to favor greatly the metric measures, the adverse vote was in proportion of 12 to 8. As to the probable cost to manufacturers individually of making the proposed change in their methods of measurement, the great preponderance of opinion was that it would be simply enormous, and that the benefits to be derived would be so small as to bear no comparison therewith at all.

These facts, which could be added to quite easily on a large scale, should serve to show, I think, that the objections to the metric system are far from being the mere whims of an out-of-date generation which some writers affect them to be.

"ANTI-METRIC."

June 15th, 1904.

THE CANADIAN STORES, LIMITED.

A year or two ago, notably on 24th October, 1902, we devoted some attention to a scheme which was intended to increase export business from Canada to the United Kingdom, the name being first the Canadian Produce Corporation, and later the Canadian Stores Company, Limited. It was being pushed by Mr. Walter R. Nursey, who came out to this country some months ago to get stock subscribed and to appoint local directors. The venture did not seem to take as quickly as expected, and for some months we have not been hearing of the project, but information comes to us from London under date of 30th May, that Mr. Nursey sailed a day or two before for Canada, and at the same time sailed Mr. Thos. Burbidge, general manager of the company. Their purpose in coming is said to be to get some further subscriptions to the stock. It was stated not long ago on their behalf, if they did not make the statement themselves, that £100,000 or £150,000 of stock had been subscribed for in Canada, but this cannot be true. All we have been able to find subscribed in Canada is about $15,000, while the subscriptions of the public in the United Kingdom have been about £7,000, in addition to the £10,000 subscribed by the promoters, the provisional directors and their immediate friends, in order to go to allotment. We are told that Messrs. Nursey and Burbidge are going to give orders on behalf of the company for the Auxiliary Stores, of London and elsewhere, which are of somewhat the same nature as Harrod's stores. We have not found out much about the financial standing of the Auxiliary Stores, but it is certain that the Canadian Stores Company has not received the financial support it expected in the Old Country; and that Canadian capital has proved to be very shy of the enterprise, whose Old Country personnel has not appeared to give satisfaction. The London Economist of 21st May, devoted a paragraph to it, which is distinctly cautionary. "We have a recollection," says the Economist, "of previous companies having been formed with similar objects, which have not proved of advantage to those who invested in the shares. * * * At its inception it must be looked upon as very speculative." The capital is £200,000; of which £180,000 is offered for subscription.

DRY GOODS NOTES.

The Dominion Government has granted a charter to Revillon Brothers, Limited, a corporation already incorporated under French laws with a capital stock of 28,000,000 francs, enabling it to carry on a general fur trade in this country, including manufacture and exportation.

There was in Paris (France), last week, an interesting sale of tapestries belonging to the late Mlle. Leclerg, which attracted large crowds. The top price was reached by the Beauvais tapestry, entitled "Psyche entering the Temple of Hymen" by Boucher, which fetched $20,000.

J. McK. Dickson, of Edmonton, is purchasing machinery to open a flax and linen mill at that place. He asserts that Canadian flax is of a much superior character to that grown in the Old Country, being of a finer, smoother nature. In all probability the only processes which will be carried on in Canada will be the scutching or preparing of the fibre and the spinning or preparing of the thread. In this form it will be sent to Ireland or some of the other linen manufacturing centres to be made into cloth.

Extensive curtailment of production by domestic silk manufacturers, as well as the inclination to await the marketing of the new crop, induces a very inactive market for the raw article. Purchases are being made from stock in a filling-in way, and even those manufacturers who are well covered with orders are operating in a cautious manner, as a rule. A few exceptions have been instanced this week in which manufacturers have contracted for distant delivery at prices slightly below those openly quoted. The majority, however, fail to see any inducement for such speculative operations. Primary and secondary markets abroad continue very quiet. European manufacturers are no better employed than those in this country, and are buying silks quite cautiously.

A company is being organized in Moncton, N.B., to take over the old established Humphrey woolen mills in that city. Manufactures will be carried on on a more extensive scale, and the business extended, not only in woolen goods, but in clothing. The company will be known as John A. Humphrey & Son, Limited, with a capitalization of half a million dollars.

The turnover in the linen market of Belfast shows a slight falling off, but values remain practically the same as before, says a correspondent of the Drapers' Record. Brown goods show little change. The market is steady, and demand fairly general; but the aggregate of orders is perhaps hardly equal to that of previous weeks. Prices continue steady. Power loom linens for bleaching have been in moderate request. Cloth for dyeing and hollands is selling steadily, and unions are quietly firm. Dress goods are in fairly active request. Damasks are fair, handerkerchiefs quiet, and the making-up trades show a further slight improvement. The home warehouses have ordered bleached and finished linens to a moderate extent, and prices keep steady.

The wool market has continued to show little if any change, though manufacturers are closely following the course of the market. Business has been fair and continues so as the week closes for filling-in want mainly. Prices in face of a moderate request continue fully as stiff as ever, with stocks short and no pressure on the part of holders to sell. In the country, however, an entirely different state of affairs exists. At the different points where new clips have been offered, they have found ready buyers at top prices. Reports to hand yesterday were to the effect that one of the largest and most important clips, which it was not believed was even really for sale, has already been entirely disposed of at high prices. This will no doubt come as a surprise to both the manufacturer and dealer in this market, as this clip has never before been disposed of so early in the season. The increased cost of wool at inland points, means higher prices in the seaboard markets, and though some manufacturers believe that present figures on old clips are high and have been awaiting the arrival of new wools, believing that the market would then be more in their favor, are more than likely to find that the situation will be quite the reverse.—New York Journal of Commerce.

FOR GROCERS AND PROVISION DEALERS.

Canadian packers are endeavoring to secure minimum tariff treatment for hams exported from this country to France.

On the country boards this week cheese has been in moderate demand, and prices have been steady, 8 to 9c. being the usual range.

Brockville cheese board is agitating for a reduction in freight rates on cheese on the railways to Montreal. They were raised last year, unjustly it is considered.

The slight improvement in the demand for cheese keeps up. At the county board, the average sales during the past week ranged from 7¾ to 8½c., the greatest quantity selling at about 8¼c.

In a report from London, Eng., dated 27th ult., it was stated that the steady feeling which had recently set in on the cheese market had developed still more, and prices for Canadian had advanced 3s. The rise was attributed to buyers having been over-cautious, and discovering that they had missed the lowest point of the market, rushing in and forcing values up. Supplies of Canadian cheese in London are chiefly in the hands of retailers.

The Canadian commercial agent at Leeds, relates as an illustration of the goodness of the advice to ship apples to the interior centres of Britain direct, the following incident: The president of a chamber of commerce here, when in Canada last year with the deputation, bought three barrels

of Canadian apples, and had them shipped to his nearest port. The carriage of the apples from his port to the station, 30 miles, cost him 9 pence (18c.) more than the total freight from Montreal to the British port. The railway freights here, for short distances, are much larger than in Canada, but exceedingly good through rates from Canada can always be arranged. Canadian apples and other produce may be shipped very expeditiously to the interior towns in this district, not only via Liverpool, but also via Manchester.

A short pack of salmon is looked for by British Columbia cannery men. Some of the large establishments, we understand, will not be open at all, and the Packers' Association will not engage this year in trap fishing on the American side.

—Hardware merchants are by no means fully satisfied with the proposed clause in the newly-revised tariff giving a 60 per cent. preference to glass of English manufacture. It is claimed that this would act almost entirely in favor of one Canadian house, the other firms in this business handling only the Belgian article. Representations to this effect are being made to the Finance Minister.

—The provisions of the Factory Act have been extended, by an order-in-council of the Ontario Government, just passed, to about fifty industries, in addition to those included in the schedule heretofore used. The new regulations apply more especially to workshops employing women, including printing offices. Females are not to be employed at all in cleaning, moving machinery, nor where permanent injury to health is likely. Special attention is paid to sanitary appliances and the removal of noxious vapors.

—According to Dun's Index Number, the average commodity prices proportioned to consumption has made quite a considerable decline during the last month. Part of this result, of course, is due to the seasonable cheapening of food products, while some influence also is exerted by the increasing number of unemployed, which has to some slight extent weakened the purchasing power of the nation (United States). On June 1st the index figure stood at $100,951, against $102,208 a month previously, and compared with $98,936 on June 1, 1903. Dairy and garden products show the greatest fall, and meat and breadstuffs a very slight increase. Clothing also declined, while metals increased inappreciably.

—An indication of the recent growth of Montreal is to be found in the figures furnished by the building inspector of that city, M. Chaussé. He makes a comparison of twenty years ago with the present day, and intermediate dates, as under: In 1884 the value of buildings erected in the city was but little over a million dollars—last year it was more than four millions:

Value of buildings,	1884	$1,014,000
" " "	1894	1,634,000
" " "	1900	3,100,000
" " "	1903	4,094,000

The Knights of the Maccabees of the World propose to make some changes in their rates of insurance. Some time ago a commission which was appointed to investigate the finances of the order, reported that the monthly rate now charged for life protection was equitable at all ages, and sufficient to carry membership up to 60 years of age, but that after that the rate created a deficit each month equal to the difference between $5 and the amount paid, which deficit must be made up by the younger members. As a result of this it is now proposed to increase the rates for younger members, and also to raise the amount paid by members who have attained, or may hereafter, attain, sixty years of age, to $5 per thousand per month, not to include protection for total and permanent disability. The latter may continue his total and permanent disability protection by the payment of $4 additional monthly, on each one thousand dollars of life benefits carried. So it goes on!

—Some of the United States journals appear to be half surprised and half offended at the *nonchalant* attitude of Canadians in view of the strenuous efforts made by sundry good and sensible people in the New England States, as well as in the North-Western States, to get a treaty of reciprocity between the two countries. Such papers cannot understand why we will not jump eagerly to second any suggestion of the kind. But we have had our lesson from the magnates at Washington; and it was distasteful enough to determine us not to risk another rebuff. In thirty-eight years we have learned many things—among them self-reliance. And some of the Americans are beginning to respect us. For example, the Minneapolis Times says: "One thing is very evident and that is that the Canadians are going ahead without regard to the possibility of overtures for reciprocity from the United States. By the time our Government gets around to the subject again, the Canadians will have 'something to trade with.' It is greatly to be feared that we have missed an opportunity."

—The rapid march of things in Winnipeg is illustrated, among other things, by a statement made the other day by the Winnipeg Free Press with respect to the amount of buildings going on in that city. Up to 6th June, the aggregate cost of building for which permits were issued by the city building inspectors this year has passed the three million dollar mark already. A comparative statement of permits and buildings submitted by the building inspector to the fire, water and light committee up to June 6th, was as follows:—

	Permits.	Buildings.	Aggregate cost.
1900	181	227	$569,950
1901	277	353	873,795
1902	385	463	1,005,775
1903	424	548	2,145,450
1904	788	1,066	3,334,150

This does not include the proposed C.P.R. hotel and improvements, the plans for which are now in the hands of the building inspector.

Meetings.

IMPERIAL BANK OF CANADA.

HEAD OFFICE, TORONTO.

The twenty-ninth annual general meeting of the Imperial Bank of Canada was held in pursuance of the terms of the charter at the banking house of the institution, 15th June, 1904.

There were present: T. R. Merritt (St. Catharines), D. R. Wilkie, Wm. Hendrie (Hamilton), Wm. Ramsay, of Bowland, Stow, Scotland; Elias Rogers, James Kerr Osborne, Charles Cockshutt, J. L. Blaikie, Archibald Foulds, R. H. Temple, W. W. Vickers, Lyndhurst Ogden, David Smith, David Kidd (Hamilton), C. A. Pipon, Anson Jones, Alfred Hoskin, Miss H. M. Robinson, Harry Vigeon, Edward Archer, Alexander Nairn, Rev. T. W. Paterson, James Bicknell, A. W. Austin, R. N. Gooch, Robert Thompson, Albert Thompson, W. Gibson Cassels, J. W. Beatty, Peleg Howland, W. C. Crowther, V. H. E. Hutcheson, Edward Hay, J. J. Foy, K.C.; W. T. Jennings, O. F. Rice, C. Holland, Clarkson Jones, David Spry, Alexander Laird, Harry Sintzel, C. C. Dalton, Ralph K. Burgess, J. Gordon Jones, Ira Standish, H. M. Pellatt, F. A. Rolph, H. W. Mickle, W. H. Cawthra, C. H. Stanley Clarke, A. A. McFall (Bolton), Prof. Andrew Smith, F.R.C.V.S., J. H. Eddis, R. G. O. Thomson, etc.

The chair was taken by the president, Mr. T. R. Merritt, and the assistant general manager, Mr. E. Hay, was requested to act as secretary.

Moved by Mr. Thomas Walmsley, seconded by Mr. W. W. Vickers,

That Mr. Lyndhurst Ogden, Mr. R. H. Temple, and Mr. W. Gibson Cassels be and are hereby appointed scrutineers. Carried.

The general manager, at the request of the chairman, read the report of the directors and the statement of affairs.

REPORT.

The directors beg to submit to the shareholders their twenty-ninth annual report and balance sheet of the affairs

of the bank as on 31st May, 1904, together with a statement giving the result of the operations for the year which ended that day.

Out of the net profits of the year and balance of profit and loss account carried forward, and after making full provision for all bad and doubtful debts and for the authorized contributions to the Pension and Guarantee Funds:

(a) Dividends have been paid at the rate of 10 per cent. per annum, amounting to $299,194.04.

(b) Bank premises account has been credited with $25,000.

(c) Rest account has beeen increased by $200,000.

(d) Carried forward to profit and loss account, $140,656.56.

The premium received upon new capital stock, amounting to $13,688, has been added to rest account, making that account $2,850,000, equal to 95 per cent. of the paid-up capital.

A branch of the bank has been opened at Trout Lake, B.C., to which has been transferred the business of the branch at Ferguson, B.C.

It is with extreme regret that your directors have to announce the death of their late esteemed colleague, Mr. T. Sutherland Stayner, who had been a director of the bank since 1890, and who had throughout been constant in his attendance to his duties as a director, and to whose faithful service they now bear testimony.

The head office and branches have all been carefully inspected during the year, and your directors have much pleasure in expressing satisfaction at the manner in which the officers of the bank perform their respective duties.

T. R. MERRITT, President.

PROFIT AND LOSS ACCOUNT.

D. R. WILKIE, General Manager.

The usual motions were submitted and carried unanimously.

The scrutineers appointed at the meeting reported the following gentlemen duly elected directors for the ensuing year, viz.: T. R. Merritt, D. R. Wilkie, Wm. Ramsay, Robert Jaffray, Elias Rogers, Wm. Hendrie, James Kerr Osborne, Charles Cockshutt.

At a subsequent meeting of the directors, Mr. T. R. Merritt was elected president, and Mr. D. R. Wilkie, vice-president for the ensuing year.

By order of the board,

D. R. WILKIE, General Manager.

Toronto, June 15th, 1904.

THE STANDARD BANK OF CANADA.

The twenty-ninth annual meeting of the shareholders of the Standard Bank of Canada was held at the head office of the bank, on Wednesday, 15th June, 1904.

The chair was taken by Mr. W. F. Cowan, president, and Mr. George P. Reid, general manager, acted as secretary to the meeting.

The following report and statements were unanimously adopted:—

The directors have pleasure in placing before the shareholders the statements of the bank's affairs for the year ending 31st May, 1904.

The profits for the year have been very satisfactory, amounting to $183,007.17, which, together with the balance of profit and loss account, $14,506.79, brought forward from last year, have been appropriated as follows:—

Dividends at the rate of 10 per cent. per annum	$100,000 00
Added to reserve fund	75,000 00
Carried forward to profit and loss account	22,513 96

The reserve fund, after the addition made this year, now amounts to $1,000,000.00 (100 per cent. on capital), all of which has been accumulated from profits earned, with the exception of $55,470.00, premium on stock in years 1882 and 1886.

The inspection of the head office and agencies has been made and the officers of the bank have discharged their duties with zeal and efficiency.

All of which is respectfully submitted.

W. F. COWAN, President.

GEO. P. REID, General Manager.

After the adoption of the report and statement the usual votes of thanks to the board of directors and the staff were passed.

The ballot for the election of directors was then opened, and the scrutineers declared the following gentlemen unanimously elected:—Directors for the ensuing year—W. F. Cowan, Frederick Wyld, W. F. Allen, A. J. Somerville, T. R. Wood, W. R. Johnston and Wellington Francis. Subsequently the directors re-elected W F. Cowan, Esq., president, and Frederick Wyld, Esq., vice-president.

MERCHANTS BANK OF CANADA.

The annual meeting of shareholders in the Merchants Bank of Canada was held at the head office of the bank in Montreal on Wednesday, 15th June, the president, Mr. H. Montagu Allan, in the chair.

The following report and statement of the business of the bank for the year was submitted:

REPORT.

The directors beg to submit to the shareholders their annual statement of the bank's business as at 31st May last.

The gross profits were somewhat less than those of the previous year, but smaller losses have raised them to nearly the same amount net; and with the large amount carried forward from last year we are enabled to make the same provision for bank premises and officers' pension fund and add $300,000 to rest account, carrying forward a balance in profit and loss account of $18,959.54.

All respectfully submitted.

H. MONTAGU ALLAN,
President.

STATEMENT.

The net profits of the year, after payment of charges, rebate on discounts, interest on deposits, and making full provision for bad and doubtful debts, have amounted to		$729,714 39
The balance brought forward from last year ending 30th May, 1903, was		74,245 15
Making a total of		$803,959 54

This has been disposed of as follows:

Dividend No. 70, at the rate of 7 per cent. per annum	$210,000 00	
Dividend No. 71, at the rate of 7 per cent. per annum	210,000 00	
		$420,000 00
Written off bank premises account		50,000 00
Contribution to officers' pension fund		15,000 00
Added to rest		300,000 00
Leaving a balance to be carried forward to next year of		18,959 54
		$803,959 54

THE SOVEREIGN BANK OF CANADA.

The second annual meeting of shareholders of the Sovereign Bank of Canada was held in Toronto on Tuesday, 14th June, and was largely attended, there being about fifty shareholders present. The statements and reports submitted were most favorably received, and every one seemed pleased with the progress the bank has made.

D. M. STEWART,
Montreal, 30th April, 1904. General Manager.

DIRECTORS' REPORT.

The directors beg to present to the shareholders the second annual report, showing the result of the business of the bank for the year ended 30th April, 1904:

Balance at credit of profit and loss account on 30th April, 1903		$ 1,351 71
Net profits for the year ended 30th April, 1904, after deducting charges of management, paying interest due depositors and making full provision for all doubtful debts		119,760 94
		$121,112 65

This has been appropriated as follows:

Dividend No. 1, paid 15th Aug., 1903	$16,250 00	
Dividend No. 2, paid 16th November, 1903	16,250 00	
Dividend No. 3, paid 16th February, 1904	16,250 00	
Dividend No. 4, payable 16th May, 1904	16.250 00	
	$65,000 00	
Transferred to reserve fund	25,000 00	
Reserved for rebate of interest on bills discounted	20,000 00	
Written off bank premises	5,000 00	
	$115,000 00	
Balance carried forward to profit and loss account		$ 6,112 65

RESERVE FUND.

Balance at credit of account on 30th April, 1903..	$323,008 74
Balance of premium on capital stock	1,991 26
Transferred from profit and loss account	25,000 00
	$350,000 00

Branches have been opened during the year at the following places:

Aylmer, Ont.	Hensall, Ont.
Belmont, Ont.	Marmora, Ont.
Burk's Falls, Ont.	Mount Forest, Ont.
Claremont, Ont.	Ottawa (Market branch).
Dashwood, Ont.	Stanbridge East, P.Q.
Frelighsburg, P.Q.	Zurich, Ont.

These have all come up to expectations, and the outlook is favorable.

The directors feel sure that the bank's progress, as shown by the comparative statement already submitted, will be entirely satisfactory to the shareholders. The increase of over $2,400,000 in deposits affords gratifying evidence of the confidence which the investing public have in this institution, while the increase of $2,000,000 in commercial loans shows that the bank is attaining to an important position in the mercantile community.

The net profits amounted to $119,760.94, or about 9.21 per cent. on the capital, and show an increase of $68,527.34 or 133¾ per cent. over the previous year.

Our cash resources are maintained at a high level, and these alone are sufficient to pay off the demand deposits, while our total immediately available assets amount to 54 per cent. of the bank's entire liabilities to the public. These figures will bear favorable comparison with those of the strongest banks in the Dominion.

The past year has been particularly satisfactory, and the outlook for the one we have now entered is very encouraging. The bank's business is in a sound condition, well distributed and is steadily increasing in a healthy manner.

The shareholders of the bank number 841, as against 810 a year ago, making an average holding of 15 shares per head, and the subscribed capital is now fully paid up.

The branches have been regularly inspected during the year.

The directors have pleasure in recording their appreciation of the zeal and efficiency displayed by the officers of the bank.

H. S. HOLT, President.

Montreal, June 10th, 1904.

PRESIDENT'S ADDRESS.

In moving the adoption of the directors' report, I have very little to add to the statements submitted, which speak for themselves, and are eminently satisfactory. I might, however, refer to one item in the profit and loss statement, namely, the rebate on unmatured discounts. This has been calculated at the full legal rate, and, while I understand it has not been customary for banks to rebate during the first few years, we consider it prudent and conservative banking to deduct the amount from the profits. In this, as in the case of our cash reserves, we are actuated by a desire to place the bank in a thoroughly sound position, which will entitle it to the fullest measure of public confidence, and I trust that this policy will always be characteristic of the Sovereign Bank.

I wish also to mention that since the close of our fiscal year, we have purchased a site for the bank in Montreal. Our business in that city has long since outgrown our present quarters, and we found it impossible to secure other satisfactory premises, we had no choice but to purchase a property for ourselves. We were, however, very fortunate in be-

Report of Test of "Royal Automatic Smoke Consumer," made at The Bertram Engine Works Co., Toronto.

JUNE 7th and 8th, 1904

The boilers were the ordinary Horizontal Return Tubular Type, 60" diameter, by 14 ft. long, with 84 tubes 3" diam. in each.

Boilers were set in brickwork in the ordinary manner.

The total heating surface in the two boilers was 2,066 sq. ft.

The total grate surface under the two boilers was 45 sq. ft.

Particulars of Test.	Without Consumer	With Consumer.
Duration of test	8 hours	8 hours.
Total water pumped into boilers and apparently evaporated.	33,750 lbs.	43,650 lbs.
Total coal consumed	4,375 lbs.	4,522 lbs.
Total ashes	365 lbs.	507 lbs.
Total combustible	4,010 lbs.	4,015 lbs.
Mean steam pressure	64.38 lbs.	69.91 lbs.
Mean feed temperature	178.26°	172.5°
Total steam used by jets		2,707 lbs.
Percentage moisture in coal	2.5	2.5
Evaporation per lbs. coal	7.714	9.648
Evaporation per lbs., combustible	8.975	10.871
Equivalent evaporation from and at 212° per lbs. coal	8.227	10.361
Equivalent evaporation from and at 212° per lbs. combustible	8.975	11.675
Percentage of increased evaporation due to use of Consumer after deducting steam used by jets		18.18
Percentage of saving in coal due to use of Consumer after deducting steam used by jets		15.28

The steam pressure was maintained much more regularly, and with greater ease, when Consumer was in use than on the previous day when it was not in operation. The safety valves opened at frequent intervals during second day's test with Consumer.

So far as we could judge by careful observation the smoke issuing from chimney was reduced from 85 to 90 per cent. by the use of the Consumer.

O. P. ST. JOHN,
Acting for the Royal Automatic Smoke Consuming Company.

A. R. GAIR,
Acting for the Bertram Engine Works Company, Limited.

ing able to secure a site with a frontage of 45 feet by a depth of 100 feet on St. James street (between St. Peter and McGill streets), at a cost of something less than $60,000. This site is in the very heart of the financial and banking district of Montreal, and it is proposed to erect a building in which we can properly accommodate our business, and one which will be both creditable and profitable to the bank. The land is bound to increase in value, and is already too valuable to erect a building on it solely for the accommodation of the bank. It has, therefore, been decided to put up an office building, and I have every hope that this will prove a satisfactory investment to the shareholders.

I would like to say that the business of the bank has received great care and attention from our very able general manager and his efficient staff, who have spared no time or effort to give the public a satisfactory and up-to-date service and to the shareholders a sound and profitable institution.

I now move the adoption of the directors' report, seconded by Mr. Macdonald, the vice-president. Carried.

GENERAL MANAGER'S ADDRESS.

I am content to let the statements placed before you today testify to our stewardship during the past year. I would like to say, however, that the results have only been achieved by extremely hard work on the part of all officers of the bank. You could not wish for a more loyal and painstaking body of men, and the success of the institution is in no small degree due to the courteous treatment, prompt attention, and obliging service which the staff has invariably rendered to the public. When you once get business, the great thing is to keep it, and I feel safe in saying that the Sovereign Bank will not lose many customers for want of either technical knowledge or prompt and cheerful attention.

It affords me very great pleasure to be in a position to inform the shareholders at the close of the bank's second year that we have a clientele of which any institution in the Dominion might be proud. We number amongst our customers several important municipal corporations, insurance companies and societies, as well as some of the largest and most conservative merchants and manufacturers in Canada. We are in a position to handle in the most efficient way every financial detail of the import and export business. This department is steadily increasing, and brings the bank in touch with the best houses in this country, the United States and Great Britain, and it will be our constant endeavor to maintain in increasing measure the high-class patronage the bank now enjoys.

I think I can say without egotism that the Sovereign Bank has been of distinct benefit to the Canadian public. It has encouraged thrift among classes who never kept savings accounts before, and in the rural districts where we took over the business of several private bankers we have naturally given better banking facilities and afforded the people a much greater measure of security for their savings than they ever had before.

Our profits for the past year have not been contributed to by "wind falls," but have been made in the ordinary way of legitimate banking business. We were, however, fortunate in being singularly free from losses, due chiefly to the fact that we have been in a position to decline any account that we did not consider a fair banking risk. We never refuse a really good account, and so manage our resources as to always have plenty of money to handle any first-class business that offers.

The following table will give you an idea of how the bank has grown during the past year, and how well its business is distributed:

	30th April, 1903.		30th April, 1904.	
Number of officers on the staff	103		151	
Number of savings accounts open	6,006	($2,862,000)	15,125	($4,612,000)
Total number of bank's customers.	8,006	(3,253,000)	20,551	(5,700,000)
Number of discount accounts declined.	440	(3,546,461)	723	(5,358,980)

The discount accounts declined include only strictly commercial business. While some of this was unquestionably doubtful, it was not all bad, but it simply did not come up to our standard. The highest class of business also is not the most remunerative, but it is the safest, and, while we do not pretend to be able to keep clear of the unavoidable losses that occur in business, we will do our best to secure only such of it as contains a minimum amount of risk.

As regards doubtful accounts, I may say that our policy is to wipe them off our books altogether. If we recover anything from them later, well and good, but meantime we commence our new fiscal year with an absolutely clean sheet.

RESOLUTIONS ADOPTED.

Votes of thanks were tendered to the president and directors for their services during the year, and also to the general manager and staff.

Both resolutions were heartily received.

Lieut.-Col. Pellatt considered the statements submitted very complete and satisfactory, and thought the large attendance complimentary to the directors, and showed the interest the shareholders took in the bank. The manner in which the deposits had increased shows how fully the institution holds the confidence of the public.

Mr. W. K. McNaught stated that he voiced the sentiments of every shareholder when he said that the results shown were in every way satisfactory. They evidenced close attention and vigilance on the part of the directors and management, and with the continuance of such attention the Sovereign Bank was bound to go on and prosper.

Mr. J. F. Junkin thought that the statements reflected the utmost credit upon the general manager and staff, for, no matter how good a board of directors a bank had, it was necessary to have efficient management in order to carry out their views.

At the close of the meeting the following directors were declared elected:

H. S. Holt, A. A. Allan, Arch. Campbell, M.P., James Carruthers, Randolph Macdonald, Hon. Peter McLaren, Hon. D. McMillan and John Pugsley.

At a subsequent meeting of the directors H. S. Holt was elected president and Randolph Macdonald vice-president.

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing Houses for the week ended with Thursday, June 16th, 1904, compared with those of the previous week:

	June 16th	June 9th.

DEATH OF RICHARD FULLER.

On Sunday night last, died after long illness, Mr. Richard Fuller, who for many years has been well known in business circles of Hamilton. Born in England some seventy-three years ago, he was in the service of Pickford & Co., the great English carriers, who preceded the railways. He was also, we are told, a soldier, having been with the British in the Crimean campaign. About 1856 he went to Hamilton, and entered the service of the old Great Western Railway Company, for which company he was a timber buyer for a number of years. During the early days of the Canadian Pacific enterprise he obtained from the Mackenzie Government the contract to construct the C.P.R. telegraph system, which preceded the building of the railway. Later, he built the system from Edmonton to Fort Qu'Appelle. Subsequently he established the Keewatin Lumber Company, of which he was president till the time of his death. He was also president of the Keewatin Power Company. He was a director of the Great Northwestern Telegraph Company, and connected with various philanthropic enterprises in Hamilton. Mr. Fuller was a sturdy Englishman of great resolution and vigor, with a warm heart and good business principles.

DRUGGISTS CONFER.

The annual meeting of the Canadian Wholesale Druggists' Association was held in Montreal on Wednesday and Thursday of last week. Among those present we note the names of Mr. C. McD. Hay, of Lyman Bros. & Co., Toronto; Mr. W. S. Kerry, of Kerry, Watson & Co., Montreal, and Mr. A. Lyman, of Lyman, Sons & Co., Montreal. Matters of general interest to the wholesale and retail trades were discussed.

The following officers for the current year were elected: Honorary president, H. H. Lyman, Montreal; president, D. W. Boli, Winnipeg; vice-president, A. B. Evans, Montreal; second vice-president, C. W. Twiling, Hamilton; third vice-president, S. McDiarmid, St. John; secretary, J. Mattinson, London; treasurer, W. E. Elliott, Toronto. Executive, A. Lyman, Montreal; C. McD. Hay, Toronto; W. S. Elliott, Toronto; C. W. Twiling, Hamilton; J. Mattinson, London. Board of Management, C. McD. Hay, W. C. Niblett, L. J. Mylins, J. W. Knox, S. and H. McDowell, Geo. W. Gerow, W. B. Skinner.

DROLLERY.

'Twixt optimist and pessimist
The difference is droll;
The optimist the doughnut sees—
The pessimist the hole.

—New York Sun.

MONTREAL MARKETS.

Montreal, June 15th, 1904.

Ashes.—The volume of business continues light, but there is no accumulation of stock in the inspection stores. For No. 1 pots, dealers are paying $6.05 to $6.10, and for seconds, about $5.50. In pearls there have been no transactions for some time, and from $7 to $7.25 is a nominal quotation.

Dairy Products.—The weekly figures of cheese exports continue to be much behind those of last year, and it is judged that there must be a considerable accumulation of stock going on, as the make is quite large. The shipments last week aggregated 48,682 boxes, or 27,390 boxes less than the corresponding week a year ago, and the total since the opening of navigation is 200,180 boxes, being a shortage of nearly 88,000 boxes in comparison with the figures of this date a year ago. In spite of this, prices are about ¼c. firmer than at last writing, choice Westerns being quoted on spot at 8⅜ to 8½c., Townships, 8¼ to 8⅜c., and Quebecs at 8 to 8¼c. The shipments of butter show some little increase on last year's figures. Last week there were shipped 11,680 packages, being 2,129 more than for the same week of 1903, and for the season to date the total gain is about 6,000 packages. Towards the end of last week prices took something of an upward turn, and finest

Thorough English Course. Individual Attention. Pupils prepared for the Universities and for Examinations in Music and Art. Large staff of Resident and Visiting Teachers.

MISS VEALS, Lady Principal.

Townships creamery is quoted at 17 to 17¼c., ranging down to 16c. for medium; Western dairy, 13 to 14c.

Dry Goods.—With the warmer weather retail business has been fairly active of late, and money is coming in quite well, general collections at present being reported by some large houses up to the figures of a year ago. Travellers' orders for fall stuffs are not large, as a rule, apparently verifying the calculation made some time ago that considerable stocks were being carried over throughout the country, owing to the peculiar

THE COMMERCIAL

The Weekly Financial, Commercial & General Trade Newspaper of the Great West

Reaches direct 90 per cent. of the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

Do you want to sell or increase the sale of your goods in these, THE BEST BUYING PROVINCES IN CANADA?

Estimated that 200,000 new settlers will arrive this year. Will the retail merchant offer them your goods? Our advertisers our best references. We beg the favor of an enquiry.

THE HUGH C. MACLEAN CO., LIMITED, Publishers, Winnipeg.

Eastern firms should subscribe for THE COMMERCIAL and keep posted on Western trade

weather conditions which interfered with business last winter all over the Dominion.

Groceries.—The movement is moderate but not brisk; collections are reported rather better than in April and May, but some houses say there is room for further improvement. A second reduction of 5c. a cental in sugar quotations was announced by the local refiners last Friday, making the present factory figure for standard granulated $4.35, with yellows ranging from $3.75 to $4.15. The decline somewhat checked the demand from jobbers, but as outside markets for raws are again showing signs of firming up there is a growing inclination to place orders. The first direct molasses cargo from the island is now unloading in the harbor. Prices are weak; and little demand is reported. First cost in Barbados is reported at about 8c., and with the late reduction in duty, quotations are from 23 to 24c. in a jobbing way for last year's crop. Teas are reported quiet, but firm as regards quotations.

Hides.—Apart from an advance of 5c. on lambskins, making the present quotation 25 cents, there is nothing new in this line. Hides and calfskins are both rather dull at former figures.

Leather.—Trading is somewhat slow as regards local demand, as some of the boot and shoe factories are taking stock. Export business in sole is fairly good. There is no sign of any weakening in quotations, and dry hides are reported firmer in American markets.

Metals and Hardware.—The markets for general metals seem to have taken an all-round weak turn. Copper is notably lower at 13 to 13⅜c., lead is weaker at $3.15, spelter also is down to $5.50 in a jobbing way, and antimony to 7¼ to 7½c.; ingot tin is easy at 30½ to 31c. Trading in pig-iron is slow, and there is comparatively little coming in now. We quote No. 1 Summerlee at $19.50 in moderate lots; No. 3 Middlesboro, $17; Londonderry, $19. Bars rule easy at $1.65 to $1.70; iron pipe is lower at $4.30 for inch. Nails, wire, horse shoes, etc., are unchanged, nor are there any variations to note in tinplates, Canada plates, etc. Terne plates, which were scarce, are in better supply, and are easier at $6.25 to $6.40.

Oils, Paints, Glass, etc.—Business in these lines, which has been very fairly maintained since opening of navigation, is now showing some signs of slackening up with the approach of midsummer. Turpentine is again a little easier, the quotation being now 82½c. for single barrels. Linseed continues easy, with sales reported at almost any price; 45c. and 48c. are the supposed regular quotations for raw and boiled, respectively. Pure white lead is quoted at $4.40 to $4.50, but is also still sold at much cut prices. The change in the tariff, which provides a 60 per cent. preference in favor of glass of English manufacture, and which, it is claimed, will operate entirely in favor of one house, all the others handling Belgian glass, has raised a general storm of protest in the trade, and an influential deputation of wholesalers was in Ottawa Monday to lay the matter before Mr. Fielding, who promised to give the question further consideration.

TORONTO MARKETS.

Toronto, June 15, 1904.

Chemicals, Drugs, etc.—Quotations are nominally the same as those mentioned last week, and new features are lacking. Trade may be described as fair to good. In New York trade is steady. Quinine is meeting with a fair enquiry, but opium continues as dull as ever. Silver nitrate is ½c. lower owing to declining cost of production. In Great Britain, business, both for the home trade and for export, is on the dull side.

Flour and Grain.—An easier market prevails, owing to lower cables from Europe. The ruling quotation for ninety per cent. patents is $3.65 to $3.70, in buyers' bags, middle freights. Manitoba flour keeps steady. Millfeed is firm, and no change has occurred in oatmeal. No changes whatever have occurred in grains, but little or no business is being done.

Fruits and Vegetables.—As the smaller fruits come forward in greater quantities the market for tropical products drops off a little, though prices retain a fair amount of firmness. A few Canadian strawberries are in the market, and fetch about 15c., though absolutely first arrivals realized considerably more. Quotations range about as follow: Apples, $1.25 to $3 per barrel, according to grade and quality; cocoanuts, $4.25 per sack; oranges, California navels, $3.50 to $4.50; Valencias, large, $7; ordinary, $6; Sorentos, $3; lemons, Messinas, 360's, $2.50 to $3; 300's $2.50 to $3; Sorrentos, $3 to $3.50; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; dates, Sair, 3½c. per lb.; Hallowee, 4c.; figs, 8 to 12c.; tap figs, 3½c.; Egyptian onions, $2.50 to $3 per sack; tomatoes, $3 to $3.50 per crate; pineapples, Floridas, 12's, $4.50; 24's, $3.75; 30's, $3.25; 36's, $3; 42's, $3; Havanas, $3 to $3.50; strawberries, Canadian, 15 to 18c.; southern, 16 to 18c; watermelons, 35c. each.

Merchants Fire Insurance Co.

CAPITAL AND ASSETS OVER HALF A MILLION

HEAD OFFICE TORONTO.

Agents Wanted in All Unrepresented Districts.

Groceries.—The prices of all grades of sugars dropped 5c. per hundred since last report. Business in that line is quite good, while in general groceries it is normal for this time of the year. Teas are in good demand at brisk rates. Canned goods retain their firmness. In fish, sardines may be said to be out of the market altogether, though we note that goods described under that heading are being pushed by some of the retail stores at prices ranging from 50 to 100 per cent. less than the wholesale rates at which they were last sold, weeks or months ago.

Hides and Skins.—A certain degree of scarcity exists, especially for good hides. The market as a consequence is quite firm. Sheepskins are firm at $1.25, while calfskins are steady. Tallow has made no further changes. The leather trade is on the quiet side just now.

Provisions.—Butter offerings are large, and many held goods are coming in, which do not sell very readily. For new grass butter, however, the demand is fairly brisk. For cheese the improved demand which set in two or three weeks ago seems to continue pretty well in force. Eggs are in good demand at 15c. for new-laid. Trade in hog products has improved, and with continued warm weather should become still better.

Wool.—Warm weather has led to more liberal offerings, which meet with a fairly good response, though there has been hardly any export enquiry as yet.

30 Days of Grace

for the payment of Renewal Premiums is one of the many privileges the SUN LIFE OF CANADA grants its policy-holders. Should the Assured die at any time within the days of grace the claim would be promptly paid, even though the premium had not been paid.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policy-holders and addition to Reserve.
$53,841.18 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1,800,000.00.

You will make no Mistake if you Take out a Policy in THE NORTHERN LIFE.
HEAD OFFICE, LONDON, ONT. JOHN MILNE, MANAGING-DIRECTOR
The Northern Life has some Good Districts Open for Live, Energetic Agents.

Strength and Stability
Are the important elements required in effecting insurance,—guaranteeing, as they do—the absolute fulfillment of the contract.

The financial position of the
NORTH AMERICAN
is unexcelled, making it a most desirable Company for Policy-holders and Agents.

Vacancies for active, energetic men to act as representatives.

North American Life Assurance Co., Home Office, TORONTO, Ont.

Liberal commissions paid for desirable business. Applications for agency to be made to
DAVID BURKE, A.I.A., F.S.S.
General Manager.

Sometimes a revision of policy forms means little. It stands for
THOROUGHNESS
in every detail in the changes that have been made by the Union Mutual—re-arrangement of features, reduction of rates, liberalizing of rights, a contract modern to the highest notch. A policy that looks well, sells easily and pleases long.

UNION MUTUAL LIFE INSURANCE Co.
Portland, Maine.

Protection from Loss.

The business of boiler insurance is an engineering business; the insurance is only a guarantee of the trustworthiness of the engineering services.

Measure the value of those services and then consider the guarantee. In doing this remember that EXPERIENCE, SKILL, and ABILITY are the determining qualifications of the value of those services.

Insure your boilers in

THE BOILER INSPECTION & INSURANCE CO. OF CANADA,
Canada Life Bldg., Toronto,

which has been in this business for nearly THIRTY YEARS.

From Medicine Hat, Assa., comes word of the striking of a very large flow of natural gas. A million and a half cubic feet per day is the reported outflow from one gusher, but it must be remembered that such early reports are inclined to be duly optimistic.

From the way tobacco plants are being set out, Essex county will this year have the largest acreage ever planted. From Essex to Kingsville, via the Ridge and Division roads almost every farmer has his own hot-bed. Along the Street in Mersea the acreage will be increased. Colchester South and Malden will have their usual acreage. The weather has been very favorable for setting out plants. If the weather remains at all favorable, little replanting will be necessary.

Mercantile Summary.

TORONTO capitalists are believed to be behind a company which has just received a Dominion charter under the title of the Rio de Janeiro Light and Power Company, with the large authorized capital stock of $25,000,000.

FROM the Coleman coal mines, recently discovered in the Crow's Nest region of Alberta, about 200 tons of coal is now being taken daily by the International Coal and Coke Company. The seam ranges, it is said, from 20 to 22 feet in thickness, without slate, while the large seam near Connelsville, Pa., is only 9 feet.

THE deal whereby the British Columbia Electric Railway Company acquires the plant and business of the Vancouver Gas Company has now been completed, and one result in the near future will be a 20 per cent. reduction in the charge for electric lights, both in residences and factories in the city of Vancouver. The gas lighting system is to be extended especially for fuel and manufacturing purposes.

MR. JAS. GAYLEY, vice-president of the United States Steel Corporation, has at length perfected a new process, a modification of the Bessemer, for making steel, which, it is believed, will greatly reduce the cost of manufacturing. It can be applied, it is said, in making both steel and pig iron manufactures, and may possibly revolutionize the industry, if that is not too much to say.

THE Ontario Government will guarantee the bonds of the James Bay Railway Company to the extent of $20,000 per mile from Toronto to Sudbury. The guarantee will run from the road's completion for a period not exceeding thirty years at 3½ per cent. per annum, and will be secured by a mortgage, including the line, right of way, stock and equipment, etc. Construction work is to be begun within a year.

AMONG the fires of the past week was a serious one in the Rat Portage Lumber Company's premises. The loss is estimated at $100,000, besides about $25,000 worth of glass. Several dwelling houses also were destroyed at a loss of about $12,000. The lumber company's plant was insured for $65,000. At Huntsville, Ont., John Whiteside's sawmill was wrecked with all its machinery. Loss over $12,000.—On the 20th the village of Wakefield, Que., was partially wiped out by fire, the chief losers being Geo. Patterson, general store, $20,000; Union Hotel, $10,000, partially insured; Presbyterian Church, $7,000. There was partial insurance in most cases.—At Thornbury, Ont., Patterson Bros.' bakery and confectionery store and the office of the Herald were burned to the ground with a loss of $6,000, about one-third insured. The premises at 5 Jordan Street, Toronto, occupied by Stewart & Thomas, bookbinders; Legge Bros., engravers; Phillips & Wrinch, dealers in smallwares, and the Holmes Protection Co., were badly damaged on Saturday last, and four firemen were more or less injured by inhaling the fumes of nitric acid.

THE Canadian Electrical Association held a very enjoyable convention in Hamilton last week, inasmuch as besides the discussion of several interesting papers on scientific and technical subjects, some pleasant trips to outlying points and a banquet were indulged in. The following officers were elected for the ensuing year: B. Thornton, Montreal, president; A. A. Wright, M.P., Renfrew, and R. G. Black, Toronto, vice-presidents; C. H. Mortimer, Toronto, secretary; A. A. Dion, of Ottawa, A. B. Smith, of Toronto; B. F. Reesor, of Lindsay; J. A. Kammerer, of Toronto; G. J. Henderson, of Hamilton; C. B. Hunt, of London; F. Thompson, of Montreal; J. J. Wright, of Toronto; John Murphy, of Montreal, and A. E. Evans, of Quebec; Executive Committee.

Mercantile Summary.

A MONTREAL clothier, only in business since the spring of 1903, and bearing the somewhat Asian name of L. Azef, has made an assignment. His liabilities are estimated at $3,300; of his assets we have no statement.

NATHAN SCHEFFER, dry goods dealer, at Grand Falls, N.B., is reported embarrassed, and is said to be offering to settle with his creditors at 30 per cent. of their claims, payable in November next. He owes about $7,000, with nominal assets of $4,500, partly in book accounts of poor quality. He is reported to have been unsuccessful in Woodstock, N.B., several years ago.

WE learn that M. Laviolette, general merchant at Clarence Creek, in Russell County, Ont., has assigned to W. A. Cole, of Ottawa. He has also been carrying on a branch at South Indian, as Laviolette & Son, under the charge of a son, which has not proved remunerative. ——D. Buckley, formerly a farmer and pedlar, who started in the grocery line at Cornwall, Ont., about eighteen months ago, has made an assignment of his estate.

THE Prescott dry goods firm of Henderson & Post, reported in deep water several weeks ago, have, we understand, arranged a general extension. A surplus is shown of $6,400 over liabilities of about $12,000.——Reid, Griffin & Co., general store keepers, Sand Point, Ont., will wind up business, it is said, and are reported to be seeking a compromise arrangement. They began business only in the spring of 1903.

BUSINESS troubles are being again reported from Sydney, C.B., and if the strike situation be unrelieved, there are expectations that not a few more traders in that place may be calling for indulgence. A. McLeod & Sons, general dealers, are asking an extension, in payments spread over a year, attributing their embarrassment to the strike. They owe about $10,000, and claim a surplus of $4,000.——H. Norris, clothier, of the same place, has assigned. Suits have been frequent against him for some months past.

A. LACOMBE, of Fraserville, Que., has been quite a number of years in the baking business, but evidently finding making money in that line slow work he took to stock speculations, and has now run up liabilities of $8,000, which he is trying to settle at 20 cents on the dollar, with the assistance of friends. If wound up it is said the estate would not pay only 5 cents on the dollar.—— An offer of 25 cents on the dollar made by Miss Beaudreau, milliner, at Sorel, Que., has been declined.——L. D. Mathew, of St. Roch de Richelieu, Que., has assigned on demand of Hudon Hebert & Co., Montreal. He carried on a small tailoring business for 20 years, but latterly added a grocery stock, which has proved his undoing.

THE POPULAR ROUTE TO WORLD'S FAIR.

Now that the World's Fair is in complete running order, the Grand Trunk Railway System have inaugurated a double daily through car service, Montreal to St. Louis, which gives the public an exceptional route to the Ivory City. In addition, patrons are offered stop-over at any point in Canada, Detroit, and Port Huron, or Chicago, Ill., without extra charge. Do not make a mistake, but see that your tickets read via the Grand Trunk—the great double track route to St. Louis.

DOUBLE TRACK ROUTE TO WORLD'S FAIR.

The Grand Trunk have inaugurated a double daily through car service, including sleeping cars and coaches, direct to the World's Fair City. Fast trains, most interesting route, stop-over allowed at Chicago, unexcelled road-bed—are assured patrons of this line. Ask Grand Trunk Agents for full information.

THE OPPORTUNITY OF A LIFE-TIME.

No one should miss visiting the greatest World's Fair ever held, now open at St. Louis, Mo., and for solid comfort in travel the Grand Trunk route should be taken. Through sleeping cars and coaches direct to the World's Fair City via the Grand Trunk double-track route. Stop-over allowed at any point in Canada, Detroit, Port Huron and Chicago. All Grand Trunk agents will give full information.

TWICE A DAY TO ST. LOUIS.

The Grand Trunk offer a double daily through car service direct to the World's Fair City—St. Louis, Mo. Trains leave Montreal morning and evening. Send four cents in stamps to J. D. McDonald, District Passenger Agent, Toronto, for the handsomest publication yet issued on the World's Fair, and consult Grand Trunk Agents for further particulars.

—Dairying is a healthful occupation. Doctors recommend milking as a cure for Americanitis—or nervous prosperity. I speak advisedly on this point, as one who has risen from physical bankruptcy to opulence. But good health does not pay bills nor directly purchase the good things of life. Success in business implies not the accumulation of millions, but it means the winning of the game of life; the comforts of home; some leisure; a contented spirit and the fun of managing a profitable and progressive enterprise. The satisfaction that one has met the obstacles and hardships of his environment and conquered them adds zest to work and makes life worth living.—The Pacific Tree and Vine.

Mercantile Summary

W. PETERSEN, Limited, of Newcastle-on-Tyne, is interesting capitalists in a scheme to establish a new fortnightly steamship service between that port and Canada.

THE Canadian Pacific Railway, it is said, is about to build a palatial hotel in Victoria, B.C., and the city will contribute its quotum towards the expense of forming a complete square.

THE British Columbia Pharmaceutical Association held its annual meeting at Vancouver last week and elected officers as follows: President, Mr. J. Cochrane, Victoria; vice-president, Mr. McDonald, Revelstoke; secretary-treasurer, Mr. J. K. Sutherland, Vancouver. The names of Messrs. Every, Victoria; T. Atkins, Vancouver, and R. E. Strong, Trail, were added to the council of the association.

THE Canadian Westinghouse Company, Limited, of Hamilton, Ontario, have recently closed a contract to furnish the Shawinigan Water & Power Company, Shawinigan Falls, P.Q., with a 6,600-k.-w., two-phase, 2,200 volt, 3,600 alternations, 180 R. P. H. Rotating Field Alternator, for direct connections with water wheel. Two 2,200-k.-w. Oil Insulated Water Cooled Transformers, 2,200 volt primary, 50,000 volt secondary, are included in this contract.

THE assignment is reported of E. C. Mount & Co., plumbers, Montreal, whose record in the past has not been very favorable. In 1892 they were reported as requiring an extension, and in the fall of 1900 arranged a compromise at 25 cents on the dollar. Their present liabilities are said to be fairly heavy.—— Mount Bros., electricians, etc., of the same city, have also had to go into insolvency, owing to complication with the first named firm, through accommodation, it is said.

SHIPMENTS of ore from the Rossland district last week were divided as follows: Le Roi, 12.330 tons; Centre Star, 1,440 tons; War Eagle, 990 tons; Le Roi No. 2, 490 tons; milled, 250 tons; Spitzee, 30 tons; I. X. L., concentrate, 7 tons; Kootenay, 385 tons; Jumbo, 200 tons; total, 5,122 tons; footing up to date, 172,288 tons. The two-hundred-ton electrical concentrator recently put in at the Rossland Power Company's works is working very successfully. Le Roi No. 2 has declared a dividend of 1s. per share.

A MEETING of the creditors of Fraser, Johnson & Co., wholesale dealers in saddlery and harness at Hamilton, has been called, we understand. The firm owes $14,000 to 123 unsecured creditors, and $10,358 to their bankers, and show only some $13,000 worth of assets, of which $4,000 is outstandings, considered uncollectable. Then it appears a bill of sale of part of their stock has been given to another firm. The bank holds customers' notes for $7,000 as collateral security. In view of this state of affairs, the meeting of the firm's creditors is quite likely to be a lively one.

Mercantile Summary.

MESSRS. R. A. Wylie, of Winnipeg, and J. McTavish, of St. Catharines, Ont., propose to put up an acetylene gas lighting plant in Deloraine, Man.

THE Robb Engineering Co., of Amherst, N.S., have been awarded the contract to supply one of the great Puerto-Rico sugar plantations with a large sized Robb-Armstrong engine for furnishing electric light and power. This award was obtained in competition with several of the leading American concerns.

A NEW down-town commercial club, to be known as the Canada Club, is being opened in Montreal. The workmen are putting the last touches to the club's premises. The rooms occupy the whole of the top floor of the western wing of the Board of Trade, an area of about 5,000 square feet. It promises to be a very convenient and attractive place.

AN application for a winding-up order has been made in the matter of the Shediac Boot & Shoe Co., by a Moncton firm. The company was incorporated in 1896 with an authorized capital of $35,000, but has never apparently made very easy sailing. Last month they were burned out, with a loss estimated at from $35,000 to $40,000, and only $18,000 of insurance.

THE Dominion Coal Company held a directors' meeting in Glace Bay, C.B., on the 21st inst., and decided, owing to the comparatively poor returns for the first half of the year in consequence of the extremely severe winter, not to pay any dividend on the common stock for the current half year. On preferred stock the usual dividend of 4 per cent. was declared.

REFERRING to the paragraph in our issue of 3rd June concerning tenders asked by Government for bi-monthly Atlantic and Pacific steam service between Canada and Mexico, a friend has sent us a pamphlet which helps to illustrate the activity of investment by the Americans in that tropical country. There has been secured by the American Mutual Plantation Company, capital stock $60,000, a tract of land containing 3,000 acres, bounded by the Tulida and Michol rivers, near Frontera, which is not far from Coatzacoalcos, on the Gulf side, one of the stopping-places of the proposed Canadian line. The company has already planted corn and sugar cane on its plantation, the latter a profitable crop, and looks forward to the cultivation of rubber, cacao and vanilla, as well as to the raising of cattle. For development purposes they have issued bonds, some of which are offered to the public, which may be paid for at once or at so much per month, and on which six per cent. is guaranteed. Chicago and Wisconsin men, mostly such as Levi Waterman, bank president, and Chas. S. Barthoff, constitute the directorate, one of whom, Mr. C. J. Bour, has spent months looking over the property before he invested in it. The venture is deemed a very likely one.

BROWN BROS., Limited,
Stationers & Bookbinders, Toronto.

THE Guelph and Goderich Railway Company have elected directors as follows: Sir T. G. Shaughnessy and D. McNicoll, Montreal; J. W. Leonard, H. P. Timmerman, A. MacMurchy, A. H. Hertzberg, W. B. Bulling, Toronto; Wm. Bell and Mayor J. H. Hamilton, Guelph; Lieut.-Col. MacDonald, secretary pro tem.

A SPECIAL report was laid before Parliament last week showing that the Canadian Government owns 6,042 miles of land telegraph lines, 348 miles of cable, total 6,390. The average yearly number of messages sent is 96,500, of which the Yukon lines carried 42,000. The expenditure on the Government telegraph service last year was $373,348, and the receipts $132,422. The Yukon line cost to maintain $242,211, and the revenue was $113,005.

WE have been attracted by the new catalogue of the George B. Meadows Co., Toronto, of which a copy is just come to us from the printers. This firm of wire, iron and brass manufacturers is the one that made the handsome railing and cluster lamps at the Alexandra Gate on Bloor Street, and they have done handsome grill work, counters and railings for the Union Bank of Halifax, the Bank of Toronto, and the Bank of British North America. The present catalogue is a striking piece of work. We are informed that the cover design is by a Toronto artist, the printing by a Toronto printer, the photos and half-tones by Toronto concerns. There are thirty-two pages of handsome illustrations of work executed in the company's establishment. They make a reasonable claim to the patronage of home institutions, for they have shown that they can do good work.

LAST month's statement of the Montreal Street Railway Company makes a satisfactory showing. The total earnings increased from $172,986 in May, 1903, to $220,154 in May, 1904, while the operating expenses only increased from $112,140 to $126,641. The net earnings were $60,846 and $93,512 respectively, or an increase of 53 per cent. The surplus carried over was $70,871, compared with $40,232 in the previous year.

FRUIT GROWERS AND THE RAILWAYS.

The nature of their business, requiring quick undelayed transport for comparatively high-priced products, renders fruit growers peculiarly liable to suffer, or at any rate to find many sources of complaint about their treatment at the hands of the railroad corporations. And the quarrel, in very many sections of this continent, has been a perennial one. The railways' policy of squeezing out all the profit that the traffic can possibly bear, having been applied to this industry in good earnest. Tuesday's session of the Dominion Railway Commission was largely devoted to a hearing of the case of the fruit-growers of the Niagara Peninsula—the garden of Ontario. Representing these were delegates from the chief associations of the interested parties, including Mr. W. H. Bunting, president of the Ontario Fruit Growers' Association, Mr. E. D. Smith, M.P., etc.

During the year 1902, Mr. Bunting showed the volume of traffic of this kind was a very great and steadily increasing. From the St. Catharines cold storage depot alone the quantity of mixed fruit shipped had increased from 256 tons in 1898 to 2,465 tons in 1903, and this was merely a part. He then proceeded to give instances of the serious results which had often attended delay in the despatch of such perishable goods. In shipping to Winnipeg, for example, eight, ten, and even twelve days have sometimes been consumed on the road, meaning a great loss to the shippers. The pressure of the present rates, aggravated by the steady increase in production and consequent decrease in prices, was such that a reduction is imperatively needed. What was to be desired, thought Mr. Bunting, was a change in the classification of rates. Why should pears be charged a higher rate than apples? and why should a mixed shipment of the two fruits be made to pay the higher rate? "Why," asked Mayor Graham, of Belleville, who appeared on behalf of the International Apple Shippers' Association, "why should apples be charged 6½c. per hundred pounds, and cheese only 2c per hundred. There may be intelligible reasons for such anomolies, but it would be reassuring to plain people to have the railways give them. Instances were cited at the meeting of the difficulty found in getting the railway companies to take up and dispose of claims for damage.

TORONTO STOCK EXCHANGE.

The annual meeting of the Toronto Stock Exchange was held on Tuesday last, 21st instant. Officers for the ensuing year were elected as follows: President, R. H. Temple; vice-president, A. P. Burritt; secretary, N. Macrae; treasurer, W. C. Cassels; executive committee, Messrs. R. A. Smith, J. L. Campbell, G. A. Case; auditors, J. K. Niven, F. G. Osler. The proposal to expend $60,000 or $70,000 in erecting a stock exchange building where the old Royal building is, corner Wellington and Yonge streets, appears to have received its quietus.

MONTREAL STOCK EXCHANGE.

The handsome new stone structure erected on Francois Xavier St. in that city, by the Montreal Stock Exchange, was occupied by this body for the first time on Monday last. The beauty and convenience of the building caused much admiration. While the exterior, with its Corinthian colonnade and appropriate pediment, forms an ornament to the street, the interior has a brightness of its own; for besides architectural beauty it overlooks the garden of the Seminary, the green of whose trees and grass, seen through the windows that light the Exchange room, lend unusual charm to the indoor scene. Mr. Chas. Meredith, chairman of the governing committee, in the name of the members, complimented the building committee on their work, to which Mr. Wm. Wilson, chairman of the latter body, replied. A feature of the opening was the receipt of a telegram of congratulation from the members of the Toronto Stock Exchange, which expressed the hope that the opening was a good omen for the future. Mr. Meredith replied as follows:—"Very many thanks, in which all the members join."

ANNAPOLIS EN FETE.

On June 21st and 22nd, the pretty and ancient town of Annapolis Royal celebrated the tercentenary of the landing of De Monts and Champlain, (1604), leading the first expedition for the colonization of what is now British North America. Prominent men were present from Halifax, Montreal, Boston, London, England, and Toronto. On Annapolis river was the French warship "Troude," and the United States warship "Topeka," while below in Annapolis basin was the British warship "Ariadne." The commemoration proceedings began on Tuesday, in Fort Anne, where the corner-stone was laid for a statue to De Monts, to be erected by the Dominion Government.

—The Grand Council of the United Commercial Travelers, most of whose members were from the United States, held a convention in Winnipeg the week before last and completely "captured the city." At the business meeting the following officers were elected: Grand counsellor, Geo. W. Rogers, St. Paul; grand junior counsellor, Walter G. Jacobs, Aberdeen; grand past counsellor, Ernest Grant, Minneapolis; grand secretary, J. M. Dresser, St. Paul; grand treasurer, F. E. Noble, St. Paul; grand conductor, H. J. McGarvey, Huron; grand page, J. A. Macpherson, Grand Forks; grand sentinel, C. A. Vandever, Minnehaha lodge, Minneapolis; grand executive committee (elected for two years), F. J. C. Cox, Winnipeg; W. D. Austin, Fargo.

CANADIAN IRON AND STEEL INDUSTRY.

A voluminous report upon this subject has been issued by Mr. J. Stephen Jeans, secretary of the British Iron Trade Association, who last fall visited Canada to investigate into its resources and possibilities, for the benefit of the British iron and steel masters. The importance which this country occupies in the minds of these representative business men is shown in the following words of Mr. Jeans respecting Canada:

1. It is already the greatest market among the possessions of the British Crown, after the Mother Country herself. 2. It has offered to the Mother Country greater facilities and consideration than have been offered by any other colony or British possession. 3. The future increase of population, and consequently of iron and steel consumption, in the Dominion is likely to greatly exceed that of any other British possession. 4. Canada has herself enormous resources in the raw materials of the iron industry, and is likely in the near future to enter on a large scale into the competition of iron-making countries for the supply of the world's markets. 5. It is the attitude and the conditions of the Dominion that have primarily raised the pending controversy as to the fiscal policy of Great Britain in relation to her colonies.

But when Canada comes to be considered in another light, namely, as a market for British iron and steel manufacturers, there is a different story to tell. In no other field have they been so seriously displaced by their rivals as in Canada. The proportion of iron and steel imports into this country coming from Great Britain have fallen during the last twenty years from more than 70 per cent. of the whole to less than 25 per cent. In 1902 less than 200,000 tons of iron and steel entered Canada from the Mother Country, while if the proportion had continued the same as twenty years ago the quantity would have been 600,000 tons, or 17 per cent. of Great Britain's total iron and steel exports. This is not a pleasing thing to narrate, because, as Mr. Jeans recalls, no country in the world, in ratio to population, has shown such an increase in wealth and commerce as Canada has done during the past few years. He mentions, too, that in the United States the greatest increase in population and riches has coincided with the greatest increase in the consumption of iron and steel. And he seems to think that the wonderful growth of that country during the last two decades is likely to be duplicated by Canada during the next.

The secretary of the British Iron Trade Association regards recent Imperial preferential trade proposals from an unbiased standpoint, but tries to show how the Canadian preferential policy has put an entirely new aspect upon the tariff question, which, for some years before the enactment of the former, was a sore point with British manufacturers. There are cases, he says, in which, far from desiring a decrease in Canadian duties, the latter would eagerly welcome an actual increase.

"One of these cases is that of steel rails, which are now admitted to Canada free of duty. As the matter stands the United States controls this business, but if a considerable duty was levied, then the preference of 33 1-3 per cent. accorded to the British rail-maker—which counts for nothing at present—would be a substantial help against the United States. Britain, which is now practically excluded from the Dominion rail market by the action of Germany and the United States, would then have a better chance. The same condition largely applies to plates, of which, at the present time, there is a duty of only 5 per cent. A preference of 33 1-3 per cent. on a duty of 5 per cent. ad val. clearly is of no importance whatever in helping Great Britain against either the United States or Germany. Hence those countries have now the opportunity to secure the trade of the Dominion, and they are likely to continue to dominate it, unless and until the duty is so far increased that the preference of 33 1-3 per cent. can be of real assistance to Great Britain."

And there are many similar cases which might be taken from the iron and steel industry.

The Canadian bounty system, we are told, is one which is not liked by the British producer at all. It hits him harder than anyone else, for, being without home protection, he cannot, like his cousin in the United States, "dump" his produce on Canadian markets without adequate profit. Moreover, Britain has but small chance of competition with a country whose boundaries extend for 3,000 miles alongside those of the Dominion.

Mr. Jean's remarks about the wonderful opportunities which the Canadian ores provide for the investment of British capital should be the means of drawing, beneficially to all parties, the attention of capitalists of that country. Other things being equal,

the nation which possesses the best and most readily accessible supplies of ore may hope to attain to premier position, and the resources of the Lake Superior region north of the United States boundary may be simply incalculable.

THE DRY GOODS TRADE.

That the weather has a greater and more immediate effect upon business than many people imagine has been evidenced by the course of events during the past few weeks in the dry goods trade. A month ago, and the dullness was very perceptible, though, seeing the continued generally prosperous state of things throughout the country, no good reason could be assigned for it. This reason, it is now clearly visible, however, was merely the backward state of the season and continued cool days. When an improvement set in in this respect, an improvement could almost at once be discerned in the state of the dry goods trade. The spirits of dealers and retailers, before at a low ebb, went up at once; they saw things in a brighter light, and the result was quite a spurt of orders for a wide range of sorting goods. Retailers at once saw that their stocks were too low in many items, and perceived that the time to replenish was quite close at hand.

In some lines the demand during the past week or more has been exceedingly active, notably in cloth and trimmings for tailors, and the present season must have been one of the best retail clothing makers have known for a long time. The ready-made clothing trade, indeed, we have heard some say, has been the sufferer from this extra briskness in custom goods. Domestic lines of manufacture have been especially well favored; and they seem to increase their popularity with each season. Prices keep firm.

This applies also to cotton goods, in spite of the decline in prices of several items across the line. It looks as if next season we shall not experience the absurdly high prices for raw cotton which ruled last year, but nevertheless there is not much chance of any appreciable decline in made-up goods for some time to come. Those in the market now and in the near future were made when raw material was at or near the highest price. A good deal of interest is being taken in the effect of the new tariff on woolen goods from Great Britain. We understand they are being rated at the new schedule already, though usually goods ordered under an old and lower rating are allowed to come in until the expiration of a certain period at the lower charges.

As to the prospects for fall trade, so far as we can gather, they are excellent. Stocks, while not particularly light in some quarters, are by no means excessive, and now that the indications for the crops promise well, there is every probability of a very fair season's trade being done.

BANKING REVIEW.

We present below a condensation of the monthly statement of Canadian banks for May, 1904. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities; average holdings of specie and Dominion notes, etc.:

Canadian Bank Statement.

	May 1904.	Apr. 1904
LIABILITIES.		
Capital authorized	$97,546,666	$97,546,666
Capital paid up	78,801,319	78,738,355

Notes and cheques on other banks	18,624,100	15,536,206
Loans to other banks, secured	891,539	602,305
Deposits with other banks in Canada	5,265,062	5,207,827
Due from banks in Great Britain	3,262,168	2,551,004
Due from other banks in foreign countries	13,593,721	10,211,489
Dominion or provincial Govt. debentures or stock	10,547,439	10,576,950
Other securities	54,400,300	53,876,748
Call loans on bonds and stocks in Canada	36,960,202	36,771,611
Call loans elsewhere	38,767,494	36,426,920
	$233,717,067	$221,957,243
Current Loans in Canada	409,210,955	409,196,073
Current Loans elsewhere	19,235,638	18,872,814
Loans to Dominion and Provincial Governments	2,776,475	2,974,624
Overdue debts	2,026,693	2,002,802
Real estate	688,522	723,863
Mortgages on real estate sold	754,477	752,511
Bank premises	9,492,347	9,383,194
Other assets	6,977,226	3,843,270
Total assets	$684,879,573	$669,706,579
Average amount of specie held during the month	15,849,340	16,292,799
Average Dominion notes held during the month	30,186,800	29,809,788
Greatest amount notes in circulation during month	60,258,489	61,645,746
Loans to directors or their firms	10,664,253	11,033,680

The decline shown in the circulation is a natural feature of the time of year, but the increase of deposits, from $405,000,000 to nearly $419,000,000 is unusual. It indicates that the difference, some fourteen millions of dollars, has not gone into investment, nor found its way, as too many millions in previous months found their way, to the stock exchanges, to be risked in more or less promising ventures. Almost every bank shows an increase of deposits in the month, and it may be predicted that such increases will continue. The increased figures showing dealings between banks indicate activity of movement, and, indeed, as the bank clearings have lately shown, business has continued to be active. The aggregate of easily convertible assets shows an advance from $221,000,000 to $233,000,000, the banks generally adhering to a policy of strengthening their reserves. Elsewhere to-day, as in last week's issue, we hav remarked the results of the year's business to some half dozen banks, whose meetings have been held within the fortnight. They are all showing goo profits. Having heard from almost every part of the Dominion approving remarks upon the new form in which we presented the monthly Bank Statement last month, we have resolved to continue it. The letters of approval we received number thirty-four, and of objections there is not a single one.

ABSTRACT OF BANK RETURNS.

Description.	May 31st, 1903.	May 31st, 1904.	In Month 1904.
Capital paid up	$75,979,000	$78,801,000	Inc. $ 68,000
Circulation	56,949,000	57,857,000	Dec. 792,000
Deposits	425,390,000	468,053,000	Inc 15,136,000

Small	$ 12,164,000

Gold held, $29,090,000. or 75 per cent.

FURTHER BANK MEETINGS.

Satisfactory growth is shown by the Ontario Bank during its forty-seventh year. There was an increase of more than a million in deposits, and the current loans and discounts are increased by $867,000. The decline in call loans on stocks and bonds is about a quarter of a million. Of the $14,573,000 assets, there is $3,460,000 in readily available shape. Circulation remains nearly the same as a year ago. An addition is made to reserve, which brings that fund up to $600,000. No new branches have been opened during the year. The net earnings of the bank were at the rate of 11¾ per cent. on the paid capital. After paying dividend and adding $100,000 to rest, $5,000 was placed to officers' pension fund and $54,862 carried forward. The report pays a tribute to the memory of the late A. S. Irving, who was a valued member of the board for many years. Mr. John Flett has been elected a director in his place. The Peterboro' office of the bank has been enlarged and refitted to accommodate the growing business at that point.

The chairman at the meeting of the Bank of Hamilton, in his address concerned himself with some general considerations relating to the business situation. He looks for a good harvest, and describes the demand for money as decidedly active. He commends as wise the disposition shown among the banks of Canada to increase their reserves, even though the volume of discounts may through this step be restricted by the amount so reserved. The bank has now sixty-one branches, of which twenty-one are in the far West and forty in Ontario. An addition of $1,720,000 has been made to deposits during the year, a good proportion without interest, and the assets have increased by $2,754,000. Net profits are almost exactly the same as in the preceding year, and sales of new stock yielded $195,483 premium. After paying ten per cent. dividend the reserve fund has been increased to $2,000,000. To replace the late George Roach, whose recent death the board deplores along with every one in Hamilton who knew him, Mr. C. A. Birge has been chosen a director, and the choice is a good one. Since the meeting of the bank at Hamilton, which was held on Monday last, another of its directors has passed away in the person of Arthur B. Lee, of Toronto, who has served the bank faithfully on the board for the last fifteen years.

The increase of the capital of the Traders Bank by half a million dollars last year has proved, it appears, inadequate for the business offered to the bank. It is intended, therefore, to increase the capital stock still further by the addition of $1,000,000, and when that is done the bank proposes to open offices outside of Ontario. Eight new branches were opened during the last year. The shareholders gave the board power to establish a pension fund and a guarantee fund, and it is probable that these desirable funds will be established. An increase of circulation by nearly half a million is a feature of the statement, and the increase in deposits during the twelve months has been $2,429,000. The considerable ratio of 12.61 per cent. net profit for the year is shown. Out of this and the premium on new stocks $250,000 was added to rest, and $22,678 carried forward. With current discounts of $12,115,000 the bank has readily available assets of $5,624,000. The growth in the last eight years has been quite remarkable.

In the case of the Union Bank of Canada there are signs in the report and statement of the advent of new management. For example, we find a revaluation of assets made, and an appropriation of $210,711 made for the reduction of their values. This is distinctly a salutary step. For another thing, there is in the present report an appropriation of $10,000 towards the reduction of bank premises account, an item which we looked for in vain in the reports of several previous years. Mr. Balfour is to be congratulated upon these steps. The profits of the year are large, and it is well that this is the case, for it enables the writing off to be done without trenching upon rest. It was not to be expected that a growth so rapid as from $8,647,000 of current discounts and 41 branches in 1909 to $16,068,000 of current discounts and 81 branches in 1904 should not have left some bad debts. The deposits made show an increase of a million. These have not been all put into current loans; for we observe that a prudent increase is made in the proportion of easily available assets to total liabilities, which are now respectively $3,672,684 and $20,602,110. A eulogy of the ability and devotion of the deceased general manager, Mr. Webb, is contained in the report. Six branches of the bank have been opened during the year.

HERRING CATCHING AND CURING.

An experiment of much moment to the people along the coasts of our Atlantic provinces is proceeding in the neighborhood of Canso, and is being watched with extreme interest by the people of Halifax and elsewhere. Mr. Cowie, the Scotch herring curing expert, with the steam drifter sent out from Yarmouth, England, to experiment in improved methods of catching and curing Nova Scotia herring, arrived in Halifax a few days ago. Mr. Cowie is making Canso the headquarters for his experiments, but he expects his little fishing steamer to follow the herring in their migrations along the entire Nova Scotian coast and up the Gulf of St. Lawrence. The experiments are of two kinds, one relating to the curing of the fish and the other to the methods of catching them. So far as the former is concerned Mr. Cowie has already scored a success, proving that the fish off the Nova Scotia coast can be cured not only to equal, but to excel the famous Scotch article, "kippered" herring or haddock, thus commanding in the markets of the world fully twice the price formerly obtained.

The adaptability of Scotch methods of fishing on the coast of Nova Scotia and New Brunswick is still an open question. The steamer has set her drift nets on six occasions, we are told, and each time secured fish, the maximum quantity being twenty barrels and the minimum one barrel. The casts were made at widely separate points, and, while herring were found at all places, they were not found in large quantities, and it is believed a good deal of information will have to be gathered regarding the movements of the fish before this part of the experiments can be considered successful. One thing has been demonstrated, however, and that is that Canada is not getting all that she might out of her Atlantic fisheries. Attention has been turned to an important subject, and brains and capital are likely to be enlisted in the development of the industry on a more extensive scale than heretofore. The enormous increase in the Scotch fisheries dates from the establishment of a Fishery Board, and that some such body of experts is needed in Canada is undeniable. The Halifax Board of Trade is about making a move in this direction by the establishment of a permanent Fish Committee, which already has a lot of useful work cut out for it.

CROP PROSPECTS.

Finer and warmer weather has been vouchsafed to Ontario and Quebec during recent days, and all crops are feeling the benefit of it. In Quebec the great quantity of rain is producing a phenomenal promise of hay. Our Winnipeg telegram of yesterday noon says: "Crop reports from all over the West for the week just ended are favorable in the extreme. From every part of the country encouraging reports of very favorable weather conditions and of the magnificent growth of the crop have come in. The weather has been generally warm, with plenty of rain. The average height of the grain is from six to twelve inches. The outlook was never brighter in any previous year at this period. If conditions continue favorable there is reason to think this year's crop will be the best yet." Quite evidently no such word as fail is in the lexicon of the buoyant Western man.

ADVERTISING FAKES.

In one of the New York humorous journals the other day there was a timely skit upon the absurd lengths to which the much-lauded modern system of scientific (sic) advertising is being carried. One enthusiastic advertiser was represented as being willing (in prominent head lines) to sell the reader's real estate and remit him the proceeds, less commission of 95 per cent. "No matter where you are or what you are, or how sharp you are" (thus goes on this thoroughly up-to-date believer in the "art of publicity), "I can do you! My advertising bill runs up to $100,000 per annum, and you may as well help pay it." This is, perhaps, a little more than gentle satire; but does it not in truth strongly remind one of much which catches his eye on turning the pages of many of the popular magazines? Here can be found glowing descriptions of every kind of article under the sun, infinitely superior to other makes, and offered at prices not one-third of the ordinary market value. There are described marvellous systems of accomplishing by mail in six weeks what old-fashioned folks are glad to be able to do in as many years. The reader is let into the secret of how to obtain (also through the post-office) untold influence over the lives of others; how to cure diseases unheard of and otherwise; how to make a fortune with no outlay (except a few preliminary fees to the man who is going to sell him the way); how to invest his money so as to receive 120 per cent. per annum at the very least. And sandwiched in amid all these glowing, shrieking announcements to the great army of gulls are the cards of reputable business men, who are told (and know) that advertising is the life of trade. But how do they like their company in the fore-and-aft magazine pages? And is such a juxtaposition of the modest business card and the brazen lie, of the honest and the fake, fair either to the public or to the men who are trying in a legitimate way to tell it what they are doing?

THE CALGARY COMMERCIAL CONVENTION

In spite of the efforts we had made to get a report of the proceedings of the Calgary convention sent to us by wire in time for last issue, we were disappointed, for the telegram never reached us till Friday afternoon.

The first convention of delegates from Territorial boards of trade, which closed at Calgary on June 16th, is regarded as the most successful commercial gathering ever convened in the West. Sixty-two elected delegates from over thirty towns and cities of the various Territories were present, in addition to invited delegates from Winnipeg, and extreme interest was shown in nearly all questions presented. Mr. Thomas Tweed, of Medicine Hat, was elected chairman of the convention; Messrs. Laird, of Regina and Morris of Edmonton vice-chairmen, and Mr. C. H. Peterson, of Calgary secretary.

Resolutions were passed dealing with insolvency legislation; small debt procedure; the Chamberlain fiscal policy; endorsing the Hudson's Bay route; the speedy construction of projected transcontinental lines; navigability of Saskatchewan river; train inspection at a point west of Winnipeg; transportation outlets via the Pacific Coast; immigration into the Territories; and good roads. Motions preferred respecting increased duty on lumber and aid to colonization railways were dropped.

A banquet was tendered Mr. William Whyte, second vice-president of the Canadian Pacific Railway, and the visiting delegates, by the Calgary Board of Trade at the Queen's Hotel, on Thursday night, which was a brilliant affair. The 1905 meeting will be held at Regina.

WESTERN NOTES ON THE WING.

The British Columbia town of Fernie, which was so fire-swept not many months ago, is rising from its ashes, and the inhabitants are showing much confidence. They are hustling in building operations, and the rough carpenter is having his innings; temporary premises are being rushed up; all forms of buildings from booths to sheds cover the burned area, without any particular regard for appearance at this stage. Later on, Fernie will be seen clothed in solid brick. The business men of the place have every confidence in the future of the town, and although in many cases severe losses were inflicted by the fire that insurance did not cover, these men that suffered so are not over-borne by the calamity, but have calmly set themselves to repair their fortunes with renewed courage. They are tackling it again, and with the indomitable spirit that adversity cannot conquer, in the conviction that they are ultimately bound to succeed.

Work in the mines has been slack and uncertain for some time, the men working only two and three days a week

The next town, travelling eastward along the Crow's Nest branch of the C.P.R., is Michel. Like Fernie, it is also a coal town, and the whole paraphernalia of tipples, cars,

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending May 31st, 1904.

J. M. COURTNEY,
Deputy Minister of Finance.

coke ovens, and the like, fill the yards of the place. Michel is termed a company's town; the Coal Co. own it; there has been no selling of lots, everything in the shape of land here has been held tight by the company. Although the town has a population of about 1,500, it has only one store. It might be suspected that there was room for another, but the Crow's Nest Coal Co. will not sanction any more. So business in this capacious store is carried on under the name of the Trites-Wood Co., Limited, and a big business it does. There is also one hotel, and it is run exceedingly well; may it never fall into worse hands than the present management. Such is my wish. The company's houses for their employees are roomy and comfortable looking, with neat, white fences surrounding. These form a pleasing and strong contrast to the rough log shacks that formerly occupied the ground.

Our next town as we proceed east is an entirely new one. Its name does not yet appear on the Canadian Pacific time-table, but this will be remedied in the near future. Coleman, which is in Alberta, is not named after the maker of a celebrated yellow condiment, but rather takes its name from its great fuel deposits. The town was incorporated only last September, and already we see streets graded and fine buildings going up on them. The International Coal and Coke Co. are operating the mines at this point; they are installing a plant with a capacity of 2,000 tons a day. There are 400 coke ovens under construction; grading is completed for three miles of trackage, built and owned by the company, giving every facility for the rapid conveyance and handling of the product of the mines. When the works that the company have at present under way are completed, there will be employment assured here to at least 600 men. The town has already twenty business places, fine modern buildings with up-to-date methods prevailing. A waterworks system with a 250-foot head is already a possession of the inhabitants, with hydrants at every corner, and an electric plant is to be installed. For hotel accommodation, the "Coleman" affords as satisfactory experience as any house in the West, not even, in my opinion, excepting Winnipeg. The town is afforded banking facilities by the British American Trust Co. In every way, Coleman, N.W.T., is a most remarkable youngster of ten months. The town is charmingly situated; undulating, grassy hills rise in a series of lovely terraces back from the town, capped by the Crow's Nest Mountain. From this mass, standing in stately grandeur dominating all, down to the purling brook that meanders down the pass, all is beautiful in scenic charm.

As one looks east, Turtle Mountain stretches itself athwart the pass. The town of Frank, N.W.T., nestles at its foot on the far side. Remembering the destructive landslide here a year ago, we are astonished to find apparent unconcern at any possible recurrence of such a thing, and confidence that the rest of the mountain will "stay up." What a stupendous pile of rocks, where did they come from(?) tossed clear across the valley for two miles and piled even at that limit 300 feet high? It seems impossible that they should have come off the top of Turtle Mountain. The people of Frank have moved their homes just a little to the westward of the scene of the slide, but they remain quite near the base of the mountain, and, judging from the wide sweep that the late fearful slide took presumably they are as safe as if two miles distant. To quote from Byron:

> Mountains have fallen,
> Leaving a gap in the clouds, and with the shock,
> Rocking their Alpine brethren; filling up
> The ripe, green valleys with destruction's splinters,
> Damming the rivers with a sudden dash
> Which crush'd the waters into mist, and made
> Their fountains find another channel.

Lethbridge, 12th June, 1904.

OUR MANCHESTER LETTER.

A great deal of fresh comment has been excited by the cable from Ottawa detailing the new incidence of the Canadian tariff. Of course more attention has been attracted to the items of increase than to those of decrease. And hard words have been used by some partisan newspapers. In effect, the bigots of Liberalism here have taken a new vow to give no preferential rebate on colonial wheat. The friends of preferential dealing see in the Dominion's decision a tactical error. They regret now that Canada should ever have accorded a measure of preference upon woolens and cordage that she could not maintain. Such are the general views of the rival politicians. Men in the woolen trade, looking coldly upon the new proposition as a matter of business, are not moved to transports of passion. The seven per cent. of additional duty is serious perhaps, but not a killing matter. On level terms, they fear Continental opposition only in a few lines of goods. As Germany and her neighbors are still handicapped by five per cent., there is a confident feeling that the Canadian export trade in woolens will continue to extend. In the interest of Imperial relations, it may be hoped that the present reconstruction will be somewhat permanent in its nature.

For as many years as one can remember, there has been a demand for a British Minister of Commerce and Industry. On the very day the news from Ottawa about the tariff changes was received here, an inspired revelation was made in the Daily Telegraph. The anchronism we call our Board of Trade is to be removed. The new office of a Secretary of State is to be created and as an inevitable consequence salaries are to be raised. That is as far as existing intentions are disclosed and excellent as may they be in so far as they go, they are ludicrously insufficient. Unless the new Ministry of Commerce is to take the colonies into its purview, and to maintain resident commercial agents in most of them, one of the most pressing reforms will have been burked. But we in England actually need much more than that from the new department. It must take over some of the commercial reporting now done by agents of the Foreign Office, and must weld into a homogeneous whole our scrappy systems of commercial intelligence. Further than that our industrial leaders will look for sympathetic and business-like treatment; which has not invariably been obtainable from the obsolete Board of Trade, which, as you know, was a department of Government.

An article from the pen of Mrs. Murray, in the Contemporary Review, has been copied widely by provincial papers. Perhaps some Canadians might care to administer an antidote to the impressions that lady gives. Her contention is that life in the Dominion is much more costly than in the Old Country. A middle-class household in Montreal is said to require two shillings, where one in England would suffice. She effrays would-be immigrants with such illustrations as these: A loaf of bread, 2¾d. in London; 4½d. in Canada; Canadian apples cheaper by 7s. the barrel here, than in Montreal; textile furnishings, four times English prices, and sundries of dress, twice or three times. Eggs and milk and meat and fish are said to exhibit no saving, while gas at 6s. per 1,000 ft. means twice or thrice our usual cost. Certain details are at variance with one's own private information from settlers, and they are repeated here for the philosophical interest of truth-lovers.

Cider as a beverage has been growing in vogue during recent summers, and medical testimony is helping to popularize its consumption. It is brewed extensively in the southeast and southwest of England, and in many distinct flavorings. American ciders are also upon the market and some warnings against them have been issued. A preservative is employed, which throws a sediment of the color of brick-dust and imparts a flavor that may be distantly likened to chloride of lime. What the chemical may be, I am not in a position to say. But for the benefit of any Canadian, who may have designs upon cider trade in England, I add that this unpleasant concomitant ought by all means to be avoided. Our own growers are making the most of the purity and wholesomeness of their brands, and imported cider had better rival the home-grown article in that respect also.

Some sensation has been created by the oil war now raging. The American and Russian companies are throat-cutting with zest and fury. Common burning oils, such as were 3⅜d. the gallon a month ago, are now at 2¼d., and consumers are receiving the benefit. The Standard Oil Co.

are the aggressors and the Shell Transport concern, of Batoum, their principal protagonists. All the Caucasian distributors are being drawn into the conflict, and should Rockefeller win, the control of the kerosene trade in Britain, including distribution to small retailers, will fall into the grasp of the Anglo-American Oil Company, which is the Oil King's English alias.

Local loans on towns' security are not in high favor just now among professional lenders. Financial critics have spoken spitefully also against the increase in municipal indebtedness. There is, however, something to show for the money. Many millions have been absorbed by the electric tram systems that now girdle the towns, and promise to connect the whole industrial half of the country. Gas, water and sewage schemes account for most of the rest, and sinking funds are in operation against all of them. Private investors, and in especial small ones, do not share the fright of the financiers. Many of our municipalities are now doing direct business in small amounts and receiving money on deposit for fixed terms. To the thrifty workingman no security seems safer than the rates of the town he dwells in. Other considerations equal, it is probable that he will increase his holdings and that by slow degrees the municipalities may become less helplessly dependent upon the professional market. This development is separate from the municipal bank that the city of Glasgow has sought to legalize and from the other schemes of our collectivists. Those ideas are still removed by a few years from realization in practice.

Manchester, 10th June. NORTH COUNTRY.

OUR HALIFAX LETTER.

We are having a rather exciting time here over the holiday question. The Natal Day of Halifax was celebrated for many years on June 21st, although it is shown that to be in accordance with historical facts and allowing for the changes in the calendar it should be on June 31st, that being the anniversary of the day on which Lord Cornwallis arrived off the mouth of this harbor, in 1749. As July 1st is a statutory holiday it would be convenient to many to synchronize the two holidays—a course followed for the last two years. This year, however, the city council voted the 21st a public holiday, and it has been proclaimed as such by the mayor. The Merchants' Association held a meeting last week to petition against the two holidays, but the members after a lot of wrangling divided equally—thus preventing action. It is only in recent years that Dominion Day has been generally kept in this city, "Halifax Day" having been substituted by a large proportion of the citizens. The keeping up of the two holidays is a matter of sentiment and at the bottom of it lies the animosity of a few old-time Anti-Confederates who, by keeping the city's Natal Day to the front, hope to minimize the observance of Dominion Day. As all the wholesale houses in the city close the year round on Saturday afternoons, the extra holiday is objectionable to many from a business standpoint.

A large force of men are now employed in double-tracking the Intercolonial Railway for the distance between Halifax and Windsor Junction, where the road forks, going to Windsor on the west and Truro on the east. The heavy traffic over this end of the road having made this work necessary. This together with the construction of the Halifax and South-Western Railway has created a big demand for unskilled labor.

An effort is being made to get the Halifax tramway to extend its line through Dutch Village, passing the cemeteries and connecting with the existing line on Almon Street. A petition for this extension has been signed by over one thousand citizens. The portion of the city concerned is rapidly growing in importance, and sooner or later will secure the convenience asked.

Mr. W. T. James, one of the leading merchants in Bermuda, spent last week in Halifax. He says the extension of trade in Canadian goods is progressing on the islands, but he complains that Canadians have not yet learned the importance of a number of matters touching their export trade, such as the packing and wrapping of the goods, careful marking, and the necessity of attending to orders *as soon as* they arrive. Indifference to these points has lost Canadian houses a lot of business.

The strike situation at Sydney is unchanged. The company has about 200 men at work on the plant, and is making small shipments. Large numbers of applications are made daily at the P.W.A. headquarters for relief. Single men are allowed three dollars a week and married men five dollars. The drain on the relief fund is heavy, but it is being replenished by liberal contributions from the lodges. The only unpleasantness of the strike situation occurred when the public attempted to collect a poll tax from a body of Italians about to leave the town. The Italians did not belong to the P.W.A., but the latter body, on learning of the trouble, appointed a committee to aid the city police in maintaining order.

The coal output of the Nova Scotia Steel and Coal Company for 1904 will be 200,000 tons in excess of last year, and it is practically all sold. This company earns well on for a million dollars a year, and regularly pays increasing dividends.

The United States School Ship, "Pennsylvania," is scheduled to arrive in Halifax on September 15th, and will remain here for some weeks. This ship has 250 cadets on board who are preparing in this novel manner for entrance into American colleges. The internal arrangement of the ship is planned to provide every requisite of school-life, giving the pupils advantage of the stimulating influences of sea-life as well as the benefits of travel and observation under proper guidance.

The province was visited by a heavy frost recently which did considerable damage to small fruits and vegetables in the low sections. Fortunately the apple trees were sufficiently out of bloom to escape damage. The apples are setting well, and if conditions continue good, the crop will be enormous, though it is perhaps too much to hope for this after the big yield of last year. The total quantity of apples shipped from Nova Scotia to Great Britain last season was 531,808 barrels. About 90,000 barrels were sold in Newfoundland and the Maritime Provinces.

The tercentenary of the landing of Europeans in Canada for the purpose of settlement is taking place at Annapolis Royal this week, under the auspices of the Nova Scotia Historical Society. Annapolis Royal is the oldest town in Canada, and the second oldest on the North American Continent.

Halifax, Nova Scotia, 20th June, 1904.

A ST. LAWRENCE TRIP.

(2)

A former resident on the shores of the Bay of Quinte, who had read my notes of this trip thus far, wondered that more had not been made of the beauty of the Bay which has been famous for many years. The aforesaid beauty is freely admitted; but it must be pleaded in excuse that if in last week's brief story, ending with Trenton, I did not praise the landscape glories of the Bay, it was because rain and drizzle shut them out from our eyes, and I could hardly have been a truthful narrator, if I described features of the trip which we could not and did not see. An Irishman, living in one of the Midland Counties of England, advertised that he taught Readin', Writin', Arithmetic, the use of the Globes, and Navigation. A retired naval officer, living near by, sent his son to school for the autumn term. Home came the boy at Christmas, and the old salt examined him as to his acquirements in navigation. Finding that the boy did not know the bowsprit of a vessel from the binnacle or a halyard from the hawse-hole, the officer went in high dudgeon to the teacher. "How dare you, sir, send my boy home to me without having acquired even the rudiments of navigation? You are an impostor!" "Aisy, now, Commander," says the schoolmaster, "how could ye expect me to teach navigation *in the winter*, whin the navigation does be froze up entirely?"

We saw at one point on the Prince Edward County shore, the village of Wilsonville, where Mr. Wilson has for years had a foundry and machine shop, the machinery of which is driven with great force by water from a lake 100 to 200 feet above the works. How this lake is fed is one of the puzzles for the local scientists. Belleville, which should be atractive from the very name, "beautiful city," in French, we cannot pass by without a word. But really, landing at the old Corby wharf, as the "Spartan" did, we could see but little of the place. There, inviting us to enter, was a brick tower and the tops of several church spires seen above the trees, but the only landmark we could see the whole of was the Abbott Iron and Steel Works on the landward side of us, which are now disused. Opposite lay the Bay Park, which occupies the site of the former Rathbun sawmills and lumber piles, and it was nearly covered with the high water. As the rain kept passengers from going ashore, they watched for what seemed hours the deck-hands hauling truckload after truckload of cheese on board the boat, to the number of 600 boxes, destined for the English market. This done, the embarking of some spirited horses was a matter of more varied interest and of decidedly more fuss.

Deseronto and Picton were the further points at which we stopped in the daylight. On an island in front of the former town, known as Foresters' Island, the able Chief of the I.O.F. has his summer home. His fondness for kiosks, pagodas, pinnacles, and bizarre architecture generally is shown in the numerous structures erected here. One of the buildings, as yet unfinished, is intended as a home for orphan children of parents who had been Independent Foresters, but may by misfortune become dependent ones. Deseronto is a justly noted manufacturing town, made so by the enterprise of the Rathbun family. Here are not only sawmills and various wood-working factories, but cement works, wood alcohol works, and other industries of moment. It is a connecting point, besides, for railway and steamer lines, east, west and north, as well as southward to Watertown and Oswego in the United States. It was here that a lady of our party made the discovery—perhaps through a burst of confidence on the part of the chambermaid—that most of the male waiters at table were university graduates. Upon closer enquiry, a lady who knew the locality told us that there were among them, one from McGill, one from 'Varsity, and three from Queen's, who had passed in arts, and took this method of putting some money in their scanty purses.

A place we all wished to visit, really visit, and not look at from a wharf, was Picton, the capital town of Prince Edward County, because it was old, and quaint, and picturesque, and friendly. But look at a fraction of it from a wharf and imagine the rest, was what we had to do, for our steamer, being of too deep draught, could not go farther than the entrance to the harbor. Quiet beauty characterized the neighborhood. Close at hand were graceful elm and birch trees, dwellings and farm houses of types both old and new, and an air of comfort was everywhere evident. All along the shores of Bay of Quinte churches are numerous. We found, too, plenty of dormer windowed houses, and dwellings which looked, as a fellow-tourist expressed it, "as if they were gittin' on to the old Psalmist's limit of human life." Dairying and fruit culture are staple industries of Prince Edward County, and Picton has the handling of much of these goods for export.

Kingston and Gananoque our ship passed in the night, Brockville in the early morning, reaching Prescott and the Galops Rapids at an hour not too early for passengers to rise who had not seen these, the first of the series of rapids in this great river St. Lawrence. Farther on were the Rapids du Plat and the Longue Sault. All these furnished more or less stirring enjoyment to the travellers on board, many of whom were Americans, and a dozen of whom, Cook's tourists from the north of England, who had been at the St. Louis Exhibition. One of these pleasant folk, a clergyman from Accrington, in Lancashire, expressed a lively sense of the beauty of Toronto and Hamilton, and the attractiveness of Canada generally. Cornwall being reached, we transferred to the "Columbian," our boat being too deep-laden to venture the most eastern rapids. These were the Coteau, the Split Rock, and the Cascades, followed by the really alarming Lachine. To turn and look back at some of these green and white declivities we had passed through, set the nerves of some of us thrilling as much as when in the rapids themselves. But here we are presently at dear old Montreal.

20th June, 1904. J. H.

A CANADIAN EXPORT COMPANY.

We are informed that the firm of Browne & Wells, Limited, which firm took over the business of Browne, Wells & Co., and have been doing business as general export and import merchants in Toronto for the last eighteen months, have found it necessary, owing to the large increase in their business, to consolidate their interests with the new firm that has just been incorporated under the name of the Imperial Export Co., Limited. The president of this company is Mr. George F. Trowbridge, of Messrs. Strong & Trowbridge, of New York. The vice-president is Mr. R. J. Christie, of Messrs. Christie, Brown & Co., of Toronto; Mr. Christie was also vice-president of Browne & Wells, Limited. We understand the other directors are Mr. R. K. McIntosh, of Messrs. P. McIntosh & Sons; Mr. J. D. King, of Messrs. J. D. King & Co.; Mr. McLaughlin, of the McLaughlin Carriage Co.; Mr. de Schryver, of New Zealand, whose valuable connections in New Zealand the new company are taking over, and who will also represent the company there. Mr. R. H. Dana, of New York, is coming to reside in Toronto to manage the business here in conjunction with Mr. J. A. Wells, of Browne & Wells, Limited. This company have already established valuable connections throughout the British colonies and other parts of the commercial world, and have a very good connection in England. We understand the head office of the English branch will be in London, under the management of Mr. John L. Sardy. Mr. Browne, of Browne & Wells, Limited, will continue to represent the company in Liverpool, where he has successfully pushed the products of Canadian manufacturers, by giving them something they never had before, a strong export company, managed by men who have been brought up in the export business, and also old-established connections. It appears that the Imperial Export Co. are well able to do their part, and they should meet with hearty cooperation by the Canadian manufacturers in putting their goods on the foreign markets, more especially in the British colonies, in competition with their neighbors across the line. In discussing the matter with Messrs. Browne & Wells, Limited, they state that the principal reason for their desiring this consolidation was the strong connections they would make in foreign markets, and they incidentally mentioned that there is a strong feeling abroad in the British colonies, both sentimental and otherwise, in favor of Canadian goods, owing to the preference that has been introduced into some of the colonies in favor of Canadian manufactured goods.

THE CANADIAN LIFE INSURANCE OFFICERS' ASSOCIATION.

The regular quarterly meeting of the association was held in Toronto on the 10th inst., the following members being present: Messrs. David Dexter, president, in the chair (Federal); L. Goldman, (North American); David Burke, (Royal Victoria); John Milne, (Northern); W. C. Macdonald, (Confederation); F. Sanderson, (Canada); A. McDougald, (Pelican and British Empire); J. G. Richter, (London); R. Junkin (Manufacturers); P. C. H. Papps, (Manufacturers); T. Bradshaw, (Imperial).

Several important matters occupied the attention of the meeting, amongst which was the subject of Competitive and Comparative Literature. The report of the committee which had been considering the question for some time, was adopted. The recommendations were as follows:

"In the opinion of your committee, the stamp of dis-

approval should be placed upon competitive literature, comparisons and criticisms, and to this end it is strongly recommended that: (a) The companies, members of your Association and their representatives, abstain from the general publication and circulation of competitive and comparative literature. (b) That the companies shall not permit their representatives to publish, directly or indirectly, or to circulate any literature or advertisements referring in any way by name, number, or otherwise, to any life assurance company member of this Association. (c) That all such literature, advertisements and publications now in the possession of companies or their representatives be immediately recalled and destroyed. (d) That the companies and their representatives shall do everything in their power to discourage hostile and improper criticism or attacks of any kind in the insurance or public press upon any company member of this Association."

The fact that the Canadian Life Insurance Officers' Association has so strongly pronounced against the use of literature of this character will go a long way to secure its discontinuance.

With reference to the Bill introduced into the Senate by Hon. J. K. Kerr, entitled: An act further to amend the Insurance Act, we observe that the Association has regarded with much disfavor the attempt to interfere with the General Insurance Act, to the advantage of one company, for the following, amongst other, reasons:

1. The bill is introduced on behalf of, and can apply to the business of only one institution, the Mutual Reserve Life Insurance Company, of New York, formerly known as the Mutual Reserve Fund Life Association of New York; yet it has been framed in such a way as to give the impression that it is of general import. This Association considers that the introduction into the General Insurance Act of provisions such as are contained in the bill in question, giving power to change the amount of the policy, alter the premium, and entirely reform the contract, would convey an erroneous impression to the Canadian insuring public, and to the insuring public of other countries where our Canadian companies are seeking business, in regard to the stability and standing of our regular companies, and of life assurance in general in Canada.

2. The Association is also of the opinion that the General Insurance Act should not be made the vehicle to give relief to any one institution in particular. If this be allowed to be done in the case under consideration, it would appear that it may form a dangerous precedent.

3. The members of the Canadian Life Insurance Officers' Association regret that there has been included in the General Insurance Act legislation dealing with assessment assurance, inasmuch as it has afforded an opportunity for those who advocate assessment assurance to urge that that class of assurance and regular life assurance, being legalized by the same Act, were in fact the same, and, as a consequence, many people have been deceived thereby. Should further legislation on the subject of assessment assurance be introduced into the General Insurance Act, as proposed, it appears to this Association that it will have the effect of aggravating this impropriety.

4. The Association ventures to suggest that whatever legislation Parliament deems it advisable to grant in the premises, such legislation should be in the nature of a private bill, so that it will be unmistakably known to apply only to the society seeking it—the Mutual Reserve—and thus, that sound life assurance shall not be injured or prejudiced thereby.

The next meeting of the Association will be held in July.

DEATH OF ARTHUR B. LEE.

It will come as a surprise to many in this city to learn of the death on Wednesday morning last of Mr. Arthur B. Lee, head of the Rice Lewis & Son Company. His illness had not until quite recently been deemed dangerous. He had had a serious illness some years ago, but as he came of sturdy English stock and was only sixty-six years old, few expected to hear of his somewhat sudden taking off. Mr. Lee was Toronto born. He entered the employ of Rice Lewis & Son in 1856, at the age of eighteen; in 1877 he was made a partner in the firm; and in 1889 at incorporation, president of the company. He was a sound and conservative business man, of exemplary life and unquestioned integrity. Because of these qualities he held a prominent position in business circles. In 1878 he was president of the Board of Trade, and in 1881 became chairman of the Board of Harbor Commissioners, a position which he held at the time of his death. He was a director of the Bank of Hamilton, the Toronto General Trusts Corporation, and the Victoria Rolling Stock Company.

ACTUARIAL EXAMINATIONS.

The following were successful in passing Part 1 of the examinations of the Institute of Actuaries of Great Britain, recently held in Toronto: Charles A. Armstrong, Imperial Life; A. G. Dalrymple, Canada Life; John Esler, Crown Life; Lorne K. File, Imperial Life; Louis Linzmeyer, Manhattan Life, New York; Donald Matheson, Imperial Life; Edmund Scales Macfarlane, Manufacturers' Life; James Baldwin McKechnie, Manufacturers Life; John G. Parker, Imperial Life; A. G. Portch, Canada Life; W. R. Pearce, Kingston, Ont.; W. A. Sinclair, Canada Life. It will be observed that two of these candidates are associated with the Manufacturers Life, three with the Canada Life, one with the Crown Life, one with the Manhattan Life of New York, and four with the Imperial Life.

A PICTURESQUE SHORE.

There are perhaps not many in Ontario—not so many relatively, at any rate, as in provinces east of her where interest in the historic past of localities has been long and uniformly maintained—who have "ta'en up the antiquarian trade," as a certain Captain Grose did long ago, and interested themselves in archæology and the history of places. But the province is improving in this respect. The Canadian Institute, the Ontario Historical Society, the Canadian Club, of Toronto, and various local associations in the province, and the Government itself, through the Provincial Museum and its zealous curator, have stimulated an interest in historic remains in different parts of Ontario. Such books as: "In the Days of the Canada Company," by Miss Lizars and her sister; "The Humors of '37," by the same; and monographs issued from time to time by writers concerning places in the east and southwest of the province, have helped to awaken or keep alive intelligent concern as to what is precious and picturesque in the annals of our old-new heritage.

Two pamphlets have reached us within the past few days,* which must prove of value to those, now unhappily few, whose memories can go back to the troublous times of the Mackenzie Rebellion, as well as to those who welcome records or memoranda about a singularly interesting locality—the Canadian shore of the beautiful river Detroit. Beginning with the year 1797, when there was a military post at Amherstburg, the souvenir pamphlet entitled Old Fort Malden contains maps and sketches bearing date 1812, 1830, 1838, and later, illustrating the fort, the island of Bois Blanc, and the town. At the meeting of the Historical Society, held in Windsor, on 2nd June, papers were submitted dealing with the shores of Detroit river and Lake St. Clair; the capitulation of the American General Hull to General Brock, at Fort Detroit; the schooner "Ann" episode of 1838; and the Fighting Island affair, where Col. Prince penned his merci-

*Historic Amherstburg, 1812—1837-38—1866: A souvenir issued on the occasion of a visit of the Ontario Historical Society, June 2nd, 1904. With illustrations.

Fort Malden and the Old Fort Days. By Rev. Thos. Nattress, B.A., Amherstburg, Ont. Printed by the Echo Printing Company.

less but necessary despatch announcing that certain invaders of our soil, having been condemned to death, were "shot accordingly."

But our concern must for the moment be with the pamphlets we have named, descriptive of scenes and doings at the particular part of the Canadian frontier which has been described, and correctly, as the most southerly point of the British possessions in North America. Besides the historic interest of this old town and older fort, the river shores at this place have a landscape beauty which for two and a half centuries has entranced the pioneer and traveller, whether he were the Jesuit missionary of 1671 in his canoe, or the passenger by one of the splendid steel ships of to-day, which pass and repass these shores from Detroit to Cleveland or from Duluth to Buffalo. The prospect from the grove at the mouth of the river, between whose banks the blue waters of Superior, Michigan, and Huron pour southward, is ecstatically sung by Charles Sangster, in his poem: Evening Scene on the Banks of Detroit River:

I stood upon a bank that faced the West,
Beyond me lay Lake Erie, softly calm.
. . . . . .
There lay the Island, with its sanded shore,
The snow-white light-house, like an angel friend.
. . . . . .
And down behind the forest trees, the Sun
Arrayed in burning splendors slowly rolled,
The woods were flashing back his gorgeous light,
The waters glowed beneath the varied green.
Even to the softened shadows, all was bright,
Heaven's smile was blending with the view terrene.

The mention by Sangster of the magnificent trees at Elliott's Point reminds us to describe the historic Elliott mansion which produced an extraordinary impression upon some members of the Historical Society, who visited it on the excursion this month. Here stands, overlooking Lake Erie, a stately building of brick, "four-square to all the winds that blow," with wide verandahs on every side, an ancient gateway and a serpentine driveway. It is a hundred years old, possibly more, for Col. Matthew Elliott, grandfather of the present occupant, Mr. Fred. E. Elliott, came to Amherstburg in 1784, at which time, Mr. Nattress' pamphlet informs us, there were fortifications already at or near this point. In the wide corridors and lofty chambers of this most interesting house are drawings and paintings of scenes and personages of the 1812 war, and of the 1837 rebellion. In cabinets or on shelves are family and historical records, letters, military despatches, old arms and curios. Reminders are here of the sojourn in garrison, between 1838 and 1850, of many British regiments—the 32nd, the 34th, the 43rd, the 89th, and the old Royal Canadian regiment, the "Sawbucks," as they were familiarly called, which in succession, up to 1851, after which no garrison was maintained, occupied Fort Malden. We commend to the attention of the Historical Society and of the Ontario Government the eminent propriety of securing this landmark of long ago, and such of its contents as can be secured, as a possession of the country. And let this step be taken before it is too late. For, pity it is to say it, little more than forty years have passed since the lofty frame building in the town of Amherstburg, which had been Brock's headquarters, was allowed to be torn down, and its timbers made into firewood, instead of being maintained as a memorial of the brave deeds of loyal men at a critical time in the history of Canada.

Well does the present writer, then a boy, remember this tall, weather-beaten Drake house, with moss growing on its steep roof, a double flight of curving steps to its main door, the semi-dismantled interior with worm-holed floors, carved mantels, oval concave and convex mirrors, dusty hangings and the curious air of ghostly desolation which Hood hints of in The Haunted House:

The very stains and fractures on the wall,
Assuming features solemn and terrific,
Hinted some tragedy of that old hall,
Locked up in hieroglyphic.

Pictures of many familiar things, alluring to those fond of studying the past, are to be seen in the illustrated pamphlet, named above. The Tecumseh stone, from which that great warrior held up to scorn the retreating British General Proctor—the three block-houses of logs on the British island of Bois Blanc—the stump of the old Fort Malden flagstaff, kept for years with care by the late John MacLeod, whose dwelling, still standing, was on part of the site of the fort—the monument in Christ Church burial-ground to the soldiers who fell at Pelee Island, designed and erected by the late Mr. Andrew Kemp, of the Royal Engineers' Department—the moat and northwest bastion of the fort—its ruined buildings and still more ruinous-looking mortars, and carronades. An interesting old town, Amherstburg, in picturesque surroundings, modernized in many ways and rejoicing in such modern features as electric light, a summer hotel, and a trolley line through Sandwich to Windsor, but with an antique flavor that is all its own.

FIRE INSURANCE MATTERS.

It is announced this week that a dividend at the rate of six per cent. per annum has been declared by both the British America and the Western Assurance companies for the half year, and that it will be payable on and after Tuesday next.

According to a decision of Chancellor Boyd, a lunatic is civilly liable to render compensation to persons affected or injured by his acts. Judgment was given last week against the defendant in the suit of Stanley v. Hagey, of Walkerton, whereby the defendant is liable for $2,237 in having caused the burning of the plaintiff's barn.

We are interested in hearing that Mr. E. F. Garrow, the efficient secretary of the committee of fire underwriters appointed to facilitate the adjustment of losses by the Toronto conflagration of April, has in hand a pamphlet descriptive of the nature and extent of the losses, etc., etc. This pamphlet he hopes to be able to finish next week. It is sure to be interesting.

The aggregate of insurance loss by the great Toronto fire is said to approach very closely to eight millions of dollars, while the total property burned was probably between ten and twelve millions. These estimates, while not official, were given us by a well-informed underwriter. Next week we hope to be able to give exact figures.

The opinion of an expert is worthy of consideration, and when that day comes—the day when the people cease obtaining their "wisdom" from the ward bosses—such suggestions as the following on the subject of fire protection will result in much good. Recently, Mr. Victor E. Rhodin, an underwriter of Stockholm, was interviewed by a local paper, and took occasion to point out why fire insurance rates were so much lower in Europe than in America, and added:—"What is needed in America is wider streets, lower buildings and more yard room. The primary need, however, is better building laws and a stronger regard for the safety of business and public structures. While in New York recently, I saw the fire department fighting a fire. The supply of water was inadequate, and I questioned the fire authorities about it. They said it was the fault of the water company and was no business of theirs. It is always something, and this something is at the bottom of the big fires in America and the high insurance risks."

Among several good effects already produced by the Baltimore conflagration (and not the least of them in importance) must be counted a sort of general stirring up of municipal authorities in various sections of the country to a keener recognition of the necessity of reforms and improvements looking to the prevention, and also to the extinguishment, of fires. Increased efficiency in fire-fighting departments; a better water supply; greater promptitude in calling in the aid of firemen, and so forth. It seems impossible to conceive of any occurrence in which the old adage that "a stitch in time saves nine" applies with equal force as in the case of an outbreak of fire. * * * It seems almost like a fatality that the governing bodies in cities and towns (in too many instances at all events) have occasional fits or spasms of vigilance, and these only when some greater disaster occurs.—Insurance News.

FINANCIAL MATTERS.

The reports in the Winnipeg papers that the Spencer Block in that city has been bought for $800,000, or at the rate of $2,000 per foot, leads some of them to repeat the rumors that one or more of the large Toronto departmental stores is about to invade that territory. But in boom times all sorts of things are said—and done.

The Mercantile Bank of Lancashire is a concern that has some North American relations. On this bank the American Express Co. drew small drafts for customers. Now it is being absorbed into the Lancashire and Yorkshire Bank, Limited, an institution with 126 branches, a paid-up capital of £860,000, and a reserve of £570,000. Thus the Mercantile follows in the direction of the Adelphi, of Liverpool, which joined the larger corporation in 1899. Shares in the Lancashire and Yorkshire Bank return 15 per cent., and are well held at £33 10s. per £20 share of £10 paid. The deal is regarded as good for both sides, and has been approved generally by the customers of the two banks, because for one reason, it does not involve the centring of control in London. In the industrial centres it is felt strongly that local directors, practically acquainted with the course of local trade, are to be preferred to the most eminent of financial magnates not so informed. One projected amalgamation (that of the Manchester and Liverpool Bank with Lloyds, Limited), fell through for no other cause than public resentment against the transference of power. Though London managers do control perhaps five-sixths of English banking routine, it is probable that their scope will not be enlarged very much more. For one thing amalgamation has approached its limit of possibility, and for another, clients are averse to more changes.

LIFE ASSURANCE ITEMS.

The Century Life Insurance Company secured from the Ottawa Banking and Commercial Committee, an extension of time to May 23rd of next year, within which to obtain its license from the Department to do business.

The bill respecting the Ottawa Fire Insurance Company presented to Parliament has been reported by the committee, Mr. Chas. A. Magee, Ottawa, explained the bill. The capital stock of the new company is $1,000,000. The head office of the company is to be in Ottawa. The new company is liable for all the debts of the old company.

There was held in Toronto last week the twenty-fifth annual convention of the Canadian Order of Foresters, which is entirely distinct from the Independent Order of Foresters, head office, Brantford. High Chief Ranger J. A. Stewart, Mayor of Perth, presided, and some 400 delegates represented all parts of the Dominion. The High Chief Ranger referred, in his annual address, to the gratifying progress of the Order during the past year. The increase in membership was 7,439, making a total membership of 52,160. Receipts from insurance premiums for the twelve months amounted to $433,210, and from interest on investments, $52,224, making a total of $485,434, or an aggregate of insurance funds on hand of $1,795,594.68. The sum paid out during the year in the life insurance department was $268,627, for 270 claims, leaving a surplus of $1,526,967, or a net income for the year of $216,807. According to the statement, the sick and funeral benefits branch showed a net increase in membership of 2,847, making the total 30,454. Mr. Clovis Laporte, of Montreal, High Chief Ranger, conferred the High Court degree on delegates attending the High Court for the first time. These members numbered nearly two-third of those present. The management of this body is conducted, we believe, with prudence and economy.

The British Columbia fruit industry is making good headway, year by year. It has already shown its capacity to grow magnificent crops. Now, ventilated cars are to be put on by the Dominion Express Co. to ship it from the growers to their chief markets, which at present are in the North-West Territories.

DRY GOODS ITEMS.

A warehouse of the Montreal Cotton and Wool Waste Company, in Montreal, was on Monday, 13th inst., seriously damaged by fire, including a large quantity of material. The loss was $15,000, not insured.

We hear from Cornwall that Mr. S. Greenwood, local manager of the two Cornwall mills of the Canadian Colored Cotton Company, has been appointed to the position of general manager of the company, which recently became vacant through the retirement of C. D. Owen. Mr. Greenwood appears to be very popular in Cornwall.

A New York hatter says that though a few manufacturers and haberdashers are trying to push the brown hat with great zeal, yet its hold on the market is very weak. In some places in the country it may sell well, but in New York, it has become even less popular than it was a few months ago.

Much dissatisfaction is expressed in the trade at not getting a reply to the representations of the deputation which went to Ottawa to ask the Government to defer the enforcement of the new tariff regulations, as regards woolens, until August 1st. The Dry Goods Section of the Board of Trade has instructed the secretary to address a strong letter to the Department praying for a speedy decision, as business is suffering through the delay.

Late and apparently reliable reports are to hand regarding the outlook for the growing cotton crop in the South. The acreage is said to be 32,363,690 acres, or an increase of 11.62 per cent. over last year, while other authorities speak of an 8 per cent. increase. At any rate, an increase of some proportion appears certain as was only likely to result from the very high prices this year. The larger acreage is credited to nearly all the cotton States, running from 3 per cent., in Florida, to 55 per cent., in Oklahoma. The prospects on June 1st, so far as weather conditions, etc., were concerned, were quite favorable.

—Mr. J. Grant, of Montreal, is trying to interest several Stratford, Ont., capitalists in a company for the manufacture of powdered milk.

—The Canadian Pacific Railway land sales for the year ending June 1st show a very great falling off, compared with the previous year, but the reason of this is the company's determination to sell its land to actual settlers only, and not to large land companies. The figures were 735,646 acres for $2,929,721, compared with 2,290,004 acres for $8,272,498. Alberta was the only district in which the sales showed an increase.

—A sufficient number of members not having signified their intention of taking part in it, the proposed excursion of the Canadian Manufacturers' Association to Newfoundland will not take place this year. It was arranged that the steamer "Prince Edward" should leave Montreal on 2nd July on this excursion, particulars of which were given in the Monetary Times of 27th May. It is not unlikely, however, that the Association will take a trip to Newfoundland another year.

—A remarkable record of building is shown by Vancouver. During the eight months, since 1st October last year, there have been erected in that city, according to figures prepared by Capt. McSpadden, the building inspector, five hundred and sixty-eight dwellings. During the same time, over a hundred business blocks have gone up. From October 1st to June 2nd is just two hundred and eleven days. Hence, with 668 structures built in that length of time, Vancouver has seen work commenced on a little over three buildings each twenty-four hours. This tells eloquently of the growth of that fine city.

—It is said that the log cutters on the Pacific Coast have decided to close all their logging camps indefinitely, thus throwing about 4,500 men out of employment. This action is attributed to the Government regulations preventing lumber operators from exporting to the United States logs cut from lands held under special license, and also to the fact that present prices paid by the British Columbia mills are not high enough to allow of a profit to the loggers.

—Quebec Board of Trade has presented a memorandum to the Transportation Commission, pointing out the requirements of the harbor of that city, and advocating Government assistance for the Great Northern Railway extension from Garneau Junction to Quebec, as it would shorten the route from Shawinigan Falls to Quebec by eighteen miles, and obviate the heavy grade on the Quebec & Lake St. John road which the company have to use now.

—A very satisfactory degree of activity is being shown in the direction of new buildings in Toronto. Last week, building permits representing an expenditure of $302,000, were issued. Among the new buildings to be erected is a five-story brick warehouse at 52 to 58 Front street West, for Messrs. W. J. Gage & Co., at a cost of $50,000; a four-story warehouse for Messrs. A. A. Bradshaw & Son, 25 Wellington Street West, for $20,000, and a warehouse, four stories high, for Messrs. H. S. Howland & Sons, 136 and 138 Front street West, costing $45,000.

—The recent ruling of the Master in Chancery that the debenture holders of and the depositors in the Atlas Loan Company, of St. Thomas, should rank equally, has been confirmed by Chief Justice Falconbridge. The decision is a disappointment to the currency debenture holders, who contended for priority in ranking, and appealed accordingly. These debentures amount to about $300,000; the sterling debentures to $100,000, and the deposits to probably $450,000—or say $850,000, all told.

—The Vancouver, B.C., Tourist Association is a live body, and it is taking up in earnest the idea of utilizing and improving all possible centres of attraction for its own and other citizens. Now it is pushing to the front the merits of the beautiful English Bay section of the city, though at present that residential district is said to be rendered unsightly by reason of piles of rubbish and stones and by a collection of ugly shacks. A by-law, authorizing the city to purchase the property has already been passed (some time since), and what the Association now propose is that the city authorities should expend a considerable amount of money in rendering it an attractive resort for visitors, who are going into Vancouver in increasing numbers every year.

—Fort Frances, in the Rainy Lake district, is, since the proposition to develop the large water-power there, the centre of attraction to a good many industries. One reason for this is the project for building a smelter for the treatment of iron and copper ore by electricity. It is believed that the iron industry of Seine River district will assume large proportions shortly, and that the mines in that part of North-Western Ontario will be in a position to ship within a few months; and this ore, together with that from other points, would go to this smelter. It is pointed out what an advantage it would be to the Canadian Northern Railroad if it could get its needed large supplies of rails and rolling stock near by, instead of having to import them from long distances. Backus & Co., who have done much towards getting the value of the water-power recognized, are said to have given instructions for the immediate construction of the proposed pulp and paper and flour mills. Work on the power dam is to be started at once.

THE ONTARIO BANK.

The annual meeting of the shareholders of the Ontario Bank was held at the banking house, Toronto, on Tuesday, June 21st, 1904.

Among those present were: G. R. R. Cockburn, Donald Mackay, John Flett, Henry Lowndes, R. Grass, Arthur Harvey, F. B. Polson, A. P. Choate, Hon. R. Harcourt, R. D. Perry, R. Mulholland, F. M. Purdy, W. Spry, Thomas Walmsley and others.

On motion, Mr. George R. R. Cockburn was called to the chair, and Mr. McGill was requested to act as secretary.

Messrs. Henry Lowndes and F. M. Purdy were appointed scrutineers.

At the request of the chairman, the secretary read the following report:

REPORT.

The directors beg to present to the shareholders the 47th annual report for the year ending 31st May, 1904, together with the usual statement of assets and liabilities.

Profit and loss (brought forward from 31st May, 1903)		$ 73,606 91
The net profits, after deducting charges of management, interest accrued upon deposits, and making provision for all bad and doubtful debts, were		176,255 54
		$249,862 45

Which have been appropriated as follows:

Dividend, 3 per cent., paid 1st December, 1903	$ 45,000 00	
Dividend, 3 per cent., payable 1st June, 1904	$ 45,000 00	
Added to rest	100,000 00	
Reserved for officers' pension fund	5,000 00	
		$195,000 00
Balance of profits carried forward		$ 54,862 45

It is with great regret that your directors have to announce the death of their late esteemed colleague, Mr. A. S. Irving, who for many years had been a valued member of the board.

The rest account has been increased to $600,000, and the amount carried forward to the credit of profit and loss account is $54,862.45.

The deposits have been increased since our last annual meeting by $1,089,735.06, and the general business of the bank continues to steadily improve, which, in view of the fact that no new branches have been opened during the year, must be regarded as exceedingly satisfactory.

The Peterboro office has been enlarged and refitted at a considerable outlay, which has been provided for without increasing the bank premises account.

All of the offices of the bank have been inspected during the year.

G. R. R. Cockburn, President.

GENERAL STATEMENT.

LIABILITIES.

Capital stock paid up	$1,500,000 00	
Rest	600,000 00	
Balance of profits carried forward.	54,862 45	
Dividends unclaimed	1,118 93	
Dividend payable 1st June, 1904	45,000 00

Overdue debts	8,566 58	
Real estate (other than bank premises)	30,000 00	

Bank premises (including furniture, safes, etc.)	125,000 00	
		$11,113,793 42
		$14,573,919 60

C. McGILL, General Manager.

After a few remarks by the chairman, the report was adopted.

By resolution, the sum of $5,000 was granted to the officers' pension fund of the Ontario Bank.

The scrutineers appointed at the meeting subsequently reported the following gentlemen duly elected directors for the ensuing year, viz.:

George R. R. Cockburn, Donald Mackay, R. D. Perry, Hon. R. Harcourt, R. Grass, T. Walmsley, John Flett.

The new board met the same afternoon, when Mr. G. R. R. Cockburn was elected president, and Mr. Donald Mackay, vice-president.

The Ontario Bank, Toronto, June 2st, 1904.

BANK OF HAMILTON.

The thirty-second annual meeting of the shareholders of the Bank of Hamilton was held in the head offices of the bank, Hamilton, Ont., on Monday, 20th June, at noon.

The annual report of the board of directors was submitted by the chairman, Hon. W. Gibson, and was as follows:

REPORT.

The directors beg to submit their annual report to the shareholders for the year ended 31st May, 1904.

The balance at credit of profit and loss account, 30th of May, 1903, was		$ 70,122 04
The profits for the year ended 31st May, 1904, after deducting charges of management and making provision for bad and doubtful debts, are		335,513 53
Premium received on new stock		195,483 00
		$601,118 57
From which have been declared:		
Dividend 5 per cent. paid 1st December, 1903	$107,806 75	
Dividend 5 per cent. payable 1st June, 1904	111,230 87	
	$219,037 62	
Carried to reserve fund from profits	$104,517 00	
Carried to reserve fund from premium on new stock as above	195,483 00	
	$300,000 00	
Carried to rebate on current bills discounted	$ 5,000 00	
Annual amount written off bank premises, etc.	5,000 00	
	$ 10,000 00	
Allowance to ex-president authorized by shareholders	5,000 00	
		$534,037 62
Balance of profit and loss carried forward		$ 67,080 95

The directors have to report, with much sorrow, the recent death of Mr. George Roach, who had occupied a seat at the board for nearly thirty years. Mr. Roach's advice was always valuable, and his attendance most regular. He was also greatly interested in the progress of the institution, and took constant pains to further it.

Mr. Cyrus A. Birge, president of the Canada Screw Company, has been appointed by the board a director in Mr. Roach's place.

It is proposed to introduce at the annual meeting, for the consideration of the shareholders, some changes in the bank's by-laws, the chief of which is the change of the time of the annual meeting from June to January.

WM. GIBSON,
President.

Hamilton, 6th June, 1904.

GENERAL STATEMENT.

LIABILITIES.

To the public:		
Notes of the bank in circulation		$ 1,994,876 00
Deposits bearing interest	$13,606,868 15

Other assets not included under foregoing heads		58,609 04
		$24,713,613 07

J. TURNBULL,
General Manager.

Bank of Hamilton, May 31st, 1904.

THE PRESIDENT'S ADDRESS.

In moving the adoption of the report, Hon. Mr. Gibson said: "As the annual statement has been distributed and copies mailed to all the shareholders, I think we can, as has been the custom in the past, take the report as read. If that meet with your approval, we will go on with the consideration of whatever points there may be as to which information may be desired by the shareholders present. It is satisfactory to know that we have had another good year in the history of the bank. Our earnings have been about the same as last year, although it must be remembered that the banks amongst themselves decided to take the wise precaution of increasing the reserves of all the banks, and in this way large sums of money were withheld from investment that would otherwise have been earning money. The decision thus taken by the banks is one that will commend itself to all. It is far better to do banking safely, even if the earnings are not as large, than to have larger earnings at greater risks. We have been able to show profits for the year amounting to $335,513, which, added to the $70,122 from last year, and the $195,483 premium from sale of new stock, amounts to $601,118 for the year. After paying dividends amounting to $107,000 and $111,000, we added to the reserve an amount sufficient to bring it up to $2,000,000, and you will observe that our reserve is now almost equal to our paid-up capital. The confidence that the public has in the bank is exemplified in the large amount of money on deposit. During the year the bank had interest-bearing deposits amounting to $13,606,868.15, an increase of $983,000, and deposits not bearing interest amounting to $3,871,818.12, an increase of $737,000, or a total increase of deposits of $1,720,000. Our assets have increased by the magnificent sum of $2,754,000, which, I am sure, will be gratifying to the gentlemen here this morning. As far as the shareholding of the bank is concerned, we have increased to 722, as against 588 last year, an increase of 164 new friends added the bank, another evidence of its popularity. We have expanded somewhat during the year, taking care to keep within safe limits. The bank has now 15 branches in Manitoba, two in British Columbia, four in the North-West Territories, and 40 in Ontario.

I think as far as the business outlook is concerned throughout the country, we may feel satisfied. With abundant harvests, abundant business and large demands for money the bank should continue to prosper. I can assure you that the greatest care will be taken in loaning money only on good

security, and the best interests of the bank will be carefully guarded.

I deeply regret, and I am sure you all do, the loss of our old friend and director, Mr. George Roach. He took a very deep interest in the affairs of the bank from its inception, and was one of its most faithful attendants at its meetings. Up to within two or three days of his illness, he was in attendance at the board meetings, and always rendered very valuable service to the board, and advice which his colleagues were always pleased to receive. Upon his removal, your board considered it wise to submit the name of Mr. C. A. Birge, whom they elected at the last meeting, and whose name they place before you with confidence this morning. That gentleman has had large business experience, not only in the city of Hamilton, but his name is known throughout the whole Dominion of Canada as one in which business men have the utmost confidence, and the bank's shareholders, we think, are to be congratulated. Mr. Birge is a business man in close touch with the business men of the country, and as it is the business men that we have to deal with, I think the board was wise in selecting a gentleman like Mr. Birge.

I have pleasure, gentlemen, in moving the adoption of the report.

The adoption of the report was declared carried unanimously.

The scrutineers, Messrs. R. S. Morris and C. S. Murray, reported the re-election as directors of the retiring members of the board, viz.: Hon. Wm. Gibson, John Proctor, A. B. Lee (Toronto), John S. Hendrie, M.P.P.; George Rutherford, J. Turnbull, and C. A. Birge.

At a subsequent meeting of the directors, Hon. Wm. Gibson was re-elected president, and Mr. J. Turnbull, vice-president.

UNION BANK OF CANADA.

The thirty-ninth annual general meeting of the shareholders of the Union Bank of Canada was held at its banking house in Quebec, on Monday, June 20th, 1904.

The directors' report was as follows:

REPORT.

The directors beg to submit a statement of the assets and liabilities of the bank at the close of the financial year ending 31st May last. Also the following statement of the result of the business for the past year:

PROFIT AND LOSS ACCOUNT

31st MAY, 1904.

Balance at credit of profit and loss account on May 31st, 1903		$ 24,117 20
The net profits for the year, after deducting expenses of management, reserving for interest and exchange, and making provision for bad and doubtful debts, have amounted to		438,697 25
		$462,814 45
Which has been applied as follows:		
Dividend No. 74, three and one-half per cent.		$ 87,262 95
Dividend No. 75, three and one-half per cent.		87,500 00
Appropriation for revaluation of assets		210,711 64
Written off bank premises		10,000 00
Balance carried forward		67,339 86
		$462,814 45

The foregoing statement shows that the bank has had a prosperous year, and the net earnings obtained $438,697.25, or over 17½ per cent., on its capital, is evidence of the profitable character of its business.

Mr. G. H. Balfour, who has been associated with the bank for many years, was appointed general manager on 12th January last. In assuming this responsible position, Mr. Balfour considered it desirable to make an examination of the bank's assets. Having been in full charge during the whole of last year, he has had a good opportunity of becoming acquainted with the working of the various accounts, and on his recommendation, your directors have appropriated $210,474.59 in reduction of their values.

The sum of $10,000 has also been appropriated to reduce bank premises account. It has been found necessary to erect buildings for our own use in many places, and although this asset represents good value, it is deemed desirable to write it down from time to time. This account has been increased during the past year largely by the cost of our new offices at Winnipeg. Good progress is being made with the construction of this building, and it is hoped that we may occupy it about 1st November next.

The following branches in the province of Ontario were opened during the year with good prospects of successful business:

Haileybury, Newboro, Mount Brydges, Pakenham, Metcalfe and Sydenham.

It is with sincere regret that your directors record the demise of their late general manager, Mr. E. E. Webb, which occurred after a protracted illness on the seventh of January last. In the death of Mr. Webb the bank has sustained the loss of one who, for twenty years, devoted his best energies to its welfare. And to his able, zealous and judicious management is in great measure to be attributed the large and prosperous business which has accrued to it.

The customary inspections of the branches of the bank have been made during the year.

A. THOMSON, President.

GENERAL STATEMENT.

G. H. BALFOUR,
General Manager.

Quebec, May 31st, 1904.

The usual resolutions were adopted, and the old board of directors were re-elected, which were as follows: Messrs. Andrew Thomson, Hon. John Sharples, D. C. Thomson, E. Giroux, E. J. Hale, Wm. Price, Wm. Shaw, E. L. Drewry, John Galt, and F. E. Kenaston.

At a subsequent meeting of the newly elected board of directors, Messrs. Andrew Thomson and Hon. John Sharples were elected president and vice-president, respectively.

THE TRADERS' BANK OF CANADA.

The nineteenth annual general meeting of shareholders was held at its banking house, in Toronto, on Tuesday, the 21st June, 1904.

The chair was taken by the president, Mr. C. D. Warren, and the general manager was requested to act as secretary, when the following statement was read:

The net profits for the year, after making provision for bad and doubtful debts, and reserving accrued interest, amounted to		$238,422 34
Premium on new stock		150,000 00
Balance at credit of profit and loss last year		14,974 99
		$403,397 33
Appropriated as follows, viz.:		
Dividend No. 36, three and one-half per cent., payable 1st December, 1903		$ 60,971 56
Dividend No. 37, three and one-half per cent., payable 1st June, 1904		69,747 56

Transferred to rest account		250,000 00
Balance at credit of profit and loss new account		22,678 21
		$403,397 33
Average paid-up capital for the year		$1,890,625 00
Percentage of net profits on average paid-up capital		12.61 per cent.

GENERAL STATEMENT, 31st MAY, 1904.

		$18,573,533 57

H. S. STRATHY, General Manager.

Toronto, 31st May, 1904.

REPORT.

Your directors have pleasure in submitting to the shareholders the accompanying report of the bank's business for the year ending 31st May, 1904, from which it will be seen prosperity has attended its operations. Money throughout the year continued in good demand at satisfactory rates.

During the year eight new branch offices have been opened; some of which became necessary in order to protect existing interests. All expenses in this connection have been paid out of the current year's profits.

The figures, compared with those of last year, show a healthy increase all round.

The increase of half a million of dollars to the bank's capital last year was promptly taken up, but proved inadequate to enable the bank to take up the large volume of good business which was offered. A by-law to further increase the capital stock will be submitted to you with a view to enabling the bank to extend its sphere of usefulness beyond Ontario, to which province its offices are at present confined.

The recent lamented death of two of the bank's most trusted managers, Messrs. C. S. Rumsey and M. C. Chalmers, managers respectively at St. Mary's and North Bay, points to the desirability of establishing a pension and guarantee fund, which the Bank Act provides for. A by-law in this connection will be submitted to you, which, when passed, will permit your directors to deal with the matter as they may deem most advisable in the interest of the bank.

All the offices of the bank have received their usual careful inspection.

C. D. WARREN, President.

A by-law was passed authorizing an increase of $1,000,000 to the capital stock of the bank, making the authorized capital $3,000,000. By-laws were also passed giving the directors power to establish pension and guarantee funds, as provided for by the Bank Act.

The usual resolutions were moved and carried.

The scrutineers reported the following gentlemen duly elected to act as directors for the ensuing year, viz.: C. D. Warren, Hon. J. R. Stratton, C. Kloepfer (Guelph); W. J. Sheppard (Waubaushene); C. S. Wilcox (Hamilton); E. F. B. Johnston, K.C.

The meeting then adjourned.

At a subsequent meeting of the newly-elected directors, Mr. C. D. Warren was re-elected president, and Hon. J. R. Stratton, vice-president, by a unanimous vote.

H. S. STRATHY, General Manager.

The Traders Bank of Canada,
Toronto, June 21st, 1904.

COMPARATIVE FIGURES FROM 1897.

May 31st.	Capital paid up.	Rest.	Deposits.	Assets.
1897	$ 700,000	$ 40,000	$ 4,235,300	$ 5,886,800
1898	700,000	50,000	4,930,800	6,824,800
1899	700,000	70,000	5,661,100	7,638,300
1900	1,000,000	150,000	6,528,000	9,177,000
1901	1,344,420	250,000	7,672,500	10,846,400
1902	1,350,000	350,000	8,890,400	12,294,800
1903	1,500,000	450,000	10,881,600	14,759,500
1904	2,000,000	700,000	13,311,200	18,573,500

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing Houses for the week ended with Thursday, June 23rd, 1904, compared with those of the previous week:

	June 23rd.	June 16th.
Montreal		$20,780,941
Toronto	$15,710,654	17,796,404
Winnipeg	5,127,616	5,128,712
Halifax	1,561,702	1,668,201
Hamilton	1,106,359	1,132,641
St. John	947,774	954,440
Vancouver	1,725,929	1,430,146
Victoria	534,753	801,895
Quebec	1,458,306	1,576,176
Ottawa	2,254,784	2,022,890
London	931,983	903,575
		$54,196,021

Chicago & Milwaukee Electric Railroad 5 per cent. Bonds

These bonds have been largely purchased by leading Canadian financial institutions. We recommend them as strictly high-grade investment securities.

The net earnings on this property for 1903 amounted to louble the interest on the bonds.

The net earnings for 5 months, 1904, have increased 65%.

Particulars on Application.

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

THE following late patents have been registered for Canadians in this country and the United States: Canadian—A. Lafond, game boards; A. B. Wass and W. Whitaker, suspending devices; R. E. Poole, pruning apparatus; T. Barrow, motors; F. E. Moody, skirts; S. Knechtel, saw tables; J. J. Mackle, folding cots; W. W. Boran, clothes drier; E. Bowman, snow plows; J. Powley, beds; G. P. Breckon, fire-proof windows. United States—B. E. Bechtel, brick cutter; F. A. Mansell, spring roller for screens, curtains and awnings; A. W. Otto, feed-guide for printing machine; J. Walther, automatic railway gate.

MONTREAL MARKETS.

Montreal, 22nd June, 1904.

Ashes.—Present receipts are confined to a few small lots, and the total volume of business is light, with no stock of consequence in store. For first quality of pots dealers are paying from $6.10 to $6.15, and for seconds, from $5.50 to $5.60. It would appear as if the making of pearl ash had been entirely abandoned, their having been not a transaction in this line for months.

Cements and Firebricks.—Business has quite flattened out in these lines of late, and present sales are few and unimportant. Stocks of cement, however, are small, and receipts from Europe quite light, only 1,000 bbls. being received from that quarter during the past fortnight, but some moderate lots of American are reported. Receipts of firebricks for past two weeks aggregate 196,000. Quotations remain as last given.

Dairy Products.—Last week's shipments of cheese were 65,023 boxes, over

Guardian

Assurance Company, Limited

HEAD OFFICE:

11 Lombard Street, - LONDON, E.C.

Established by Deed of Settlement in 1821, and Registered under the Joint Stock Companies' Acts in 1893.

The Annual Meeting of this Company was held on Friday, May 20th, 1904, when the Directors' Report for the year ending December 31st, 1903, was presented.

The following summaries are taken from it:—

FIRE DEPARTMENT

(Including Burglary Insurance Business.)

The Fire and Burglary Insurance Premiums, after deducting Re-insurances, amounted to **$2,376,647**, as against $2,256,614 in 1902, showing an increase of **$120,033**, and the Losses, after making the same deduction, to **$1,131,418**, as against $1,190,790 in 1902.

The Premium Reserve Fund, to cover unexpired Policies, now amounts to **$1,030,000**, and the Fire General Reserve Fund at **$2,125,000**. There will, therefore, be an aggregate fund (apart from the Proprietors' Capital) of **$3,175,000** to meet Fire Claims.

LIFE DEPARTMENT

The total number of Policies in Force on Dec. 31st, 1903, was **11,761**, assuring with bonuses **$41,287,878**. Of this sum $3,358,390 was re-assured with other offices, thus reducing the liability of the Company to $37,929,488.

The amount of Life Funds at the same date, including the Investment Reserve Fund of **$150,000**, amounted to **$16,122,336**.

58,000 boxes less than in the corresponding week last year. In butter, however, exports show a moderate gain, the figures for last week being 23,247 packages, an increase of nearly 9,000 packages over the figures of the same week in 1903, and the total increase since the opening of navigation is about 15,000 packages. The cheese market is again weaker, about 8 to 8⅛c. per lb. being about the best figures for finest grades. Choice creamery butter is quoted on spot at 17½ to 18c., 9,000 dairy makes 14 to 14½c. per pound.

Dry Goods.—There is little new in this line since a week ago. Some moderate business of a sorting character is still reported, but there is apparently more or less of a conservative disposition on the part of retail buyers in the placing of orders for fall goods. Money is said to be coming in very fairly. Much dissatisfaction is expressed in the trade at not getting a reply to the representations of the deputation which went to Ottawa to ask the Government to defer the enforcement of the new tariff regulations, as regards woolens, until the 1st of August, and the Dry Goods Section of the Board of Trade has instructed the secretary to address a strong letter to the Department praying for a speedy decision, as business is suffering through the delay.

Groceries.—Trade is rather quieter, which is only natural as the season gets on to midsummer. Further easing off in price is noted in sugars, the factory price for standard granulated being now $4.30 in barrels, and $4.25 in bags; yellows range from $3.70 to $4.10. Molasses continues to rule easy. Owing to competition from American and British handlers of rice, the local milling company has given notice of a reduction in quotations to take effect July 1st, standard B. quality to be $2.85, and other grades at proportionate figures. Evaporated apples are advanced, and are being quoted at 7½ to 7¾c. in a jobbing way. Dried fruits are neglected, and it is said some dealers have fair-sized stocks in hand, on which they stand to suffer a considerable shrinkage. A sale of layer Valencias was reported last week at 5½c., which cost about 8c. to lay down. Quotations of new pack salmon have been made, and are much higher than last year; River Inlet are figured to cost $5.95, as against $4.85 last year, and Fraser River, $6.05. Canned vegetables are scarce and high, and packers will only book orders subject to circumstances.

Hides.—Business in this line is slack, but values hold steady at 9c. per lb. for No. 1 beef hides; 13c. per lb. for No. 1 calfskins: and 25c. each for lambskins.

Leather.—A fair seasonable demand is reported from local consumers, and a pretty steady export movement in sole at satisfactory prices. Values are all steadily held, sole being quoted on the basis of 23½ to 24c. per lb. for No. 2 manufacturers', and the production of black leather is comparatively limited, with tanners quite firm in their ideas. Best Western splits are held at 20 to 21c., fine grades of harness at 30 to 32c., and other lines at proportionate figures.

Metals and Hardware.—Business is easing off as a whole, though some hardware dealers report quite a fair demand yet. Copper has shown some recovery since a week ago, being now quoted at 13⅜ to 13¼c., but other metals rule easy. Tin is showing further decline, and is quoted in a jobbing way at 28½ to 29½c., while a sale of a round lot is reported at 27½c.; spelter continues easy at $5.50, and lead at $3.15 to $3.20. There have been some large receipts of sheets, plates, etc., lately; one Bristol steamer, now in port, bringing about 1,800 tons. Canada plates are quoted at $2.20 to $2.25 in a general way, though some large business is reported at $2.15 for 52 sheets. In pig-iron bars, nails, wire, etc., there is nothing new.

Oils, Paints and Glass.—Little that is new can be gathered in these lines, except that business is getting quieter. Prices show no special changes. Linseed oil continues to be sold down to 43c. per gallon for raw. In fish oils there is practically little doing. Turpentine remains at 82½c., by the single barrel, and in other lines there are no changes to report.

TORONTO MARKETS.

Toronto, June 22nd, 1904.

Chemicals, Drugs, etc.—Trade in local drug circles is not above average. There are no special features worth noting, and prices keep steady. In the New York market there is an unsettled feeling with regard to menthol. Quinine and opium are quiet, but values continue fairly steady.

And Still it Leads

As applied to the gain in net amount of assurance in force in Canada for the

5 Years Ending Dec. 31st, 1903.

Head Office—Waterloo, Ont.

The Mutual Life OF CANADA

still maintains its stand at the

HEAD OF ALL ITS COMPETITORS

among Canadian Life Companies, as shown by the Government Reports.

Dry Goods.—The finer weather conditions have brought about a better sorting demand for light dress and other seasonable goods, but a decreased enquiry for woolens. Values in the latter continue strong notwithstanding, as indeed they do for practically all lines. Tailors' cloth and trimmings are in extra good demand, as they have been for some time past. Trade conditions in the country seem satisfactory, and payments continue good.

Flour and Grain.—A steady market prevails for flour, and ninety per cent. patents sell for about $3.70 in buyers' bags, middle, or eastern freights. Millfeed is firm at $18, or a little less for bran, and $16.50 to $17 for shorts. Oatmeal is firm at $4.75 or $4 for carload lots. Wheat (Ontario) is 1 to 2c. lower and dull at the decline. Barley is dull but unchanged. Oats are steady at unchanged quotations. Peas, rye, corn and buckwheat are nominal, no business being done.

Fruits and Vegetables.—The feature of the week so far as the local trade is concerned, is the opening of the fruit market for the season on Tuesday last. The chief business transacted was in strawberries, which were fairly plentiful, but not of particularly good quality, being soft and rather sour. They fetched 10 and 12c. the box. Other fruits in the local market have made no appreciable change, and they continue steady in tone. Prices may be quoted as follows: Apples, $1 to $3 per barrel; cocoanuts, $4.25 per sack; oranges, California navels, $3.50 to $4.50; Valencias, large, $6 to $7; ordinary, $6; Sorrentos, $3; lemons, Messinas, 360's, $2.50 to $3, 300's $2.50 to $3; Sorrentos, $3 to $3.50; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; Egyptian onions, $2.50 to $3 per sack; tomatoes, $3 to $3.50 per crate; pineapples, Floridas, 12's, $4.50; 24's, $3.75; 30's, $3.25; 36's, $3; 42's, $3; Havanas, $3 to $3.25; strawberries, Canadian, 15c. to 20c.; southern, 16c. to 18c; watermelons, 35 cents each.

Hides, Skins and Leather.—There is a strong feeling for hides, the supply being on the light side. Sheepskins and pelts keep steady. No change in calfskins. Tallow is steady at old prices. In leather no great volume of trade is being transacted, but prices keep quite firm. An improvement is expected any time now.

Hardware.—Trade is scarcely so voluminous as some anticipated for this period, but still there is no particular cause for complaint. Features are very few; indeed, there is scarcely anything in the present conditions which calls for special comment. Prices have made no appreciable change lately.

Groceries.—Buying of sugars the last few days has been more active than usual, and the tone of the market is firm, probably in sympathy with New York. The position of canned goods, especially vegetables, continues very strong, and this is likely to become more so until the new crop comes on the market. In dried fruits an average trade for this season is going on, but there is no striking feature. Teas are held quite firmly.

Provisions.—The stocks of lower grades of held butter are still so large that the somewhat larger supplies of a good clean article which are now coming forward and which meet with a fairly good response fail to make much impression in the way of prices. Cheese keeps its steady tone. The market for eggs continues moderately strong, and new-laid realize 15c. The packers' needs will probably soon be comparatively speaking, over, when the receipts in local market are likely to improve. Hops are dull, and quotations of 28 to 32c. for 1903 crop are merely nominal. The demand for smoked meats is becoming more active, with the warmer weather conditions, and a steady trade is the promise.

Wool.—Liberal offerings are coming in of new clip wool, and the market is steady, but prices are regarded by dealers as somewhat too high, though the exorbitant values in the Old Country are helping to render this less noticeable. Hardly any so far has been taken for United States account. For pulled wools, the demand from the home mills is only small.

Merchants Fire Insurance Co.

SEVEN TO ONE

That is about the ratio. About seven times as many persons are injured as die from all causes yearly.

Accidents are a more prolific cause of death than any disease except lung diseases.

Twice as many people are accidently killed as die of old age.

Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy?

WRITE THE

The market value of securities deposited with the Dominion Government for the protection of Policy holders amounts to over .. $202,500.00

Liberal commissions paid for desirable business. Applications for agency to be made to
DAVID BURKE, A.I.A., F.S.S.
General Manager.

Sometimes a revision of policy forms means little. It stands for
THOROUGHNESS
in every detail in the changes that have been made by the Union Mutual—re-arrangement of features, reduction of rates, liberalizing of rights, a contract modern to the highest notch. A policy that looks well, sells easily and pleases long.

UNION MUTUAL LIFE INSURANCE Co.
Portland, Maine.

FRED E. RICHARDS, President. ARTHUR L. BATES, Vice-President.

Agents always desired—the kind who write policies and hold them.

ADDRESS:
HENRI E. MORIN, Chief Agent for Canada, 151 St. James St., Montreal, Canada.
For Agencies in Western Division, Province of Quebec and Eastern Ontario, apply to
WALTER I. JOSEPH, Manager, 151 St. James Street. - Montreal.
